Ham in a day!

Get your Amateur Radio License in just one day!

Sponsored by the:

Kent County Radio Amateur Civil Emergency Service

No Techno-Babble needed, this class is for anyone who wants their amateur radio license

Date: Sunday August 27th 2006

Cost: 30.00 Includes the 14.00 FCC license Fee

Location: Red Cross 1050 Fuller Ave NE

Pre-Registration is required to reserve a spot in the class

Time: 1:00 PM - 7:00 PM

Testing will start at 6:00 PM

To register e-mail jeffnawrot@... or call 616-889-7101

16 & under must be accompanied by an adult!

Bring either drivers license or 2 pieces of identification

Coffee and Treats will be provided! Dress comfortably!

Small Print Warning: All persons learn differently from others, this class is not a guarantee at getting your radio license. Decent short-term memory is a must!

This message has been prepared on resources owned by Kent County Radio
Amateur Civil Emergency Service. It is subject to the Acceptable Use Policy
and Procedures of KCRACES.

1.I am studying "intro to packet radio"by Larry Kenny WB9LOZ.Any suggestions for other packet how to's?
2.When I connected I got this as a list of available commands---WinPack-Awg uses a virtual TNC-what appears to the user as the TNC responding to TNC2-style commands is,in fact,part of the software.The available Virtual commands are:----list.So how do I participate in the Packet net at MKG KA-NODE and MKG-1 BBS?
3.Is the best teacher just trying the different commands and see what they do?I just don't want to interrupt legitimate traffic with my testing/playing.

If testing and playing with packet radio aren't legitimate traffic, then
there isn't any legitimate traffic to interrupt.

I'd suggest you try the following:

a. Leave a message for someone. If you can hit Don's station from your
location (and you probably can), leave one for me on it. In WinPack,
with AGW running (enter commands in quotes as given, without quotes):

1. Connect to Don's station: "c WB8I"
2. Leave a message for me: "s KD8ATU"
3. Enter a title (like an e-mail message)
4. Enter some text. When you're finished, put "/EX" on a line by itself.
5. Disconnect. "b"

b. Send internet e-mail to yourself via Winlink. You should be able to
hit Ed's station, which is what's called a "Telpac" (TELnet over PACket)
node, it connects to a telnet server over the internet, and lets you
interact with it via packet.

1. Connect. "c KC8LBZ-2" (the -2 is an SSID. This is how one
distinguishes different stations using the same call)
2. Send an SMTP (internet) message: "sp smtp:kd8cbj@..."
3. Enter the message like you did before, again ending with "/EX" on
an otherwise blank line.
4. Disconnect. "b"

You might also want to try APRS. You'll need an app such as UI-View32
for that. APRS is run primarily on 144.390, you'll also hear traffic on
145.800 (and possibly .825) when the International Space Station is
passing overhead.

Joe,
Very nice response. Thankyou.

Paul,
The reason we began using 07 in the first place was to develop our knowledge and expertise.
Glad to see you using it.
Tom

Topic: 1068 Message: 1068

I haven't had any checkins the last 3 weeks, so I'm really hoping that someone will be out there this time. The net starts at 7 PM eastern/6 PM central, on 144.150 +1500Hz (144.1515 actual). Beam heading schedule is generally like this:

7:00 - East-southeast (Grand Rapids, Detroit, London)
7:03 - Southeast (Kalamazoo, Fort Wayne, Cincinnati)
7:06 - South (Holland, Benton Harbor, Indianapolis)
7:10 - Southwest (Chicago, Peoria, St. Louis)
7:13 - West (Milwaukee, Madison, Dubuque)
7:16 - Northwest (Green Bay, Rhinelander)
7:20 - North (Traverse City, Marquette)
7:23 - Northeast (Mount Pleasant, Alpena, Sudbury)
7:25 - East-northeast (Big Rapids, Saginaw, Wiarton)

My antenna isn't all that big or all that high up, so the biggest factors going into the range of the net are your setup and the level of enhancement present. I can reliably work phone at 200 miles regardless of conditions, and digital modes (especially robust modes with FEC like MFSK16) can be copied at much weaker signal levels than phone, so a range of 300 miles might be possible.

Ham in a Day?

My personal view on the subject is that it takes a lot longer to develop a ham than a single day. I really did not get to the point of being comfortable with radio until I had more time and more privileges under my belt. Maybe I'm still not there?! Hi

It does take more effort on the part of the ham and the amateur radio community to develop a newly minted ham. Mic fright, etiquette, radio uses, net procedures, all those newfangled letter and number combinations instead of a simple name, frequencies, privileges, and the list goes on and on.

My initial elmer, Tom, N8YJT, took a lot of time to introduce the neophyte to radio. He did a very good job with the material, students, and six weeks of classroom. He did not stop there and the radio club assisted with the duties of Elmer training. Lots of folks took lots of time on many sessions to get me both comfortable and productive with radio. I consider all those who helped in all those different aspects of radio to have been my Elmer, and I have lots of fine folks to thank and be grateful for their patient direction.

So the short answer is that a ham ticket does not make an amateur radio operator. Some of those folks will pass and then forget the entire hobby right after getting some paperwork from the FCC. The goal should be to get the folks past the test and into a license and THEN get them an Elmer to help them learn, grow, and mature. I'd wager only a small percentage will ever go on to hit the "push to talk" and ever contact anyone without some additional direction outside of the initial training, even if such training were ten or more weeks.

Our hobby is so vast and involved. The really neat thing is that everyone is willing to help and make the new guy, or even the experienced Extra guy, feel comfortable with all those modes of doing the basic thing of communicating.

Don't forget the new guy. With a little effort she will develop into a really great asset.

My $0.02 (how Do you get a cent sign?) (see, another question for Elmer)

Bill

Another cool thing is that nobody cares if it took you a day, two weeks, two months, or twenty years to get your license. Everyone wants to help and they celebrate your success no matter what.

I fondly remember the two meter repeater literally lighting up when I announced success in a test session. Everyone was pleased and provided encouragement and well, maybe even amazement. No matter. Here was a bunch of folks who really cared and showed an interest. Maybe you get that in astronomy or stamp collecting but it is not universal. When I hear a guy get a QSL card from some DX I'm just as happy as if that card were in my hands. We rejoice and that sets us apart.

I am all for the ham in a day class. I do see your points Mark and do agree with many of them, but I think getting more people in the hobby is a great thing. When I got my license I saw a testing session at the end of the week. So, I started reading the question pools on Tuesday and took the test Friday. Not quite ham in a day, but pretty close. Yeah, I did not retain most of that information, but now that I am licensed I have learned what I need to know. I don't need to know the frequency ranges of 6 meters etc when I only ever use 2 meters. All of the local hams have always been great helping newcomers out from what I have heard, and from my own experiences. That is part of what makes this hobby great! There are many of us out there that can read manuals all day and not comprehend anything. Give us some hands on time and we will learn it really quick. I am looking forward to getting some new faces into the hobby and getting some more check-ins and spotters in the field.

Subject: [WestMichiganHams] Feelings about Ham in a Day

I am very interested in what other hams feel about the Ham in a Day class.

To me, the class is a 'mill' that imbeds answers to test questions in a persons head just long enough to pass the test, which is given the same day. As a matter of fact, the ad for the class indicates that "short term memory" is required.

How much will the students remember a week or a month after the class?

Is there enough time in a cram class to discuss etiquette, repeater locations, activities, etc? If not, who is supposed to teach this stuff?

Take a look at the new test, a little different from the old, but not much. I ask, if a person knew the answer to every question in the pool and little else, they could get a license....if you handed them a radio, could they work it? If they did manage to get on the air, would they know how to talk or would they, perhaps, resort to the ways they learned to talk on other radio services?

I guess time will tell, but soon we will see if the Ham in a Day classes produce assets or burdens to the hobby. My feeling is that many of the students will go on the air not knowing what they are doing and the local hams will attempt to correct them. In various ways. Some of the new licensees will get the wrong impression and think hams are stuffy OFs that don't like newcomers. Others won't ask for advice at all and become Lids in a Day. A few, of course, will become fine hams.

Am I being to critical in thinking that the ratio of the types above stands too good of a chance to skew to the first two possibilities?

How about some chatter about this? What are the positive and negative aspects? The positive, of course, is that it enables people with very busy schedules to take a class. I just touched on a few possible negatives.

Thanks and 73,

Mark K8MHZ

> I am very interested in what other hams feel about the Ham in a Day
> class.

We are part of a shrinking population. If the class can do two things successfully I'm good with the concept.

First - if lowering the effort will attract more hams it is a good thing. One day is pretty short to do more than teach "where is the resource to avoid going beyond the bounds of satisfactory radio operation". The questions heighten awareness for the most critical issues. After locking out the repeater for two days is too late for civil discussion, but to demand electronics degree is too much.

Second - if adequate esprit-de-corps can be instilled in one day it is a good thing. No "lids". Joining the ranks of hams brings with it a certain respect for others and some enthusiasm for the hobby. We talk about CB in disparaging terms and if one day can weed out the miscreants let's do it.
>
> To me, >SNIP< above stands too good of a chance to skew to the first

Well expect some "turn over" - every grad will not be active after a year...for various reasons. Hold on to the idea of tar and feathering...

You know, our hobby has become less grass-root build Heathkits and more interconnection of high level components. By putting modulator circuits on the exam and leaving the different approaches to measureing DC thru microwave off the exam we demonstrate a certain "not staying in step". If we need anything, we need more follow-on to the class in form of networking (one-on-one?). The social animals with tickets may be our greatest asset in ham radio...

Like you.

This topic reminds me of why I became a ham in the first place...and why I felt comfortable doing so. Rewind the tape of time to a few years ago, over four, to be exact. I was getting involved in sailing and I wasn't comfortable talking to anyone on marine VHF. This is not so good, I thought, especially if I have to ask for help in an emergency. Around that time period, Bill and I met Clarke Cooper, K8BP, through his brother Larry. I noticed Clarke's ham license plate and batted around the idea of asking Clarke how to become a ham radio operator. I didn't know diddly squat about ham radio, but thinking that it was a way to learn to be comfortable using a microphone and talking to others on the air, I decided to ask him. Clarke, who was president of the MAARC at that time, is passionate with a capital "P" about ham radio and he suggested that we try the ham radio classes that Tom Porritt was teaching. Before we took the test and as we took the classes, we got to go into the field during a very snowy day and help Clarke and other hams set up a remote site, where we learned about VHF repeater operation and what packet might do. We froze our butts off, but the ham radio hook was in and we weren't spitting it out.

We further enjoyed the 6-week long technician class and from my point of view, I can say that it was a class that helped far more than a one day blitz might have done. While I could have handled a one-day blitz, I am happy that I didn't have to do that. I don't like being rushed through material that I want to learn. I like to have time to think about it and feel that I have understood it and not just memorized it. Granted, amateur radio at a higher level IS a complex subject and I am still learning new things all the time as an Extra class licensee. That said, the extended class gave me an opportunity to think and get more excited about ham radio. The joy that Bill and I felt when we found out through the Internet, on our vacation, that our licenses had been issued made us like kids with new toys! We had time to make friends whom we later talked with on the local repeaters. And luck of all luck, we didn't get blasted on the local repeaters for our tentative operating skills. I can now talk with the best of 'em and I attribute that to folks who were willing to take time with us and introduce to an interesting hobby that they love.

Strange to say, though, I still don't talk much on marine VHF. The fish don't bite much when we're sailing, so we don't have much to say to the charters...but we have talked with Georgia on 20 meters through that Outbacker mobile antenna perched on the transom. And I'm one QSL card away from my DXCC confirmation. ;-)

The very fact that the questions/answers are published has opened that door already. I studied the Q&A book for a week on my own and passed the test. I think it would be good for someone who is interested and has some prior knowledge or has been studying. Taking a class is not a prerequisite to getting the license, so it's better than nothing. At least it means a person is willing to learn from others if they attend.

Ham in a day, Ham in a week, Ham in a month. Bottom line is that none of it scratches the surface. An active club with lots of educational opportunities and Elmering is the answer.

Being licensed 30 years ago I guess I have some right to approach a response from an older and somewhat crusty viewpoint. Back then learning was by study with an Elmer, reading books and going to the very sanitary government FCC office in Chicago to take a test. No question pools online, no wholesale VE testing. (except for a Novice license). Study of 5 WPM then 13 WPM code but developing a mental block of 20 WPM.

I think that if a person can get a ticket in a day it is a wonderful thing and we as a community should continue to round out the person's eduction with Ham experiences and the crusty 'ol fashion Elmer process.

Did you study for weeks on end before learning the Internet in order to embrase or use the technology. Likely not but you learned from experiences. How to connect to the web, perform a web search and even post to a group.

Look at the demographics of our community... getting older aren't we. Time to bring in the 'Nintendo kids' to help advance some of the technology. The Internet, APRS, Echolink and D-Star were not widely known, used or in existance when I started. If all we had to offer today was study, study, study to listen to us talk about the old days few of the newer Internet generation would take us seriously.

BTW - I traded my straight key and FT101B for a TNC and APRS with an IGate.

My 2¢

Hello We are still in need of volunteers for the Coast Guard Parade this coming weekend. There is a free breakfast at Russ's we will be meeting for at 7:00am then we will take assignments for parade line up and be in position by 8:30 for that. At 10:30 we will get assignments for parade safety at the Grand Haven Public Service parking lot the parade starts at noon and will be over by 4:00. Please send me a email if you can help out or give me a call at 616-846-7307. At this time we are very very short of help so if you can please come out and help . If you don't get a hold of me please still come out and help if you can .

ham in a day or a year you really don't start learning until you are on the air and learning from so many others that have learned from so many others that have learned from so many others. I studied for months and passed my General, but did not learn what I studied until I put it to use and recieved so much help from other hams both on the air and off.

1083. Thanks

Never a wasa,but wasa wanna be,
Back in the days of 23ch.C.B. and 10 ch.add a crystal scanners I was bitten.My first exposer to ham radio was a friend of a friend who had a converted police radio,and a homebrew touch tone pad.Auto patch cool.I thought only millionaires had "car phones".He also showed me the inside or W8ZHO.The novice requirements did'nt spook me,I even got a practice key from Radio Shack.The girls,cars,and others redirected my interest.By the way,I was 16 yrs.old at the time.25 years latter in W8ZHO that looked unchange,and under the "hopeful" watching eye of a V.E. I tested out and got my ticket.Aug.25 will be 1 year.I have sampled quite a few ham radio options in the last 12 months.Because it is such an endless list of things you can do,on my grave stone I want---Wait,I wasn't done playing radio---

Topic: 1085 Message: 1085

Hello Everyone ?. I want to thank all the hams that came out and helped for this years Coast Guard events. I heard a lot of guys say they had a good time, and I want to say all the events went on like top notch operations. You can truly see that events like this are a good thing to prepare us incase we have a major emergency in our area. There was a runner that collapsed on one of the YMCA runs and through the hams out on the route had help on the way the minute it was reported on the net. A 4 year old was lost in the crowed at the Grand Parade and was reunited with parents with in minutes, just think how scared you would be at 4 and lost in that crowd and we were able to help out and also confirm return to there parents. These were just a couple of incidents that were handled. One of the parade committee said they could not believe hams did this for free, they have not been able to get good communications paying for it. I didn?t tell them it is selfish on our part as for doing events like this we get to operate on all the bands that we have and places to put our repeaters. Added to our event this year there was a ham stationed down at the water front and one on the hill by the fountain to coordinate the evening events which I heard worked were the cities radios failed. We were short on volunteers I would have liked to have had more of the down town covered for parade safety and there was no one in the Red Cross tent but we handled everything in the areas we were in and I heard from my family there were only two gaps in the parade and both could not be avoided

Excellent communicators on the street, excellent net control, and good relations with emergency services because we have been working with them makes for a excellent event ?. Thank you everyone that came out to help?

All:

The MAARC (the Muskegon radio club) is having a Founders' Day Picnic and YOU are invited.

We will feature a pig roast, Special Event, special presentation, lots of photographs and video, and tons and tons of fun for our families.

The event starts at 11:00 am and lunch will be noon. It is a pot luck thing so bring along a salad or desert to go along with the pig roast. Cost will be $8 for adults, kids 5 to 12 will be $4, and under five kids are free.

Bring the family, your friends, hams of all ages, and the kids. We will have games, radio, fun, and all manner of picnic related events. Can you pin the antenna on the transceiver? Volleyball? Games? Fun!

Mark your calendar for August 19, a Saturday. We'll run until the cows come home.

Sorry for the late response. I talked last week with someone who monitored the traffic to and from the Coast Guard on this and the reporting person received the information on a Marine Channel. I can't remember if he said it was 63 or 68.

Subject: [WestMichiganHams] Hams monitored distress calls?

From Mlive:

"Wannamaker said there have been no reports of a boat missing or being late at any area marina. She said the distress call was made on a marine radio channel typically used and monitored by ham radio operators, not the usual channel 16 distress frequency, so the Coast Guard did not receive the call directly."

So....can anyone tell me just what channel Ms. Wannamaker is talking about?

This whole thing smells....fishy.

Does anyone else have any info on this???

No, the Chronicle reported that part correctly. The vessel in distress did not contact the Coast Guard directly. The information was passed on by someone who had been on the other Marine Channel. I am not sure where the Ham part of it came in. The person I was talking to did not hear anything about Hams.

Topic: 1098 Message: 1098

I was just looking at the one day internet acution that Miedema Auctioneers run every Thursday. On page two of the Misc. items they have two General Radios MC-5 Transmit/Receive. The starting bid is $10. I don't have a clue what these are and they don't say if they are working or not. Just thought I would let the old radio collector's know. They also have a 35 DC Power Supply and 3 or 4 Tecktronix Oscilliscopes listed, along with a ton of computers and other electronic goodies.

They are located in GR on US131 and 76th and if you win, you have to go pick your item up.

Here is the link to their site:

Once again, the net will be held this (and every) Friday at 7 PM eastern/6 PM central on 144.150 +1500Hz, using MFSK16 mode. Net control is located in EN62wx, and starts facing east, proceeding clockwise.

I've been doing it every week for a month now, and have yet to have even one checkin. If you are within 200 miles of Lake Michigan, do whatever it takes to be there tomorrow night.

1105. Meidema Auction

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-08-11 15:44:21 UTC
From: wingerham
Topic: 1105 Message: 1105

I have to apologize for being fairly limited in my message the other day about the Meidema Auction. I didn't receive the feedback until it was pretty well over.

Here is how you get to it.
1. www.1800lastbid.com
2. Click on the Online Recovery Auction for the next Thursday(it is always held on Thursday).
3. It will then give you a choice to go to the larger reposssesed items or the smaller items.
4. The next page is there terms. Basically, they want you to know you have to pay their fee over your bid price and that your bid is legal.
Hit agree and you are in.

I noticed that two of the three oscilloscopes went for $85 and $78. They have two more listed for next week Thursday. If you are not familiar with this site, it usually has a ton of computer, electronics and tools that would interest us hams. Last week they must have had 20 new generators on the site.

I also should have mentioned that I am in no way affiliated or do I have any interest in this site.

Mark,
Take a listen at the suspected trouble spot by listening to 145.25 on your 2 meter rig. That is the carrier frequency for Channel 18 on the cable system.

It sounds like what your are hearing is video. That hum is what it sounds like on an audio (narrow bandwidth) radio

Yes, and the problem may not be in the CATV cables you can see on the street. My neighbor across the street (until a few days ago) once mentioned that she could sometimes hear me when she was watching WGN (ch. 18 on Charter). But she admitted that she had performed a DIY extension of their TV wiring inside the house; who knows how good the connections were or what quality materials she used!?

Hi Mark ... Sounds like you have a signal beating against the 94 signal and changeing it at your location kind of like in a SH radio but your problem is happening in the air..a lot of times if you have a cheap am radio you can track the problem down but if that won't work you will need the help of a Spectrum analyzer as it could be interfering with the IF in your ham radio and that is why you are not getting a signal reading. If I had a analyzer I would let you use it but that is one thing I do not have. Good Luck with finding the problem ..... 73 Don

k8mhz@... wrote: Calling all hams to put on their thinking caps....

For quite some time now I have been having problems receiving 2 meter signals at my QTH. For instance, the 94 will go from 60 over to down below the noise in an intermittent fashion. This is confirmed by different radios and different antennas.

Yesterday I made a discovery. The source seems to be about 3/4 of a block from my house. When I take my mobile or my HT there this is what happens:

When and ONLY when I get a signal on 2 meters I hear a hum that is a bit faster then 60 cycles. There is a point on Dorset street where the hum totally wipes out my 2 meter signal by de-sensing my radio. I can watch as the 60 over signal from the 94 gets punched into the dirt by the hum, which is audible but does not register on the meter. There is a point only a few feet wide on Dorset where I can stand or park and have my 2 meter rig's receiver totally wiped out. Not intermittently either, it's nothing but a haspy staticy hum.

Here is the weird part, as soon as the 2 meter signal drops, the nasty hum (audibly loud) totally disappears! Even while standing near what seems to be the source of the problem.

This makes it very tough to pin point. I suspect a utility problem as the hot spot is right under a group of utility lines. It has all of them, MV, LV, CATV and TX. The lines look pretty good, no nasty connectors are visible.

If I could determine how to be able record the noise without having a 2 meter radio signal present I would have a much better chance of figuring out the person or company to blame.

The problem has got so bad that I routinely miss about a third of the Sunday Net as the interference takes out a word or two at a time.

Today I am going to go look for some harmonics. I am thinking it is possible that what I am hearing is a mix of compatible but different signals.

Any help with my little adventure would be greatly appreciated.

Hi Mark ... Sounds like you have a signal beating against the 94 signal and changeing it at your location kind of like in a SH radio but your problem is happening in the air..a lot of times if you have a cheap am radio you can track the problem down but if that won't work you will need the help of a Spectrum analyzer as it could be interfering with the IF in your ham radio and that is why you are not getting a signal reading. If I had a analyzer I would let you use it but that is one thing I do not have. Good Luck with finding the problem ..... 73 Don

k8mhz@... wrote: Calling all hams to put on their thinking caps....

For quite some time now I have been having problems receiving 2 meter signals at my QTH. For instance, the 94 will go from 60 over to down below the noise in an intermittent fashion. This is confirmed by different radios and different antennas.

Yesterday I made a discovery. The source seems to be about 3/4 of a block from my house. When I take my mobile or my HT there this is what happens:

When and ONLY when I get a signal on 2 meters I hear a hum that is a bit faster then 60 cycles. There is a point on Dorset street where the hum totally wipes out my 2 meter signal by de-sensing my radio. I can watch as the 60 over signal from the 94 gets punched into the dirt by the hum, which is audible but does not register on the meter. There is a point only a few feet wide on Dorset where I can stand or park and have my 2 meter rig's receiver totally wiped out. Not intermittently either, it's nothing but a haspy staticy hum.

Here is the weird part, as soon as the 2 meter signal drops, the nasty hum (audibly loud) totally disappears! Even while standing near what seems to be the source of the problem.

Here is a really cool clock program. You can have multiple time zones and formats in any fashion you wish. Has a sync feature. No spyware or any of that junk. Great for having the three zones we use all in one glance, local 12 hr, local 24 hour and UTC. Each clock has it's own little window. I think you can have as many as you wish.

During WWII, the Korean War, and even into the Vietnam era the U. S. Signal Corps designated many of their telegraph (Morse code) keys with a "J-" and a number. The real workhorse key during those years was the J-37. There are many more glamorous wartime keys around, but the keys that carried the bulk of the action were the J-37 keys. The J-37 key is unusual because, with the addition of different bases and connections, it became part of other more special purpose keys. All the keys shown below are based on the J-37. If it was used on the Silversides I could not tell you .

I am surprised the cable company hasn't been out to fix it. I had my CATV amp in the basement turned up too high and they came a-knocking. The tech showed me with his meter where the strongest signal came from.

I was having mild 2 meter problems, but not as much as Mark.

Subject: Re: [WestMichiganHams] Elusive interference

Good lead!!

I found a CATV amp here that I have trouble with pegging my meter on 145.25. Turning if off did not change my problem. Also I can stand right next to it with my HT and get the '94 full scale.

A trip down the street found with the HT confirmed that interference from 145.25 was coming from the exact same locations I was getting the most de-sensing from. The noise seems to be coming from a length of cable coming from an amp at the corner of Edenbrook and Dorset and continuing to Hendrick and then fading away.

I tried using a 440 Yagi to pin point the source but heard nothing. The next step is to take a larger 2 meter Yagi to try to figure out if there is a problem with the cable or one of the two taps I see. The noise is the loudest in front of one of my neighbor's houses and may be coming from inside. A good directional reading is needed to figure that out.

Thanks much Don!

You too Alan,

Mark K8MHZ

Mark,
Take a listen at the suspected trouble spot by listening to 145.25 on your 2 meter rig. That is the carrier frequency for Channel 18 on the cable system.

It sounds like what your are hearing is video. That hum is what it sounds like on an audio (narrow bandwidth) radio

Thanks to Al KV8X I am more confident in saying that neither J-37 or J-38 would be an ORIGINAL NAVAL key as the Navy never used the J series to designate their keys. They only used C?, C??, or SE until approximately 1942 when they went to AN (Army-Navy).

1129. Ddigital signal notes

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-08-15 14:45:02 UTC
From: George (Skip) VerDuin
Topic: 1129 Message: 1129

Greeting to the digital users of 145.070.
If that is not "you", then this is not probably interesting at all.

If there is any good news in this it is that k8rra is now stepping on a lot fewer other signals.
I recently discovered my collision avoidance techniques were not working and I was transmitting on top of other packet signals.
Of course that is a bad thing to do - sorry.
More accurately in detail - I was not properly detecting the presence of other signals and delaying transmission until others cleared the air.

Now I am - I have done some detail signal analysis and found 100% success with signals I can hear.
At the same time I can report that collisions are very prevalent.

For the purpose of avoiding collisions, the most important parameters I am using are:
FULLDUP=OFF, DWAIT=0, SLOTTIME=7, PERSIST=63
There are many others, not worth detailing here.

The purpose of this note is to open the door to improving the traffic thruput on 145.070 by getting our configurations to work better in concert.

If there is interest in this subject, please reply to me on the reflector and then lets consider a sub-group for this purpose only?
Two outcomes are obvious:

1. No one will care about this subject and life will continue as it has been.
2. Enough hams will participate to optimize that traffic will improve and lids will move off the frequency.

I'm OK with either outcome, and there may be other outcomes too.

Ham radio thrives an real names and QTH's Paul.
And the occasional nick (I'm Skip).

If you get "hacked" the whole community supports finding the hacker.
Mark (MHZ) is going thru that now at another level...

The good news is that the help documents on the site you visit are
usually OK to feel your way around.
At the site you note - WB8I - the sysop is prototyping jnos to supersede
or augment msys so hurry up and learn the msys context on a local
system.
There are multiple networking tools - KA-NODE / NET/ROM / etc., each
with a slightly different "personality".
You probably can't hurt anything - so go play...

If your Polyphasers all have N connectors, it's because that's what you chose to buy. You can buy them with either N or UHF connectors, and you can buy non-crimp N connectors too; doesn't LMR400 take the same connectors as RG8?

Sorry about the delay getting back to answer your questions.
On the Msys BBS :
N = your first name, were all friends here and It can be looked up in a
callbook.
NQ = your location. City, State
NZ = your Zip or postal code
NH = the BBS where you plan on having most of your packet mail routed
to.(usually a full blown BBS.

You will find a numbe of facilities at this Station
WB8I-2 can be connected to using TCP/IP the IP address is 44.102.134.31
(not accessible from the internet)
WB8I-2 or 49441 in a Netrom Node network node.,
WB8I-7 in a Knode

As someone (Skip I believe), feel free to connect to any of the stations
here. There is nothing to break and its a great way to learn the systems.
You may also see from time to time a WB8I-4, -5, or -6. These are the
Jnos BBS and AX25/TCP/IP gateway.

All of these stations have pretty extensive help files, but if you have
a question about something,do exactly what you are doing ask the questions.

1150. Thanks for Founders' Day Picnic

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-08-19 23:22:10 UTC
From: Bill Fries
Topic: 1057 Message: 1150

All:

We had a wonderful Founders' Day Picnic event at the MAARC clubhouse. Many, many thanks for everyone's participation and assistance. The food was wonderful and the friendship shared was much better than the food.

Can you get over Al, KV8X's special presentation of memorabilia from W8UCG??!!

We will enjoy the video of the old home movies now on VHS format, too. The goal there is to get some captions and identify a few of the older hams on the tape.

Many thanks to all who came and enjoyed the event. There is already talk of another picnic next summer. Are you in?

Bill, AB8SC

1151. Ohio QSO Party, Saturday, August 26, Noon to Midnight

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-08-20 02:07:19 UTC
From: Hank Greeb
Topic: 1151 Message: 1151

The Ohio QSO party, sponsored by the Mad River Radio Club (MRRC) will be held next weekend, starting Saturday, August 26, at noon EDT, and ending at Midnight EDT. The contest is open to any Amateur Radio Operator. The object is for folks outside the state to contact as many Ohio operators as possible on as many bands as possible.

Full rules are at http://www.oqp.us

I'll be operating with the special event station W8B crew, in BROWN County, Ohio, east of Cincinnati. We'll be operating both phone and CW with two separate stations. A pictorial QSL will be available for SASE. Best possibility between BROWN county and Western Michigan is 40 metres during the daylight hours, and 80/75 metres during the evening. We plan to operate about 5 KHz below the suggested calling frequencies or 3535 7040 KHz CW, 3840 7220 KHz Phone. Frequencies are subject to band conditions, activity, etc.

The MRRC is composed of contest minded hams in Michigan, Ohio, and surrounding states.

CU during the OQP!

How true...
And there are those of us who have struck out looking for greener
pastures.
I have found it in unix (AKA Linux) where two things seem very true:

1. System failures are reduced to a few percentage points of the
Microsoft alternative
2. Applications live in a world of "microsoft compatible" feature
sets.

On both counts and only for my needs are these two things ranked winner.

If you should care to dabble in alternative environments I would
consider it an honor to be one of your resources.

1154. Linux Question

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-08-20 18:29:16 UTC
From: Andrew Young
Topic: 1154 Message: 1154

I just installed Linux XP on one of my machines. Can anyone tell me how to install a program that wasn't included? I have looked it up on the net, but most folks seem to assume the person asking the question is already familiar with Linux. Maybe I am overcomplicating it.

Andrew

Typical Linux systems use RPM, or yum, or other (yes there are more) to
manage software install and upgrade.
If you have found the new software bundled compatible with XP method,
then you are good to go with similar method to system install.
Rather than go thru the options, do you know which management tools are
available?

> I have looked it up on the net, but most folks seem to assume the

Yup, the vocabulary is different... If you are OK with making what you
are looking for public, and where you found it, perhaps we can provide
enough detail on this reflector to allow you to load it...

You peeked my curiosity Andrew...

It's Russian.
Don't misunderstand - I'm OK with Russian products I just don't speak the language.
The WWW is indeed bringing the entire world to your desktop, but you might want to pick something closer to home.
Linux has many distros.
For the advanced user the distro is a trivial issue, but for the newbie the distro needs to be picked for the services you initially want.
The reason for that is exactly what you experienced - loading non-bundled software can have some pitfalls needing tweeking.
Sometimes tweeking is not for the faint-at-heart.
On the flip-side of the coin, installing a distro has become very simple (unlike last year) and some some boot from DVD never loading on the disk at all.

Here is a review:

In conclusion, I found Linux XP to be an adequate system for someone with modest requirements, for example perhaps that teenager who wants to im and listen to music but keeps downloading virii, spyware, and trojans or your granny who only wants to write a few letters, email and look at some pics of the grandkids. I see it as an admirable attempt to sway Windows users towards Linux, and I think Linux XP may have accomplished that. It's appearance would not throw any Windows user into a tailspin of confusion. It was an easy install, easy configuration and easy use. I rather liked it for what it was. Although it has all the feel of a commercial product. The only major drawback seems to the the time limit requiring an activation code (I wonder what would happen after 99 boots). For the right market, Linux XP has a definite use. For experienced users, it's a nice novelty to load up, look at, and then boot back to your normal system. I can't see myself switching. But perhaps you know someone who will.

If you want to read the whole thing, surf to:
http://www.tuxmachines.org/node/4207 My read suggests this is not the place to start with custom wants.

Skip,

I downloaded a couple of other distributions, including one called "Hamshack Hack," which is Knoppix. I can make a few copies in case anyone wants one. It runs right from the CD ROM.

I guess what I am trying to do is learn Linux, not so much install and forget about it. That's why I want to try to install a few programs. I currently have the Linux XP 2006 Distro installed. It is based on Red Hat.

We can go simplex (direct e-mail) if you want. The frequency is ayoung@...

Spasibo, Comrade VerDuin.

From: Hank Greeb
Topic: 1161 Message: 1161

There was an ad for a new ham radio store when I attended the
Hudsonville Hamfest, but I lost it in the usual ham shack clutter.

Please tell me where to go to get some 450 ohm twin lead which I'll be
needing for the upcoming Ohio QSO Party. I could get it at R&L in
Hamilton, Ohio, but would prefer to support a local vendor.

All
This looks like a good show to watch about Ham's. Tom

'Postmark KATRINA' will air on the Weather Channel, Sunday and Monday August 27 and 28 at 7:00 P.M. Central Time. 'Postmark Katrina' Produced by Les Rayburn, N1LF, is a Weather Channel one hour special that tells the story of a service by Ham Radio to restore critical mail service to the battered Gulf Coast area in the wake of Katrina.

Rayburn and his crew were fully embedded with Federal Law Enforcement Officers from the U.S. Postal Service Enforcement Agency within hours of Katrina making landfall. Critical High Frequency Communications for the National Communications System SHARES, was provided.

This program is recommended viewing for Ham Radio Operators.

Thanks Tom for the heads up.

According the The Weather Channel's Website, The program runs at 8PM ET. Note the e-mail said 7PM CENTRAL TIME. Its part of the Storm Stories series. It's not clear from their listing if the program is 30 minutes repeated immediately or if it's two parts run in succession.

Like usual, the Great Lakes area Friday night 2 meter MFSK16 net will be held tonight at 7 PM eastern/6 PM central on 144.150 USB. I'm pretty sure that everyone on these lists who cares is well aware of it, so I will probably not post weekly reminders anymore. In other words, it's up to you to spread the word!

Well, this week's net went fairly well. 2 checkins, Jerry KC0HLN from Waterloo, IA at about 320 miles (strong signal!) and Mike KC9DOA from Fond du Lac, WI at about 120 miles. Nothing was heard from Brian N2MLP, we'd need a lot more enhancement than we had this evening to make the 600 mile trip between here and east PA.

Thanks to all who dropped in, hope to see even more of you next week!

Just a minor correction: it was created by JARL. Icom was just the first
to market with gear for it.

So our radios will operate similar to Nextel phones with that cool screechy sound quality, really loud beeps on transmit, and packet losses?

Awesome!

Here is a heads up on the digital standard for amateur radio, D-Star.

D-Star was created by Icom as an open protocol means of digital comms.

Kenwood has now introduced D-Star radios in Japan.

This will be long needed replacement for strictly analog radio.

Stay tuned for more info.

All:

In the June issue of Flashovers, the monthly newsletter for the Muskegon radio club I wrote the following paragraph. Linda, AB8QH took the picture. I'm sure the vehicle is the same one shown in the photographs from Mark's post. This was part of a story on my first trip to Dayton this past May

In the parking lot there are a collection of vehicles
sporting the ubiquitous antenna, amateur radio license
plate, and bumper sticker. One small car has
sixteen antennas and Linda has the photographic
proof. I resist the urge to wander over and steal an
inconspicuous look inside at what most certainly is
a wall-to-wall collection of radio hardware requiring
a virtual pincushion of antenna hardware. This guy
should be driving a bus to support all these antennas
and not the tiny car he has hidden under there
somewhere.

Over the last few weeks I have had problems with the signal to my cable modem . I lose the signal to my modem but still have my digital cable .
I have all new cabal "18 awg " and have eliminated splitters . I also tried running a direct line and not having ant televisions connected and still have a problem . I bought a new ethernet cable .
The other thing is I seem to lose my signal more during the hours from 9am-8pm. I do lose the signal through-out the night, just not as often . When I lose the signal it will be lost from anywhere 3-10 minutes. Then it comes back for a few minutes and goes away.
Should I build an amp ? giving me a 10-15 db gain in signal strength or should I look at some thing else ? I did try another modem with no success.
I called comcast and they say things look good at there end .
They will send out a tech again . the tech seems to have problems diagnoseing the problem .
I think it may be in the ISP's network port. They think other wise .

Mark,

I hope you noticed the date of the article is over a year old. As of this time there has been NO progress made to implement this system in my area (Cedar Creek Township). The original time table called for my area to have service by the January 2006. I wouldn't hold my breath waiting for it to show up in your area.

I doubt the engine keeps running very well even with all the radios off. Did you get a good look at that heap?

Judjing by the workmanship, I doubt the oil gets changed more than once a year.

That is one of the most photographed cars in history, I'll bet! It has been on Hamsexy a couple times now. The piece de la resistance was the photos of the inside.

I don't know how legal having all that stuff on the dash is. Rumors are that he now has 44 antennas on the car. And lest we forget the yellow flasher and the remote controlled spotlight on the roof.

I was wondering the other day if, by coincedence, traffic was to come on all the radios at the same time so the alternator would have to keep up with draw from all the speakers. Do you think the engine would keep running?

Pictures can be uploaded to the Photos section of the group. I don't think anyone has used this feature yet so let me know if you have any problems with it.

Those which Radio Shack sells will also work. I had to do the same last August after suffering numerous losses shortly after signing up for broadband from Comcast in June of last year. I have had zero issues since installing the amp. Within the last two weeks I also purchased and installed an APC broadband cable line surge supressor, which I installed at the main line coming into the house instead of at just the modem point and have also not had any issues.

1217. Internet Connection

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-06 16:33:34 UTC
From: wingerham
Topic: 1217 Message: 1217

There is a third alternative to Comcast and Verizon. A company out of GR has two wireless ports in the Muskegon area. I have been using them for years and it works great. They use a secure Ghz connection. They installed a Yagi that looks at one of their two towers. One is on Lorin Industries building on Roberts near Laketon and the other is just south of Craig's Cruisers on Pontaluna Rd. These towers have an effective radius of 4 miles. However, most hams have a tower to mount the Yagi on, so you could go further.

They have several plans to choose from. There is an intitial connection fee. It is for the special router and antenna system. I understand they are hooked directly into several T10 lines. I know we have a very fast connection and it isn't loaded up like Comcast can get.

Here is there web address: http://www.wmiswireless.com/

Other than being a customer, I have no affilation with them

Hi Mark,

Your problem should be soon taken care of. I contacted a friend of mine, a senior technician at Comcast. He is now looking into getting your problem corrected, If there is anybody at Comcast that can do it he can.
As for amplifiers, that?s issue. At no time should it be necessary to put in an amplifier. They legally obligated to provide enough signal to maintain a minimum of 0db at each device such as TV, modem for total of four devices. We always tried to provide 8-12db at the ground block. Should the customer need to run more devices then they have to provide for that by law also. Now, unfortunately a large number of the technicians there do not have the understanding for RF like we do. But there are a few that do.

Scott Christmas will be checking into this, he may not be the one coming out, but he will follow up and see that it gets resolved. He is stuck working in the head-in for the next few weeks.

I have been instructed to give you or anyone else that may be having this problem his direct Nextel number. You or anybody else who needs his number can give me a call @ 231-767-1095 and will be happy to pass it on.
They actually do want the problem fixed, they realize the competition is coming.

Hi Mark..... Not surprising. The overwhelming problem in these cases is lack of adequate signal at the point it comes into your home. CATV signals appear to come in OK, but broadband high speed data, signal levels need to be at a higher level above the noise floor. Comcast appears to be deficient in attaining this level in many cases. Good luck in getting them to admit the flaw is on their end. One question : is your computer connection direct into the 10/100 card from the cable or are you using wireless at 2.4 gHz. thru a router???? KV8X

Hi all ,

The Tech showed up . Went through every thing I did . Not wanting to believe that I checked everything and that I had a suggestion to a remedy. She packed up and left.
I'm Still having problems . She had no idea what to do .
She did call Dennis Berens. He is on vacation this week . She said they will have another tech come out tomorrow.
This is the kind of service I've been dealing with from Comcast.
Anyway, I would like to thank you all for your help and suggestions.
I guess I'll see what they do tomorrow. Maybe time to go to Verizon.
One would think I deserve a discount for bad service.

Hi Mark....welcome to the crowd. I live on a "fringe" leg of Comcast, and had them out to check their end and everything was OK. The best solution is to go down and buy yourself a preamplifier, but you have to make sure it is "Bidirectional".. meaning it will allow commands you send from your computer to get back to the net. I bought mine, an RCA model DT100M at best Buy and paid around 30 dollars for it. Not only will it have enough gain to support multiple computers, it will get rid of the "fuzzy channel" syndrome as well. I have not had problem one with connecting after I installed this preamp. Best advise....dont bother with Comcast...it's a waist of time.
This is a sure fix. I guarantee it..... KV8X

1220. "DXing" on WiFi/802.11b

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-06 17:15:06 UTC
From: Hank Greeb
Topic: 1220 Message: 1220

It's been proven that 2.4 GHz 802.11b can be heard "barefoot" (300 milliwatts or less) over a 125 mile path, as long as it's line of sight and no atmospheric absorption from humidity, etc. See http://tinyurl.com/eawpa Of course, they were using 3 metre (9 feet) or larger dishes, which is impractical for most installations in Michigan.

These folks gave presentations at the SW Ohio Digital Symposium in 2005 and 2006 - they're very sharp cookies.

They say the folks who use cantennae don't really understand antenna theory nor practice. Most any parabolic reflector is orders of magnitude better than cantennae.

Al,

I found some plans for the SBA. The predicted gain is 14dBi.

It does not look very hard to construct. The material is copper and may be pricey but there is a metal shop here in town that stocks it and will sell cuts.

Yes,

Plans and info for the SBA would be interesting.

I don't really know what the range of the Cantenna is. 15 miles is very doubtful.

With the new MiMAX coming to other townships first I would like to try a little DXing then.

Subject: Re: [WestMichiganHams] WiFi Polarization

The cantenna is what I had in mind....with a little variation. Back in the 60's a physicist working with the USAF developed a unique antenna called the SBA, or short backfire antenna. It works on the same principle as the cantenna, but picture a cookie tin used as the waveguide as opposed to a coffee can. It has a larger diameter and less depth than a coffee can. From what I've read so far, the SBA is a big hit with the WiFi group in Europe. I'll pass along a couple of links from the IEEE group with photos and such if you are interested.
What distances have you covered with the cantenna design so far?? My radio range is roughly 15 miles at 2.4 gHz, and I have multi mode RX capability on that band . Just need to build an antenna, hoist it up 80 feet and see what we can hear. This could prove very interesting !!!

May I suggest a Cantenna? Mine works well as a waveguided directional.

Parts are 1 coffee can, 1 chassis mount PL259 connector, a piece of #12 solid wire 1.21 inches long, four screws, a 1/4x20 nut and some electrical tape. Fits nicely on my camera tripod.

Joe,

Are you going to try and hold a net Friday (Sep. 8th)? If so, I'll
try and check-in. I assume 144.150MHz +1500Hz means a 144.150MHz dial
frequency with the audio centered at 1500Hz.

There's a fourth alternative.

If your area is "stuck" on dialup, and/or if you're cheep, and live in what is considered a "rural" area of Western Michigan, UTMI (http://www.utmi.net) offers 384K DSL on top of their inexpensive telephone service (typically cheaper than the local telephone companies). I'm paying $9.95 per month for (384K bps) DSL on top of $29.95 per month for local phone service including call waiting. There's the usual FCC fees and taxes, of course.

They're not perfect, but since we don't have cable at this address,and the cable company won't run 1/2 mile of cable for only 2 or 3 subscribers, this is a much better solution than tying up a phone line at a higher cost.

It's available in most parts of western Michigan - I don't know the details of their coverage area.

Has anyone heard anything about the Feidaxin FD-150A/450A Programmable Handheld Radio? These are currently being sold on e-Bay from store in Hong Kong, Australia, and perhaps elsewhere. They're made in China, sell for about $60 including shipping from e-Bay stores. Since I haven't seen them in any QST write-up, I wonder if they are type accepted for US Ham use. There's one review by a ham in France on e-ham.

Perhaps China is making a run to be a low cost supplier of VHF and UHF radios?

The link for the description on e-Bay is http://tinyurl.com/hbtcm

I seem to attract more flames than anything else. I guess I'll give up and slink away from this "know it all" conference, which seems to be antagonistic to ideas which aren't congruent with the self-styled "leaders."

I would counsel the folks who are receptive enough to ideas to research their subjects of interest using internet searches via google.com, yahoo.com, kartoo.com, ask.com, or other search engines. A bit of research can result in considerably less dead ends and less frustration.

(But, then the above may bring more flames, so, I won't say more.)

> This user of a Cantenna understands that the total cost of the project was about 3 dollars as the only purchased part needed was an SO 239. The project can be made in less than an hour. The Cantenna is a waveguide and does not have the gain of a parabolic. The construction of a true parabolic requires the correct shape reflector with the driven element in a precise location and is difficult to construct from discarded materials. Once constructed it requires some bracketing on the outside of the reflector for a mount. All the Cantenna requires is a 1/4-20 nut taped to the outside of the can and it can be nicely situated on a camera tripod.
>
> The Cantenna is very cheap and easy to construct and shows an estimated 3 dB gain over a dipole and has directivity and a decent front to back ratio. The best bang for the buck as far as directional 2.4 Ghz antennas go. Sure, much higher gain is possible but can it be done in a few minutes for a few bucks? The Cantenna is so easy to build it could probably be done expeditiously.
>
> I know that the distance record for 2.4 gig is considerable. They

were using CW if I remember. That distance is not achievable with broadband data transfer, I suspect.
>
> So, who really knows antenna theory and practice? Very few, and I doubt they congregate in Ohio. Many are not even hams.
>
> Any individual can bolster their knowledge about antennas by building them and using them. A very good place to start for 2.4 gig is the Cantenna.

The theory and practice of building a parabolic antenna is documentd quite well.

Get hold of a recent or perhaps not so recent Antenna Book or VHF manual from the ARRL. My last one of each is dated in the 80's, so I can't speak for the newer one, but one or both of those books described how to make a parabolic reflector, the tolerances and grid spacing (if you use a mesh type reflector) which were recommended for various wavelengths, and recommended construction techniques. Since memory fades, this may have been for 432 MHz moonbounce work, with large ground based parabolas, but the theory presented should be valid.

I'm sure a search of back issues of QST, the index for which is available on the web to ARRL members, would turn up articles on the subject also. RSGB produces several antenna publications, though my library contained only one of them concerning inexpensive HF wire antennae. Nothing popped out whe I did a cusory glance at their on line store.

Andy Meng, N8MX, one of the fellows who helped set the WiFi record, says they found Direct TV and/or Dish parabolas in their search. Perhaps a note to him might give you hints of how to find them.

1236. HIGH SWR WITH G5RV

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-08 15:35:56 UTC
From: ravennaelectronics
Topic: 1236 Message: 1236

Good day everyone.
I put up a brand new G5RV a few weeks ago. It is horizontal and about 45 - 50feet in the air. I hooked up brand new coax and connectors and I get a SWR that is to high for the antenna tuner to work with. I have tried RG8 and RG213 as well as changed up the length of coax. I also made a air balun. Still a high SWR. I have redid the connectors twice and no luck. MFJ said it is my coax or my connectors and it could not possible be a defective antenna.
Here are the readings I am getting on my MFJ269 when it is connected to the coax that is connected to the G5RV
3.85-4.00 average of 9.5:1
7.225-7.3 average of 1.5:1 This is the only decent reading!
14.225-14.350 average of 4:1
18.11-18.168 average of 7:1
21.3-21.450 average of 7:1
24.930-990 average of 5:1
28.3-29.7 average of 7:1

Anybody have suggestions? Better yet, anyone available to come out and take a look to see if I am messing something up?

Thank you
Doc, KD8BGQ

Hank,

Amateur Radio doesn't need type-acceptance. You can build your own radio or modify anything to transmit in our bands as long as you follow the rules for maximum bandwidth, power, and such.

Andrew

Has anyone heard anything about the Feidaxin FD-150A/450A Programmable Handheld Radio? These are currently being sold on e-Bay from store in Hong Kong, Australia, and perhaps elsewhere. They're made in China, sell for about $60 including shipping from e-Bay stores. Since I haven't seen them in any QST write-up, I wonder if they are type accepted for US Ham use. There's one review by a ham in France on e-ham.

Perhaps China is making a run to be a low cost supplier of VHF and UHF radios?

The link for the description on e-Bay is http://tinyurl.com/hbtcm

Hank,

These radios show up on eBay all the time. The 2 meter rigs can transmit outside the amateur band on police frequencies. The 440 rigs can transmit on FRS/GMRS bands, both without mods.

I seriously doubt they are FCC approved or approved by any US agency. I would also question the quality of the signal and it's ability to stay in it's bandwidth.

60 bucks is cheap though....

1242. Re: HIGH SWR WITH G5RV

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-08 16:49:01 UTC
From: Hank Greeb
Topic: 1236 Message: 1242

Hi, Doc:

Sounds like you have a "very interesting problem. I've had similar problems with other things which "should work but don't." Often it's something which is obvious to a disinterested observer, and I beat my head against the wall for not figuring out the situation on my own.

The MFJ folks are probably correct, because the antenna is just wire, so unless there's a short or open connection in it, it "should" work. Telling you that certainly doesn't resolve your problem though.

You might wish to look at the original G5RV article by the inventor of this antenna. It is described at

http://www.astrosurf.com/lombry/qsl-g5rv-2.htm

This article gives many suggestions and tips on how it should be constructed, watchouts, etc.

I'd check for continuity between the feed ends of the coax and the radiator part of the antenna, and that there's not a short someplace in the setup.

At W8B, our setup in Brown County Ohio during the Ohio QSO party, we used a G5RV as an inverted V, with the apex about 40' above ground, the ends about 10' above ground. The internal matchbox in an Icom 706 was capable of tuning on 40 and 20 metres. We had a very short piece of coax between the ladder line and the rig, which may have been the difficulty with matching on 75 metres. We didn't have extra coax with which to experiment, so we made a totally different antenna.

Perhaps someone on the reflector has an antenna bridge you could borrow to "look" at your antenna to determine the resistance and reactance on the various bands. This is the definitive way to understand an antenna. With it you could determine the resonance point near the bands of interest.

To get on the air on your favorite band you might try lengthening the antenna by putting a couple coils in series with the twin lead. I had a wierd impedance on the CW setup at W8B, and I made two coils out of some extra 18 gage bell wire which I found on site. I cut the wire into two pieces of identical length and wound the pieces around a couple of plastic soda pop bottles. The length I used "magically" extended the feeders to a point where I could match

on 80 meters, though I was prepared to experiment with taps on the coil.

BTW, I've used dipoles fed with twin lead for some years, and find that they work very well. Did you consider using a balanced transmatch, putting it between the coax and the twin lead, or extending the twin lead into your shack? G5RV says this is often the preferred method of feeding the antenna when it's physically possible.

If no one lives closer to you than Rockford, I'll volunteer to come out to your place (about 34 miles from me) next week. I'm far from an antenna expert, but might be able to spot something that you missed. The earlier would be next Monday (after the Grand Rapids Hamfest), or possibly Wednesday, certainly Thursday.

Come to the Hamfest on Saturday and we can talk about it in person. I'll be around the ARRL booth whenever I'm not assigned to other duties.

GRAHamfest 2ØØ6 Saturday September 9th!!!!

The GRARA sponsored annual GRAHamfest will be held this year on Saturday, September 9, 2006, once again at the Kent County Fairgrounds in Lowell. Doors open to the general public at 8 AM. Swap table setup starts at 6 AM on Saturday and from 6-10 PM on Friday evening beforehand.

Volunteers are needed anytime on Friday after 3 P.M. to help with facility setup. Also there will be a potluck dinner at 7 PM on Friday evening, bring a dish to pass.

For more details visit the GRAHamfest 2ØØ6 web page at http://www.w8dc.org/swap.htm

Doc:

I'm surprised at your SWR on the G5RV. It may not be related but I think the antenna folks suggest that you feed a G5RV with over seventy feet of coax. And I seem to remember wrapping eight turns of coax in a six or eight inch diameter circle just before feeding the antenna. This creates a balun or decoupling and helps keep RF from returning from the antenna to the shack. But I'd doubt that either of these things would effect the SWR.

This antenna was designed to be more or less resonate on twenty meters. And it does not seem to be so fussy about nearby metal objects. The club's G5RV ladder line component is parallel with and a few feet away from sixty or more feet of tower.

You're confronted with an interesting problem. I'm sorry to not be of any assistance.

I'll tell you a short story of using an ohm meter to measure resistance between center and braid on a Carolina windom. The two seemed to be shorted together and I was concerned. But at RF the thing works great. I don't know if such a measurement on a G5RV will show an open circuit between center and braid. I'd try it and ask someone else to do a similar measurement. Might suggest something?

Bill, AB8SC

1245. Ride to Findlay Hamfest Needed

Topic: 1245 Message: 1245

I'm looking for a ride to the Findlay hamfest on Sunday. I'll be "beat" helping with the Grand Rapids Hamfest on Saturday, so I don't wish to drive the 200 or so miles to Findlay, but would like to visit with some of my acquaintances who will be there.

A fellow ham who was helping set up the Grand Rapids Hamfest this afternoon said he has heard several folks talking on the linked repeater system about going to Findlay. He can't remember the call letters of the folks he heard.

I'd really appreciate a reply e-mail if you're going and have room for another passenger, or know of someone who is going. I'd be more than willing to share driving expenses.

How much, and what quality of coax did you need to add? If the SWR is actually 9/1 at a shorter length, you may be burning up much of the RF in the coax, unless the coax is of very high quality or short length.

From: Hank Greeb
Topic: 1236 Message: 1250

RG-8 "should" be good for 80 thru 10 metres. Losses at 4
MHz "should" be less than 0.3 dB per 100 feet, and at 30 MHz should
be less than 1 dB per 100 feet. To be absitively sure, I'd measure
the power loss of the coax at SWR=1 with a dummy load. Put a
wattmeter and dummy load at the transmitter end, with a very short
coax between the rig and the power meter. Measure the power, then,
with no changes in the rig, put the long coax between the
transmitter and the wattmeter and calculate the loss. That will
give you the loss at perfect match. Using tables from the antenna
book or the handbook, calculate the loss with the originally
measured 9/1 SWR with the original length of coax.

The proof is whether the antenna gets out on the various bands, but
measurements are nice for peace of mind.

Thank you Mark, Hank, and Bill for the help. Mark paired up a 75 foot section of 213 with a 50 foot section RG8. I am going to get a 100foot single length of 213 (so I can bury it in the ground) and that should be long enough to run into the shack. Once I get a dummy load I will do what you suggest Hank. I definetly do not want to burn out the coax.

Once again, thank you all for the help. Look for me on the HF bands later this afternoon and evening (weather permiting).

Best Regards,
Doc, KD8BGQ

1258. HF Nets are Fun

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-09 14:19:26 UTC
From: Bill
Topic: 1236 Message: 1258

Mark and All:

Remember that there is a really Great net on HF on Sunday Mornings. I recommend the Hairnet at 8:00 am local time. We have a moderated roundtable discussion on all manner of topics each Sunday morning. Drop in and visit with us around 3.945 mHz. The frequency varies slightly with QRM. The net is ably hosted by K8ROH and welcomes all hams for a fun hour or so Sunday mornings.

Also remember the Bathrobe Net on twenty meters.

Check out the latest issue of Flashovers for information like this with lots more detail. You'll find a bunch of folks enjoying nets to stay in touch with friends around the States.

If you have 50 Ohm coax, like RG8 or RG213, and it's matched, at 100 watts you'll have 70 volts anywhere along the line. If you have a Voltage Standing wave ratio of 9, as you measured with the shorter piece of coax the maximum voltage will be about three times that, or 210 volts (if my memory of how VSWR is calculated). That certainly won't burn up the RG8 or RG213 coax. You MIGHT get into trouble with VSWR=9 if you're using the full legal limit of power.

As others have said, you won't dissipate much power with your coax as long as it is new coax. If the dielectric has gone bad, then you could be generating heat and not much would be getting into the antenna.

That reminds me of another point. A way to check the loss of the coax if you don't have a dummy load is to feed it with the far end open (no load)O. Good coax will have a high SWR at the input when it's not terminated. If it has a low SWR, it is an dummy load dissipating most of the power along the length of the line.

To fully undestand the effect of the lengthened coax you should borrow the antenna bridge which Mark (I believe) mentioned in another message. Changing the length of coax doesn't affect the VSWR, just the capacitive or inductive part of the impedance which is "seen" at the input.

The only problem is that this radio was made for the commercial two-way band outside of the US. The radio is NOT type accepted to be used in the US, as it transmits outside of the 2 meter band. Some countries use the entire spectrum from 140-174 mhz.
If it only operated on receive outside of the 2-meter part of the band it would not be a problem. Having it transmit outside of the amateur band is only tempting one to transmit where he shouldn't, like the VHF MURS channels. For $50.00 dollars more, I would stick to good old amateur portable and play it safe.

I believe that any Amateur radio that made by a commerical vendor has to have some type of certification form the FCC. Homemade does not.....for Ham use

Ask the cadre of folks on the 75 Metre SSB and CW nets who routinely use 75 and 80 meters, and know when conditions are "right" to move to 160 or 40 meters. And, be cognizant of the differences in propagation during the sunspot cycle.

For antennae, it's very hard to beat a dipole configured as an inverted V, and fed with open wire line, with a tuner at the transmitter end. My setup for years has been 30 feet of TV mast (5 foot sections), though more recently I've heard of 4' sections of fibreglass reinforced polyester masts for very reasonable prices at major hamfests. Either way, one person can get the antenna up to 30 feet at the apex within 10 to 15 minutes. The dipole I've used was a half wave on 80 meters, but when I didn't have room for that, I've successfully used a half wave on 40 meters, or most anything in between.

A wide range tuner is needed, but designs for those are readily available, several are made commercially if you don't want to build your own. I've used an ancient Johnson Matchbox for years. It's a bit bulky, so I'm looking for a smaller replacement.

Jim,

I can't argue with you on that because I don't know enough about it. I will assume you are correct. I do know that using old commercial/police radios for 2 meters is pretty similar, since they would be used outside their type-acceptance.

Thanks for the input. I am lazy, so I'd rather stick with a real ham rig myself. Too much room for error. No temptation, though, because I want to keep my license. I can't see why anyone would want to risk that to transmit somewhere they aren't welcome. But I know they do because I have heard them. I just hope they aren't hams.

Andrew

1267. Feedline Loss

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-09 18:36:56 UTC
From: Bill Fries
Topic: 1259 Message: 1267

All:

At the last club meeting Clarke, K8BP presented much useful information on feedlines and antennas. He has had much success with a home made "dipole" made from copper tubing, whip antenna ends (like an adjustable hamstick), and pvc. The plans were published in Flashovers earlier this summer or late spring. A great antenna that he'll tell you worked GREAT 0.1 watt to the southern Pacific.

In the presentation he handed out a feedline loss table for various coax. From his form I'll only quote a few examples like the really inexpensive RG58. Assuming you feed a hundred watts of power into the coax and your antenna is out there on the end of a hundred feet of the feedline you'll radiate 85.5 watts on seventy-five meters. Same situation on ten meters and your antenna sees 62.8 watts. Contrast this with 600 ohm open feedline (ladder line) (like that stuff on the "bottom" of the G5EV) on seventy-five meters you get out 99.2 watts and on ten meters 97.7 watts. Hard line does about as well. Spend some money on 9913 and lose fifteen watts on ten and around five watts on seventy-five meters.

The numbers are quite dramatic on two meters and above, but you already knew that.

You could always put up a twelve element yagi and get tons of gain making the linear amplifier REALLY effective! Larry, K8PUJ has your next really great yagi advertised in Flashovers. Check out the stats. And, well, nobody would mistake your antenna for a CB antenna. Nobody!

>
> One consideration is the difficulty of having portable antennas. We now have several VHF field stations capable of reliable communications from 0 to around 20? miles using high gain verticals on 15-20 foot masts. 50 watt radios are the norm. Jim, KC8PCJ, had his field station equipped for HF using a pair of hamstick antennas configured as a dipole atop one of the portable masts.
>
> This configuration is perfect for field operations but needs to be tested and evaluated.
>
> First we need to look at where an HF station will be of value. My thoughts are they should have a range of 20 miles to anywhere in the US to a similar station.
>
> NVIS has been shown to have good coverage from 20 to 1000 miles. Perfect, but NVIS relies on the critical frequency, not the MUF to operate. Lately the critical freq for the area has been in the 75 meter range at best. Hamsticks are very lossy at this frequency and the lower the frequency the higher the antenna has to be, plus lower frequencies are absorbed more during the day. NVIS works best when the critical frequency is 5 to 7 Mhz.
>
> Another option is getting the hamsticks up high enough to use them as a rotatable dipole. In order to get the most gain and best directivity we should be 1/2 wave above ground. That is 30 feet on 20 meters and 20 has been the highest frequency within recent MUF values that can be considered anywhere near reliable.
>
> Then comes the verticals. They have a low take off angle but require a counterpoise. By using techniques like drooping the radials they can be made with an impedance very close to 50 ohms.
>

> So much for the theory, now for the practice.
>
> Hamsticks were chosen as a method because they can be step up without supports on any portable mast as commonly used in field stations. There are some locations where better antennas can't be used. The hamsticks will work almost anywhere and should be standard equipment in HF field stations. Other antennas such as wire dipoles are a great adjunct and may work better in some locations. They are not easy to erect. The hamstick antenna can be set up in just a few minutes by one person. Also, practice has shown that even at a height of 15 feet or so, PCJ's antenna was directional. That just tells me it will be even better up higher.
>
> Besides Jim's station Tom W8AMZ and I will have a couple more. I would like to hear from others that would like to build HF stations in order to have a realistic idea as to their range and which antennas and bands we will need to work particular areas. DX may or may not be a consideration. Having a self contained portable radio station that can communicate for thousands of miles is not a bad tool to have.
>
> Jim purchased the mount he uses at a hamfest somewhere, I believe. I built two mounts but with a bit of a different design. The attachment allows the mount to be hoisted up and down the mast with a rope and a pulley. This is not only a nice touch for changing bands, but is necessary for adjustments in height required to fine tune an NVIS station. They will also be outfitted with an attachment point for another pulley that can be used to hoist a dipole to. They can be used either as a sliding mount or be tightend to the mast. The latter would be desired for use as a rotatable dipole. The mounts allow for a VHF antenna to be mounted atop the mast without interfering with the HF mounts. Multiple mounts can be used if desired. I am also working on a design to use the hamsticks in a vertical configuration. An advanced design will allow for either configuration to be used on the same mount. My goal is to have a mounting system that will be able to handle a multiple of antenna configurations. A friend of mine has a small sheet metal shop and helped me with the first design. He said he would love to be able to produce them commercially. My take is that in order to make them saleable they have to be better than anything already available. The first ones were made of aluminum and are light and very strong. Tom the sheet metal guy is definitely old school and overbuilds everything. (He spent about an hour welding up a pan for me to put cat litter in to catch oil drips from my cars. More time was spent making perfect double bends, checking angles, etc all the while driving me crazy with his perfectionism. When he was done it was not only perfect in every way, but watertight as well. Three days after I got it home I forgot it was there and ran over it with my car. The thing was built so good all it took was a pair of pliers to straighten it out and put it back to use. His design with

the double bends prevented damage to my tires. I have been using it for years and still run over it from time to time!)
>
> We need more than 3 stations to experiment with. Any HF field station no matter the antenna chosen would be a valuable component to the development of usable portable long range radio stations.

All,
Let me add this about the event.
1. Talk in and instructions on the 94 repeater.
2. Calibrate/Test your equipment on a "test range" between about noon to 1:30PM. Details on the 94 repeater, but the basic concept is to set up a known signal source so you can get a fix on it with your equipment.
3. Picnic: club will furnish tube stakes, buns, condiments. Drinks will be available at the clubhouse. Bring a salad or desert to pass.
4. Drivers meeting at 1:45PM
5. Foxhunt Start at 2PM
6. Picnic about 4PM (monitor the the 94 repeater or the foxhunt frequency of 146.435

Any questions let me know. Will send advance copy of rules to those who make a request.
Tom, N8YJT

I'll second this experiance. I use a "hamstick dipole" portable on 20m quite often. In my experiance, I've been able to work pretty much any station I can hear. Typically, my dipole is at about 18 feet on a self-supporting mast. At this height, I notice a bit of directionality, maybe 1-2 S-Units.

> Besides Jim's station Tom W8AMZ and I will have a couple more. I

I'll volunteer myself and my portable station towards that end. I have "hamstick" elements for 10m, 12m, 15m, 17m and 40m.

<snip>

Any chance you can post a picture of that mount? The ability to place the dipole on top of the mast after setting up the mast would make it much easier to place the dipole at 1/4 wavelength.

> Maybe we can get a net going for portable HF stations? Any takers?

See my offer above.

The change in frequency of a received signal
due to the motion of the satellite. This requires adjustment of the
transmit or receive frequency, with the common practice being
to change the higher or lower of the two frequencies in use .
I'm having trouble remembering this. Which way do I go? I was trying to work the SO-50 satellite. I went up and down and heard nothing . I was using the Arrow II antenna system and having no luck . Was it me ?
SO-50 did 2 passes last night and I had no luck receiving .

From: Hank Greeb
Topic: 1273 Message: 1274

Mark:

The doppler shift is a percentage of the frequency in use. If the downlink is on 432 MHz, and the uplink is on 144 MHz, then the doppler shift on the uplink is approximately 1/3 of the doppler shift on the downlink. So, if you're receiving the satellite at 5 KHz off on 432 MHz, for example, the uplink should be offset about 1.6 KHz on the uplink. The shift is to a higher frequency if the satellite is moving toward you, and to a lower frequency if the satellite is moving away from you. This means that the shift depends on where in the pass the satellite is. If it's directly overhead there will be no Doppler shift. If it's near the horizon the shift will be maximum. If you're working the satellite for a long period you'll have to adjust both the receive and transmit frequencies, first to higher frequencies and then to lower frequencies than the actual transmit frequencies..

Hearing a satellite is fun! Working one for the first time for me was similar to my first contact. I worked one on Field Day a bunch of years ago, and was so flustered that I had to read what I had copied to be sure of who the station was - I was copying CW but I was so flustered that the copy was going through my brain to the pencil without registering in short term memory.

I looked for NY4PD/NYPD as well today. I did not find them anywhere. The only 9/11 Special Event station I came across was W2IK/WTC911 on 14.272 at 1040Est. I did not even find any of the Route 66 stations on during the day today. I did work a guy in Amersterdan Netherlands.

1283. MAARC Gives American Flag 2 Fruitland Twp

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-12 14:30:11 UTC
From: Bill Fries
Topic: 1281 Message: 1283

All:

The MAARC, the Muskegon radio club, is presenting Fruitland Township (we had Field Day at their park the past two summers) with a brand spanking new American flag. There will be a ceremony held in conjunction with the township's board meeting on Tuesday, September 19 at 7:00 pm. I expect to have some Boy Scouts do the flag ceremony.

You are invited to attend.

Could we encourage a newspaper to visit and write a paragraph or two?

The October board meeting for the MAARC will be held afterwards at their clubhouse.

Bill, AB8SC

Bill:

Nice gesture you're doing for the township.

There should be a person at the township office who sends publicity releases. That person is a likely candidate to formulate and send out publicity releases. And, if your club doesn't have a Public Information Officer or publicity chair, any officer or appointee could write up a publicity release for the event and send it to the local daily and weekly newspapers. As the township office which local paper they use for official notices - that would be the first place to start, but publicity in a daily newspaper would be a bonus! You don't have much time before the event if you wish to get it into the weekly papers - but you have several daze for daily rags.

I'm sending this along to our section manager, Dale Williams, WA8EFK, and Section's Public Information Coordinator, Harold E Beauchamp Jr, KC8QMH, who may have better pointers on how to maximize the probability that your club's name will be in lights in the newspapers.

I MIGHT have a solution for you Paul.

It involves mixing manufacturers...
After reading Marks site reference, the mic for the 101 sounds LIKE the Kenwood mic I have - MC-50.
Desk - two PTT - 4-conductor female connector...
The decision to try it needs to be all yours - I have no recommendation. Except "Be careful what you connect together.".

I have nothing that this mic will connect to - thus it is a spare unused mic for me.
After you read the details and are certain it is what you need, let me know.
I've been thinking it needs to go to hamfest or e-bay.

Let me know?

Since USA Today featured the idea, I'd hope they did enough research
on their source to determine if the source was feeding them an
olde "urban legend".

Did anyone ever hear of wave-guides? These things are just "piping
for UHF and microwave RF." While iron gas lines aren't the optimum
conductor for a wave-guide, they theoretically could be used as such.

A home I owned whilst my daughter was in school was built in 1926. It
had iron piping for the natural gas directly to the house. One would
have had to use ham type ingenuity to get past the outside meter and
probably several pressure regulating valves between the source and the
house. There'd be a bunche of technical challenges getting through
the many "T's" and other places where reflections/SWR bumps might
exist, but the idea shouldn't be thrown out prima facie. These
problemmes aren't much different in concept than the problemme of
feeding RF through unbalanced lines with 4800+, 60 Hz AC. At least
the frequencies in use would be in the microwave range. Since 99.44+%
of the hardware would be under ground there'd be little chance of RF
leaking into the ham bands to bolix up our communications.

It has been suggested that we mention the address of the Fruitland Township Hall and Park. They exist at 4545 Nestrom Road, Whitehall MI.

Their board generally meets on the third Monday in the month. One or more of their folks have conflicts and have asked that the meeting be moved a day later to Tuesday, September 19 at 7:00 pm. The hams have asked to present the Fruitland Township with a replacement flag on this Tuesday. There is not cast in stone assurance that their board meeting has been moved but I'm going to say that the hams will present the flag on this Tuesday evening whether or not their board meets. There are just too many folks to herd up and coordinate.

Should you wish to observe, participate, or just cheer I'd suggest you mark your calendar appropriately and arrange the transportation. This park is the same facility our radio club has been using for the past two Field Days.

Hope to see you there!

Bill, AB8SC

1295. Standard Operating Procedures or Suggest Operating Procedures

Hello Everyone ?. What happens when we set SOP?s (Standard Operating Procedures) for ARES and then we very from them and something happens that causes litigation ? by setting up SOP?s are we opening our self?s as volunteers to being held liable for not following the SOP?s were if we were just doing our best to help out there would be no document for a lawyer to say we did not follow our own SOP?s. If we do set up SOP?s just how far should we as Volunteers take them ?.. Who responds ? how we respond ?. Who is in charge ? what we respond too ?. ?????

Just some food for thought ?..

Maybe we should call them Suggest Operating Procedures ...???

It has been a week now and I have had the best service I've had since I started with Comcast . I do not know what Scott Christmas did Tom . I will tell you it worked .
I have been told by several Amateurs that the last week I've sounded better than ever on Echo-Link .
To bad I had to go through so much to get the service I paid for . I am happy with what I have now .

> As for amplifiers, that?s issue. At no time should it be necessary to put in an amplifier. They legally obligated to provide enough signal to maintain a minimum of 0db at each device such as TV, modem for total of four devices. We always tried to provide 8-12db at the ground block. Should the customer need to run more devices then they have to provide for that by law also. Now, unfortunately a large number of the technicians there do not have the understanding for RF like we do. But there are a few that do.

Comcast, and had them out to check their end and everything was OK. The best solution is to go down and buy yourself a preamplifier, but you have to make sure it is "Bidirectional".. meaning it will allow commands you send from your computer to get back to the net. I bought mine, an RCA model DT100M at best Buy and paid around 30 dollars for it. Not only will it have enough gain to support multiple computers, it will get rid of the "fuzzy channel" syndrome as well. I have not had problem one with connecting after I installed this preamp. Best advise....dont bother with Comcast...it's a waist of time.

Unfortunately untrained operation is as much more of a threat than having an SOP. With an SOP we all play on the same page and have to practice and drill BEFORE an event happens. In my organization, show up untrained and sent home or serve in a non-critical area! Standardization of operation needs to be addressed by the State ARES organization as well as minimum training requirements State wide before something goes down and we will be called on to perform with as few mistakes as possible. The one mis step is the one our served agencies WILL remember-not how many times we get it right! That is the nature of the Public Service beast since 9/11 no matter how much we may not like it! DE WD8USA ...-.-

AMEN.

However, most public agencies are tolerant of non-critical misteaks.

And, too many volunteers aren't cognizant of the difference between
critique and blame.

SOP's?

I know I am not a member of any ARES reflector at this time, but I have something to say about SOP's.

I work in the Pharmaceutical industry. We are BOUND by the FDA to follow verbatim any document we call an SOP or Procedure. If we deviate from the document we are subject to legal action and we must perform an investigation which ends in a corrective action to prevent the incident in the future.

Now, if we call something a GUIDELINE and describe it as such in the "purpose" section at the beginning, it can be deviated from without consequence.

Can it be called a guideline?

Andrew

Subject: [WestMichiganHams] Standard Operating Procedures or Suggest Operating Procedures

Hello Everyone .. What happens when we set SOP's (Standard Operating Procedures) for ARES and then we very from them and something happens that causes litigation . by setting up SOP's are we opening our self's as volunteers to being held liable for not following the SOP's were if we were just doing our best to help out there would be no document for a lawyer to say we did not follow our own SOP's. If we do set up SOP's just how far should we as Volunteers take them ... Who responds . how we respond .. Who is in charge . what we respond too .. ?????
Just some food for thought ...

Maybe we should call them Suggest Operating Procedures ...???

Joe,

I will try. Part of the problem could be that many rigs don't have SSB above 10 meters. One of mine does.

Andrew

Yes, iron pipe could be used as waveguide. However, for the past 25+ years, most of the pipe used for distribution along roads, and the pipe run to houses and businesses, is plastic. *Not* so good for waveguide.

Anyone locally have a source for hardline or have some they want to part with? I am looking for the following pieces and lengths:

1) 50ft - 900Mhz capable - for 300W repeater antenna
2) 50ft - 900mhz capable - for 25W yagi antenna, this may not endup with hardline
3) 300ft - 900Mhz capable - for 300W repeater antenna
4) 100ft - 900mhz capable - for 25W yagi antenna.

If anyone has anything, I would be interested. The above is estimate lengths, slightly shorter would be okay.

Subject: [WestMichiganHams] Amber alert?

Just a few minutes ago I heard an Amber Alert being broadcast on 14.300 USB for a missing male child in a wheelchair. A license plate # was given, but no state was mentioned on the alert. The NCO assumed the plate was from Minnesota which is supposedly the state the alert was from.

I went to the website for the National Center for Missing and Exploited Children and found nothing about the alert. I also searched Minnesota's Amber Alert site and found nothing.

I was under the impression that the Amber Alert system was under the auspices of a national organization. Searching the Internet does not support this.

There should be one site where all the alerts have info. Missing information, such as the state the license plate was from, could be gained from such a site. 14.300 is the home of the Maritime Mobile Net and people from all over the world listen to it. Passing traffic from a local source which assumes that some info will be already known to the recipients causes confusion. There should be a place to follow up on the alert.

If I can get a verification and better details I would like to post the alert.

Woman found in corn field
Monday, September 18, 2006
SPENCER TOWNSHIP -- A bloodhound helped find a missing 47-year-old woman unconscious in a cornfield over the weekend. The woman, whose name was not released, was reported missing about 11:30 p.m. Saturday from her home on Lincoln Lake in northeast Kent County. Rescuers worked with Kent County's R.A.C.E.S. (Radio Amateur Civilian Emergency Services) and the Mid Michigan Working Dogs Blood Hound Team to track the woman, who was found nearly five hours later about a half-mile from her home. She was taken to Spectrum Health Butterworth Campus for treatment. Kent County sheriff's deputies were not releasing her name or a report on her condition.

This message has been prepared on resources owned by Kent County, MI.

From: Bill Fries
Topic: 1312 Message: 1321

All:

I'll be putting together a beam antenna and think I'll use either Penetrox or Noalox in the aluminum joints. But where can I purchase this stuff? I've heard the big box-marts carry it but which department? Should I wait until the next hamfest, Kzoo or Holland? Or maybe I don't need the stuff. I can get it off the internet but shipping seems high?

Your opinion?

Thanks!

Bill, AB8SC

From: Linda Rosenthal
Topic: 1326 Message: 1326
Attachments: 1 described; binary payloads are missing from this source WARC

Last night, members of the Muskegon Area Amateur Radio Council presented Fruitland Township (located near Whitehall) with a new flag for their park, where we were graciously allowed to camp for Field Day 2006. They have allowed us to use the park, off and on, for several years. KV8X, Al Pepping, suggested the gift of a flag to replace their tattered one, to honor their forbearance of our annual "campout." Left to right, the hams are: Denny, N8CTT, Tom, W8AMZ, Linda, AB8QH, and Jon, AB8RD. Greg Boughton, the township supervisor, is receiving the flag on behalf of the township. The scouts were from Troop 1008 in North Muskegon. We have the scouts' names, but they scattered like the cold evening wind before we could match them with the picture. Thanks to Randy Hughey, the troop's scoutmaster, for bringing the boys down and giving the flag a proper sendoff and for taking this photograph.

If you are just listening you don't need a fancy antenna. Just run a really long wire to the center pin of the antenna PL 239. Jam it in there. Since you are not transmitting you get away with lots of stuff.

You can get fancy and get an antenna tuner or a dipole but you don't need that stuff to just read the mail.

Then like Mark says start listening and get the feel for things. You can dial anywhere with impunity. I'd give a listen to the Teenage Net each weekday, or the Bathrobe Net each weekday, or spend a little time reading the mail on the Hairnet on Sunday morning. You will be able to hear W1AW's CW transmissions, you can even decode RTTY from all over. Maybe you like PSK and your computer will read that mail, too. Learn where the DX windows are and you'll begin a hobby of respect and become a Short Wave Listener. There are tons of broadcast shortwave stations from all over. They will send you QSL cards, too!

1340. GLA Friday night 2m MFSK16 net: new time!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-22 13:56:07 UTC
From: Joe Veldhuis
Topic: 1340 Message: 1340

The Great Lakes area Friday night 2 meter MFSK16 net will be held tonight on 144.150 MHz USB, at a new time: 8 PM eastern, 7 PM central. I was told that 6 PM may be too early for those in the Central time zone, so I went ahead and pushed the time back an hour. Hopefully this will bring in a few more checkins from the west.

It's a dreary fall day here today, and propagation isn't looking good. KC0HLN and N2MLP can forget it (unless someone can relay), but those within about 40 miles of Lake Michigan should be able to get in. Point your beam at me and listen for a half hour or so; if you hear me, there's a good chance I can hear you, so throw in your call!

Nets?

There are details regarding several nets in Flashovers, the MAARC's monthly newsletter. You can see a recent copy of the newsletter by visiting our club's www page.

http://www.qsl.net/w8zho/

Hairnet? 3945 or 3.945, give or take QRM 8:00 am on Sunday, only.

Look for the UP and Teenage nets. Great fun, too.

I get the same noise at my home, but it also affects our television, wide band Fm, 2 meters and anything else I have with an antenna. We have had the power company out here once, but they did not find anything. It dosn't happen long enough or frequently enough to get a fix on it. It also affects my mobile radios up to 2 miles away from my home. I have also heard reports about the same noise affecting the receivers at the radio tower at the corner of Garfield/Baseline and M-120.

My QTH is at the corner of 176th and Garfield Rd in Hesperia, Oceana County, 4 mile w sw of Hesperia.

I am sure my noise is not related to your noise, but it sounds the same. I am hoping that you find your noise source so that it may point me in the correct direction for finding mine.

Thanks!

If I didn't know any better, it sounds like someone's using electrical equipment near the antenna. I know that's not the case though. It's very interesting.

I seem to remember, deep and back in my mind somewhere, that the folks at the ARRL have sound files of noises frequently heard on the air. Or was it another ham with a www page with a similar focus. Certainly the ARRL has lots of rfi information that includes noise from BPL and other sources.

I thought this sound was like an electric fence that I seem to remember cycles on and off. I thought I heard a regular interval of on and off. The problem with the fence idea is I'm wondering how far away from the Herefords does Mark live?

Best of luck tracking this down.

It's good to note patterns for sure.

My own ongoing experience is with a 2 or 3 KHz modulated burst every seven seconds on 3.830 SSB - sounds like someone clearing their throat of a serious lugee. I found the same signal at 1.915 MHz - I do have a portable AM broadcast band rcvr that can tune in 1 KHz steps - it doesn't have a BFO - I did not hear the sig at 957 or 958 KHz.

A unit on a nearby bakery's roof emits a sound every 7 seconds - sound's like a seal's bark or like Goofy's dumb "Gah-Huk" chuckle. The city inspectors did go over there years ago at our request and determined that the acoustical level did exceed the decibel limit - the bakery said they would remedy the situation - didn't happen.

Not convinced I have the culprit because I haven't yet taken the HF rig over to the bakery to see if the the sonic and RF emissions are indeed synchronous. Also could set a mike and preamp outside the house and run the lead into the shack for a side-by-side listen.

I have .wav and .mp3 files of the sound coming from the xcvr and of "Goofy" as heard a on our front porch. Can easily see the 7.0 second feature of each in WaveStudio.

I can request the net to QSY off of 3830, but I can still hear Goofy through thermopane windows - HI ! Larry

k8mhz@... wrote:
The pattern of the noise is much like that of a machine in a factory. It cycles on and off, 1-4 seconds on, 3 seconds off for a while. Last night at 7:59 it came on for over a solid minute and shut off until 8:12. Break time on 2nd shift? Right now it sounds like someone is working on it or setting it up. The repetition is there, but not as regular. I got it as high as S9 here last night. It is also loud on 60 meters.

I just hope it stay on long enough for me to find it.....err....I mean sure hope it quits soon :) !

Coming in November is the popular ARRL contest known as Sweepstakes.
There is a CW and a Phone version. The first is early in November,
while the second is a few days into our Michigan holiday, Deer Camp.

So you want to participate? We can use the radio club's fine facility
and enjoy the event.

Mark your calendar and let me know.

Calendar marked! Karen and I are a go for this. We talked about this last weekend. We were considering operating from home on this but if the club is going to open the doors, we can see fit to go up there and partake in the fun.

Things to turn on for Sweepstakes.
1. Coffee
2. Radio
3. Coffee
4. Back-up Coffee pot

Topic: 1342 Message: 1360

Doc:

So I sense your definite need for caffeine. We should get Starbucks coffee and make up a HUGE POT. I'm game.

And, Chris, we'll find a way for you to get to the clubhouse.

I'm bringing my sleeping bag. Can really old kids have a "slumber party" too?

Should be a really great time.

Since clock time changes some time in October I can't say exactly what time we'll be at the clubhouse. Just about all the contests run on UTC which requires some computation for "regular folks" time.

Excerpted from the ARRL's www page:
Phone: Third full weekend in November (November 18-20, 2006).
2.3. Contest Period: Begins 2100 UTC Saturday, ends
0300 UTC Monday.
2.4. Operate no more than 24 of the 30 hours.

Let's see if I can do the math: 2100 UTC minus 5 hours for local time is 1600 local minus 12 for am or pm makes the start at 4:00 in the afternoon. End time is 0300 plus 2400 for the math is 2700 minus 5 hours for local time is 2200 minus 12 hours am or pm makes the end of the contest at 10:00 pm. That last part sounds too late. Anyone want to check my math? Linda did the checking. And the contest runs thirty hours so it makes sense.

Tom, W8AMZ is saying we should have a HUGE tub of chilie to keep the troops fueled and talking. Great Idea! I'm thinking that stragglers on Sunday morning need a really BIG breakfast. I'll make something to hold us over until the early afternoon when the leftover chilie is resurrected and employed.

Rumor is that the clubhouse's shack computer will be running and we can use that for logging. I'll make sure we have a back-up notebook computer, just in case. We'll run a Multi-Single meaning multiple operators (YES! Lots) working a single rig.

This will be great fun!

Oh, Sweeps is an HF contest. However, we will have control operators there so EVERYONE can assist. We'll need loggers and operators and folks to keep the coffee pot running and other folks to cheer while other folks are the peanut gallery heckling while we have some folks running for pizza and other folks just running over to the Red Rooster for sanity and some "quiet time" while the rest of the interested folks calculate the current and predicted score and search for ways to post our score on the Internet to those folks interested in such details before the actual end of Sweeps and the time when we all pull the plug, leave the shack, and return to our civilized civilian lives of quiet normalcy.

Normalcy? I've never been accused of being normal. Oh, and yes Bill, older kids can have a slumber party, but all of the ones I went to when I was a teenager usually ended up being broken up by the cops. Good thing the club house is out in the country so we don't have to worry about the noise keeping the neighbors awake. *chuckles* I'm looking forward to it.

Good day Tom.
I may be able to help out on Sunday. I will not be there by noon time is the only problem. Church does not get done until noon. I could be there at the earliest 12:30. More likely around 1pm would be a better assumption.

From: ravennaelectronics
Topic: 1368 Message: 1368

Good day everyone.
The Scouts National Jamboree On the Air is quickly approaching. It is the third weekend in October (21-22). Are any of the area radio clubs/organizations/associations/councils going to open up their shacks and grounds to allow the scouts to camp, play radio or a at least play radio?

I know my son's unit has been asking about the MAARC opening up again like they have in the past. My son's unit has FOUR adult amateur radio operators in it and five youth that want to learn and get their license.

Let me know and I will get the word out to the units.

Actually Paul, until one of your stations is a "full Service" BBS you
are best off with WB8I-? as your "home".

On Thu, 2006-09-28 at 12:02 +0000, kd8cbj wrote:

> I set it up as KD8CBJ-1?Is this what an Alius is.

As you might guess ALIAS is another way of addressing your station.
"MKG" is an alias for example.
Your alias is your choice, and one primary use is to build digipeating
lists for other users of your station.
You should probably not consider ALIAS as a mail feature, only
CALL-SSID, or CALL@DOMAIN.

Your note specifies you connect to WB8I / you should probably ONLY
connect to WB8I-? (you fill in the SSID) when you establish a link.
Use the same practice for all your stations - do NOT connect to kd8cbj.
Your at-home (not "home") station might have "MYCALL KD8CBJ" and
"BBSCALL KD8CBJ-1".
Your mobile/other station might have "MYCALL KD8CBJ" and "BBSCALL
KD8CBJ-2".
Neither of your stations is "your home station", both of your stations
permit BBS mail messages and CONNECT WB8I-? to your "home" station.
The ALIAS you assign does not figure into this mail addressing, and DO
NOT use one alias on both stations...

Does that make it better or worse?

From: Hank Greeb
Topic: 1372 Message: 1372

From Mad River Radio Club mailing list. Sounds like this might be useful to other hams.....

==========

Don K8BB put me on to a spray mentioned by W4ZA in the NCJ that is dynamite on removing old rusty bolts. PB Blaster is available at WallMart in the auto section for under $4 a can. I actually laughed the first time I used it...it made it incredibly easy to loosen a 6 year old non-plated UBolt.

Try it...you'll like it!

Subject: [WestMichiganHams] Young ham places in local spelling bee

Contrats to Nicole Austin, KOLEY and Wendy Austin, BSN for earning second place at the Hackley Library Spelling Bee.

Not bad for their first event. Both 1st and 3rd place had not only been in spelling bees before, but had won them. The 3rd place team won the Hackley event last year and the younger half of the team won the spelling bee at the Nellie B. Chilsom Middle School.

I had no idea that the competition would be so tough. I am proud of the both of them.

Doc:

At the last board meeting of the MAARC there was no discussion on this activity and date. It certainly can be arranged and you are encouraged to 1) host the event and 2) make invitations and etc.

On a Jamboree weekend in the past a Scout Troop has camped at the club's clubhouse and enjoyed the weekend on the radio. This certainly could be arranged, again, for this year's event.

The policy at the club is to encourage these activities. Members can borrow a clubhouse key and supervise the use of the clubhouse. Nonmembers will be "hosted" by a club member. A simiple process.

Unfortunately my unit is camping that weekend elsewhere.

Best of luck in making this happen. We have advertised this event at the monthly October Roundtable Scouter event without any takers. Not an excuse not to post a flyer at this upcoming Roundtable.

Thank you for the scope Bill. Karen and I are members of the MAARC so that is simple enough. With your and the board's permission I would like to see JOTA at the clubhouse. If you can, give me a call on the landline this evening or sometime Sunday afternoon so we can work out the details.

Thank you

From: Bill Fries
Topic: 1368 Message: 1380

All:

The Muskegon radio club is hosting a steak dinner and YOU and a guest or three are invited. Mark your calendar for Saturday, October 14, at 5:00 pm at the clubhouse, 2888 Scenic Drive between Muskegon and White Lakes and near the Red Rooster Tavern. The menu, you ask? Steak, baked potatoe, salad, and desert. You may bring and share your favorite dessert. Cost will be $6.50 for adults and less for the youthful contingent. Youthful in age, not temperament, that is.

Hope to see all of you there. Advance tickets will be available at various events leading to the dinner. Get a copy at the upcoming membership meeting or a breakfast nearby.

Mark:

Do you use packet spotting? You will often find the station's call sign listed. There are frequent mistakes, especially on cw, but this is oftentimes a good place to start looking. Or verify.

My logging program will also alert to dx being spotted. Handy! Or disappointing when tons of spots are already confirmed. I'm not bragging, just mentioning. And there is a new twist to spotting nets where dx post that they are on the air and where. Kinda like self spotting but different. I don't use this WoTA stuff, yet.

1385. Unidentified caller on tonight's net

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-09-30 00:47:07 UTC
From: Joe Veldhuis
Topic: 1385 Message: 1385

Sherm KB9Q called a minute before the net was supposed to start. As I was swinging the beam around to answer him, I noticed another, very weak signal. I thought it may have been KB9DOA in Fond du Lac or KC0HLN in Waterloo, but it seemed to be strongest when I aimed southwest. Never did find out who that was. Did anybody on here try unsuccessfully to check in tonight?

Aside from Sherm in Big Bend, WI, I had two other logged checkins: Mark KC8DEI and Paul W8IQE from Grand Haven, MI.

From: Tom VanderMel
Topic: 1386 Message: 1386

[Address comments to k8je@..., only. Do not click on reply to this message. The ARRL reflector is outgoing, only, and does not accept incoming messages.]

- K4FQT did It!
- Ambient BPL Becoming a Better Citizen?
- Will ARRL Appeal the FCC Action?
- Correction on Barry Goldwater's Second Call
- Kentucky Emergency Net Moves to Winter Home
- Sanctioning Hamfests/Swaps/Conventions
- Who to Write When You Have a Beef?

K4FQT DID IT!

In case you don't know this, K4FQT is none other than ex-W8FQT, Dick Mondro, our former Vice Director. Dick and Sandy, who is now KC4SM, moved to Florida nearly a year ago. No longer a resident of the Great Lakes Division, Dick could not run for re-election here.

Also if you didn't know it, Dick is an outstanding business consultant. In fact, he is personal conslultant to the owner of the Detroit Tigers baseball team. Dick's influence in structuring the Tigers' organization and its concept for running the team on the field for the current season is largely responsible for the succes the club has had in copping the American League, Central Division penant.

Great job, Dick, but watch out for the Chisox next year!

AMBIENT BPL BECOMING A BETTER CITIZEN?

I've just learned that Ambient, the provider of some of the dirtiest BPL systems around, may be coming to realize it should be a better corporate citizen. At least one new Ambient BPL system that has been installed within recent weeks has notched every amateur band. The report is that the ham bands are essentially devoid of BPL interference even though frequencies just outside these bands are plagued with interference. With a couple of new Ambient systems planned for activation in the Great Lakes Division (at least one is by Duke Energy), we can hope the actual version of BPL used is effectively notched.
WILL ARRL APPEAL THE FCC ACTION?

As noted on www.arrl.org, the Board of Directors is considering a legal appeal of the recent FCC ruling that nearly gives the store to BPL providers. This is the decision in which the Commission concluded that licensed radio services such as Amateur Radio do not necessarily deserve to be protected from interference caused by Part 15 devices,

and that mobile operators of licensed services definitely do not warrant protection from interference from Part 15 devices. The ruling was made in a Memorandum Opinion and Order that became effective September 29.

The effect of the ruling actually goes beyond concerns over BPL itself. It brings into focus the apparent belief by FCC it can issue radically new and changed rules through the "back door" and, thereby, avoid following established procedures for developing and adopting rules changes. The basic premise that rulemaking should be done by thoroughly considering public input is at stake.

CORRECTION ON BARRY GOLDWATER'S SECOND CALL

Every now and then, I make a mistake that confirms my firm belief that I am not infallible. In the last issue of Weaver's Words, I gave Barry Goldwater's second call as K3UGE. At the time I typed this, I would have put money on being correct, but Charles Ring, Jr., W3NU of Brookfield, OH corrected this error and has told me it was K3UIG. He was merely the first to let me know of my failing memory. Sorry to have made the mistake and thanks to Charles and the others for correcting me. Incidentally, Goldwater's last name originally was Goldwasser in the family's native Germany.

KENTUCKY EMERGENCY NET MOVES TO WINTER HOME

Effective October 2, 2006, the once-weekly Kentucky Emergency Net (KEN) moved from 3.993.5 MHz to 3.972.5 MHz. This is also the home of the Ohio Single Sideband Net (OSSBN) that meets three times a day. This frequency will remain the KEN frequency until the April 2, 2007 net session after which the then-new Kentucky SM & SEC will choose either to remain on 3.972.5 or move back to 3.993.5. In a true spirit of cooperation, KEN management requested the concurrence of OSSBN management for the move before deciding on it. OSSBN management agreed enthusiastically. The likelihood that OSSBN evening sessions will run into the beginning of KEN is small, but this may happen, occasionally.

KEN serves as an administrative and training net for Kentucky ARES. The reason for the shift in frequencies is that German digital SW broadcasting often covers 3.993.5 MHz as propagation extends during fall and winter months.

SANCTIONING HAMFESTS/SWAPS/CONVENTIONS

I want to make certain everyone realizes I have no intention of trying to keep any affiliated club from obtaining ARRL sanctioning for its hamfest/swap/convention. The opposite is true. I'd like for every one of these events to be sanctioned. My purpose in discussing the sanctioning is to call attention to a fact I believe is poorly known by many people. This fact is that sanctioning is not a one-way street. It is not just for ARRL to put its stamp of approval on the event and to pass on the benefits of sanctioning (publicity in QST, prizes for

the event, information useful in organizing the event) to the event sponsors. The event sponsors actually owe ARRL a few small acknowledgements in return. These include having an ARRL table in a conspicuous location with ARRL literature neatly place on it (preferably manned with a club member knowledgeable about ARRL if there are no ARRL officials present), placing the ARRL Diamond logo on event literature and publicizing the fact that prizes given by ARRL are from the ARRL. I don't know about anyone else, but the exchange seems to be very fair to me. It is a win-win situation. You can read the rules at http://www.arrl.org/FandES/field/hamfests/rules.html.

This month, I want to make readers aware that I have established a simple, supplemental procedure I will follow before I sign off on sanctioning requests. This process is as follows:

1. When a sanctioning request is forwarded to me for approval, I will E-mail an appropriate person of the club sponsoring the event and ask them to confirm they understand and are complying with the guidelines. I offer to work with the club to reach mutually acceptable resolution to any areas in which compliance is not readily achievable.

2. As soon as I receive assurance from the club representative that they understand and comply with the guidelines, I send my approval to HQ for sanctioning the event. If there are issues that need to be addressed before approval is given, I'll work with the sponsors to find prompt, agreeable solutions to the issues.

This simple, 2-step process can be accomplished within 24 hours.

Why have I established this new process? I've attended dozens of hamfests/swaps/conventions throughout the Great Lakes Division during the nearly 4 years that I've been Director. Most of these events do a pretty good job of meeting ARRL guidelines for sanctioning. Unfortunately, a small number do not.

I do not judge the reasons a few events fail to meet the guidelines. My guess is that the people involved with them merely don't know about the guidelines. My objective merely is to help event sponsors meet these guidelines. Why?

It is unfair to allow organizers of some hamfests to fail to implement the guidelines when organizers of other hamfests make the effort to meet them. In exchange for this effort, sponsors who comply with guidelines receive publicity in QST and on the ARRL web site, prizes, the ability to have ARRL officials appear at the event and other

From: Joe Veldhuis
Topic: 1385 Message: 1388

Ernie, Jeff and I were talking about this very subject earlier. Here's a list of the check ins I've had over the course of the net, with approximate distances:

KD8ATU Joe - southeast of Grand Haven, MI - 0 miles
KC8DEI Mark - Grand Haven, MI - 7 miles
N8WVN John - Zeeland, MI - 14 miles
KB8QAP Jeff - Byron Center, MI - 19 miles
KB9Q Sherm - Big Bend, WI - 106 miles
KC9DOA Mike - Fond du Lac, WI - 128 miles
KC0HLN Jerry - Waterloo, IA - 320 miles

And of course, this is all without the use of repeaters.

From: Hank Greeb
Topic: 1381 Message: 1391

What frequency and location for a local 2 metre packet accessible DxCluster? I haven't fired up my 2 metre packet station since moving up to Rockford because I haven't heard much of anything about packet activity around here.

A side question: I'm going to a "four county corner" in Illinois about 20 miles SW of Champaign, Illinois. How would I find a DxCluster in that area? I'll be setting up a portable station, and could bring along a 4 element beam to mount on 20' or so mast, if there's any possibility of working into a packet cluster on 2 metres.

It appears from the coverage areas of Altell and Spring (two cellular services of which I could borrow a PC card for access to the internet) that this area is outside their normal coverage range. The fellow who set up at this place last year used satellite linkage for his internet access, which would co$t me a bundle to set up.

Hank:

I use the internet for dx spots. I once saw a two meter packet cluster, live, from Holland. I'd guess if you need a two meter cluster you're going to have to search the web. They must be out there somewhere.

There are folks who county hunt, lots. Maybe they can help answer your question. Or you could hook into one of them and ask them to feed you the packet spotting stuff when you are on location.

Bill, AB8SC

Good morning everyone! Hope you made it trough the storms last night fine.

The first Saturday of every month there is a ham radio get together at Samuel's restaurant in Fremont at 8:00am. It is open to anyone that is a ham, wants to be a ham, or even knows what ham radio is.

This month that will be this Saturday the 7th.

I hope to see you there!

1395. Michigan Section SET Guidelines for October7, 2007...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-03 22:04:38 UTC
From: Tom VanderMel
Topic: 1395 Message: 1395

...Just a reminder about the SET this weekend. Tom

Ladies and Gentlemen,

This is going out to all Michigan Section ARES/RACES/ARPSC Staff for some clarification on SET Operations to be held October 7.

First of all the SEOC will be active from 10 AM to 2 PM October 7. Your times can vary as much as you wish from this to suit the schedules of your people or operations. Just keep in mind the operations at the SEOC will be from 10 AM to 2 PM. Frequencies for usage will be 3.932 (3.663 CW - QMN), 7.232 (7.068 CW - QMN), 146.52 and 145.76 (Packet - WC8EOC or WC8EOC-3).

Scenario once again is a Statewide Blackout mirroring what some of us saw a little over two years ago in August of 2004. The first hour of operations will be with the advantage of using the local repeaters for communications. After one hour, all repeaters will simulate failure due to failure of backup power supplies such as Battery Backup, Diesel and gasoline and propane generators. The only generators that might not fail would be natural gas fueled generators which so long as the valves stayed open would run until the pipeline was exhausted. However for this test/exercise ALL forms of repeaters will fail for a minimum period of 4 hours of operation for this exercise. After 4 continuous hours of life without repeaters you can simulate a partial restoration of electrical services to key county components and infrastructure (you get to resume repeater usage).

All counties are encouraged to participate at some level. As always the rules laid down by the ARRL allow you to count other events as your SET for the year. We would still like to see each county participate at some level even if it is only one station.

Goals to be attained:

· Pass one message back and forth (one each way - TO and FROM) between your county and the neighboring county via simplex. This message can be very simple. EXAMPLE; 1 R W8??? 14 Somewhere, MI October 7 My County, MI Exercise Exercise Exercise X Our County is currently active and available during Blackout event Joe EC Our County, MI (You of course can be as creative as you wish and go well above and beyond this if you wish.)

· Pass one message to your DEC from each county in the District.

· Each District pass one message to the SEOC. (DEC's this message can originate with you or you can delegate this to one or two counties in your jurisdiction)

· Individual Counties who also have HF capabilities can also attempt to contact the SEOC via any of the above mentioned methods (HF, VHF or Packet). In this way you get some idea of propagation from your respective EOC's for that date. Remember that there is a 4 hour window to play with here. Obviously this is not a contest and the simple fact that 83 counties all trying at once to get into the SEOC would create havoc should be considered. As with anything of this magnitude, order and listening before hand can alleviate some of

the chaos.

· Utilize whatever means you have at your disposal to get the message thru to it's final destination. As soon as I know what the NTS schedule is for the day and frequencies, I or John WB8RCR will publish them.

· DEC's designate one county pre-event to generate a message for needed Mutual Assistance. This can also fulfill the previous item of DEC's sending a message to the SEOC.

· Messages should also be sent at the DEC's and/or the EC's discretion to the SM and STM indicating your participation

That should be simple enough and allows each and everyone in the state to have enough time to attain the goals set forth.

Purpose:

· To test simplex, packet and/or HF communications within each county (intra-county communications) and determine what holes or gaps need to be addressed for future operations

· To test simplex, packet or HF communications between each neighboring county (intra-district communications) and determine what holes or gaps need to be addressed for future operations

· To test simplex, packet or HF communications between districts (inter-district communications) and determine what holes or gaps need to be addressed for future operations

· To test simplex, packet or HF communications within the state (intra-state communications) and determine what holes or gaps need to be addressed for future operations

On another note, ALL EC's should with this coming Reporting Cycle September 1 - 5, 2006 (for August 2006 timeframe) report in the comments section your intentions for the SET. Make sure that your DEC gets a copy of this report so that they can plan accordingly.

Michigan has for many years led the way in the Annual SET reporting and participation. Let's blow the rest of the Sections out of the water this year. Remember that you have until the end of the year to report your participation to ARRL HQ. However, I suggest that all take the time immediately after the exercise to file the report so that it does not get lost in the shuffle. (Report Format can be found on the ARRL.org website and doing a search on 'SET'.)

As always, If there are any issues or questions, please contact me as soon as possible.

Marty Mendelson, N8MG

1396. set 2006

Yahoo group: WestMichiganHams (2006 — 2008)

From: Tom VanderMel
Topic: 1396 Message: 1396

All
This weekend is the SET. We will be on the Air Saturday from 10AM-2PM. At least get on the air. Tom KB8VEE DEC-6

2006 Simulated Emergency Test
October 7 - 8
The ARRL Simulated Emergency Test is a nationwide exercise in emergency communications, administered by ARRL Field Organization Leaders including Emergency Coordinators, District Emergency Coordinators, Section Emergency Coordinators and Net Managers. Many other Section Leaders like the Section Manager and the Section Traffic Manager may have a hand in planning the exercises and/or reviewing the results. Amateur Radio Emergency Service (ARES), National Traffic System (NTS), Radio Amateur Civil Emergency Service (RACES) and other public-service oriented groups can be involved. The SET weekend gives communicators the opportunity to focus on the emergency-communications capability within your community while interacting with NTS nets. Although the main SET weekend this year is October 7 -8, local and section-wide exercises may be held throughout the fall season.
During September, the ARRL will be among dozens of organizations and agencies taking part in National Preparedness Month. "The Ready Campaign," produced by the Ad Council in partnership with the US Department of Homeland Security (DHS), is aimed at making citizen preparedness "a priority for every city, every neighborhood and every home" in the US. The ARRL encourages you to consider this year's Simulated Emergency Test and preparations for it as a demonstration of Amateur Radio's readiness and as an active participant in National Preparedness Month. http://www.ready.gov/,
http://www.ready.gov/npm/index.htm
Purpose of SET
1. To find out the strengths and weaknesses of ARES, NTS, RACES and other groups in providing emergency communications.
2. To provide a public demonstration--to served agencies such as the American Red Cross, the emergency management agency and through the news media--of the value to the public that Amateur Radio provides, particularly in time of need.
3. To help radio amateurs gain experience in communications using standard procedures and a variety of modes under simulated-emergency conditions.
Format
The scoring format reflects broad objectives and encourages use of digital modes for handling high-volume traffic and point-to-point Welfare reports out of the affected simulated- disaster area. Participants will find SET an opportunity to strengthen the VHF-HF link at the local level, thereby ensuring that ARES and NTS are working in concert. The SET will give all levels of NTS the chance to handle exercise-related traffic. The guidelines also recognize tactical traffic on behalf of served agencies.
Test messages should carry the word "TEST" before the precedence; that is, "Test Priority" on phone and "TEST P" on cw. The text of such messages should also begin with the words "TEST MESSAGE."
ARES units and other groups are free to conduct their emergency exercises anytime between September and December if an alternative date is preferred. The activity period should not exceed 48 hours.

Links to SET reporting forms and the EC Annual Report may be found at http://www.arrl.org/FandES/field/forms/. You may e-mail your SET summaries to ARRL Headquarters via sewald@.... If you mail them to ARRL via the postal service, the address is: ARRL Headquarters, 225 Main Street, Newington, CT 06111-1494. January 31, 2007, is the receipt deadline.

Preparation is Important

Steps for the Emergency Coordinator

1. Sign up all available amateurs in the area under your jurisdiction and work them into your SET plans.
2. Call a meeting of all ARES members and prospective members to briefly outline (no details!) SET activities, and give general instructions. Do not divulge the exact time or nature of the test to them at this time. This should come as a surprise. Take this opportunity to register new ARES members and get up-to-date information on others. Hold an on-the-air meeting if it's not possible to meet in person.
3. Contact served agencies and explain the intent and overall purpose of the SET. Offer to send test messages to other branches of their agencies, and invite officials to your ARES meetings and SET operating sites.
4. Contact officials of any adjacent communities having no active amateurs and offer to provide representation in amateur networks for them as well.
5. Arrange publicity in consultation with an ARRL Public Information Officer in local newspapers and radio/TV stations by preparing an announcement and/or inviting the press to observe your group's SET operation.
6. Set up liaison with one or more NTS local/section nets (if you don't already have liaison) so you will have an outlet for all messages out of the local area.
7. Formulate your plans around a simulated disaster. Possible "plots" include: a flood, a serious fire, an ice storm, a missing person, a serious accident (automobile, bus, aircraft, for examples), a broken gas line, and so forth. Elaborate on the situation by developing a scenario, but please be realistic.

During the SET

1. Announce the emergency situation. Activate the emergency net. Dispatch mobiles to served agencies.
2. Have designated stations originate messages on behalf of served agencies. Test messages may be sent simulating requests for supplies. Simulated emergency messages (just like real emergency messages) should be signed by an authorized official.
3. Emphasize tactical communications for served agencies.
4. As warranted by traffic loads, have liaison stations on hand to receive traffic on the local net and relay to your section net. You should also be sure that there is a representative on each session of the section net to receive traffic going to the local area.
5. Operate at least one session (or substantial segment of a session) of the local net on emergency-only basis. Or, if a repeater is on emergency power, allow only emergency-powered stations to operate through the repeater for a certain time period.

After the SET

An important post-SET activity is a critique session to discuss the test results. All ARES (and RACES) members should be invited to the meeting to review good points and weaknesses apparent in the drill. Emphasize ways to improve procedures, techniques, and coordination with all groups involved. Report your group's effort using the appropriate forms and include any photos, clippings and other items of interest.

The Role of NTS

The main function of the National Traffic System in an emergency situation is to tie

together all of the various local activities and to provide a means by which all traffic destined outside of a local area, section or region can be systematically relayed to the addressee.

Normal NTS routing should be followed. A valid exception is the handling of emergency traffic that should be routed as rapidly and efficiently as possible, bypassing various levels of nets when delivery can be expedited. Another exception is when one station is loaded down with traffic for one region or section. At the discretion of the Net Control Station (NCS), the station may be directed to bypass a normal channel and go directly to a lower (or higher) echelon net.

The interface between NTS and ARES lies in the liaison function between local nets and other NTS nets, particularly at the section level. Responsibility for representation of the local network on the section net lies with the local net manager who may or may not be the EC. Although we usually think of ARES members being the representatives in section nets, it is equally valid to expect NTS personnel to act as liaison to local nets.

At least one net session or substantial segment of a session should be conducted on emergency power. Plan a surprise session or two. Advise the NCS just before net time. If NCS is unable to operate on emergency power, then someone else must be net control. Only stations operating on emergency power may report in during this time.

Summary

One of the first steps on the way to a successful SET is to try to get as many people involved as possible, and especially new hams. In a real emergency, we find amateurs with all sorts of varied interests coming out of the woodwork. Let's get them involved in SET so they will know more about how emergency communications should be handled. Promote SET on nets and repeaters, and sign up new, enthusiastic radio amateurs. Many of those offering to help will be inexperienced in public-service activities. It's up to you to explain what's going on to them, and provide them with useful roles. They may like it so much that they become a permanent fixture in your ARES or NTS group. For a review of last year's nationwide Simulated Emergency Test, read the article in July, 2006, QST. Thanks to your efforts, the public service tradition in Amateur Radio continues!

we need at least 10 people to help with the spring lake homecomming parade at this time we have 5 this event starts at 5:00 pm at the spring lake village hall (EOC) the parade starts at 6:00 and should be over By 6:30 7:00 at the latest its is just your basic block traffic untill the kids and band passby . just 2hrs of your time for a good cause THE KIDS. I know that if you have kids you would want them to be safe thats what we are trying to do. we might get the job done with 5 people but that cuts down on the saftey .So For the kids please volnnter . Thanks and 73 KC8UNY

1402. Great Lakes area 2 meter MFSK16 net - 8e/7c tonight

Pass this on to all Hams please

Well it that time of the year again, and unless you have been under a rock or stuck in a cave with no internet access you can't miss that we again are putting on a hamfest. We are coming down to the wire, and the tables are selling out. We now have less then 50 available! So if you want a space please contact us at HYPERLINK "mailto:swap@..."swap@....

Also next Saturday, 9 am at the Tech and training center we will be having swap meeting. All of those wising to help out are encouraged to attend.

Thank again for all of those have helped out so far this year, and let's have a great time this year again.

John Hanse

From: Jack Amelar
Topic: 1414 Message: 1414

Reminder, the October meeting of the Lowell Amateur Radio Club (LARC) will take place at the Morley receive site. This is part of a weekend long campout, grounds cleanup, play radio, etc. beginning Friday, October 13 to Monday, October 16. The monthly meeting at the usual time of Saturday 10AM. All are welcome, stop by during the meeting or any other time, or come out for the weekend.

The Morley receive site is owned by T&W Electronics on 10 rural acres. Among the commercial stuff, the LARC 145.27-(94.8Hz) repeater has a remote 144.67 receiver. Part of the deal is we maintain the grounds. This time, we decided to make a weekend outing of it.

The tower is at +- 3750 155th Ave, Morley, about 1/4 mile south of 4 Mile Rd. TI: 145.27-(94.8Hz) or cell phone (616)558-8046. If you have any questions, see the contact information below.

According to the weather, the worst of the nasty stuff should be past by the end of Friday with partly sunny highs in the 50s for Saturday and Sunday.
In case anyone is wondering, the neighbors are being informed by mail of our presence.

All

We lost a great one in Tom Fischer K8OOO. We all know he was a giving person. 73 Tom KB8VEE

Thomas H. Fischer K8OOO

Thomas H. Fischer died October 7, 2006, after giving up a valiant fight with cancer.

Click to enlarge

Thomas H. Fischer was born on April 23, 1942, to Kermit and Jean (Peterson) Fischer in Saginaw, Michigan. The Fischer family moved to Spring Lake in 1945.

Tom graduated from Grand Haven Senior High School in 1960 and also from Aquinas College in 1983. He ran Lakeside Auto Inc. from 1967 until 2005. He had also worked as a part-time policeman for the city of Grand Haven and as a full-time policeman for three years for the Village of Spring Lake. He was a member of Spring Lake Presbyterian Church.

Tom had an avid interest in Spring Lake and its well-being. He was a Spring Lake Village councilman for the past 20 years until his illness forced his retirement. He enjoyed researching the history of the village and shared his knowledge with his fellow council members.

He also enjoyed collecting postcards of the Tri-Cities area, but focused on Spring Lake Village. He would share his pictures by showing them at the area Senior Centers. Tom was also a member of the North Ottawa Amateur Radio Club.

Tom is survived by his brother, David (Julia) Fischer of Spring Lake; a nephew, John (Linda) Fischer of Grand Haven; a niece, Lynne (Gary) James of Grand Rapids; and a great-niece, Caitlyn James, and great nephew, Austin James, also of Grand Rapids.

Arrangements for a memorial service will be announced at a later date. In lieu of flowers, memorials may be made to Hospice of North Ottawa Community, http://www.noch.org/hospice.html, or to Spring Lake Presbyterian Church.

Share memories with the family at their online guest book at www.vbkfuneralhome.com.

VanZantwick Bartels Kammeraad of Spring Lake is handling arrangements.

1416. NEW LAW FORMALLY MAKES AMATEUR RADIO PART OF EMERGENCY COMMUNICATIONS

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-09 20:08:59 UTC
From: Hank Greeb
Topic: 1416 Message: 1416

==>NEW LAW FORMALLY MAKES AMATEUR RADIO PART OF EMERGENCY COMMUNICATIONS COMMUNITY

A section of the Department of Homeland Security (DHS) 2007 Appropriations Act, HR 5441 <http://thomas.loc.gov/cgi-bin/bdquery/z?d109:h.r.05441:>, formally includes Amateur Radio operators as a part of the emergency communications community. Congress approved the measure before adjourning for its pre-election break. President George W. Bush signed the bill into law October 4.

Amateur Radio is included within the legislation's Subtitle D, Section 671, known as the "21st Century Emergency Communications Act." Radio amateurs are among the entities with which a Regional Emergency Communications Coordination Working Group (RECC Working Group) must coordinate its activities. Included within the DHS's Office of Emergency Communications -- which the measure also creates -- RECC Working Groups attached to each regional DHS office will advise federal and state homeland security officials. The final version of the legislation incorporated language from both House and Senate bills and was hammered out in a conference committee. An earlier version of the 21st Century Emergency Communications Act, HR 5852, included Amateur Radio operators as members of the RECC Working Groups.

In addition to Amateur Radio operators, RECC Working Groups also will coordinate with communications equipment manufacturers and vendors -- including broadband data service providers, local exchange carriers, local broadcast media, wireless carriers, satellite communications services, cable operators, hospitals, public utility services, emergency evacuation transit services, ambulance services, and representatives from other private sector entities and nongovernmental organizations.

The RECC Working Groups will assess the survivability, sustainability and interoperability of local emergency communication systems to meet the goals of the National Emergency Communications Report. That report would recommend how the US could "accelerate the deployment of interoperable emergency communications nationwide." They also will coordinate the establishment of "effective multi-jurisdictional, multi-agency emergency communications networks" that could be brought into play in an emergency or disaster.

In light of the new legislation, the ARRL plans to follow up to determine how it can interact with the DHS and its Office of Emergency Communications.

1420. Call for papers, 21st Annual SWOH Digital Symposium, Saturday, January 13, 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-10 15:34:42 UTC
From: Hank Greeb
Topic: 1420 Message: 1420

This is the call for papers for the 21st Annual SW Ohio Digital Symposium, held at Miami University, Middletown Campus, Middletown OH, on Saturday, January 13, 2007.

Topics concerning any form of digital communications are encouraged, we've even had a presentation about the use of semaphores in 18th century France - which at the time was the fastest means of communications, far faster than any other means of communications.

For an idea of the topics which have been presented at recent symposia, see http://www.swohdigi.org

For further information, contact Jay Slough, K4ZLE, <k4zle@...> or Carl Morgan, K8CM, <K8CM@...>

And to think he only took the test last Saturday the 7th in Muskegon.

I don't know what the "secret" is but it seems that whenever we give tests
in Muskegon the successful ones appear in the FCC database the first part of
the next week.

Congratulations again Joe.

Or not. Brought the page up in my other browser and it shows Extra. That was certainly faster than what I expected.

Could be KD8ATU the VE as well - something to consider if you're interested, Joe! Awesome job on that test.

From: Chris Schulte
Topic: 1433 Message: 1433

Hi all,
I really hate using an e-mail list to beg for transportation, but I wish to attend the steak fry for the MAARC on saturday, and I don't have a ride. Could someone possibly pick me up and drop me off? If there's anyone who can help me out, you can either e-mail me off list at ab8wo2006@..., or you can call me at 215-1919
Thanks again,
Chris Schulte

1435. Steak Fry Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-11 21:54:56 UTC
From: Bill Fries
Topic: 1433 Message: 1435

All:

You are invited to an old fashioned Steak Fry on Saturday at 5:00 pm at the MAARC Clubhouse, 2888 Scenic Drive. All folks with a taste for steak are invited.

Cost is $6.50. Menu is Steak (New York Strip), baked potatoe, salad, and dessert. If you would like you can bring along a dessert to share.

We'll have fun. Bring a guest or three.

Bill, AB8SC
pres of radio club

1437. Re: [WestMichiganHams] Steak Fry Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-11 23:04:38 UTC
From: Bill Fries
Topic: 1433 Message: 1437

Chris:

There are many ways to get out the word surrounding an event. Certainly asking for a ride is a great one. Tonight I made a targeted appeal to a single ham to invite him and others to enjoy the steak fry. The more you get to know me the more you'll probably find that I'll be a little obtuse when trying to find support for something. I think it beats the direct, just the facts, approach.

We hope to see everyone there for this fun event.

Bill, AB8SC

1439. ARLB019 FCC releases long-awaited "Omnibus" Amateur Radio Report and Order

SB QST @ ARL $ARLB019
ARLB019 FCC releases long-awaited ''Omnibus'' Amateur Radio Report and Order

ZCZC AG19
QST de W1AW
ARRL Bulletin 19 ARLB019
>From ARRL Headquarters
Newington CT October 12, 2006
To all radio amateurs

SB QST ARL ARLB019
ARLB019 FCC releases long-awaited ''Omnibus'' Amateur Radio Report and Order

Ending a protracted waiting period, the FCC's Report and Order in
the so-called ''Omnibus'' Amateur Radio proceeding, WT Docket 04-140,
was adopted October 4 and released October 10, 2006. In it, the FCC
adopted nearly all of the proposed changes in the Notice of Proposed
Rulemaking released back in 2004. The FCC has:

+ expanded the phone subbands in the 75 and 40 meter bands;

+ permitted auxiliary stations to transmit on portions of the 2
meter band;

+ permitted the use of spread spectrum on 222-225 MHz;

+ permitted amateurs to retransmit communications from the
International Space Station;

+ permitted amateur licensees to designate a specific Amateur Radio
club to receive their call sign in memoriam;

+ prohibited an applicant from filing more than one application for
a specific vanity call sign;

+ eliminated certain restrictions on equipment manufacturers;

+ permitted Amateur Radio stations in Alaska and surrounding waters
more flexibility in providing emergency communications;

+ clarified that ''amateur stations may, at all times and on all frequencies authorized to the control operator, make transmissions necessary to meet essential communication needs and to facilitate relief actions'';

+ deleted the frequency bands and segments specified for RACES stations;

and

+ deleted the requirement for public announcement of test locations and times.

In addition, the FCC took several other miscellaneous actions.

In ''refarming'' the frequencies currently authorized to Novice and Technician Plus licensees, the Commission increased the voice segments for General, Advanced and Amateur Extra licensees.

On 75 meters, Generals will be able to use voice from 3800-4000 kHz, an increase of 50 kHz. Advanced class licensees will be able to use voice from 3700-4000, an increase of 75 kHz, and Amateur Extras will be able to use voice from 3600 to 4000 kHz, a generous increase of 150 kHz.

On 40 meters, Advanced and Extra Class licensees will be able to use voice from 7125-7300 kHz, an increase of 25 kHz. General class licensees will be able to use voice on 7175-7300 kHz, an increase of 50 kHz.

On 15 meters, General class operators will have phone privileges on 21275-21450 kHz, an increase of 25 kHz.

ARRL President Joel Harrison, W5ZN, expressed the ARRL's gratitude to the FCC Commissioners in a letter dated October 11: ''On behalf of the ARRL and the Commission's licensees in the Amateur Radio Service I want to express appreciation for your release yesterday of the Report and Order in WT Docket 04-140 (FCC 06-149) amending Part 97 of the Commission's Rules. The Commission's action in clearing this pending proceeding will assist the Amateur Radio Service in meeting its objectives, particularly with regard to providing emergency and public service communications.''

The changes will go into effect 30 days after the R&O is published in the Federal Register.

I gather that MAARC is Muskegon Area Amateur Radio Council? That 2888 Scenic Drive is 2888 Scenic Dr, Muskegon, MI 49445. For a newbie in the area, I looked up MAARC as an acronym and found Mid Atlantic Antique Radio Club, which I knew wasn't correct. Is there a discount for kids age 6 and 9?

If we're coming from the Grand Rapids area, how late can we arrive and still find some food? It might be hard to make it by 5 p.m., due to traffic and work schedules.

Yes, the MAARC is the Muskegon Area Amateur Radio Council, the radio club in Muskegon.

The address is 2888 Scenic Drive, Muskegon, MI. We have a P.O. Box but don't generally hold any functions there.

The www site is hosted by some friendly hams who give us space on their server. In exchange we try to keep it current but the hosting organization will sometimes, and without warning, change around our site, drop parts, or suffer a disaster and restore our site to its state a few months before. You get what you pay for.

Directions? From US 31 at Highway M-120 exit and go toward North Muskegon. Just past the said intersection is an unmarked and "major" roadway intersection. Take this to the right (north) as this is River Road. If you find yourself driving past the Meijer's gas station you missed the road and you're going to turn around. This little stretch of roadway would take you into the antique store and dentist's office complex. Inside of a half mile the road curves to the west and now you are on the formal River Road and heading west toward Lake Michigan.

Stay on River Road for what will feel like ten miles and go through a four way stop, across a railroad track (yes, this is a stop, too), through a stop light (don't go north nor south here) and stay west. Eventually, and this is the ten miles part, you find yourself at a tee intersection at Scenic Drive. Drive through and west, down a private driveway, and you'll get your car wet in Lake Michigan. At the tee turn right and north while watching your odometer. Eight tenths of a mile up you'll find the clubhouse's sign, address, and two track driveway to the east (right). If you were looking on the west side of the road you would see Moby Dick, the white whale, sign. Turn here on the dirt drive and not on the more inviting gravel driveway. You're there! Missed the driveway? Turn around in the parking lot of the Red Rooster.

We will extend a kid's price for the dinner.

Since we are planning for sixty folks to enjoy the event it may be unlikely that they will all be comfortably served close to the 5:00 pm start. I'd bet that we'll still be cooking steaks up to 6:00 or later.

We'd love to have everyone enjoy the event.

Bill, AB8SC

Hello Hank,
Yes we will discount for the kids. I as for time I will be the one cooking the steaks and as long as the charcoal holds out I won't turn anyone away. We are thinking about starting to serve about 5pm if you let me know about when you might be there we will waite for you plus I can put your steaks on the grill when you get there.

1453. Steak Fry a BIG Hit

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-15 14:21:33 UTC
From: Bill Fries
Topic: 1448 Message: 1453

All:

Thanks to all who came out to the clubhouse and enjoyed the steak fry. Tom, W8AMZ did a wonderful job grilling steaks. He did not do the dinner by himself and I'll issue a blanket thanks to all who helped. It sure was great to sit around and shoot the breeze with many of our friends in the radio community.

Around the clubhouse, somewhere, is a home movie of a steak dinner at the clubhouse from years ago. A tradition worthy of the "old guys," for sure!

If you're kicking yourself for having dinner elsewhere, the reprieve dinner will be the totally awesome Harvest Dinner in early November.

Stay tuned.

What is the least expensive way to be able to operate on 6 meters?
My recently inherited FT-101ex has the option to add a FTV-650B 6 meter transverter.Good luck finding one?? Other ways to get on 6 meters(not FTV-650B transverter)?

It shouldn't be too hard to find one of those on ebay for a lot less then you'll probably pay for a brand new six meter all mode rig or something that has six meters in it. Other then that, you might be able to get something inexpensive off of qrz, or through the arrl for sale listings.

All:

I can get you on six meters for $25. That is the cost of a membership in the MAARC. This club has a rig, tower, and beam dedicated to six meters. The beam is up at least forty feet. I have never operated this rig but you have all modes all over the six meter band.

Makes joining a real benefit?

Bill, AB8SC

1460. Re: 6meter

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-16 20:47:25 UTC
From: Bill
Topic: 1454 Message: 1460

Chris:

If transportation is the only hurdle then I'd have to guess that the problem can be managed. I would guess that hams near your home can be asked to share the driving responsibilities. I'd be willing to help get you to a fair number of events. These rides from me are offered during the winter when I am a lot less likely to ride my motorcycle to a meeting.

It was a pleasure to get you to the clubhouse last Saturday afternoon. To be honest, I forgot that you needed a ride back home and was initially surprised when Barney offered to give you a lift. Hi

I was thinking I should give you a ride to the December meeting when we vote for the next year's leadership. But I remember I will be the outgoing president and that position does not need a vote or two. If I were running for something it would be good to give you a lift, review your vote, and, depending upon the outcome of the review, see how you get back home.

It might be a safe bet that you can find rides to about all the ham related events. A little bit of a complication, but nothing insurmountable.

Bill, AB8SC

Darn Bill, I was kind of hoping to figure out how to put me and Riley on the back of your motorcycle. *chuckle* If nothing else, she can ride on the back and you could tye me behind it and I'd have to run to keep up.

1463. Hoffmaster Trail Run - Help Needed

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-17 00:14:30 UTC
From: Dennis Harriss
Topic: 1463 Message: 1463

Once again it is time for us to help out with the Hoffmaster Trail Run.

The run will be held at Hoffmaster State Park in Norton Shores on Saturday November 18, 2006. In previous years the race itself started at 10AM. Due to the distances we have to travel to get in position we will be starting an hour earlier at 9AM. The event will run no later that Noon.

I am looking for at least 12 people to help me. Once again we will be using a portable repeater supplied by AB8AZ.

If you can help contact me at n8ctt@... or my cell phone 231-670-1284.

Denny N8CTT AEC/DRO Muskegon County
n8ctt@...

1464. Illinois QSO Party, 1700z oct 22 thru 0100Z Oct 23

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-17 04:39:31 UTC
From: Hank Greeb
Topic: 1464 Message: 1464

Reminder, the Illinois QSO Party starts next Sunday, 1700Z October 22 and ends Monday, 0100Z October 23. A nice "8 hour sprint." All counties within Illinois should be represented during the party. Rules and other information can be found at http://www.w9awe.org/ILQP2006.html

Suggested CW frequencies are 50 KHz from the bottom of the bands, 3.5 thru 28 MHz, and 3890, 7290, 14290, 21390, and 28390 KHz. for phone.

I'll be operating portable from the corner of CHAMpaign, DOUGlas, EDGaR, and VERMilion counties, as N9Q. A pictorial QSL card will be available for #10 S.A.S.E. to N8XX.

There's a slightly different "spin" to this contest - folks who contact a station who is operating from a 2, 3 or 4 county intersection may claim 2, 3 or 4 contacts, and 2, 3 or 4 multipliers. Therefore, if you contact N9Q you'd get 4 qso points, and, if you hadn't contacted any of the four counties listed above before this contact, you'd get 4 multipliers.

Though I haven't got my microphone talking to my rig yet (last time this happened was perhaps 10 years ago), I'm going to try to operate some SSB as well as CW.

This will be my first adventure in the ILQP. I'm praying that 40 meters has short skip during the early afternoon. Look for N9Q on 7045 KHz ? during the afternoon and 3545 KHz ? after about 2200Z. If I get my microphone working with my rig, I'll be on 7285 KHz ? off and on during the day, and 3885 KHz ? during part of the evening hours.

73 de n8xx Hg (operating as N9Q at CHAM/DOUG/EDGR/VERM during the upcoming ILQP)

1466. Use the Clubhouse Shack!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-17 12:28:38 UTC
From: Bill Fries
Topic: 1454 Message: 1466

Paul and Others:

The club welcomes folks like you to use the clubhouse's assets. They want the rigs humming along as much as possible.

To gain access you might start with a board member. The secretary handles the keys and loans same to members.

To use the rigs you will need a little training in which switches work which rigs and antennas and how you plug in all the items. It really takes only a minute. Also there are some issues with weather and the comfort in the clubhouse. Again routine and easily handled.

Once you know the lay of the land you can then get on the air. You are the control operator and can go anywhere your privileges allow. A Tech? Right now the VHF and UHF rig is only receiving as the antennas are showing too high SWR. There is the six meter option I mentioned earlier. It works great.

General or Extra? The clubhouse has a wonderful shack. You can go anywhere you want using your privileges. If you are hosted by an extra or general ham you can use the club call sign, W8ZHO to work anyone anywhere with those privilages.

The shack has a paper log and you need to log all RF out. It is easy, and again takes only a minute.

There are times when the shack is managed and visitors are invited. These times coincide with club meetings, board meetings, and will also be this weekend with JOTA and sweeps in November.

The rigs are there for your use and pleasure. Use them! I have successfully used these assets to score DX which I consider quite rare. Fun.

Bill, AB8SC

1469. Microphone compatible with Drake TR-7 Needed in a hurry

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-18 18:46:57 UTC
From: Hank Greeb
Topic: 1469 Message: 1469

My microphones seem to not work with my rig. Last time I used them was about 10 years ago, at least one of them was working, but now one doesn't do anything at all (except turn on the rig with a PTT switch), and the other must have a fault because it causes a loud hum.

Does anyone in the assembled multitude have a Drake microphone in their junk box with which they'd part, either for a nominal $$ amount or for a loan for this coming weekend? I'll be operating in the Illinois QSO party (N9M) and a few SSB Q's might liven up the party. Primary operations for state QSO parties seems to be on CW, because mobiles and rovers can be heard better with that mode, but when CW gets into a lull, I'd like to try SSB.

Between now and the flood of replies I'll be experimenting with some microphones from my junque box which are surplus from some defunct FM Rigs, but since my familiarity with voice gadgetry such as mikes is obvious from the fact that I've not operated on Phone for some 10 years, I'm not holding my breath.

Any help would be appreciated.

Subject: [WestMichiganHams] Aircraft on 20 meters

I just heard an aircraft on 14.300 that was not an amateur station.

The aircraft ID'd itself as 775 Papa Tango and was asking if the station they were contacting was a ship. They acknowledged that they were on "Fourteen thousand three hundred". I got a recording of some of it.

Anyone else hear it?

Oddly it was during the Maritime Mobile Net. The net was in progress, faded away and this aircraft came on, then the aircraft faded away (I have that recorded) and the net came back very strong.

Weird??

I have heard some interesting stuff on 14.300. I listen to that frequency a lot .
No Problem about the links . I found out about the links while tracking ships around the world . I got into tracking ships by a fellow I talked to while working the birds .

Link for tracking ships around the world .
http://www.sailwx.info/shiptrack/shiplocations.phtml

I do not have anything else to do but surf the web and listen to the radios .

Thanks for the links.

As far as I know 14.300 is exclusively for amateur use. I don't think 775 Papa Tango is an amateur call sign. This did not appear to be part of the net, but going on at the same time. QSB took them out.

73,

Mark

Al:

Thanks for the reply. Your diagnosis was almost congruent with my first diagnosis, I'm at least 99.44% sure that the microphone is wacky. It didn't work when I bought the TR-7, which didn't bother me because I typically operate Corn Whisky. I should have diagnosed the problem 3 or 4 years ago when I got the rig, when I had time, but..... As one of my training supervisors in one of my first jobs said "P)rior P)lanning P)revents Blank P)oor P)erformance, you fill in the blank." :)

It's a Drake desk mike. It has a dynamic element with a small transformer inside the case to transform the impedance of the microphone to the input impedance of the rig. I know it worked for 20 or so years at a radio club in Ohio, because I used it there. The club was going to sell the rig on open market, so I was first in line.

I resurrected my TR-5 backup rig, and the same problemme exists.

I'm sure that with sufficient time, and after I find a temporarily misplaced owners manual, I'll be able to resolve the situation. But, I'm leaving this area Saturday, and my computer to rig CW keying circuit was having a problemme which was taking 10 times longer than it should have to resolve. I'm just out of time. Phone is a small part of most folks' ILQP effort, so right now I'm forgetting about it.

But, if anyone has a spare drake microphone within 50 or so miles of Rockford, I'd be delighted to either borrow it or buy it for a nominal amount.

From: John Wehmer
Topic: 1479 Message: 1479

Ed Sick, a dealer in Tactical Clothing and Load Bearing Equipment (among other things) will be at the Holland Radio Club Hamfest this Saturday.

Ed's equipment should be of special interest to SAR types.

From: Jim KC8PCJ
Topic: 1480 Message: 1480

FYI
Heres a copy of text from one of my other yahoo groups. any one interested in cw practice may be interested.

No, there is no CW practice mode in the FT847 but if you have a computer with a sound card then Alex's/VE3NEA freeware, a program called Morse Runner, is what you can use and it is one heck of a CW practice program to include QRM/QRN, etc.

Take a look at his site:

http://www.dxatlas.com/MorseRunner/

1481. Fw: Free CW Course on CD

Yahoo group: WestMichiganHams (2006 — 2008)

From: T Behler
Topic: 1481 Message: 1481

Jim and all:

Below is another link to a great CW practice tool that we have had some success with here in the Big Rapids area.

Also, let me put a plug in for a weekly CW practice net that I run on the Big Rapids 146.74 2-meter repeater. The Big Rapids repeater has the standard negative off-set, and no PL. The class runs every Monday night from 8 to approximately 9:15. We will run the class through Monday: December 4.

Right now, we are finishing up the last of the letters, and will soon get into numbers, pro-signs, and other goodies. We eventually will work our way into call signs, and qso segments like you'd find on a VE code exam.

The code is sent via the Farnsworth method, at a 15 WPM character speed, and 5 WPM sending speed.

Anyone is welcome to join us.

From the DAPR Website

On Nov 4, we will be having two packet classes!!!!!! First one is Intro to packet which starts at 9:30am and ends around 11:30. Second one is Advance packet which starts 12:30pm till 3pm or 4pm. Please bring your packet stations if you need any help with them. There will be many people there that will be able to help you with all of your problems.....

Place Grand Rapids Red Cross chapter.
1050 Fuller Av. Grand Rapids, Mi.

open to all

Here's the Directions on how to get there!

* From Lansing - Take I-96 West towards Grand Rapids. Exit I-196 West into downtown Grand Rapids. Exit at Exit 79 (Fuller Ave) and turn left. Turn left onto Michigan St and look for New Beginnings on the left hand side.
* From Kalamazoo - Take US-131 North to Grand Rapids. Take I-196 East towards Lansing. Exit at Exit 79 (Fuller Ave) and turn right. Turn left onto Michigan St and look for New Beginnings on the left hand side.

From: Tom VanderMel
Topic: 1486 Message: 1486

One last remider for the BIG Hamfest this Saturday.

Great Lakeshore Super Swap
http://www.hollandarc.org/?page_id=22

Doors open at 8:00AM

The Great Lakeshore Super Swap is October 21,2006 at The West Ottawa South Campus, 3600 152nd Ave. Holland, Mi.
GPS Coordinates
N. 42.49.987
W. 086.09.361

More information call John Hanse at 616-836-3737, or email to swap@hollandarc.org

Tickets and tables call Sue at 616-394-9821.

FORUMS-Time & Locations

A) 08h30: Morning Worship-Room 112

(B) 09h00 - 10h00 : ARRL Michigan Section Digital Radio Group, presented by Jay Nugent WB8TKL - Cafeteria Area

(C) 10h30 - 11h30 - ARRL Forum, all encouraged to attend (Subject to be announced) - Cafeteria Aea.

(D) 11h00 - 12h30 NAVY Marine MARS (All other MARS also welcome to attend). Room 104

(E) 11h45 - 14h00 - ARRL Meeting (Classroom as signposted on the day).
This ARRL Meeting is for the Michigan Section ARPSC Staff (DEC,ADEC and above).
Room 104

(F) 12h00 - 13h00 - Great Lakes Emergency Traffic Net by Jack WA8IAL (in Cafeteria)

(G) 09h30-VE Testing sign in. Testing will start at 10h00. Any questions email Jim kc8ke@arrl.net

Also- if the FISTS group has a booth at the Holland Swap, they have had this code course burned on CD with them in the past. Stop by their booth, and chat. They are good folks.

PS- if they are there, you might just be talking to the editor of World Radio Magazine, Nancy Kott, WZ8C.

Sent: Friday, October 20, 2006 4:16 PM
To: QMN@yahoogroups.com
Subject: [QMN] ARRL Opinions

As if to add salt to the wound, I received the following quote from an ARRL newsletter issued a few days ago that has this to say:

"The NTS system exhibits the classic problem of modern technology marching ahead and around NTS, leaving it as a curious anachronism in a world of cell phones, instant messaging, and VoIP. NTS was originally conceived as a solution to sending messages across great distances in times of disaster and emergency. Amateur Radio still fulfills the need of alternative communications when other communications infrastructure is overloaded or inoperative. But we need to do this in a new environment of structured emergency response. -- Bill Burden, WB1BRE [Bill is former ARRL New England Division Director and New Hampshire Section Manager]"

Burden's comments are reflective of our nation's lost ability to engage in intellectually sound reasoning and reasoned debate. Why? Any attempt to compare Amateur Radio to multi-billion (or multi-trillion) dollar commercial resources is largely moot. Reread the comments of this clown, and one quickly realizes one simple fact: If the Internet (VoIP), cell phones, and instant messaging infrastructure are in place, there is no need for Amateur Radio at all. The differences between CW, NTS, WINLINK, and so forth are therefore moot.

The fact is, Amateur Radio has never been a primary communications resource. Back in the 1950s, when Western Union could send 20,000 messages a minute, Amateur Radio couldn't compete. Amateur Radio has never offered an equivalent service to Ma Bell or any other large common carrier. Yet, somehow, comparing NTS to the Internet and cell phones has become fashionable!

These comments show how some in the ARRL have become deluded by mass-media hype and advertising culture, which promote the Internet and cell phones as the be-all and end-all of the human experience. I've got news for Bill: WINLINK, PACTOR III, HF-SSB, and Two Meter FM can't hold a candle to the Internet or the public switched telephone network either!

Bill speaks of the need of "alternative communications." One can only assume this is a code for new digital methods. If so, then why did the recent Report and Order expand SSB Voice operation at the expense of new technology? Obviously, here we have an example of actions not matching words, which means only one thing: a hidden agenda.

Bill speaks of a need for structured emergency response. What exactly does this mean? NTS offers a standardized message format with outstanding standardization, accountability, and transferability between networks and modes; a format that has much in common with the standardized formats required on many government circuits and is equally applicable to an e-mail as it is to a CW net. As NTS has been first ignored and then rejected by many in the EMCOMM community, emergency managers have been seeking alternatives to Amateur Radio primarily because Amateur nets are becoming increasingly undisciplined and informal. Now, NTS is being blamed for the actions of those that refuse to utilize it or its methods?

Apparently, Bill either doesn't monitor the various non-NTS nets that are often selected for EMCOMM work (because they require no knowledge or skills), such as the abysmal 20-meter phone nets with their slow, laborious messages, inaccurate information exchanges and multiple repeats of information ad-museum because no standardization is present. Apparently, he doesn't listen in on many of the VHF-FM nets where stations are incapable of using even a basic phonetic alphabet and information is garbled on an almost minute-to-minute basis. Perhaps Bill just chooses to be in denial.

If NTS is obsolete, then the informal methods preferred by the inexperienced and uninformed are just as doomed. You can sit one of the later operators in front of an e-mail terminal and they will still garble, loose, and fail to properly track EMCOMM traffic.

Bill ..it's not the mode, it's the operator.

Enough said .you can't teach a pig to sing. It wastes your time and annoys the pig. The events of the past week have made up my mind for me. The only hope for NTS is to tell the League to get lost and start a separate organization that speaks for itself. Heck, we have nothing to loose.

73,

Jim, K8SIW

Subject: [WestMichiganHams] Aircraft on 20 meters

I just heard an aircraft on 14.300 that was not an amateur station.

The aircraft ID'd itself as 775 Papa Tango and was asking if the station they were contacting was a ship. They acknowledged that they were on "Fourteen thousand three hundred". I got a recording of some of it.

Anyone else hear it?

Oddly it was during the Maritime Mobile Net. The net was in progress, faded away and this aircraft came on, then the aircraft faded away (I have that recorded) and the net came back very strong.

Weird??

It does not appear so.

The party in question was American. Sounded like military. I think that civilian aircraft have calls similar to hams. 775PT sounded strange. Not emergency traffic, either.

I will check further with ITU but I believe that portion of 20 is amateur exclusive.

Didn't make the Super Swap?? You missed a free chopper ride.

Oh, BTW, you will have to settle for second place in future fox hunts. I now have a secret weapon. A WPL. (Weapon of Precise Location)

Prepare to hand over the crown.

73,

The Zed.

Subject: [WestMichiganHams] Aircraft on 20 meters

I just heard an aircraft on 14.300 that was not an amateur station.

The aircraft ID'd itself as 775 Papa Tango and was asking if the station they were contacting was a ship. They acknowledged that they were on "Fourteen thousand three hundred". I got a recording of some of it.

Anyone else hear it?

Oddly it was during the Maritime Mobile Net. The net was in progress, faded away and this aircraft came on, then the aircraft faded away (I have that recorded) and the net came back very strong.

Weird??

http://www.arrl.org/?artid=6883

US Coast Guard Auxiliary announces "Special Event Radio Day" (Oct 20, 2006) -- The US Coast Guard Auxiliary (USCGA) will hold a "Special Event Radio Day" Saturday, October 28, to support the International Search and Rescue Competition (ISAR 2006) and the 67th Anniversary of the US Coast Guard Auxiliary. More than two dozen USCG Auxiliary Amateur Radio stations will be active on the HF bands from the Atlantic to Hawaii and from Maine to the US Virgin Islands. Many will operate from US Coast Guard Bases. A special QSL card (see photo) will be available by making contact with any station and sending an SASE. The USCGA invites the Amateur Radio community to join in the celebration.

I just got a I pod and have been downloading music. I noticed they have a selection of weekly talk radio shows called pod casts. I noticed the ARRL has one and a lot from different ham radio operators throughout the world.
Anyone listen to these. I know they have the weekly ARRL Newsline (I think thats what its called) and does anyone recommend one?

Rather than bellyaching about "this clown," why don't we demonstrate what capability we have, and point out the many times when all the greatest technology in the modern world fails in times of natural and man made disaster.

And, instead of negative attacks upon the entire leadership of the League, based on the opinions of one former leader of ARRL, why not offer reasoned arguments in favor of continuance of "traditional" modes of communication. Simultaneously, folks inclined toward experimenting with newer modes of communication should be encouraged in their efforts.

In my years of emergency communications, I've relayed messages right beside a Red Cross vehicle who couldn't communicate on 47 MHz, with more power than I had, while I was perfect copy at a base station in the same area on 53 MHz. And, once I was at a Red Cross Shelter where cell phones were working, but the Red Cross official was "always on his phone", and ham radio had to be used to tell him to call HQ to advise them what he needed to be on the supply truck whcih was about to leave for his location. All the bellzandwhistles of modern day communications couldn't get through when a simple $150 radio and a bit of knowledge of how to use it got the message through.

Jim Weaver, K8JE, <k8je@...> is our voice in Newington for us. Let him know your opinions.

All:

We are invited to attend the annual and truly wonderful Harvest Dinner at the Muskegon radio Clubhouse, 2888 Scenic Dr, Muskegon. The dinner starts at 5:00 pm on Saturday evening. The cost will be $6. You are encouraged to bring your favorite dessert to share with others.

This will be your early Thanksgiving dinner opportunity. The menu features roast turkey, mashed potatoes, squash, vegetables, sweet potatoes, cranberry sauce, and the like. Top this off with our favorite desserts and you have a meal fit for a ham!

Don't miss this annual tradition. It is only a big week away.

Bill, AB8SC

1519. Great Lakes area MFSK16 net tonight 8e/7c

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-27 20:59:56 UTC
From: Joe Veldhuis
Topic: 1519 Message: 1519

I was busy setting up a hamfest last Friday night, and thus wasn't able to do the net. I am, however, available to do it tonight!

Time: 8 PM Eastern, 7 PM Central
Freq: 144.150 MHz USB
Mode: MFSK16

As we enter the Winter season and the bands die off, I might suspend the net, since getting enough people interested in this obscure mode of communication together for a net depends on a wide coverage area. If I'm only going to get one checkin, I've got better things to do on a Friday night! :)

Congrats Linda!

Nice Job! I know what a task that is.

I am almost half way there.

Boy, using hard cards, no bureau and no clusters at the bottom of the cycle makes it almost a challenge. (The real challenge is the green stamps!)

73,

Mark K8MHZ

Thanks, Mark. You're better off not using the bureau, in my opinion, unless you are willing to wait a loooong spell to see the cards. I have opted to QSL direct and use Logbook of the World. That's been satisfactory, but you are right about the green stamps. Dxing is fascinating. Geography, history, politics, local culture of the Dx: If you are open to appreciating it, you certainly get to experience it! Where else do you get to talk to someone in the Revillagigedo Islands? And learn the correct pronunciation through a .wav file of that long word via the magic of the Internet? At the very least, we get to throw our local little post office into a tizzy every time we show up to buy IRCs. They haven't taken to locking the doors on us yet, but...

Mark:

What ever could you be waiting for? CQ WW DX SSB is this weekend! The exchange is 5904 (signal report and CQ zone). Put down that computer and go play radio!

Fish in a hubcap? I'm "stacking the deck" and going to use the clubhouse shack.

Bill, AB8SC

Actually,

I just need to get caught up in my QSL cards. Wait until there is a contest weekend. On 20 meters it's like shooting fish in a hubcap.

:)

You said it!

I have been having a ball. I have cards from places I have never heard of. Some cool places, too, like the European Space Center....twice!

Now if I could just get that elusive Utah card.

I need to get some more cards out. I worked Luxemborg the other day. It's what, the size of Roosevelt Park? Sure do hope they return QSL. I did get a card from Sao Tome and Principe, that was cool. I also finally got my card from the Galapagos Isles. Not too long of a wait considering it was delivered via tortoise.

I am listening to the contest on 20 right now. What a mess!! I think I just may try a couple....the antenna still loads up...who knows??

73,

Mark K8MHZ

Actually, I was wondering about that 5904, is the 04 just the designator for the USA? I've heard other stations with different numbers, I'm just wondering if each number is one country, or if it's broken up into different regions per country. Also, where can I go to get my grid square information? I'm figuring that I'm going to need that eventually.

Tell your sister you want to take Shadow hunting with you. Tell her that you figured out how to use ham radio to do it. Tell her that you have a 2 meter rig on your belt with an earphone listening to another ham telling you where to point the gun. Tell her the other ham will be one of them that helped you with your antenna.

MAYBE she will get the hint! :)

73,

Mark

(PS Shadow is the name of the suspect, his sister's dog. The other dog, Riley, is my pal. Yep, Chris has a dog named Riley! And it's not a Rot.)

From: Bill Fries
Topic: 1532 Message: 1536

Working split?

It is unusual for dx to work split in a contest. Unless you count the HUGE splits on forty meters where the dx transmits between 7.05 and 7.150, give or take and listens above 7.200. Pretty much guarantees dx. Check your privileges, you cannot transmit ssb below about 7.2.

Bill, AB8SC

ps, There is a rumor that the clubhouse will benefit from the donation of a linear amplifier. This just in time for VU7. I'm salivating.

Grid square? There is a formula. But I don't know the formula and hf dx won't care. Grid Squares are for VUCC when chasing dx above fifty megahertz. Get a hundred different grids and you can apply for nice wallpaper. Or fewer at gigahertz frequencies. I think.

Chris:

CQ Magazine divided the world into forty zones. Michigan is in zone 04 with lots of company. The United States are several zones. Helps when you are listening for dx call signs, can't quite get it, but get the zone as 32 or something. Likely perks your interest.

The CQ zones are different from the ITU zones which I believe number more.

Well, I asked the question about grid squares because I was looking at
http://www.omiss.net
and they were saying something about when you apply to become a member to
give your grid square. I'm guessing that there's a web site somewhere that
will be able to figure that stuff out. If there isn't, for those who love
to write php...*grin*

1546. Wind damage

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-10-30 17:20:43 UTC
From: Joe Veldhuis
Topic: 1546 Message: 1546

Well, today I completed a survey of the antenna damage I suffered from the high winds over the weekend:

* VHF TV antenna blown down, 2 elements bent
* BBS antenna torn completely off of bell tower, dangling by coax
* 2m/70cm beams turned 45 degrees clockwise

So that , combined with the feedline failure on my log periodic, leaves me with only 2 vertically polarized antennas: the wire dipole I use for APRS, and my scanner antenna which was broken in half during a wind storm around this time last year. I am using the latter for the BBS until I can repair the main antenna (which won't be until the ladybug swarm is gone).

What sort of damage did everyone else get?

-Joe, KD8ATU

Hi Mark,

Here are the ones I hear the most traffic on:

Central Dispatch 155.490
Fire Dispatch 154.190
LEIN 154.755
State Fire 154.295
Norton Firegound 155.085
Ottawa Central 154.725
Ottawa Fire 154.250
Roosevelt Pk DPW 155.895
Grand Haven Fire 154.160
Muskegon County "3" 155.700
Heights PD Tact. 155.370
Musk. PD Tact. 154.650
Muskegon DPW 155.025
Muskegon DPW 155.055

That should get you started. Let me know if you need a specific frequency. The FCC search can be a bit tricky but I have pretty much figured it out.
If you are interested in MURS, I have them too. They are being used by stores and hunters.

Hope that heps y'all,

73,

Mark K8MHZ

If anyone goes to the meeting, I think they should suggest advertising more. It went by one weekend and I forgot all about it.

Air Fair organizers looking for ideas
Muskegon Events, Inc. is asking the public for new ideas to "rejuvenate" the Muskegon Air Fair at two public forums at Muskegon Community College.

The first is scheduled for 6:30-8:30 p.m. Wednesday in MCC's Collegiate Hall. The second will be Nov. 9 at the same time and location.

Muskegon Events announced a month ago that continuing financial losses had forced cancellation of the 2007 Air Fair.
Air Fair organizers are seeking community input to "rejuvenate the Air Fair and allow it to continue to be a great event for many years to come," according to a press release announcing the forums.

Muskegon Events took over operation of the show in 2005 from longtime Air Fair Executive Director Terry Grevious, the former Muskegon County Airport director who launched the show in 1984.

Muskegon Events also stages the Muskegon Summer Celebration, Muskegon Irish Music Festival and the Muskegon Film Festival.

Attendance at the 2006 air show was among the lowest ever.
Organizers said the 2006 show lost more than $100,000 and the show has lost more than $700,000 over the past five years.

Despite perfect weather, last summer's show failed to draw spectators from beyond the Muskegon area, organizers said.

Attendance estimates of 38,000 to 43,000 for this year's show were way below the 63,406 that watched the last non-jet-team show in 2002.

For the complete story, return to Mlive.com or pick up a copy of Monday's Muskegon Chronicle.

Subject: [WestMichiganHams] Muskegon Air Fair Wants Your Input

All:

You can read a Muskegon Chronicle story on how the Muskegon Air Fair is hoping you will give them direction for future shows. Although the '07 show is canceled the '08 show might return the event to the airport.

The organizers are hoping the general public will provide some
suggestions of merit.

Visit the story:

I don't know about free but I do my cards in Word which is paid for so kinda free.

I print on heavy paper, four cards a sheet, landscape, on my BIG printer I have called a plotter. I'm sure it is not cheap but I have the cards in small quantities I can manage.

I snagged a ninety year old ham club station in Washington (the state) on hf. I passed the mic to Al, K8AER for a QSO. We cranked out a card for him (his first QSL card?) and mailed the cards. I've gotten a LoTW QSL. I hope he will get his first QSL card in the mail. We used Word to do Al's QSL card.

Mark, K8MHZ will help me produce a dozen or so QSL cards for the special event station that activated W8ZHO for their birthday party we called Founders' Day. I think he will use some photographic type program and we'll print the cards at Walgreens or something. We will also print Big labels for the back of the photograph for the QSL dope.

Helps? Hope so.

Bill, AB8SC

Paul,

QSL Maker is the best place to start, but the web site is down. The file is over a meg so I can't e-mail it to you.
http://hfradio.org/wb8rcr/QSLMaker.html <http://hfradio.org/wb8rcr/QSLMaker.html>

Here is another one to try for a different program:
http://www.radioqth.net/qsl.aspx <http://www.radioqth.net/qsl.aspx>

I also use Adobe PhotoShop and have Walgreen's print up full color glossy cards for 19 cents each.

If you plan on sending out a bunch of cards with no SASE, the best deal is getting blank pre-stamped post cards and printing on those.

Thanks for generating some interest in cards, I don't think we do enough card exchanges.

73,

Mark K8MHZ

1564. 21st Annual Southwest Ohio Digital and Technical Symposium

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-02 17:47:00 UTC
From: Hank Greeb
Topic: 1564 Message: 1564

21st Annual Southwest Ohio Digital and Technical Symposium

In cooperation with Dial Radio Club; Miami University, Middletown and the ARRL, the 21st Southwest Ohio Digital and Technical Symposium will be held on Saturday January 13, 2007. The venue will once again be in Thesken Hall of the Middletown campus of Miami University. Registration will begin at 8:00 AM, with presentations running from 9:00 AM until approximately 4:30 PM.

As this is being written we have commitments for the following presentations:

* D-Star, Mark Thompson, WB9QZB
* WinLink 2K, Greg Zach, WG8Z
*A PSK-31 Audio Beacon Project, Jim Everly, K8IKE
* Using a Wide Band Noise Generator, Jay Slough, K4ZLE
* The SoftRock Software Defined Radio Project, Tony Parks, KB9YIG

Other potential presentations are in the wings, such as an AMSAT update, a microwave communications demonstration and more. As you can see, this year's program should be very informative with topics that are state of the art and have immediate real world application. Come meet the folks who are making things happen technically in our hobby, both locally and nationally.

There is no charge for attending the symposium. A box lunch will be available on site. Directions to the campus in Middletown, Ohio can be found on the website: http://www.swohdigi.org. Updates to the program will also be posted on the website. For further information, you may contact Jay Slough, K4ZLE at arrl.net

- Dee Logan Wins Silver Antenna Award
- Red Cross Background Checks
- No RACES Frequencies = No RACES?
- CW on 80 M
- Scholarships Available
- SW OH Digital Symposium
- W1AW Schedule Change
- W8GEX writes on Op from New DX Entity

DEE LOGAN WINS SILVER ANTENNA AWARD

Congratulations to D.E. "Dee" Logan, W1HEO, of Mentor, OH. Dee is the 2006 winner of the Philip J. McGan Memorial Silver Antenna Award for long-time demonstration of success in Amateur Radio public relations. Dee led a team of amateurs in the Cleveland Area who developed "The Northeast Ohio Ham Radio Project." This effort pulled together nearly all resources needed to interest and guide people in becoming Amateur Radio operators. One part of the project involves an excellent video that is available to any club to use in its recruiting effort. The video is available to clubs in the general Cleveland area that become a member of the overall recruitment project. There is a fee for this membership and the video. The video is also available to clubs outside the area for a lesser fee.

Contact Dee for details.

Incidentally, the very first McGan recipient was Ohio SM Joe Phillips, K8QOE.

RED CROSS BACKGROUND CHECKS

I doubt if anyone believes the Red Cross should blindly accept just anyone who comes in off the street as a trusted volunteer. Most people who volunteer are fine, upstanding citizens who have the highest motives; however, there are those among the public who are . . . well . . . dishonorable. Just imagine what injury folks with perverted ideas of honesty could do to disaster victims and their property during

relief operations. The Red Cross has responded to the risk of having dishonorable people try to infiltrate its ranks by turning to background checks for all employees and volunteers.

I believe the Red Cross has the right and duty to keep unscrupulous people from joining its ranks. I also believe it has the right to require, somehow, background checks for all its personnel -- paid or not. The Red Cross needs a way to determine the honesty of its workers as best it can. When it comes to most volunteers, this is where I draw the proverbial line. Requiring background checks for criminal activity is thing. Requiring permission to do credit checks and more is just too much for non-employees, but this is precisely what Red Cross is doing.

As one ham who is a long-time officer in his local Red Cross Chapter said, "The Red Cross is requiring volunteers to grant permission for more than just a criminal background check, they are also requiring permission to draw a consumer and/or investigative consumer report on the volunteer. This would include a criminal background check, credit check and a mode of living check."

The ham Red Cross Chapter official? He authorized his superiors to do a criminal check, only. He still has his position at the Chapter.

Incidentally, some amateurs have expressed concern that MyBackgroundcheck that does the checking will have access to all of the credit and personal information on persons who have been checked even though Red Cross says they do not want it, themselves. Frankly, I'd trust the Red Cross folks that I know long before I'd trust many other people.

My suggestion: Read carefully what is being demanded and be sure you are willing to agree with it. If you agree, by all means give your consent to the full background check. If you don't agree, don't give your consent. You might even try sending a letter to your local chapter giving consent for them to do a criminal check but withholding your consent to other checks. Use your personal judgment.

NO RACES FREQUENCIES = NO RACES?

A few people have asked if FCC's abolishing special RACES frequencies means it plans to abolish RACES. It may come as a shock to some of you, but I don't know just what is in the minds of the folks at FCC. I discovered my crystal ball was broken when they issued the recent omnibus Report & Order. Nonetheless, I strongly doubt they plan to abolish RACES.

Instead of looking behind the abolishment of RACES frequencies for an ulterior motive, why not look at it at face value. The change that will take effect 30 days after the new rules are published will open amateur frequencies to use by RACES. RACES is being freed to operate anywhere in the ham bands the local RACES brass want it to operate. My

money is on RACES being around for quite some time.

CW ON 80 M

In spite of the misinformation being spread by some people, ARRL neither petitioned nor wanted FCC to drop the 75 M phone band down to 3600 kHz. We asked them to drop the phone band edge to 3725 kHz. This represented an increase in the phone band of 25 kHz. This 3725 kHz is also the lower band edge proposed by the Commission in its NPRM two years ago. Imagine our surprise when the Commission announced the phone band edge would be 3600. Not only does this make things difficult for the many NTS and other 80 M CW nets, and casual CW QSOs, but it thoroughly jumbles the situation for RTTY and data modes that are no longer permitted on 80. Bummer.

Speaking of CW, ARRL also has also not asked FCC to abolish all Morse testing for Amateur Radio licensing exams. We petitioned to have the exam dropped for General licensees. This tactic was based upon the knowledge CW would be dropped totally if we did not develop a counter strategy to FCC internal thinking to drop all Morse testing. The strategy acknowledges that Morse testing will be lost for Generals regardless of what we do. At the same time, we're trying to keep it for Extras. The idea is to keep Morse as one means of making the Extra Class license something extra. Will even this strategy work. I'm hopeful, but not holding my breath.

When will the FCC release its decision on Morse testing? My crystal ball is still broken, but I'm guessing it will not take nearly so long as it took them to release the omnibus Report & Order.

One final word on Morse testing: Even if the Commission abolishes all Morse testing, CW will remain the primary mode of operation for a great many current hams. I'm included among this number. It will even become the primary mode of operation for a great many new hams. A still greater number of hams -- new and old -- will use it to some extent. Abolishing Morse code testing as a licensing requirement will not of itself doom Morse to extinction.

SCHOLARSHIPS AVAILABLE

It is time to apply for ARRL Foundation scholarships. Over 40 scholarships ranging in value from about $10,000 to $300 are available. The sponsors of some of the scholarships have designated them for specific categories of applicants; however, many are open to all amateurs who are furthering their education. For information on the scholarships and the application form, go to http://www.arrl.org/arrlf/scholgen.html.

The Great Lakes Division has been well represented among scholarship winners during recent years. I'm sure there are a few more worthy candidates in our three state.

SW OHIO DIGITAL SYMPOSIUM

The annual SW Ohio Digital Symposium is January 13 with registration beginning at 8 AM and sessions at 9. This is not a hamfest/swap. It is a place for the typical and not-so-typical ham to come to learn the practical operation of PSK-31, software defined radio (SDR), D-Star, WinLink 2000 and more. This is an opportunity to advance the typical technology of Amateur Radio beyond CW, SSB and FM. The Symposium is at the Miami University Middletown, OH, campus in Thesken Hall. Directions and program information are at www.swohdigi.org. Additional information can be obtained from Jay Slough, K4ZLE at k4zle@....

W1AW SCHEDULE CHANGE

In case you want to copy W1AW code practice or bulletins and can't find what you want, check its new schedule. This schedule is at http://www.arrl.org/w1aw.html.

W8GEX WRITES ON EARLY OPERATION FROM NEW DX ENTITY

Joe Pater, W8GEX, is a well-known DXer member of the Southwest Ohio DX Association. A resident of Hamilton, OH, Joe arranged for a DXpedition of a few friends to new DX entity Montenegro. He wrote of the trials and tribulations of forming this DXpedition in the fall issue of the International DX Association (INDEXA) newsletter. It was a relatively small DXpedition as DXpeditions go, but provided many new contacts to the worthy with this new country. Contacts were with 406DX.

TENTATIVE SCHEDULE

I'm getting back into the swing of things now that I've pretty well recovered from back surgery. My tentative schedule at this moment is as follows:

Nov. 17-19: A&F Meeting, Newington, CT.
Jan. 9: 20/9 Meeting, Canfield, OH.
Jan. 13: SW OH Digital Symposium, Middletown, OH.
Jan. 18: A&F Meeting, Newington, CT.
Jan. 19-20: Board of Directors Meeting, Newington, CT.
Feb. 11: Mansfield Hamfest, Mansfield, OH.
May 18-20: Dayton Hamvention, Dayton, OH.
Sep. 9: Findlay Hamfest, Findlay, OH.

If you wish me to come to your meeting or other event, please let me know.

Tnx for your support of ARRL. Your backing is very important to the well being of Amateur Radio. Please consider becoming a worker in the new ARRL Legislative Action Program. Several amateurs throughout the Division have volunteered, but we still need additional help if we are to cover all of the US Representatives and Senators in our three states. Contact Division Legislative Action Chair Val Rose, N8EXV (n8exv@...) or me (k8je@...) for information. The job requires such little time and can provide such great benefit to Amateur

Radio.

For picture cards I use Irfanview, available from http://www.irfanview.com, available for free (donation of $10 suggested but not required). I generally take a picture of something associated with whatevere event I'm celebrating (or the shack or house if it's a general QSL). The help files are a bit skimpy, but I've found that one can put a picture within a picture (like an ARRL Logo, or personal picture, etc). Also, one can put text within the picture. It is easier to use than photoshop elements, though it doesn't have quite as many features.

For printing I generally forward the picture to my local Meijer, which does overnight printing for 17¢ per print - cheeper than one can buy photo stock plus ink. If I want to wait an extra day, or have a large order, they'll send the order to Kodak for 14¢ per print.

This is a bit more expensive than using card stock (which I can get for 10¢ per sheet - so four cards cost 2.5¢ each plus the cost of ink. The biggest advantage, besides being a bit more colourful, is that with inkjet printers, most times the ink will run and smudge if the card gets at all wet.

Well, I was busy setting up a hamfest 2 weeks ago, and slept through the net last week, but this week the net will most certainly be held.

Time: 8 PM eastern, 7 PM central
Freq: 144.150 MHz USB (dial)

One idea I've had, after seeing some discussion on the illinoisdigitalham list (one of 3 I cross-post this to), is to try using Olivia instead of MFSK16. As robust as MFSK16 is, Olivia is even better. Starting next week, I think I'll switch to Olivia for this net. The mode is supported in MixW and MultiPSK on windows, or gMFSK and Fldigi on Linux/*BSD.

I think that the section is more geared toward retransmitions of broadcasts and music, not so much phone patches, besides, how are we to know if the person that we are calling is using a chordless phone or not? With a cell phone, it's one thing because you can almost tell by the number, but we can't tell someone that if they see the repeater number come up on the caller ID to not answer with their chordless. If nothing else, it's a grey area, but I don't think anyone is going to really get bent out of shape for using an autopatch to call someone on a cell phone, or talking to someone with a chordless phone.

If we really want to split hairs, wouldn't it then be illegal to call a pager using the repeater's autopatch as well?

Subject: [WestMichiganHams] Technicality?

Please read the section below and offer up your take on whether or not using a cell (radio) phone to communicate on a phone patch is legal or not. I guess cordless (radio) phones would also be suspect if the provision were to be followed to the letter.

From: §97.113 Prohibited transmissions.

(e) No station shall retransmit programs or signals emanating from any type of radio station other than an amateur station, except propagation and weather forecast information intended for use by the general public and originated from United States Government stations and communications, including incidental music, originating on United States Government frequencies between a space shuttle and its associated Earth stations. Prior approval for shuttle retransmissions must be obtained from the National Aeronautics and Space Administration. Such retransmissions must be for the exclusive use of amateur operators. Propagation, weather forecasts, and shuttle retransmissions may not be conducted on a regular basis, but only occasionally, as an incident of normal amateur radio communications.

This section is referred to when talks of using ACU devices, such as Muskegon's Motorola ACU-1000, EchoStation and other ACUs (Audio Combining Units) but if followed to the letter prohibits cordless and cellular telephone re-transmissions as well.

Considering that a lot of people are now switching from their conventional land line to a cellular phone for their primary phone needs, I don't think that it would be a problem. It is something to think about, and possibly go so far as to ask someone on the commission for clearification of the question.

Chris,

Sending TO a pager is different, no other form of radio transmission is being re-broadcast via amateur radio unless it was done using a radio telephone.

So, if it is OK to use a phone patch to re-broadcast cellular phones, would it then be OK to have a repeater in which the input was a cellular phone?

See where I am concerned?

If it is NOT OK to use a cellular phone as a repeater input it is also NOT OK to use them on a phone patch as the exact same retransmission is suspect, just connected differently.

Please read the section below and offer up your take on whether or not using a cell (radio) phone to communicate on a phone patch is legal or not. I guess cordless (radio) phones would also be suspect if the provision were to be followed to the letter.

From: §97.113 Prohibited transmissions.

(e) No station shall retransmit programs or signals emanating from any type of radio station other than an amateur station, except propagation and weather forecast information intended for use by the general public and originated from United States Government stations and communications, including incidental music, originating on United States Government frequencies between a space shuttle and its associated Earth stations. Prior approval for shuttle retransmissions must be obtained from the National Aeronautics and Space Administration. Such retransmissions must be for the exclusive use of amateur operators. Propagation, weather forecasts, and shuttle retransmissions may not be conducted on a regular basis, but only occasionally, as an incident of normal amateur radio communications.

This section is referred to when talks of using ACU devices, such as Muskegon's Motorola ACU-1000, EchoStation and other ACUs (Audio Combining Units) but if followed to the letter prohibits cordless and cellular telephone re-transmissions as well.

No, because the cellphone does not transmit in an amateur band. So you can't use it for a repeater input, even if it were technically possible.

> If it is NOT OK to use a cellular phone as a repeater input it is also NOT OK to use them on a phone patch as the exact same retransmission is suspect, just connected differently.

I totally disagree with your premise, Mark. The fact that cellphones use RF is incidental to their operation, and would not fall under an interpretation of the amateur rules prohibiting re-broadcasting of other services.

Good discussion though.

I haven't had a conventional land line phone in over 2 years . 1500 minutes with no long distance charges for 45 dollars . I talk to California and Kansas for at least 10 hours a month . Try that on a land line for 45 dollars .
Cheaper than a land line phone .

there are a lot of grey areas in this rule though.

KD8BIG

---------- Original message ----------
From: "Chris Schulte" <ab8wo2006@...>
Considering that a lot of people are now switching from their conventional land line to a cellular phone for their primary phone needs, I don't think that it would be a problem. It is something to think about, and possibly go so far as to ask someone on the commission for clearification of the question.

Chris,

Sending TO a pager is different, no other form of radio transmission is being re-broadcast via amateur radio unless it was done using a radio telephone.

So, if it is OK to use a phone patch to re-broadcast cellular phones, would it then be OK to have a repeater in which the input was a cellular phone?

See where I am concerned?

If it is NOT OK to use a cellular phone as a repeater input it is also NOT OK to use them on a phone patch as the exact same retransmission is suspect, just connected differently.

Subject: Re: [WestMichiganHams] Technicality?

I think that the section is more geared toward retransmitions of broadcasts and music, not so much phone patches, besides, how are we to know if the person that we are calling is using a chordless phone or not? With a cell phone, it's one thing because you can almost tell by the number, but we can't tell someone that if they see the repeater number come up on the caller ID to not answer with their chordless. If nothing else, it's a grey area, but I don't think anyone is going to really get bent out of shape for using an autopatch to call someone on a cell phone, or talking to someone with a chordless phone.

If we really want to split hairs, wouldn't it then be illegal to call a pager using the repeater's autopatch as well?

Who operates / owns 88.7-106.5 MHz ? I have heard phone conversations there before . As well with the UHF standard and "T" band .

UHF standard = 450-470 MHz
UHF "T" band = 470-512 MHz

KD8BIG

-------------- Original message --------------
From: <k8mhz@...>
"No, because the cellphone does not transmit in an amateur band. So
you can't use it for a repeater input, even if it were technically
possible."

It is technically possible with ACUs. Reverse phone patches using land lines are and have been legal for some time. If the phone is cellular instead of a land line it is still a reverse phone patch but in actuality is a re-transmission of a non-amateur frequency. Both the Motorola ACU-1000 and a properly set up EchoStation repeater have the capability of re-transmitting ANY audio input to an amateur frequency, or any frequency that there is a transmitter for. EchoStation can be set up with a cell phone as a receiver and a ham rig as a transmitter so the cell # could be called and the received audio is sent out over the transmitter. EchoLink uses many frequencies via the Internet in the same manner. This seems like a breech of the law, not just to me, but others as well. NOT to be taken that this use is a travesty, but more to be taken as a need to address Part 97's failure to keep up with the times.

"I totally disagree with your premise, Mark. The fact that cellphones
use RF is incidental to their operation, and would not fall under an
interpretation of the amateur rules prohibiting re-broadcasting of
other services."

The only allowance for incidentals is clearly outlined and pertains to things such as music on the ISS for instance. Nowhere in Part 97 is there an exception for devices that use RF 'incidental to their operation', which I don't think is the case for cell phones. Cell phones are radio phones and the radio part is the primary function of those devices, not merely incidental.

The re-transmission exclusion bears no written exceptions and leaves little room for interpretation. Without an exception for cellular or cordless phones it is against the ruling of 97.113.

If I missed something in other sections of Part 97 please point them out to me.

I think this is the case of the law not keeping up with the technology.

73,

Mark K8MHZ

OK Mark, how about microwave hops within the landline telephone
system? I would submit that these fall into the same category as the
cordless in your house, or cellphone RF link. If a cellphone is
illegal in a phone patch, then so is the microwave link. That would
make a great many patches illegal going back to the first day of using
microwave links for landlines, including of course domestic and
international phone patches. Then, since we cannot always know when
microwave is involved in ANY phone call, we must stop all patches.

Thanks for pointing this out. I need to go buy a new keyboard before next week's MFSK net, as my current keyboard is wireless. Clearly, I'm retransmitting its 27MHz signal on the lower end of the 2m band, which goes against the rules.

Also, somebody might want to inform the HSMM guys of this rule. After all, they're using off-the-shelf wireless networking equipment under part 97, rather than part 15, but how can they guarantee that the packets their equipment fowards _never_ crossed through wireless networking equipment operating under Part 15?

The idea that passing through the ether outside the bounds of Part 97 somehow poisons a signal so that it can never be legally transmitted on an amateur frequency just doesn't pass the sniff test. To me, this seems like nothing more than FUD (Fear, Uncertainty, and Doubt) rather than a real problem (unless, of course, there is some reason to believe the FCC actually interprets their rule this way).

>
> "What is an ACU?"

OK, I just wasn't familiar with the particular model "ACU" that you referenced. There is one of these units in the Ottawa CO. comm. trailer. However, I don't think these connect DIRECTLY to a cellphone, do they? In other words, I can't walk up to one of these and use my cellphone to talk to the sheriff's department, for example. There is no RF connection inherent within these units that would allow my cellphone to receive service, authentication, etc. That can be done only by my carrier's system. The ACU will connect to the PBX in the trailer, and then the outside world via copper, however.

> "OK Mark, how about microwave hops within the landline telephone
> system?"
>
> I have questioned that since I first read 97.113. When cell phones came on the scene I further questioned it. Now with ACUs there may be reason to get the FCC to give us an opinion. If phones such as cells and microwave assisted land lines don't violate 97.113 how do cell phones used as an input device in an ACU violate the same rule?

My point EXACTLY. We're beating a dog that doesn't exist. If 97.113 is out of date now, it NEVER was up to date. As I posted earlier, microwave landline links have been used for what, 60+ years now? Part 97 has been re-written several times in that period. If the FCC had any intention of including microwave links in the rule as applied, they would have stated so way back then. As another poster succinctly stated, perhaps I need to get rid of my wireless keyboard?? I don't think so. That would be absurd.

I still think the word "incidental" applies here. Cellphones, wireless keys, WiFi systems, landline microwave links, etc., are not Radio Stations. They use RF only as a part of their infrastructure, incidental to their normal operation. The spirit of this rule has always applied to radio services such as police, fire, broadcasters, Joe Plumber's two way system, etc.

Think about the term "wireline" in Part 97, I don't remember which particular rule right now. As far as the FCC is concerned, this term does not necessarily mean "copper". If a segment of the "wireline" control system for an Amateur Station, for example, happens to be fiber, or microwave, it is STILL a "wireline".

I think this issue is one of splitting hairs. A phone patch is a connection to the telephone system. How the audio gets to the phone jack is really not of much importance to us. We have no control beyond that telephone jack at the repeater.

You could reverse-engineer systems all day if you want to find problems. How about Echolink on a WI FI connection?

Retransmit police/TV/broadcast/MURS/FRS frequencies through a crossbander? That's what it prohibits if you think about it in a reasonable manner.

Actually, I think it's only illegal if you have a flashing yellow light attached to the antenna of the cell phone.

How was 97.113 ever written into the rules if it instantly indicts hundreds of hams every day for being illegal in their operations? In other words, if no other "radio station" can be a part of any amateur transmission, then each and every autopatch could be illegal. Yet no ham has ever been fined, I'm quite sure, for simply initiating and participating in a patch, with the FCC referring to 97.113, just because there was a microwave link in the audio path somewhere. And for 6+ decades! Please clarify for me.

It is unfortunate that most hams do not utilize the digital modes both on HF & VHF-It is a very secure mode which cannot be readily deciphered by the general public, handle high volume record traffic and on HF need minimum power levels to get through when voice cannot.
It is interesting to note also that at least the new hams and oldies that are computer literate (which I am not) do not take advantage of this mode. Hat's off to the DRG,the DAPPER club,Ray,N8LRF & Jay,WB8TKL for a great class! DE WD8USA / Red Cross Comm. Chair,Kent County

Chris:

Most wallpaper you chase requires you to certify that your QSOs were two way conversations. This mostly means you both understood the call signs involved.

Some wallpaper will encourage you to exchange a signal report to more or less prove the QSO took place. So each station will send and receive a signal report. This is not necessary in all cases.

For example, to earn the DXCC(R) you and the dx agree on time, date, band, mode, call sign. It is not necessary to agree on signal report. You do need to have a QSL card or LoTW credit for DXCC because this is an ARRL award.

I have been chasing states on a special net for this purpose. I think the net was called the 3905 net or club. They offer wallpaper and help you earn their awards. They have a Worked All States along with wallpaper for working their officers, or YLs or things like that. For their award they require the usual stuff from above combined with a signal report. So on their nets you will hear folks sending, "Double nickels, or Speed Limit, BANG, BANG, or twenty-two" or other stuff. The signal report must agree for their awards.

You generally will not receive wallpaper using an intermediate or net control to facilitate the QSO. You will often hear stations calling the dx and saying something like, "Last heard you were 4 and 2." They are just hoping.

If you choose to chase wallpaper you will early on decide if you are going to use a net control or list operation to facilitate the QSO. It is a controversial subject that I would not brag about at your first meeting of the Big Guns. Lists are often times frowned upon in some circles. But if it gets you the card, then, hey, you make the call.

There are all kinds of ways to play the game. The bottom line is you need the card. Well, you need to have the card approved by the wallpaper issuing organization.

Hi Mike,

K8daa DX Cluster is down until I get the computer up and running again. You can digi thru K8daa to kc8ke and connect to his DX Cluster on 145.07.

Dave

Wa8rsa

Holland Amateur Radio Club Trustee.

Subject: [WestMichiganHams] K8DAA DX Cluster

I have tried to reach the K8DAA DX cluster via TCP/IP and via RF, but have been unable to get it connected. Is it on the air for sure? Is it accessiable via k8daa.ampr.org or only RF?

Anyone got it working, if not any other ampr.org connected DX clusters locally?

Mike

Subject: Re: [WestMichiganHams] Re: Technicality?

I think this issue is one of splitting hairs. A phone patch is a connection to the telephone system. How the audio gets to the phone jack is really not of much importance to us. We have no control beyond that telephone jack at the repeater.

You could reverse-engineer systems all day if you want to find problems. How about Echolink on a WI FI connection?

Retransmit police/TV/broadcast/MURS/FRS frequencies through a crossbander? That's what it prohibits if you think about it in a reasonable manner.

Actually, I think it's only illegal if you have a flashing yellow light attached to the antenna of the cell phone.

Paul,
I posted something on the reflector here about two weeks ago. I also had a bulletin on the hamgate at WB8I.

Don't feel too bad, I posted the bulletins and then forgot to attend. Maybe we can put some kind of packet training get together here along the lakeshore.

1605. Hazcollect Field Operational Demonstration

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-06 21:35:52 UTC
From: Tom VanderMel
Topic: 1605 Message: 1605
Attachments: 1 described; binary payloads are missing from this source WARC

To All For your infomation on Weather Radio this week. Tom KB8VEE DEC-6

All,
On Wednesday November 8th at approximately 1:15 EST there will be an operation demonstration of the HazCollect system.
HazCollect is intended to be the primary tool the NWS intends to use for delivering non-weather emergency messages (NWEMs)
to NOAA All Hazards Weather Radios. There will be a National test of the overall system between 7 and 22 November 2006.

Some of you may recall the presentations over the last couple of years on the HazCollect system as a reminder there is a flow chart
of how the system works attached. The EM will have the client software which is called the Disaster Management Interoperability Service
(DMIS) loaded on a PC in their offices or 911 centers. The DMIS will load pre-formatted for different types of emergency messages and
transmit them to the HazCollect computer in the Washington D.C area. The message will be uplinked to satellite and delivered to the Advanced
Weather Interactive Processing System (AWIPS) and immediately formatted for transmission on the NOAA All Hazards Weather Radio with
EAS codes and 1050 tones as appropriate.

On Wednesday there will be an administrative message (ADR) transmitted which will be transmitted with the ADR EAS code. If you would like
to receive the test please ensure the ADR tone is programmed to go off when your radio receives it. Below is a list of other codes that will be available
to EMs when the DMIS software is fully implemented. There are still a number of Test Trouble Reports (TTRs) that will require software
modification before the DMIS software will be fully functional. There will be a another message from this office informing you of where to go to
download the software when it passes the required field tests.

AWIPS NNN MASS NEWS DISSEMINATOR /MND/ PRODUCT TYPE LINEADR ADMINISTRATIVE MESSAGE/FOLLOWUP STATEMENT

From: Bill Fries
Topic: 1557 Message: 1606

All:

Mark your calendar for November 18 and 19. That is the weekend for the ARRL's Sweepstakes contest. We'll participate in the sideband version of this annual contest. We'll use the W8ZHO call and hit the push-to-talk starting at 4:00 pm on Saturday until either 1. we run twenty-four hours or 2. we pull the plug at 10:00 pm on Sunday evening.

Everyone is welcome to drop in and operate, log, cheer, kibitz, or whatever. We'll have tons of fun. Tom, W8AMZ has offered a HUGE pot of Chile and we'll have something special for Sunday morning's breakfast. Sunday lunch and dinner will be warmed over hot dogs and stale cookies.

So grab your sense of adventure and drop into our wonderful shack at the MAARC's clubhouse. It will be tons of fun for everyone. There will always be an open band, fun, radio, fun, QSOs, fun, and great hams sharing a contest to remember.

Drop me a line with any questions. By the way, Chris, AB8WO says he can operate and log without assistance. Should be quite the sight! That is one really great reason to cheer!

Bill, AB8SC

1609. Portable Generators on Sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-08 03:53:29 UTC
From: Hank Greeb
Topic: 1609 Message: 1609

Pep Boys is having another sale on portable generators

1 KW continuous, 1.2 KW max - 2 cycle 63 cc engine - item # TG-1200 - $149.98 after rebate

2 KW continuous, 2.3 KW max - 4 cycle OHV engine -item # GG2300 - $239.99 after rebate

The brand on these says "UST" - I can't find who manufactures that brand....

I bought a 1.2 KW continuous 1.5 KW max made by Eastern Tools from Pep Boys before field day, and it has worked like a charm for Field Day, the Ohio QSO Party, and the Illinois QSO party.

Two advantages of the smaller units is, first, they are light, therefore easily carried as a part of an emergency response kit. The second is that they use very little gasoline/oil combo - I used slightly more than 2 gallons of gasoline for the Ohio QSO Party (in about 14 hours of operation - I started the thing up early to be sure it was running well) and about 1.5 gallons for the 9 hours or so of the Illinois QSO party. I typically run a computer and a 100 W output rig, plus a fan and a desk lamp on a field operation, but I've run a 1500 watt heater for over an hour to test the ruggedness of the unit The one minor downside is that one needs to remember to have 2 cycle oil, but it's available in 2 ounce bottles in many places.

Two locations in Grand Rapids for Pep Boys are:

Pep Boys Supercenter
3737 Alpine Ave NW
Comstock Park, MI
(616) 785-3122

Pep Boys Supercenter
609 28th St SW
Wyoming, MI Map
(616) 261-5701

In Kalamazoo:

Pep Boys Supercenter
5630 N Westnedge Ave
Kalamazoo, MI
(269) 388-2240

Didn't find a Pep Boys in Muskegon.

Hi Mike,

Did you try and connect to wa8rsa-1?

Then on menu line you will see DXC, just type in DXC and you will be on the DX Cluster.

If you are going to send email then you need the hamgate.ottawa.ampr.org

Did you actually get that word for word or does it have your usual humorous twist on it?

Pretty funny, but the grammar is way too good for it to be a real spoof :)

Subject: [WestMichiganHams] Fwd: Cyber Alert - FBI - IC3 warns new email scheme

Although this subject has nothing to do with ham radio I would like to add a few things.

1) A business will NEVER ask you for your user name and / or password as they already have it. If they 'lose' it all they have to do is create a new one and send the new one to you so you can log in and change it if you desire.

2) Beware of any e-mail from a business you have a relationship with that does not address you by your own name. If it says 'Dear Sir', for instance, rest assured that a million other people are getting the same message.

3) Get a separate account or a debit card for online transactions. NEVER give a business your bank account info unless you are absolutely sure they won't clean you out. PayPal is guilty of this, an others are as well. READ the fine print. They can collect from any account you have given them the number for.

4) It is super easy to spoof stuff from eBAy. I will leave you with this. All one has to do is re-direct the info to another web site and it's theirs. A simple change in the html is all it takes.

(The following is NOT REAL)

Dear Ebay User,

It appears that someone has tried to access your account that did not have the correct user name and it has been locked out. Please use the form below to sign in and unlock your account. If this is not done in 72 hours your account will be deleted, your bank account will be emptied and we will post negative comments about your credit to all the bureaus. You will also never again get to use Ebay and all your positive feedback comments will be changed to negative. We will then post all your personal information on a web site and e-mail the same to millions of eBay users.

Sorry about the inconvenience. Your account will be unlocked immediately upon our receipt of the filled out form. We will notify you by e-mail at this address once your account is

re-activated.

Special Notice - As compensation for your inconvenience you will recieve a $500 PayPal cash deposit coupon and be entered into a 2 million dollar sweepstakes.

1617. D-STAR Presentation, Saturday, 11/17 @ 2:15 pm, Fort Wayne Hamfest (Red Forum Room)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-09 21:52:50 UTC
From: Mark Thompson
Topic: 1617 Message: 1617

The Fort Wayne Hamfest will feature a presentation on D-STAR by Mark Thompson, WB9QZB on Saturday, November 18th at 2:15 pm in the Red Forum room.

D-STAR is a digital protocol developed by the Japanese government and Japanese Amateur Radio League. Icom is the first manufacturer to manufacture D-STAR-compatible radios, although the protocol is open to anyone.

D-STAR enables simultaneous digital voice and data transmission. At present, digital voice can be sent on 144, 440 & 1.2 GHz (4800 bps) concurrently with low speed asynchronous data (950 bps) in a narrow 6.25 KHz channel. High speed data (128 kbps) can be sent concurrently using TCP/IP on 1.2 GHz in a 130 KHz channel.

D-STAR repeaters are connected via the Internet, which enables worldwide connections across the D-STAR network. Imagine having a broadband Internet connection via your mobile rig.

Among the many possible applications, D-STAR promises enhanced emergency communication handling - the efficiency of simultaneous voice and data communications, as well as graphic and other large file transfers that are difficult or impossible with current packet technology.

Mark, WB9QZB, will present the D-STAR system in detail, with an update on Icom technology, the radios currently available that support D-STAR, and what is in development. Mark has been actively involved for many years in local packet and digital radio activities, and has been featured on Hap Holly's RAIN Report.

Please join us for an informative and entertaining presentation on Saturday, November 17th at 2:15 pm at the Fort Wayne Hamfest. The hamfest is at the Allen County War Memorial Coliseum and Exposition Center, located at 4000 Parnell Avenue in Fort Wayne.

A free Icom hat will be available to those who attend the forum. Come early. Supplies are limited.

If you can't make the presentation visit the Illinois Digital Ham Yahoo Group for more information about D-STAR:

http://groups.com/yahoo.com/group/illinoisdigitalham/

PLEASE PASS THIS ANNOUNCEMENT ON TO OTHER CLUBS & HAMS WHO MIGHT BE INTERESTED.

One week and One day. Are you ready?

Rumor has it that if YOU drop in for the contest Tom, W8AMZ will also bring along a big pot of gumbo. Incentive enough? Hope so!

Everyone is encouraged to participate in Sweeps.

Bill, AB8SC

I'd hazard the opinion that Sweepstakes might not be the venue to introduce a non ham to radio. The stations you hear will all be less than impressive Stateside garden variety hams. The exotic corners of the globe will all be pushed off the traditional bands and will either stay off the air or play their radio on the WARC bands. We won't have the inclination to chase DX on a Sweepstakes weekend because the QSO value does not warrant the trouble.

If you were going to use a contest to wow a regular guy with the possibility then make the overtures on a big DX contest weekend. The fast pace and tons of countries will quickly give the regular guy a taste of many opportunities that present.

Working Indiana from Muskegon just won't have the same effect as working Antarctica or India. Or bring the guy in to help you catch an exotic dxpedition with a great web site and lots and lots of hams entering the fray.

My two cents.

Shows how attentive I am, just noticed this. Sounds like a lot of fun!

I just might go to the Meijer parking lot in Grand Haven and operate
from the back seat of my car, using my laptop, the 857, a 102 inch whip
and a tuner. Or, if anyone else is interested, maybe we could set up
something a little bit bigger.

Anyone else in GH (or maybe Holland) want to do it?

From: Bill
Topic: 1635 Message: 1635

All:

We need to do a little preparation for Sweepstakes this coming weekend. We will have a operators willing to pound the push-to-talk and this is really GREAT.

The contest offers a few options in category or classification. We can be a single transmitter and single operator. Or we can be a single transmitter and multi operator. Or we can have multiple operators on multiple transmitters. And, finally, we can work the power levels from qrp to a hundred watts.

Since Tom, W8AMZ is putting the finishing touches on his fancy Elecraft rig and will want to give it a try I think we should have the option of using multiple rigs. We should decide if we will put the multiple rigs on the air simultaneously. This is conceivable because the clubhouse has several antenna options.

Antennas? We have the triband beam, the G5RV, a forty meter dipole, and I think there is also a seventy-five meter dipole. I'm not sure how multiple transmitters will interact with each other at the same time. I don't think we ever tried such a thing.

Here is a suggestion: I'm willing to bet that the "crowd" will be in the shack Saturday evening. It is great to have an operator and someone to help him log in the contest. The shack is rather small. If we were to try to run two transmitters from the small shack the overlap in sounds will make each one uncomfortable. Or the operator(s) will be wearing headphones. Operating with headphones is not all bad but we will also have some folks who want to participate and listen in on the action. Bottom line: I propose we run a multi single operation where we have multiple hams running a single rig. The rig can be switched in or changed but we should try to only operate a single rig at a time. I might be wrong, but hoping to keep two rigs running along at three in the morning is not likely.

The real challenge will come later in the day on Sunday when we try to populate the shack with operators. By then my old body will be tired and reinforcements will be very handy. We should try to populate the shack on Sunday afternoon and put the push in that direction. I don't think we are at the point of scheduling operators, but the thought has crossed my mind.

What would you suggest?

Bill, AB8SC

Linda is sounding like we will have lots of operators for Sweeps. That would be Huge fun. She is thinking we might encourage a schedule so we are not all in the clubhouse at the same time. But the clubhouse is big enough and I'm not real sure when THE GAME will be on the television.

Wouldn't it be great to have a lounge area near the fireplace?

Any rate, how about a schedule?

And if this works well then maybe we can get a contesting group started? Third Coast Contesters? We can hit the contests from around our West Michigan area like a crowd of visiting operators? Off thread, for sure, and an interesting thought. . .

Hello Bill and all,

It looks like the K2 should be ready for Saturday. As for being croweded I don't think that should e a problem. I don't see any reason why we can't setup one or two stations out in the main room maybe closer to the fireplace. We just have to use a coax coupler and some extra coax of which I have plenty. And for those who may wish to operate on a vintage I thought about bringing up the Collins KWM-2. Now that makes a for a lot of fun too. So we could even be running three stations.

Well, first of all, to answer Bill's question, the game will be on tv at 3:30, and if we are running a schedule of operators, I'd prefer to watch the game first. This might put me in a bad mood as I have serious reservations about Michigan beating Ohio State, but that's for another list.

Secondly, if we have the antenna space, we may as well use them. Let's get an exact count on what antennas we have and go from there.

Obviously the triband beam is going to be used by only one rig, so that means that the G5RV, the 75 and 40 meter antennas can be used by seperate rigs themselves. For that matter, some of those can be tuned for different bands, so we can switch bands as we opperate as conditions warrent.

A schedule and stratedgy sounds like a grate idea. I know I'm all for it. Let's get this thing rolling and populate the air waves with the club callsign and hopefully not only have fun, but make a huge splash in the contest.

From: Bill
Topic: 1635 Message: 1642

You should take a moment to chase down the rules for this contest. You'll find them over on the ARRL's site. They are simple. The important thing, or interesting thing, is that we can work any call sign only once regardless of band.

The "target market" for this event are Stateside and Canadian stations. There is no real DX chasing. From a strategy standpoint the fifteen and twenty meter bands will likely be open during the day and useful for longer range stations in California, Alaska, Hawaii, and the like. These bands will close later in the afternoon.

I think activity will shift, in the evening and wee hours, to seventy-five and forty meters. And I'm thinking that these bands will fill in the sections closer to Michigan, relatively speaking. This suggests a strategy for the contest. I'm also snooping around the internet for some independent verification.

If the above is believable then a station will use two or three antennas. The G5RV might work for a station on multiple bands. We can coordinate rigs needing, say, a seventy-five meter band antenna?

This suggests that, perhaps, running more than two rigs will require extra coordination, planning, and operators. The above does suggest that maybe we can field two multi-single stations if we have the operators? Or a single and another multi-single.

Does anyone have an idea how we can get spots at the clubhouse? I do not know the status of the packet spotting station in Holland. If they are available then maybe my two meter packet station can be pressed into service. I remember seeing spots on my computer screen from this station that I was into from a local station. However the clubhouse's VHF antennas are both not operating well. Using spots is allowed in a multi-single but may be restricted in a single operator scenario.

If we choose to run two stations then we will want to have them autonomous stations meaning that each will need rig, tuner, and logging computer.

A thought?

Bill, AB8SC

Chris:

EU 175 is the IOTA designation for the island that the dx is operating from. Just imagine, you can chase garden variety dx or you can chase Islands On The Air, or all manner of other interesting things. Obelisks in Russia? Cities in Japan. It can get real fun right now!

Check out Guinea on 14160.6. I have them on cw, recently, but not ssb. And the other Guinea's QSL manager is in Russia. I'd consider my contact today to be an insurance QSO. I'm hoping.

Bill

1646. Are You Going to Sweeps?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-12 20:06:22 UTC
From: Bill
Topic: 1646 Message: 1646

All:

It has been suggested that we could use a proposed head count for Sweeps. Tom and Chris are willing to help feed the masses and they want to plan for more than seven loaves and three fishes. We rather expect to have a few more folks on Saturday evening than on Sunday afternoon, but this is only a guess.

Can we all drop Bill, AB8SC a private note to suggest when we will all be available so we can get a rough head count for the event? I am not proposing an operator and logger schedule. Having this information will help answer a few questions like, "Should we have two or four dozen eggs?" Or, "Do we have operators for two rigs or one?" Or, "Will anyone be in the clubhouse after 9:00 pm on Sunday?"

Tom is proposing a late morning breakfast for all attending. This breakfast would start at 9:30 am. By the way, there has not been any talk of charging any money for this event. Folks are donating the food.

Please find some time to drop into the clubhouse and operate and log. We want this event to really be great fun for all hams. Contesting is contagious, catch it!

Bill, AB8SC

Contesters:

We are working on a plan for the Sweepstakes contest this weekend. We need to set a few goals for the event. What would you think about:

The event runs from 4:00 pm on Saturday until 10:00 pm on Sunday evening.

We want to have fun with a contest. This contest is quite a bit like Field Day because the stations worked will be Stateside and Canadian hams, the exchange is similar, and there will be tons of FUN.

We think that there will be a few folks willing to assist. Our group has limited experience with contesting. We make up for some of this with enthusiasm.

Let's make this a fun contest and a social opportunity. We will introduce contesting to as many folks as possible. Bring your friends into the shack and we will all learn a few tricks and log some contacts. Everyone will have the opportunity to contest and learn.

A more serious operation would schedule operators and have the shack running nonstop. An operator would contact stations and log their contacts unassisted. It would also have another rig and operators just chasing multipliers. Not that this is bad nor impossible to accomplish. We just need a bit more time behind the mic and time in the seat. Let's coordinate and find the time for you to sit in the contesting seat.

And when the shack is quiet the hard core contesters can get serious and try a few advanced techniques.

There are two carrots dangled to the entire group contesting this weekend. When you log over a hundred QSOs you can purchase a special pin from the ARRL. And should our station log all eighty sections we have accomplished a clean sweep and we can purchase a special coffee mug. Small things. But both of these are within the realm of possible. In fact we can make these goals for individuals and our group.

So a sketchy outline of a plan: We will run a multi operator single transmitter station. We will be able to swap rigs. We will use the W8ZHO call. We will run a hundred watts power. This will be the primary contest station with the focus of the group.

We will also have an alternative station which will be autonomous and another multi-single operation. This shack will offer hams the opportunities offered by the front line shack. The two shacks will be at the clubhouse, operating, and pounding the push-to-talk for the

contest. The operators in the alternative shack will work bands other than the bands of the front line shack. The two shacks can coordinate efforts. This alternate shack will operate under a separate call. Everyone will be encouraged to operate each shack. There might even be some competition between this and the front line shack. Fun.

Several of our group are planning to stay at the clubhouse for the duration. Bring your sleeping bag and ear plugs (I snore, loudly) and join the fun.

Again, please drop Bill a note to suggest when you will be available for the event. With two stations running the scheduling won't be such an issue but the food and similar issues are still important. We are planning to have meals available from Saturday evening until Sunday evening. Oh, and you can bring along snacks.

We'll try this strategy for this event. We'll have tons of FUN and learn a few things about contesting. You can help and we'll all enjoy this event. With any luck this will be good training for future contests.

Bill:

Glad to see the activity and planning. Sorry, but I'll be in Indiana for the For Twain Hamfest, so I can't help out.

Since you're leaning toward multi-single, I suggest you get a contest logging programme. My inclination would be to pay a few bux to n3fjp for his programme (I think it's $6.00 or maybe $9.00). It has voice keying built in, all you do is record "CQ Sweepsteaks this is W8ZHO Michigan (or whatever)" and it will play it over and over again, at a timing which you provide. It's slightly tricky getting the volume of the system set up right so it doesn't overload the rig, but that can be done a-priori.

I'd figure on using headphones (in a manner which will allow the speaker to be heard, if folks want to listen in who aren't operating. Headphones are much clearer for listening, and two sets can be put in series or parallel so that an operator and a logger can hear simultaenously.

Even if you don't use the voice keying, all the programmes with which I'm familar have dupe checking, and most will keep track of the sections you've worked and the sections needed. For most of these programmes, all you need is a very basic computer - windows 95 on a 486 machine would do.

Finally, I'm not a member of your group, so take these comments for what you paid for them. :)

Hank:

It seems that EVERY year the Fort Wayne folks schedule their hamfest on the wrong weekend in November. I really like that show, too.

Yes, we are using the N3FJP software. Our club has a license for all the versions. And when we get that shack computer running more reliably we will put all our logs on that software. We use it a ton during Field Day.

Thanks for the tips and we'll certainly give consideration to all your thoughts. It will be great playing radio from our clubhouse.

Chris:

No, there is no provision for a GOTA station in Sweepstakes. Each station is autonomous. The second station would be separate, scored separately, and worked with the same or different operators. Does not mean that the two stations cannot coordinate QSO data to help each get to a clean sweep. Multi single operations can use assistance of other radio operators which includes packet spotting.

John,

I know all about being outside. I have to do it during the winter as part of my job and I get way more of it than I care for. Some people don't like the heat, I don't like the cold. I have no desire to be outside in the cold unless I have to. You won't find me on a snowmobile, in a fish shanty or in snowshoes any time soon.

I don't need the cold weather training. I have gear that I used to work for 10 - 12 hours a day, 6 days a week in the depths of the winter did just that when I worked on the construction of the gas fired peaker power plant in Zeeland. Some days it was 10 below and windy and we still had to work outside for the entire shift. Now we contract with a company that installs and repairs outdoor Verizon tx sites. (Those grey / green boxes you see scattered all over the place.) We schedule the power to be cut weeks in advance. When that day comes we HAVE to do the job, outside, no matter what as we only have a short time window in our 'High Risk Outage' allowance with Verizon. I have installed power transfer switches the size of a small refrigerators in blizzards. Trust me, it's no fun.

I do agree about seeing nature first hand. I grew up out in the sticks. I even had a creek that flowed through our property named after me.

My sister got our road named after her. (Bambi Lane in Egelston Township).

Now I am close enough to the Park to run net control from my nice warm ham shack!

73,

Mark K8MHZ

Help is still needed for this run which is next Saturday. We will be using a 2m portable repeater with a 1meg offset generously supplied by Darryl AB8AZ. I will let you know what the frequencies are as soon as I find out.

The run will be held at Hoffmaster State Park in Norton Shores on Saturday November 18, 2006. In previous years the race itself started at 10AM. Due to the distances we have to travel to get in position we will be starting an hour earlier at 9AM. The event will run no later that Noon.

I am looking for at least 12 people to help me. Once again we will be using a portable repeater supplied by AB8AZ.

If you can help contact me at n8ctt@... or my cell phone 231-670-1284.

What people still need to keep in mind is that your Social Security card and number is yours to do with what you wish regardless of the issue, as a consumer or a volunteer. Period. No one can force you to give it to a service provider, but that provider can still refuse you the service which you are attempting to obtain should the provider mandate that information and you do not wish to provide it.

As a Social Security employee, I find it important to remind people of this simple fact.

From: Joe Veldhuis
Topic: 1663 Message: 1663

Checked the FCC website a half hour ago and found that my new callsign
has finally gone into effect. From this day forth I shall be known as N8FQ.

I have changed the callsigns of my packet stations to reflect this,
though I am still waiting for WB8TKL to give me a new set of domains.

Just a heads-up.
-Joe, N8FQ

Many thanks also go to Debbie, KC8WSG; Rick, W8LGP; and Tom, W8AMZ. Their assistance with meal preparation and our power distribution system took us from "roughing it" to having the deluxe accomodations, as field day sites go. Thanks also to Al, KV8X for going above and beyond for the bonus points... and Jim, KC8PCJ for the satellite and digital... and Tom, N8YJT for the packet efforts... and Bill, AB8SC for a radio-active GOTA station... I could go on and on, but the point is: Field Day is definitely a team effort, and everyone's contributions are greatly appreciated.
Jon AB8RD

We were wonderful at W8ZHO!

Congratulations to Linda, AB8QH and Jon, AB8RD for much of the credit
for a successful Field Day.

And tons of thanks to all the operators who made this possible.

We can be quite proud of our effort.

THANK YOU!!!

1676. Indiana's 1st D-STAR Repeater to be Announced Saturday at Ft. Wayne Hamfest

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-16 00:15:40 UTC
From: Mark Thompson
Topic: 1676 Message: 1676

Indiana's first D-STAR repeater in Indianapolis will be announced on Saturday at the D-STAR forum at the Ft. Wayne hamfest.

The repeater owner will be at the forum and we look forward to seeing you. Details about the forum are in the attached email below.

73, Mark, WB9QZB
Chicago, IL

http://groups.com/yahoo.com/group/illinoisdigitalham/

----- Forwarded Message ----
From: Mark Thompson <wb9qzb@...>
To: IndyHamRadio@yahoogroups.com; scanindiana@...; WestMichiganHams@yahoogroups.com
Sent: Thursday, November 9, 2006 3:52:50 PM
Subject: D-STAR Presentation, Saturday, 11/17 @ 2:15 pm, Fort Wayne Hamfest (Red Forum Room)

The Fort Wayne Hamfest will feature a presentation on D-STAR by Mark Thompson, WB9QZB on Saturday, November 18th at 2:15 pm in the Red Forum room.

D-STAR is a digital protocol developed by the Japanese government and
Japanese Amateur Radio League. Icom is the first manufacturer to
manufacture D-STAR-compatible radios, although the protocol is open
to anyone.

D-STAR enables simultaneous digital voice and data transmission. At
present, digital voice can be sent on 144, 440 & 1.2 GHz (4800 bps)
concurrently with low speed asynchronous data (950 bps) in a narrow
6.25 KHz channel. High speed data (128 kbps) can be sent concurrently
using TCP/IP on 1.2 GHz in a 130 KHz channel.

D-STAR repeaters are connected via the Internet, which enables
worldwide connections across the D-STAR network. Imagine having a
broadband Internet connection via your mobile rig.

Among the many possible applications, D-STAR promises enhanced
emergency communication handling - the efficiency of simultaneous
voice and data communications, as well as graphic and other large
file transfers that are difficult or impossible with current packet
technology.

Mark, WB9QZB, will present the D-STAR system in detail, with an
update on Icom technology, the radios currently available that
support D-STAR, and what is in development. Mark has been actively
involved for many years in local packet and digital radio activities,

and has been featured on Hap Holly's RAIN Report.

Please join us for an informative and entertaining presentation on Saturday, November 17th at 2:15 pm at the Fort Wayne Hamfest. The hamfest is at the Allen County War Memorial Coliseum and Exposition Center, located at 4000 Parnell Avenue in Fort Wayne.

A free Icom hat will be available to those who attend the forum. Come early. Supplies are limited.

If you can't make the presentation visit the Illinois Digital Ham Yahoo Group for more information about D-STAR:

http://groups.com/yahoo.com/group/illinoisdigitalham/

PLEASE PASS THIS ANNOUNCEMENT ON TO OTHER CLUBS & HAMS WHO MIGHT BE INTERESTED.

1679. A question for debate

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-16 16:36:46 UTC
From: Chris Schulte
Topic: 1679 Message: 1679

Greetings all,
I'm sitting here listening to a qso here on the twenty meter band, and a gentleman is talking here in the states to someone in the netherlands. He was saying that would rather be near the ocean then on a mountain top.

Now, since the take off angle of a beam antenna decreases as the slope increases, and salt water increases radio wave propigation, which would be better. Would it be more beneficial to be on a mountain top, or near the ocean? Just something to consider here on the list and something to have a little friendly discussion about.
73,
Chris, ab8wo

That's an interesting thought, considering that the signals have to travel basically on a reverse path to get to earth, but that being said, we talk to them on vhf/uhf all of the time, and there is moon bounce, so that would be interesting to see.

----- Original Message -----

Subject: Re: [WestMichiganHams] A question for debate

Interesting question.

I have to say that a fairly large portion of my DX contacts were near the ocean. Many of my cards have pictures of the ocean on them, mostly the Atlantic.

Does salt water bounce signals back to the ionosphere well? It seems so. I have made very few contacts to stations high in the mountains but that just may be due to the difficulties of having a station there and the consequent lack of proliferation of those stations.

It would be much easier to construct a station near the ocean than on a mountain top, that's for sure.

I wonder what HF would be like coming from the ISS? Just think of the huge beams they could have!

1683. Question for the traffickkers

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-16 20:38:32 UTC
From: Hank Greeb
Topic: 1683 Message: 1683

Is there a way to get formal traffic to a packet BBS via the Internet in Western Michigan? That's the question for the traffickers around here. If I dropped some messages onto a BBS, would it be picked up and sent on its way?

Why do I ask? It's a long story.

I got onto the QMN frequency last evening at 0030Z, no Michigan stations heard. There was a QSO going on near Detroit, a VERY LOUD signal from there, so it seems that no one was around. I did a few QMN? calls, and a VE3 answered, saying he hadn't heard any stations on either. He also said there had been some difficulties on the MITN earlier in the evening (a Phone net, I suppose). But, I was hearing lots of stations in Northern Illinois, on the ILN, and the fellow in Detroit was bursting the front end of my rig to pieces.

Anyway, at 0045z I listened to 8RN, no Michigan rep, so I checked in, saying I'd take traffic for Michigan, but there was nil. I listened to the Eastern Area Net, they were having some difficulties in the Northeast and had to get relays from 4-land.

When 0230Z came around I listened for 8RN, the NCS was in West Virginia, quite loud, and there was another person in Ohio who was quite readable. Between them they had 7 messages for Michigan, which I took. At 0300 QMN came up, but the NCS was very watery and he couln't hear me, nor could any other station hear me.

I sit here, stuck with 7 messages for several parts of Michigan. They aren't all that important, but I'm of the olde school and would like to forward them along. I can't be around for the 0030Z session of QMN, nor the 0000Z session of MITN, and the western Michigan traffic net doesn't meet until tomorrow. I suspect by 0300Z tonight propagation will be long on 80, and I don't have my tuner scraped together for 160 at the present......

If I can't figure a way to get the messages into a Michigan net, I'll just call the people and deliver them by telephone, because I have cheep/zero cost long distance. But, it would be nice to get the messages closer to the destination.

Any info will be cordially appreciated.

This is true, but you also have to think about the fact that the mountain top station may have other taller mountains at a close proximity to it as well.

Something else to consider is that the mountain top station will have omnidirectional capabilities whereas the oceanside station only has an advantage with stations on the ocean side of them.

Unless they are on a small island, of course.

I'm sitting here listening to a qso here on the twenty meter band, and a gentleman is talking here in the states to someone in the netherlands. He was saying that would rather be near the ocean then on a mountain top.

Now, since the take off angle of a beam antenna decreases as the slope increases, and salt water increases radio wave propigation, which would be better. Would it be more beneficial to be on a mountain top, or near the ocean? Just something to consider here on the list and something to have a little friendly discussion about.
73,
Chris, ab8wo

All

Lets welcome George Brewster KD8EOO to our group. He is a new Ham that I meet in Holland at the Hamfest. Geouge studyed on his own and went to a Grand Rapids testing, and got his licence. He should have a radio soon and you will hear him on the air. What a GREAT call sign too. Tom KB8VEE DEC-6

Tom

Ok I joined the group and just waiting to hear back. Looks like I had better get my self a radio so I can get a taste of just how the repeaters work.

George P Brewster Sr. KD8EOO

Tom:

Sounds like you should coordinate Jim, K8COP and KD8EOO to get the new guy a great used rig for two meters.

I had a wonderful QSO with Josh, KD8EMG, a new ham from the Holland or was it Zeeland area. He was in town visiting his grandfather, Bob, K8CCG. He's thirteen, and judging from his demeanor on the radio had not likely been in too many QSOs to that date (last Saturday?).

Welcome to both!

Bill, AB8SC

I didn't think much about the fact that propagation would be greater off of salt water instead of fresh water. Is this due to the greater density salt water has over fresh water?

It seems so. I have made very few contacts to stations high in the
mountains but that just may be due to the difficulties of having a
station there and the consequent lack of proliferation of those
stations.

From: Dennis Harriss
Topic: 1691 Message: 1691

Hi All,

Here is the information for those of you that will be helping out Saturday the 18th on the Hoffmaster Trail Run. We can still use a few more helpers so if you're inclinded to help you are welcome.

We will be meeting at 9am at the Beach Parking lot of the Day use area. This parking lot is the first right after you enter the park.

The repeater we are using has a frequency of 147.220 with a standard PLUS offset (147.820) and a PL/CTCSS of 94.8. This will make it easier to setup your radios.

Directions to Hoffmaster State Park.

For those using the US-31 Expressway get off at the Pontaluna Rd exit. Go west on Pontaluna RD approximately 2 miles and when the road starts to curve to the right the Entrance to the park will be on the Left. If you need assistance talkin will be on the Muskegon 94 repeater.

Thanks to all for volunteering to help.

Salt water is a great conductor of electricity, and a body of water is very flat, so it "looks" like a great reflector to HF radio waves. Low angle reflection would be enhanced if the antenna were erected near the ocean. Low angle radiation is what DXers always are seeking.

Did you ever see a water rheostat demonstration in your grade school science class or high school general science class? It is made of two electrodes, one which is fixed in a container of water, the other can be raised or lowered into the water. A circuit can be made by connecting a 110 Volt lamp cord in series with a light bulb. If you start with distilled water in the container, the lamp will hardly light up (sometimes it's hard to see the light.) Add a pinch of salt, and you'll get some brightness with the variable electrode fully immersed. Add a teaspoon or two more of salt, and you can have an effective light dimmer switch. (of course, it won't meet building codes nor OSHA specifications, but makes a good demo for an elementary or secondary school science class on parent's day.)

The oceans have a fairly high level of salt - probably more than a couple teaspooos in a gallon of water. Sea water would make a good mediu for the water rheostat.

I am glad WMHams is here (thanks to Don M. and Mark D.) because I would have no idea what's going on in West Michigan if not. I too have been removed from both Muskegon and Ottawa county ARES groups, despite being an Ottawa County Skywarn spotter.

I was told it was because of too many duplicate e-mails, but the only dupes I see are in my e-mail box, not every one else's.

I am sure there is a good reason for the "housecleaning" on the groups and, as such, I am not questioning the leadership skills of anyone. That decision is the prerogative of the group moderators/owners and I have accepted that it's really none of my business why I was removed. I do know my frequency of volunteering has decreased. I am not really sure if it has to do with my perceived "exclusive" attitude in the community or not. It may just be that I am too busy.

You're all welcome to join the W8CSO reflector whether you're a club member or not. It's at least a connection to Ottawa County specifically, but many of the posts are duplicated on WMHAMS anyway.

I guess what I am trying to say is that you're not alone. Perhaps we should start up a WM LIDS Support group so we can feel better.

1704. Re: Parochialism and Red Tape

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-17 18:58:33 UTC
From: Hank Greeb
Topic: 1693 Message: 1704

Mark:

I've found a lot of parochialism and much more red tape since I moved to Michigan from Ohio. Red Cross wants permission to search your financial records along with a criminal background check. Locally RACES demands that a ham participates, on the air an in person, in many activities in order to stay in their good graces.

I can see why Red Cross would like their folks screened for criminal activity after some glitches in Hurrican Relief along the gulf coast. But, no one has given anyone (me, or any of the ARRL officials I know) a clue as to why they need a credit check along with that criminal background check.

As for demanding a large chunk of time for training for RACES, there doesn't seem to be any slack for a person who has been active in disaster relief operations for almost 60 years, and could write the training manuals for many of the required study courses. I'll probably submit to these courses after we get our home built here in Michigan, but right now I'm tied up with house plans, etc.....

The MITN Phone traffic Net you speak of is the Michigan Traffic Net which meets at 7pm local time. It is desperately short of NCS's and stations to go and pick up traffic. Perhaps they are all on the Internet and cannot be bothered! Yes, the MITN is in trouble. We simply need replacements for the burned out few and soon or this net will fold up! The MITN FREQ is 39.52 LSB. DE WD8USA ...-.-

Maybe you should stop hollering about how many hams happen to have broad enough horizons to be able to have more then just radio in their lives and consider recruiting other people to help with the traffic net? It would seem to me that might be a better outlet for all of the pent up energy that you appear to have. Just a thought mind you, but something that you might want to consider nonetheless.

How about we find some guy named "Bill" and ask him for a twelve step program. Then we could meet in someone's church basement and commiserate.

Bill, AB8SC

I did a quick check on QRZ.com, and find that W8LID, WB8LID, K8LID, etc., aren't assigned. I don't know if FCC has a ban on issuing these calls, but, if not, they'd be a nice vanity call for the new club

"Amateur Radio Lids of West Michigan, Inc."

Someone else might come up with a name which has a catchy acronym. ARLoMI doesn't spell anything!

Hank ,

I'm also an active member of the American Red Cross and have went through extensive training to get to the level that I am at within the organization . My brother and I are also involved with the Red Cross Emergency Communications Team and are planning on going to Chicago for training and classes in that area . I have also taken numerous courses through the ARRL , which I am a member . And have taken many Fema Courses online and at seminars . I have also went to college for Emergency Management learning , Mitigation , Preparation , Response and Recovery . Issues and problems that emergency planners, emergency responders, corporate safety and environmental managers and government managers face in a variety of crisis situations including natural and technological disasters, as well as issues of Homeland Security are addressed.
So I do have some knowledge of how things should operate .

As far as the back ground checks that everyone seems to be concerned about I can only tell you what I have learned through a letter I got from our local chapter .

The letter reads :

Volunteers are the most valuable asset the Red Cross has . It is because of the work you do that the Red Cross is able to serve the community as we do .

To ensure that we maintain the highest level of integrity of our volunteers and employees . The National Red Cross now requires background checks . These background checks must be completed by December 10th 2006 .

Background checking Red Cross employees and volunteers benefits everyone . When a victim of a house fire or a hurricane needs help , they know they can trust a Red Cross volunteer. Donors can rest assured that when they give to the Red Cross , their blood or money is protected . And when an individual makes a decision to a volunteer or work for the Red Cross , he/she knows they are in trusted company .

What dose this mean to you ?

*All volunteers and employees must perform a self-administered background check .

*You do this background check on the Internet at no cost to you .

* This background check will search the National Criminal File and verify your Social Security Number .

* All Social Security Numbers are encrypted immediately so that no one can view them .

* There will NOT be any credit checks .

Disaster Services Human Resources (DSHR) volunteers who have already completed the mandatory DSHR background checks and youth under the age of 18 do not have to complete this check .

Thank you for your cooperation and continued valuable service to and support of the American Red Cross .We value you and all the work you do for us .

Sincerely ,
Frank . P Marczak
Chapter Chairman

That is the letter I received from the Red Cross . I hope it answers your question . I know the Red Cross got a black eye due to the way things were handled during the Katrina volunteer efforts . This maybe one way they are trying to prevent further embarrassment . I encourage everyone to call there local chapter and express there concerns or ask questions .

73s ,

Big Mark "KD8BIG"

-------------- Original message --------------
From: "Hank Greeb" <n8xx@...>
Mark:

I've found a lot of parochialism and much more red tape since I moved to Michigan from Ohio. Red Cross wants permission to search your financial records along with a criminal background check. Locally RACES demands that a ham participates, on the air an in person, in many activities in order to stay in their good graces.

I can see why Red Cross would like their folks screened for criminal activity after some glitches in Hurrican Relief along the gulf coast. But, no one has given anyone (me, or any of the ARRL officials I know) a clue as to why they need a credit check along with that criminal background check.

As for demanding a large chunk of time for training for RACES, there doesn't seem to be any slack for a person who has been active in disaster relief operations for almost 60 years, and could write the training manuals for many of the required study courses. I'll probably submit to these courses after we get our home built here in Michigan, but right now I'm tied up with house plans, etc.....

Hank,

Yes, now that you mention it, I do remember this demonstration and it makes perfect sense. Initially I was thinking along the lines of the density in that the salt water would absorb fewer of the radio waves and reflect more back into the atmosphere and not be such a good wave absorber material.

the men and women of the mitn net deserves alot of credit from us hams for the hard work that they put in what they do. if it wasnt for them, passing messages the nts net would not happen. it is sad to see that they need help, if i could i would help them out. i would like to say thank you for the hard work. paul.

k8mhz@... wrote:
It is unfortunate that the MITN net is hurting for help.

Kudos to the NCS operators that have hung in there. There is more to it than what we hear on the radio.

For one thing they have to pass on accurate information. A simple thing like a decimal in the wrong place could change the entire meaning of the message.

To that effect, isn't the net on 3.952 MHz, not 39.52? :))

Sorry, I couldn't resist that!!

All:

I'll weigh in on the issue with a question, "Why would an ARES member submit an application for a Red Cross background check?" I'm not a member or volunteer with the Red Cross. Why does the MOU between Red Cross and the ARRL not allow the ARRL communicators autonomous authority in an emergency? I suggest that the ARRL folks find out what is so valuable about a Red Cross membership tag that is so deficient with an ARES membership tag. If I want to be a volunteer for the Red Cross then fine. I choose to volunteer my effort to the local ARES group.

Hi everyone.
This is Doc Strait. I am the Net Manager for the West Michigan Traffic Net (WMTN). I took over for Joe, WD8USA, in August 2006. The WMTN meets every Monday, Wednesday, Friday and Sunday evening at 9pm local time on the W8HVG Linked repeater system.
If you have traffic to pass, you can bring it to the WMTN and we can get it passed. If helped is needed with the formatting of traffic, we will gladly provide it.

The WMTN is in need of more NCSs, Liaisons for the HF nets and various ARES groups, another Digital Representative and an Assistant Net Manager. If you are interested in any of those positions or would like to know more abou the WMTN or NTS, please email me at kd8bgq at arrl.net The time to decide to learn how to do NTS is not once the disaster has struck or about to.

Some say to stop complaining and whinning and go recruiting...Well... Joe has been recruiting for at least three years and I have been recruiting since June 2006. We have been visiting clubs and various VHF, UHF and HF nets in efforts to recruit members into NTS. We have done presentations at these clubs. We have had NTS booths set up at numerous HamFests and Swaps. To date, no takers from the recruiting. Those that have joined just happened to come across the net when it was in progress. They came back and then decided to get involved. We will get a new check every so often and 99% of them do not return for reasons unknown to me. There is less than ten of us that will deliver or relay traffic for the entire west side of the lower peninsula. From Traverse City all the way down to Michigan City.

Sooo....come on out and join us! Learn how to do NTS. We provide FREE training!!

The comment that I was making on this point Doc was that Joe has no right to accuse us of sitting around clicking a mouse, or punching a keyboard when he doesn't know who half of us are, or what our radio habits are. For saying that some of us should recruit more, I am sorry, because I honestly shouldn't have made that comment, but considering that there was an accusation made that was very much baseless, I was angry and defended myself and others who write to this list on a regular basis and still find time to enjoy this hobby that we all love. Some even combine the two, which is something that once I get a little more cash, I wish to do. Again, for offending you and the other good people who handle traffic on the mitn, I appologize, but I also am just a bit offended that I and others have been accused of something without real proof.
Now, in the words of so many who have gotten into tiffs before us, "Can't we all just get along?" *grin*

People too often forget the role that hams played in the early
development of the Internet. Callsign e-mail addresses predate the "@"
delimiter.

Anyway, I would imagine that one of the biggest reasons why there is so
little participation in the NTS nets is that there's no traffic to
handle other than "spam" that people neither want to deliver nor
receive. If there was more real, meaningful traffic, there'd be more
participation. I know I'd check in more often if that were the case.

1731. ARISS Contingency Network Activated

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-18 02:26:49 UTC
From: Jim KC8PCJ
Topic: 1731 Message: 1731

from the amsat-NA news web page

News Release October 30, 2006

On Thursday, October 26, NASA Johnson Space Center asked that the ARISS Ops Team enable its ISS Ham Contingency Network and go into standby mode as a resource for NASA. ARISS volunteers immediately swung into action.

Russian Flight Controllers were experiencing difficulties completing the docking of a Russian Progress cargo vehicle. Its antenna would not retract properly as it neared the ISS. It is a requirement for the antenna to be retracted before the last step of the physical docking is executed to avoid a collision between the antenna and the docking port. The ISS was put into a free-drifting mode, which aids the crew with docking maneuvers. Free-drifting results in the ISS solar arrays not being pointed directly toward the sun. This causes decreased power generation for the ISS, and the crew is required to slow down or shut down some ISS systems to conserve power.

During free-drift mode, a loss of TDRSS (Tracking and Data Relay Satellite System) coverage can occur; TDRSS is the system that handles communications between astronauts and Mission Control (MCC) in Houston. The ARISS Team was asked to ready its ISS Ham Contingency Network so that MCC could feel secure in having solid communication coverage while their staff took care of the docking issue.

The docking problem was solved, and the ARISS contingency network wasn't used by NASA for actual communications. NASA's request and the ensuing ham activity served as a great drill for the ARISS Team. MCC (Houston) was impressed with how quickly the ARISS Team had its system up and running. The MCC staff's concern about the possible TDRSS problem was lessened, knowing of the hams' ability to act as a back-up resource in the case that it is ever needed.

Kenneth Ransom, N5VHO, generated a procedure for the ISS crew on the operations of the ARISS contingency network. The fact that the ARISS Team was asked to be on standby was known by anyone listening to the NASA communications channel. MCC Houston transmitted a message to the crew that information would be uplinked about the ham network and the procedure for it if they needed to invoke it.

It was the first time in the six-year history of ARISS that NASA had asked the hams to bring up the contingency network. Within 15 minutes of receiving the call from NASA, ARISS Ops Team member Kenneth Ransom, N5VHO, reported the ARISS Ops Team ready to communicate. ARISS Team member Tony Hutchinson, VK5ZAI, of Australia, was awakened at 2 AM, and got on-line to make a blind call up to the crew, although they did not need to answer at that point.

Within the 3.5 hours from the time the initial phone call came, until the team got word to shut down, Tony Hutchison, VK5ZAI, was as his mike, and these additional stations were on standby to cover later passes: Gerald Klatzko, ZS6BTD, in South Africa; Gaston Bertels, ON4WF, at the Belgian ON4ISS station; Dick Flagg, AH6NM, and Nancy Rochelau, WH6PN, at

Sacred Hearts Academy in Honolulu, Hawaii; and Frank Bauer, KA3HDO, and Mark Steiner, K3MS, at the Goddard Space Flight Center ham station, NN1SS. The ARISS teamwork was very effective; its members learned a great deal, and they impressed NASA with how quickly the system was brought up.

I wonder what would have happened if a neophyte ham had come into this newsgroup and had asked the question which I asked.

They'd probably have been so discouraged by the sniping, etc., that they might have dropped all interest in traffic.

I very clearly stated that I had some traffic from the Eighth Region, for various part of Michgan, and I was unable to make the MITN, West Michigan Traffic Net, Wolverine Net, or QMN sessions because of other personal obligation. I had tried the late QMN session, and it was washed out due to long skip. I don't have my packet station set up yet. I couldn't quite figure out how to get into the packet BBS's on Telnet. THAT was my question. Personally, whether the message is life or death EMERGENCY traffic, or a message from the N1 who sends reminders to anyone and everyone that their license might expire in the next EON is NOT of concern to me. If someone starts a message, and I accept that message, I try my best to relay it along, be it via CW, Phone, VHF, telnet, or whatever. I ask a simple question of how to get into a pcket bbs via telnet.....

I ask a question here in the conference, get no reply - just a bunch of folks p.....g and moaning about factors of no relevance to the question I asked.

This is very real comaradarie - very helpful. If I weren't so thick skinned after some 57+ years of hamming I'd probably fold my tent and stop handling traffic.

I trust I haven't offended anyone, but I'd counsel folks to engage brain before pounding the keyboard.

Hank Greeb <n8xx@...> wrote:
I wonder what would have happened if a neophyte ham had come into
this newsgroup and had asked the question which I asked.

They'd probably have been so discouraged by the sniping, etc., that
they might have dropped all interest in traffic.

I very clearly stated that I had some traffic from the Eighth
Region, for various part of Michgan, and I was unable to make the
MITN, West Michigan Traffic Net, Wolverine Net, or QMN sessions
because of other personal obligation. I had tried the late QMN
session, and it was washed out due to long skip. I don't have my
packet station set up yet. I couldn't quite figure out how to get
into the packet BBS's on Telnet. THAT was my question. Personally,
whether the message is life or death EMERGENCY traffic, or a message
from the N1 who sends reminders to anyone and everyone that their
license might expire in the next EON is NOT of concern to me. If
someone starts a message, and I accept that message, I try my best
to relay it along, be it via CW, Phone, VHF, telnet, or whatever. I
ask a simple question of how to get into a pcket bbs via telnet.....

I ask a question here in the conference, get no reply - just a bunch
of folks p.....g and moaning about factors of no relevance to the
question I asked.

This is very real comaradarie - very helpful. If I weren't so thick
skinned after some 57+ years of hamming I'd probably fold my tent
and stop handling traffic.

I trust I haven't offended anyone, but I'd counsel folks to engage
brain before pounding the keyboard.

The question that I have after looking at this is does the traffic have to be passed via net, or could you find someone who is on the traffic net and e-mail t to them? I know this isn't necessarily by the book, but it is what I was saying before, combining the resources of ham radio and the internet to get a job done. I know that at least two people who participate in the net are on this list, so wouldn't that be something that could be done? I'm not trying to violate the ARRL rules of handling traffic, but is that ultimately something that is allowable. That's the end of my long, drawn out and redundant question,
73,
Chris, ab8wo

Hank,

My apologies that you did not get an answer to your question.

I personally don't have experience in the realm of traffic handling so I could not answer the question for you.

It seems that a lack of manpower may be to blame. That is not a very technical answer but digging through the replies that is what appears to be.

Recruiting seems to be in a slump. It is my intention to increase our numbers by teaching tech class. When the class starts there will be time for presentations and a demonstration of traffic handling would be a good one. It would also create some exposure for the nets. Stay tuned to this mailing list for more details. When class starts I will be happy to oblige the promotion of the nets.

73,

Mark K8MHZ

Topic: 1736 Message: 1736

I tried passing Traffic when I first got my ticket . Seemed like all Traffic was , Happy B-Day , Have a nice day , Good to hear you on the net . Good luck on .... , etc . Nothing with any meaning or of importance . That is why I stepped back /out of it . It was like sending , "spHam " ?
I know they need help and volunteers etc . But there isn't anything with meaning . Someone mentioned that in another post . Some of the Traffic reappears often .
I think they are doing a good job with what they have , But they refuse to change there Net times and insist on doing Traffic Net at 9pm . I do not know how the rest of the world works but for me having children , family obligations , work and other responseabilities 9pm dose not work for me as well with many others . Think of those who would but work 2nd and 3rd shift jobs . Nonetheless, I guess it would be a great way to get in some practice . A little more time consuming but cheaper than a Hallmark .

I do not wish to take away from what they are doing . They do pass very important traffic at times and it takes a lot of Practice and Skill to be a good traffic handler . It is not something you just do . Those on the traffic net welcome all to join and are there to help those who never have taken traffic . It is better to learn on a B-Day wish than an emergency situation .

Howdy Chris
We all sure can get along and we do. Don't forget November Sweepstakes and the club today. Plenty of chili and coffee!

See ya later
Doc

Hi Joe. Congraduations on the new license level and call sign! Way to go!

You are right about one of the reasons why there is so little participation in the NTS is due to the lack of quality messages. I have heard this from many operators. I would say over 95% of the traffic we handle is what I call "spam-o-grams." It is frustrating to say the least. Rarely do we have people bring messages forward that are personal in nature. Many messages that used to be sent via Radiogram are now sent via email, blogs, reflector groups, text messages and cell phones.

One things I have requested of all the WMTN regulars is to begin bringing non spam-o-gram traffic to the nets. Not doing so is kinda like going to a potluck and not bringing a dish to pass. I think as traffic handlers, ORSs, NCSs and NMs that we need to set the example and bring decent traffic to the nets and not just check-in to take traffic for delivery. Does that mean a person checking in needs to bring a message each time? No. It would be great if they did but that is not always possible. Forcing that onto others will result in more spam-o-grams. We want the messages to be personal. Perhaps once a week or every couple of weeks if individuals check-ins would bring a personal message that would be nice. I know I send NTS radiograms on a personal level every month. I send messages to military buddies, friends and families in other states. I think sending radiograms to our non-amateur radio friends it becomes a great way to promote amateur radio.

We need people to bring more meaninguful traffic to the nets without a doubt. Question is, whom will start it and will others join in and continue to use the NTS? Why not send an ARL SIXTY, ARL SIXTY ONE or ARL SIXTY THREE instead of the holiday card or in addition to that Holidy Card.

Thank you for your good observation and feedback.

Hi again Chris
If you or anyone else has a message to get into the NTS and can not make it to the nets, by all means email it to me or call me or Jean, KC8WSE. We can then take the message from there.

> The question that I have after looking at this is does the traffic have to be passed via net, or could you find someone who is on the traffic net and e-mail t to them? I know this isn't necessarily by the book, but it is what I was saying before, combining the resources of ham radio and the internet to get a job done. I know that at least two people who participate in the net are on this list, so wouldn't that be something that could be done? I'm not trying to violate the ARRL rules of handling traffic, but is that ultimately something that is allowable. That's the end of my long, drawn out and redundant question,

Good day Hank.
I apologize for not answering your question prior to my other posts.

In the event that you have traffic to list and are unable to get
onto the nets, please email it to me. I will get it onto one of the
nets or forward it to the WMTN Digital Liaison so he can get into
the system.

My apologize

1741. Re: Question for the traffickers

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-18 18:28:56 UTC
From: ravennaelectronics
Topic: 1736 Message: 1741

Hi Mark
The WMTN is at 9pm is for a few reasons.
It allows the various net liaisions the ability to get to the various state and region nets to pick up inbound and send outbound traffic. At 7pm there is the MITN and at 8:30pm is the GLETN. After the WMTN is the QMN (CW) net. I would like to have a liaisoin for that net so that we can begin putting outbound traffic there instead of waiting until the next day to list it on one of they daytime HF NTS nets. The times of ALL nets are coordinated to produce timely and efficent traffic handling. The goal is to get that message delivered as quick as possible.
The 9pm time was the best fit to coordiante with the HF NTS nets. If there was enough interest to have daytime WMTN then I would be happy to pursue that with the W8HVG Repeater group and the Lowell ARC groups. They give us permission to use those repeaters to run the traffic net. And yes, they do get complaints from other operators that think the NTS should be dissolved or not be on the repeaters.

As for the issue of the spam-o-grams,it is like I told Joe V. There would be decent non-spam-o-gram messages if amateur radio operators would bring them to the net. Read the rest of reply to Joe for further on that.

Have a great day!

1742. New poll for WestMichiganHams

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-18 18:34:36 UTC
From: WestMichiganHams@yahoogroups.com
Topic: 9 Message: 1742

Enter your vote today! A new poll has been created for the
WestMichiganHams group:

Would you participate in a daytime session of the West Michigan Traffic Net (WMTN)?

o Yes. At any time of the day.
o Yes, but only if it is in the morning.
o Yes, but only if it is in the afternoon.
o No. I am not into NTS.
o No. I have other obligations during the day.

To vote, please visit the following web page:
http://groups.yahoo.com/group/WestMichiganHams/surveys?id=1732833

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

1743. DAYTIME WEST MICHIGAN TRAFFIC NET POLL

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-18 18:44:40 UTC
From: ravennaelectronics
Topic: 1743 Message: 1743

I created a poll to find out if there is any and/or enough support to create a West Michgian Traffic Net daytime session.

The time and day the session would meet will be based on:
1.If there is enough interest.
2.Permission from the repeater's governing body.
3.Coordination with the Michigan STM.

73
Doc, KD8BGQ

Chris:

Thanks for your question.

Surely, traffic can be passed by any means - e-mail, telephone, etc. I could have delivered the messages by telephone, and certainly would have done so if there was any time value in them. Or, I could have looked up WD8USA or others I know in the phone book or in my e-mail address book and sent them via telephone or e-mail. But I knew that many packet BBS's had telnet access, so I figured I'd give this means a try. I couldn't find the info - I had forgotten to bookmark the web page with that info. I did find, from an unrelated source, how to check into a BBS via Telnet, and was able to get the messages sent along in a reasonable time.

I was a bit amazed that the question was never answered by anyone, but the thread turned into an almost flame war about whether the traffic being handled on nets is worthwhile.

I hope my previous "rant" didn't turn folks off. Over the years I've found that traffic handling is a lot of fun and quite rewarding.

> The question that I have after looking at this is does the traffic have to be passed via net, or could you find someone who is on the traffic net and e-mail t to them? I know this isn't necessarily by the book, but it is what I was saying before, combining the resources of ham radio and the internet to get a job done. I know that at least two people who participate in the net are on this list, so wouldn't that be something that could be done? I'm not trying to violate the ARRL rules of handling traffic, but is that ultimately something that is allowable. That's the end of my long, drawn out and redundant question,

Hi Hank ,
Hello to the rest of WestMichigans Hams ,

Isn't it amazing how simple things turn into a major drama . Seems to be the West Michigan way . I sense frustration in many Hams and it dose seem there are many who don't stand up for what they believe in . They simply shuffle along and are involve just enough for their call not to be forgotten .
I know these feelings because of comments that were made to me over the air and not to my face . That is why a majority of my rigs and interest went deep into the closet for a period of time .
It took Hams such as AB8SC, K8MHZ , my brother KD8BGQ and a few others , to help me understand to keep an open mind and hang in there . Then a friend of mine got me into working satellites and the bug was back . I listen more than I talk . It seems that the last several months my voice has more bad days than good . I wish the only problem was my voice .

Your comments and none of the others offended me . It is nice that there are those out there who will let the rest of us know how as individuals where we stand with certain issues . That we all have a passion for what we do . It is also nice to know that when the going gets tough , we all seem to work together to get the job done .

I also agree we all need to engage our brain before pounding the keyboard . It is hard to retrieve once the send button has been hit . I have made that mistake myself . Now I read my post several times before I look for that send button .

I myself have not been very active do to health problems and will be off to Mayo Clinic this December to see if there is any hope for this ham . Many know my situation and I thank those of you who have stopped in to check on me .

73s ,

Big Mark " KD8BIG"

-------------- Original message --------------
From: "Hank Greeb" <n8xx@...>
I wonder what would have happened if a neophyte ham had come into
this newsgroup and had asked the question which I asked.

They'd probably have been so discouraged by the sniping, etc., that
they might have dropped all interest in traffic.

I very clearly stated that I had some traffic from the Eighth
Region, for various part of Michgan, and I was unable to make the
MITN, West Michigan Traffic Net, Wolverine Net, or QMN sessions
because of other personal obligation. I had tried the late QMN
session, and it was washed out due to long skip. I don't have my
packet station set up yet. I couldn't quite figure out how to get

into the packet BBS's on Telnet. THAT was my question. Personally, whether the message is life or death EMERGENCY traffic, or a message from the N1 who sends reminders to anyone and everyone that their license might expire in the next EON is NOT of concern to me. If someone starts a message, and I accept that message, I try my best to relay it along, be it via CW, Phone, VHF, telnet, or whatever. I ask a simple question of how to get into a pcket bbs via telnet.....

I ask a question here in the conference, get no reply - just a bunch of folks p.....g and moaning about factors of no relevance to the question I asked.

This is very real comaradarie - very helpful. If I weren't so thick skinned after some 57+ years of hamming I'd probably fold my tent and stop handling traffic.

I trust I haven't offended anyone, but I'd counsel folks to engage brain before pounding the keyboard.

Hank,

80 meters has gone very long in the early evenings as of late. QMN always meet at 7:30pm and 10:00pm local time, every day. BUT, when the band goes real long, you may not hear anyone, or hardly hear anything. Tonight at 7:30, section wide signals were their normal very strong.

Currently, the net still meets on 3663 but because of the ridiculous FCC changes that will take place around Dec 15, it will probably be moving to 3563. As a point of interest, QMN has been on that frequency since 1935!

QMN has alternate frequencies, 7068 and 1812, but I’m not sure when they are used. It also has a packet net with local access on VHF, but I’m not sure how that works, yet.

If you need to “dump” time dependant traffic, I will take it off your hands, any time. You can email me, call me on the phone or we can do it over the air.

Subject: [WestMichiganHams] Question for the traffickkers

Is there a way to get formal traffic to a packet BBS via the Internet
in Western Michigan? That's the question for the traffickers around
here. If I dropped some messages onto a BBS, would it be picked up
and sent on its way?

Why do I ask? It's a long story.

I got onto the QMN frequency last evening at 0030Z, no Michigan
stations heard. There was a QSO going on near Detroit, a VERY LOUD
signal from there, so it seems that no one was around. I did a few
QMN? calls, and a VE3 answered, saying he hadn't heard any stations
on either. He also said there had been some difficulties on the MITN
earlier in the evening (a Phone net, I suppose). But, I was hearing
lots of stations in Northern Illinois, on the ILN, and the fellow in

Detroit was bursting the front end of my rig to pieces.

Anyway, at 0045z I listened to 8RN, no Michigan rep, so I checked in, saying I'd take traffic for Michigan, but there was nil. I listened to the Eastern Area Net, they were having some difficulties in the Northeast and had to get relays from 4-land.

When 0230Z came around I listened for 8RN, the NCS was in West Virginia, quite loud, and there was another person in Ohio who was quite readable. Between them they had 7 messages for Michigan, which I took. At 0300 QMN came up, but the NCS was very watery and he couln't hear me, nor could any other station hear me.

I sit here, stuck with 7 messages for several parts of Michigan. They aren't all that important, but I'm of the olde school and would like to forward them along. I can't be around for the 0030Z session of QMN, nor the 0000Z session of MITN, and the western Michigan traffic net doesn't meet until tomorrow. I suspect by 0300Z tonight propagation will be long on 80, and I don't have my tuner scraped together for 160 at the present..... .

If I can't figure a way to get the messages into a Michigan net, I'll just call the people and deliver them by telephone, because I have cheep/zero cost long distance. But, it would be nice to get the messages closer to the destination.

Any info will be cordially appreciated.

Hank,

How loud (or quiet) is your 1KW generator? Many 3600rpm generator are a bit on the loud side while 1800rpm generators tend to be quieter.

Subject: [WestMichiganHams] Portable Generators on Sale

Pep Boys is having another sale on portable generators

1 KW continuous, 1.2 KW max - 2 cycle 63 cc engine - item # TG-1200 - $149.98 after rebate

2 KW continuous, 2.3 KW max - 4 cycle OHV engine -item # GG2300 - $239.99 after rebate

The brand on these says "UST" - I can't find who manufactures that brand....

I bought a 1.2 KW continuous 1.5 KW max made by Eastern Tools from Pep Boys before field day, and it has worked like a charm for Field Day, the Ohio QSO Party, and the Illinois QSO party.

Two advantages of the smaller units is, first, they are light, therefore easily carried as a part of an emergency response kit. The second is that they use very little gasoline/oil combo - I used slightly more than 2 gallons of gasoline for the Ohio QSO Party (in about 14 hours of operation - I started the thing up early to be sure it was running well) and about 1.5 gallons for the 9 hours or so of the Illinois QSO party. I typically run a computer and a 100 W output rig, plus a fan and a desk lamp on a field operation, but I've run a 1500 watt heater for over an hour to test the ruggedness of the unit The one minor downside is that one needs to remember to have 2 cycle oil, but it's available in 2 ounce bottles in many places.

Two locations in Grand Rapids for Pep Boys are:

Pep Boys Supercenter
3737 Alpine Ave NW
Comstock Park, MI
(616) 785-3122

Pep Boys Supercenter
609 28th St SW
Wyoming, MI Map
(616) 261-5701

In Kalamazoo:

Pep Boys Supercenter
5630 N Westnedge Ave
Kalamazoo, MI
(269) 388-2240

Didn't find a Pep Boys in Muskegon.

From: Mark Thompson
Topic: 1751 Message: 1751

D-STAR Enthusiasts in Indiana -

The D-STAR forum at the Fort Wayne hamfest was well attended yesterday, Saturday. In fact, it was standing room only with nearly 70 in attendance. After the presentation an extensive set of literature about D-STAR was made available to everyone who wanted it as were free Icom hats.

Dale, WB9YCZ from Indianapolis brought his new 440 D-STAR repeater to the hamfest and had it running out in his vehicle in the parking lot so we used the repeater with our Icom 91AD D-STAR HTs instead of simplex. Dale introduced his new repeater at the forum and it will be located on the northwest side of Indianapolis at 700 feet.

I would like to thank Gene, K2KJI of KJI Electronics for bringing a full complement of D-STAR HTs, mobiles and even repeaters to the hamfest. I know some hams got on D-STAR for the first time at the hamfest because Gene brought D-STAR equipment to the fest. His store can be reached at: www.kjielectronics.com

If you missed the D-STAR forum at the hamfest you can find out more information about D-STAR at the Digital Ham group at the link below. We know have over 400 members on the group and look forward to your participation.

On Saturday, January 13th I plan to present a D-STAR introduction / overview at the Southwest Ohio Digital Conference at the Middletown Campus of Miami University, Middletown, Ohio. More information about the forum is at: http://www.swohdigi.org/

Happy Holidays and look forward to seeing you on D-STAR.

Thanks to all who helped out with yesterdays Hoffmaster Trail Run. Bob N9AUY, John N8YQD, Chuck KC8MDL, John KC8UNY, Jon AB8RD, Mike KC8MYG, Jason KC8OVS, Keith KD8CJX and Mark K8MHZ. Also thanks to Darryl AB8AZ for allowing us to once again use his portable repeater.

The weather was nice for this time of the year with tempatures in the high 30s at 9am and ending in the low 40s by the time we were done by 11:30am. The fastest runner took just 0:28:05 to finish and the slowest runner finished in just under 1 hour, The only casuality was an ankle injury which unfortunaley occurred very close to the start of the run.

The race officials expressed their thanks for our help in making the run go smoothly. They are looking forward to using us again next year.

Subject: [WestMichiganHams] Coolest sweeps contacts

So far the sweeps have been a blast.

Part of the info sent is the first year of license. There are some very old and cool calls in the sweeps. While I was at W8ZHO they worked W1AW. I came home and worked a station with a 09 check, meaning the license was 97 years old. The call was W1MX from MIT in Cambridge.

Anyone else work a cool station or an old call?

I would love to see them posted here.

From: Hank Greeb
Topic: 1609 Message: 1755

I have the 1200 W nominal, 1500 W peak, 2 cycle 62 cc gasoline powered generator which is a bit louder than similar ones made by Honda, but it cost me $129 vs >$400 for the Honda. I can work phone or CW with it within about 15 feet of the operating table. It would still be a bargain at $149 - they had a $20 rebate coupon when I bought mine. Mine was made to Eastern Technologies, but the picture of the one made by UST looks like a carbon copy of mine.

It burns about a gallon of gasoline every 4 to 6 hours when it's hooked to a 100 watt transceiver, a computer, and a couple lights. I fiddled with my generator for a couple hours during field Day - because it was brand new and I wanted to get the carburetor "just right." We hooked up a 5 KW generator for that period, and it burned over a gallon of gasoline in the 2 hours it was running.

After that, it ran 22 straight hours on Field Day, 14 hours on Ohio QSO party, and 9 hours during the Illinois QSO party. For the price, it cannot be beaten.

The thing I like about it is that it is small and light weight. I toss it in the trunk of my car, and can still get a rig, some antenna masts, and a tent or dining canopy in the trunk of my Mazda Protege.

The club to which I belonged in Ohio had a 10 KW 1800 RPM generator, but it was so heavy that it required a separate trailer to tow it. It burned around 1 gallon of gasoline per hour - seemingly regardless of the load on it.

All:

We had a wonderful experience with Sweepstakes this weekend. I'm still sleep deprived so will not yet comment in the verbose.

I do want to thank YOU for dropping in and helping. There were so many folks to thank and so many nice things accomplished for the good of the group.

A special Thank You to the MAARC for the use of their fine clubhouse. We enjoyed the experience so much more as a group working toward the goals of friendship and competition.

We ended with 250+ QSOs and 77 of the eighty sections in the log. A most worthy accomplishment.

And, without YOUR help it would not have been half the success. A special Thank You to all who helped in so many ways.

Bill, AB8SC

Coolest Contact? Maybe you had to be there. With three or so hours left the folks @ W8ZHO decided to go for the sweep. We needed eight or nine sections. We pounded on the Alaska door for forty-five minutes before success. Tried the YL, the kid, the experienced guy, the novice guy, the blind guy with great ears, EVERY trick. Called late, called early, called twice, etc.

So, we want the sweep. Call a ham to ask for packet spot help. Asked another operator to listen for needed spots on another band. Looked at the map to see which ones we needed. Decided on a band and antenna. Dialed around searching. Nothing but a new section would do. Threw a HUGE party when we scored Hawaii.

Brought our "ace up our sleeve" guy, Chris, AB8WO into the mix. Amazing how he could 1. hear the other station's call or section before anyone, 2. he kept the entire log in his head and was spinning the dial on a dupe before the rest of us noticed, and 3. dug out the call signs and sections from under tons of QRN and QRM. Amazing to watch. Or should that be listen.

We ultimately came in three short. A most amazing accomplishment.

And we had tremendous fun all weekend. The food was great.

Bill, AB8SC

I arrived and stayed for a few hours to socialize on Saturday night of Sweeps. I was pleased to see around 20 people, kids and adults, hanging out at the clubhouse. It was heartening to see more new folks and their children coming around the club. I remember, not all that long ago, when there were only a few folks showing up for contesting. It shows how perseverance, persistence, and belief in what you are doing will produce results over time. Most of all, I am pleased that this is a POSITIVE group of individuals. Negative hams are like radios ☐ they are only powerful if you supply them with energy, left alone, they are just annoying QRM. Folks are thinking about better ways to do contesting and activities at the club. Others are Elmering and encouraging their fellow hams. I'm excited about where our club is going and what it is building. Congratulations, RF warriors!

I guess from what I had heard in the post contest discussion, The Puerto Rico station worked over 2500 contacts in the thirty hours of the contest.
There was only one station from what I understand in the continental United States that worked 2000 contacts. Talk about burning the candle at both ends. *grin*

Decided on a band and antenna. Dialed around searching. Nothing but a new section would do. Threw a HUGE party when we scored Hawaii.

Brought our "ace up our sleeve" guy, Chris, AB8WO into the mix. Amazing how he could 1. hear the other station's call or section before anyone, 2. he kept the entire log in his head and was spinning the dial on a dupe before the rest of us noticed, and 3. dug out the call signs and sections from under tons of QRN and QRM. Amazing to watch. Or should that be listen.

We ultimately came in three short. A most amazing accomplishment.

And we had tremendous fun all weekend. The food was great.

Bill, AB8SC

It's the difference between "many to one" or "one to many." Also, current sunspot activity propagation favors longer distances, like continental Untied States to Puerot Rico. Plus, there were very few Puerto Rico hams on the air, so PR was a rarity.

Back in 1978 when "N" prefixes were brand new, and so were "X" suffixes the local radio club borrowed my call for a DX contest. It was a phone contest, so I didn't participate much, but folks told me the pileups they endured were like being on the DX end of a DXpedition.

Its great to here that so many had a great time. Weather it was from home or out to the club house.I know I, did even though I did not get in much time. I am planning on doing it again. I am not sure if contesting is my thing to do with ham radio, but it is just one more of many fun things to can do in this hobby.

Coolest Contact? Maybe you had to be there. With three or so hours left the folks @ W8ZHO decided to go for the sweep. We needed eight or nine sections. We pounded on the Alaska door for forty-five minutes before success. Tried the YL, the kid, the experienced guy, the novice guy, the blind guy with great ears, EVERY trick. Called late, called early, called twice, etc.

So, we want the sweep. Call a ham to ask for packet spot help. Asked another operator to listen for needed spots on another band. Looked at the map to see which ones we needed. Decided on a band and antenna. Dialed around searching. Nothing but a new section would do. Threw a HUGE party when we scored Hawaii.

Brought our "ace up our sleeve" guy, Chris, AB8WO into the mix. Amazing how he could 1. hear the other station's call or section before anyone, 2. he kept the entire log in his head and was spinning the dial on a dupe before the rest of us noticed, and 3. dug out the call signs and sections from under tons of QRN and QRM. 1764. Re: Question from a trafficker

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-21 14:52:51 UTC
From: Hank Greeb
Topic: 1764 Message: 1764

This is all fine, but I still have questions:

First of all: PLEASE look on your BBS and see if the 9 or so messages I sent to it late last Thursday or very early Friday got there and were forwarded to something other than the bit bucket!

When I do a ST <zipinMichigan> on the WB8TKL BBS, finish the message with a ^Z, how do I get a listing of the message so I can be sure it actually got there? The BBS responded with a prompt that said the message was "in queue" but I couldn't find it with either a "L" or "LT" to see if I had entered the form correctly. The last time I did a ST was in the early 1990's, so I wanted to be sure I had done things correctly. I used the info which was in the help file, so I assumed that information was correct. IF it is incorrect, BUT I followed that info, it SHOULD BE INCUMBENT on the sysop to fix whatever I screwed up in following the listed procedure..

Why doesn't a private email message to the sysop get a timely response?.

And, how do I join the drg-users@...? I've never heard of lugwash.org. I cannot find information on drg-users on the http://www.mi-drg.org/ web page.

==========

Those are the questions from a person who was assistance SYSOP for some 10 years and a TCC member for some 20 years before that. Now, some commentary.

It seems to me that the computer gurus write help files and communicate in a language which resembles Egyptian Hieroglyphics, designed to frustrate newcomers and olde tymers alike. I also seems that the "growing pains" of the Sysops shouldn't be transferred to the users by changing the actual routing procedures before changing the HELP files.

I'm sending this to the QMN group as well as the West Michigan group because these places are where my question was originally placed. Sending the info off to what appears to me to be a private users group seems a bit bizarre.

All:

Best SS contact?

It is early Sunday morning, local time. We are dialing around fifteen meters and the signals are really great with very little background noise. AB8SC is telling another of his insufferable tales of how to work a contest or how best to pass the contest exchange or some other nonsense. We are dialing up around the dx window where AB8SC goes, again, on the topic of the dx window and how we should not contest there.

We hop above the window and immediately hear, on 21.305, a 5A7A calling cq. I am amazed. Four hams are in the guy's log, quickly, and without incident. The 5A is working simplex. He is begging for QSOs. It is easy! Well, easy if you discount another long winded story about rare dx from AB8SC.

Later in the week the on line logs from the 5A operation are posted. In there are four call signs you will recognize. And thirty thousand other call signs, too.

Bill, AB8SC

FCC Working to Correct Error in Omnibus Rules Change Order (Nov 22, 2006) -- In the recently released R&O 04-140 -- the "Omnibus" rules changes affecting the Amateur Radio Service -- the FCC inadvertently limited J2D emissions to 500 Hz bandwidth. We are happy to report that the FCC is working on an erratum to correct the J2D error. While nothing is certain until the erratum is actually released, it is fair to say that the FCC recognizes the problem and intends to fix it prior to the December 15 effective date of the new rules. We will post further information on the erratum as it becomes available.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-22 22:04:43 UTC
From: Hank Greeb
Topic: 1769 Message: 1771

In several instances over the years my experience has been that the only way to get into a disaster area was to show a Civil Defense or Red Cross ID. The local police would turn anyone with an ARES ID, for example, away from checkpoints around the disaster areas. For some 40 years I carried both Red Cross and RACES ID - which got me through to where communications was needed.

All the skills in the world won't trump bureaucracy in the field - the local PD will follow their orders. I don't know how often natural or man made disasters occur in Western Michigan, they occurred, on average, every 3 to 7 years in SW Ohio - often enough to keep me interested in helping out with disaster relief.

I can see from whence the criminal background checks come - there were scam artists with Red Cross and EMA credentials who took FEMA and the Red Cross for lots of $$'s during the aftermath of Hurricanes Katrina and Rita. Contracting with an "all in one" background check agency might hav been the most expedient and perhaps even the least costly. However, if enough folks think through all the ramifications and object to the far reaching blanket authority which is being requested by their contractor, the bureaucracy at Red Cross National may have 2nd thoughts on what folks must sign vs what Red Cross says they need.

Folks like our ARRL Director, K8JE, should be able to have enough "clout" to bring resolution at the national level.

Subject: [QMN] Michigan - Change Early Net Time

Hello Everyone:

This evening, I checked-into a Navy MARS net at 7:00 PM. By 7:20 PM, everyone was unreadable. It's amazing how fast conditions shift after sunset.

I think Stan has a good suggestion. We had this problem last year, and had to temporarily move back to 630 for a few months. With the tighter band coordination, it makes sense to maintain the same time throughout the year. Unless others object, this is a good time to revise our QMN net schedule to accommodate these winter shifts in propagation. Unless objections are heard, this will be a permanent change to prevent confusion during the net migration process. Therefore:

97 R K8SIW 31 ALLEGAN MI NOV 24
QMN QNC

EFFECTIVE NOVEMBER 26 UTC QMN EARLY WILL MOVE BACK TO
2330Z 630 EST X THIS WILL BE A PERMANENT RETURN
IN ORDER TO AVOID CONFUSION DURING THE NET MIGRATION PROCESS

I/O = C

For IC 2200H users please remember to include the C at the end of the repeater callsign. This is Michigan's first DStar repeater.

Check out the updated web page which should occur this afternoon with photos of the unit and the Ham's that made it happen.

Topic: 1769 Message: 1776

Mark,

In Ottawa County it is simple, you want to work in the EOC, enter county training facilities, use county equipment (communication trailers), enter Central Dispatch, go into EOC's of some of the sub-units (Cities and Townships), you will have a background check! End of Message, no choice.

I am talking only about criminal background checks, not credit checks and the like. Having a criminal record does not disqualify a person from participating, but might. It's up to the discretion of the whatever organization is requiring the check.

As Laryn's email suggests, we can help the Ottawa County Red Cross at Tulip Time without signing their waivers and getting yet another background check. But, we also do not wear Red Cross tags or the like. We are not representing Red Cross at the parades. In the pasts we used to wear Red Cross name tags and wear Red Cross reflective vests. We have not for the last two years, we wear our own vests.

But, it is getting a little silly. Let's see, Races, county, SAR, Central Dispatch, Red Cross, ... And all of these checks (at least the criminal ones) are essentially the same. Seems a little redundant.

By the way, I believe that similar discussions were going on right after 911. At least here in Ottawa it did.

Subject: [WestMichiganHams] ARC issues

Emergency communications folks,

The issue with the ARCs request for a background check that seems unreasonable for many, myself included, has got me to thinking....

Let's try to solve the problem with our skills. Let's look at a way to use our knowledge of technology to still provide support in a means that does not require us to be in a position that requires a background check.

I don't think anyone is wishing ill on the ARC. I think that the defensive attitude that is very prevalent about the issue is just. But we still need to provide communications support as we are charged with or all of our time and training has been wasted.

I am currently working on a solution for this problem and may be on to something,

Stay tuned.....

Mark K8MHZ

1778. 160 metre band openings

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-24 20:24:54 UTC
From: Hank Greeb
Topic: 1778 Message: 1778

Did anyone get on the 160 metre opening to Europe two evenings ago around 0300z and later? The pileups around 1823 to 1830 KHz were deafening. The DX stations weren't very strong on my wet noodle antenna, but the DX seemed to be working simplex, not split. My 160 metre tuner is still in pieces in a box, so I couldn't even try competing in the fray.

Funny thing - W1AW was only s-2 or s-3, while stations in Pennsylvania were S9++ I heard a FO8 once, but most of the DX were below the ambient noise.

Hank,
No but thanks for the heads up. I will check it out. BTW not to change the subject too much, but has anyone particiated in the stupendous VHF band opening the last two days? Into Greenville PA at 0535Z on the KE3JP repeater (146.445 + 1mhz offset). Also made simplex contacts in Westland MI, Ohio, and Indiana. Also talked to several stations on the KA8OFE (146.82) repeater in Bryan Ohio.

Bill, AB8SC, popped onto the 146.92 (Fremont) repeater this morning. Within 30 seconds or so, KC4ITU, announced his call. Bill came back to him, it's great to hear a new call on the local repeater. The ham, whose call belongs to a Dwight Behm of Lincoln Park, did not respond after a couple of hails from Bill. He was there and gone. We quickly figured out the 2-meter opening when Bill switched to the .94 repeater and discovered a Lansing net in progress, coming through clear as the blue skies of this day. What fun!

Hi Tom.
There have been about a half dozen or so check-ins to the WMTN from out of state the other night. We had Canada, Ohio, Indiana and Wisconsin. This morning I heard a guy on the Linked system from Fort Wayne Indiana. I talked with a guy earlier this morning from Chicago on their 82 repeater. I was over in Kent City at the time.

It has been great!

I don't know about all the features and compatibility. I just tried to hit the Holton repeater. No joy. And N8HE has said he has moved to the Hart machine because he does not own the D-Star hardware.

It looks like you buy a regular but upgradeable rig and insert the D-Star chip. I see the chip costs $190 and has the same part number for the ht or mobile rigs.

Must be some incentive in there, somewhere? Progress? Doubles the cost of the rig. I think you can program a twit filter and only hear those stations passing the twit test. And you pass call signs easily. Interface with gps, too. Sounds great until you double the cost of the rig to play.

Bill, AB8SC

1794. Re: 147.32 analog?

HI ,

A lot of curiosity here. This is what I am sure of.

The 32 repeater is Dstar digital voice only.

The two modes (digital and Analog) will not coexist on the same frequency.

You will not be able to bring up the digital repeater with analog equipment.

The Icom ID-800 is dual band and dual mode. There is also a dual band mode handhels.

The Icom IC-2200h with the extra board is 2m dual mode.

If an analog repeater was linked to a d-star repeater, it would be a good opportunity to try both modes and still have someone to talk to or even to listen to the dstar audio to see if there is a difference.

Many repeaters are linked. There is an entire system covering most of Michigan comprised of linked repeaters.

Grand haven has a satellite receiver that is actually a crossband repeater linked through 440 to the main site. There is also still a means to link GH to Holland. It works well.

As for making a club more exclusive? Maybe that's D-star's goal. I don't really know. I can't see why that would be a benefit unless you want "private" conversations with only a few members. I don't want to say anything else about exclusivity lest I risk going into another rant.

OK, easy guys.

Bill get a radio and even you can get in. Don't start your holier than know remarks. The repeater has always been open and it is still open to whoever wishes to use it.

The comments you are making where spoken years ago when SSB was introduced over AM. How much AM have you really done lately. Not so long ago all contest logging was done by written log. Correct me if I am wrong but do't you use a computer? Please don't confuse progress with erroneous statements.

Subject: [WestMichiganHams] Re: 147.32 analog?

Why? On the surface, in the current configuration, the two are incompatible. Seems like making a repeater D-Star makes the user's club more exclusive. Fun to experiment, though.

And when was the last time anyone linked any repeaters? I know the Holland and Grand Haven machines have been linked, in the past. It often worked?

But I've got an analog rig and not a D-Star rig. How can this be a benefit?

I'm not going off on exclusivity. The repeater that was once open to folks is now closed to the analog folks. I did not say that WD8MKG made the change to somehow close his repeater. Nothing further from the truth. I did say it was a great way to experiment with radio. D-Star seems to have lots of potential and some really great things to try and play with. If any one is wound too tight, I suggest we look elsewhere.

If anything I'm excited that we have the option of trying D-Star. Locally. Great! The rigs have been available for years. Maybe this will be the incentive to get a rig and try the mode? Bill's repeater has wonderful coverage. Now it has 25% greater coverage? Where is the down side? Wonderful for Bill.

I hope that all repeaters don't go that direction. Lots of folks around here can just scrape together the cash to get on regular analog radio. Not all changes are for the better and all D-Star machines will certainly leave some hams without repeater access.

Now, if we could get everyone doing digital hf. . .

The problem of coexistance is that those with analog can not tell when the digital side is being used. Transmission then on the analog side will cause interference to the digital side.

HI ,

A lot of curiosity here. This is what I am sure of.

The 32 repeater is Dstar digital voice only.

The two modes (digital and Analog) will not coexist on the same frequency.

You will not be able to bring up the digital repeater with analog equipment.

The Icom ID-800 is dual band and dual mode. There is also a dual band mode handhels.

The Icom IC-2200h with the extra board is 2m dual mode.

Yes, $140 is cheap. But if you want the D-Star digital stuff you will
add a $190 board. That's where the "double the cost of the radio" part

comes into play.

Read the fine print.

It is a great rig, though.

Is this why Jim, K8COP sold off a few Icom 2200 radios, recently?

Bill, you make comments that are completely false and then you try to back peddler when someone calls you on it.This is exactly what you said, "Seems like making a repeater D-Star makes the user's club more exclusive." why do you nake comments like this if you don't mean it? You are implying that someone is trying to cut others out of the repeater.

You stated "The repeater that was once open to folks is now closed to the analog folks." The repeater has received minimal, at best, usage in the past. More hits have been on the repeater in the last 3 days than in the last 3 months.

Your next quote "Bill's repeater has wonderful coverage. Now it has 25% greater coverage? Where is the down side? Wonderful for Bill." Bill has put a lot of his own resources into this project. Who benefits, not so much Bill, but I suggest all the hams in at least 4 counties so far that have been able to experience DStar on a repeater.

I would suggest you could be a better supporter if you are truly interested.

Ed

So the 147.32 repeater had gone digital. Way to go Bill. I was wondering when we were going to see a digital voice repeater crop up around here. Nice to see.

Now I have been watching the posts over the last couple of days. Yes this is progress, and a fine step, in the right direction I might add.

A couple of thought before anyone gets up in arms about the new mode on this repeater.

1. Bill has spent an unimaginable amount of time and resources to provide this machine (I know I have been in his shoes), so if he wants to take it technologically to the next step, we should all give him our wholehearted support.

2. As for making this repeater exclusive by virtue of it's new operating mode, I highly doubt that. I can imagine that many of these same conversations took place in the coffee shops back in the days when those infernal FM repeaters first started cropping up (Mobile work and repeaters used to be AM. That's right AM) I am sure that there was some grumbling about FM with all that AM stuff in use. Well we all adapted, and we will again. Heck, I was thinking about buying a D-star capable rig when I was in Ft. Wayne. Now I have a reason to.

Topic: 1782 Message: 1806

Ed:

I did a search on yahoo for: "define 'exclsive'" and offer these results:

1. Excluding or tending to exclude/ /
2. Not allowing something else; incompatible/ /
3. Not divided or shared with others

So, now WD8MKG has a wonderful repeater that will not allow analog two meter radios to access his digital repeater. He is "not allowing something else" which is specifically two meter analog radios. And the repeater is "not divided or shared with others" because of the requirement that the user have a D-Star rig. Does some part of exclusive have a negative or elitist connotation? I did not suggest that Bill has some elite tendency.

In the next sentence of my earlier post I suggested that it seems like Bill is experimenting with digital two meters. And later, I suggested that because of this new repeater feature he has now increased the effective foot print 25% or so. With the promise of other features to be added in the future? Digital pictures, maybe? Text messaging? Other cool stuff! This has to be a wonderful thing for his users. Where is the down side? I applaud Bill's work and his vision. Most laudable.

I did not say that WD8MKG had designed the new repeater to create a closed repeater. He certainly has that ability and option. He is to be commended for taking repeater technology to the next levels and, simultaneously, sharing the asset (the repeater and its features) with our ham community. Free. Willingly. I'd even bet he's smiling, simultaneously. Wonderful.

I am all in favor of a repeater owner installing features. WD8MKG has certainly changed the character of his repeater. I am also glad to hear that use of the machine has significantly increased in recent days. Without a doubt this repeater offered a wonderful asset to local users by virtue of the above average size of the foot print or coverage area. And now it is even larger? Amazing. I am pleased that this technology is locally available for hams to use. And experiment with. A very good combination of assets.

And, you say, " I would suggest you could be a better supporter if you are truly interested." I'd guess one way to show support is to purchase and use a D-Star rig. On Bill's repeater. Talking to everyone who hangs out there. Regularly. Or post some cheers on the "West Michigan Hams" group on yahoo.

Wow, sounds like I've been doing one of of those things, today. Lots.
Hmmm . . .

Subject: Re: [WestMichiganHams] 147.32 analog?

"The problem of coexistance is that those with analog can not tell when the digital side is being used."

This is just not true. I am sitting here right now listening to the digital noise on the 32 repeater and am getting it 60 over S9.

The opposite may be the case, the digital users won't be able to tell when an analog QSO is in process unless they listen in the analog mode. To that effect, digital and analog can, and will, co-exist on the frequencies. They must in order to share simplex frequencies.

I think the addition of a digital 2 meter repeater is a great way to get to learn, first hand, the answer to not only the above questions, but many others that will certainly come about. It will also give folks a reason to get into digital. I would bet that once people go digital they will wonder how they ever lived without some of it's features. Take the art of 'kerchunking' for instance. Every time you key up a digital repeater your call sign will be diplayed. Looking for someone with a D-Star and you don't know which repeater they are on? I think you will be able to enter a call sign and be able to connect with them wherever they are. Only want to hear from one station? That can be set up in your rig, and if you don't want to hear certain stations they can be excluded. Short text messages can be sent from your mike's keypad directly to the screen of a D-Star rig.

The list will surely continue to grow. Bill H. will surely be thought of as a local pioneer in the new digital realm.

73,

mhz

Subject: [WestMichiganHams] D-Star recording

Attached you will find a recording of a D-Star QSO as heard on an analog FM reciever. Listen close for the initialization beep at the beginning of each exchange and the faint signal modulation just under the noise level.

I used a program called Audacity and my PC to make the recording.

73,

mhz

HI ,

A lot of curiosity here. This is what I am sure of.

The 32 repeater is Dstar digital voice only.

The two modes (digital and Analog) will not coexist on the same frequency.

You will not be able to bring up the digital repeater with analog equipment.

The Icom ID-800 is dual band and dual mode. There is also a dual band mode handhels.

The Icom IC-2200h with the extra board is 2m dual mode.

Subject: Re: [WestMichiganHams] 147.32 analog?

Yes, $140 is cheap. But if you want the D-Star digital stuff you will
add a $190 board. That's where the "double the cost of the radio" part
comes into play.

Read the fine print.

It is a great rig, though.

Is this why Jim, K8COP sold off a few Icom 2200 radios, recently?

Bill, AB8SC

Honestly, I agree that it is a wonderful new piece of technology for us to play with. It's the repeater owner's decision on what to do with the equipment and how it's used. You could say the same thing about using PL tones to keep unintentional signals from keying a repeater. If you want to use it, get the technology. If not, use another repeater.

Subject: Re: [WestMichiganHams] Re: 147.32 analog?

Ed:

I did a search on yahoo for: "define 'exclsive'" and offer these results:

1. Excluding or tending to exclude/ /
2. Not allowing something else; incompatible/ /
3. Not divided or shared with others

So, now WD8MKG has a wonderful repeater that will not allow analog two meter radios to access his digital repeater. He is "not allowing something else" which is specifically two meter analog radios. And the repeater is "not divided or shared with others" because of the requirement that the user have a D-Star rig. Does some part of exclusive have a negative or elitist connotation? I did not suggest that Bill has some elite tendency.

In the next sentence of my earlier post I suggested that it seems like Bill is experimenting with digital two meters. And later, I suggested that because of this new repeater feature he has now increased the effective foot print 25% or so. With the promise of other features to be added in the future? Digital pictures, maybe? Text messaging? Other cool stuff! This has to be a wonderful thing for his users. Where is the down side? I applaud Bill's work and his vision. Most laudable.

I did not say that WD8MKG had designed the new repeater to create a closed repeater. He certainly has that ability and option. He is to be commended for taking repeater technology to the next levels and, simultaneously, sharing the asset (the repeater and its features) with our ham community. Free. Willingly. I'd even bet he's smiling, simultaneously. Wonderful.

I am all in favor of a repeater owner installing features. WD8MKG has certainly changed the character of his repeater. I am also glad to hear that use of the machine has significantly increased in recent days. Without a doubt this repeater offered a wonderful asset to local users

by virtue of the above average size of the foot print or coverage area. And now it is even larger? Amazing. I am pleased that this technology is locally available for hams to use. And experiment with. A very good combination of assets.

And, you say, " I would suggest you could be a better supporter if you are truly interested." I'd guess one way to show support is to purchase and use a D-Star rig. On Bill's repeater. Talking to everyone who hangs out there. Regularly. Or post some cheers on the "West Michigan Hams" group on yahoo.

Wow, sounds like I've been doing one of of those things, today. Lots. Hmmm . . .

Hi Tom,

I use a program that sets up a PDF maker as a printer. Any file I can print I can turn into a PDF file. Actually, I think the program is called Primo PDF Maker. It was free on the Internet.

I don't have Microsoft Publisher and that is probably why I can't open the file.

I understand your issues with your screen reader. My friend Chris AB8WO has one and he let me listen to it. I don't know how you guys make any sense out of it! I do know that graphic files can't be read though. If something comes across the list your screen reader can't de-code just give a yell and we will let you know what it is about.

If you think you can use PDF Maker I will try to find a link to the site. The install file is almost 10 megs so it is too large to attach to a group post.

Thanks for your contribution,

Mark K8MHZ

What program is used to open the file? I have nothing for a .pub extension.
How about a re-send in a common format like PDF? I have their flyer and will scan it if you don't have a PDF.

Bill, you make comments that are completely false and then you try to back peddler when someone calls you on it.This is exactly what you said, "Seems like making a repeater D-Star makes the user's club more exclusive." why do you nake comments like this if you don't mean it? You are implying that someone is trying to cut others out of the repeater.

You stated "The repeater that was once open to folks is now closed to the analog folks." The repeater has received minimal, at best, usage in the past. More hits have been on the repeater in the last 3 days than in the last 3 months.

Your next quote "Bill's repeater has wonderful coverage. Now it has 25% greater coverage? Where is the down side? Wonderful for Bill." Bill has put a lot of his own resources into this project. Who benefits, not so much Bill, but I suggest all the hams in at least 4 counties so far that have been able to experience DStar on a repeater.

I would suggest you could be a better supporter if you are truly interested.

Ed

Subject: Re: [WestMichiganHams] Re: 147.32 analog?

I'm not going off on exclusivity. The repeater that was once open to folks is now closed to the analog folks. I did not say that WD8MKG made the change to somehow close his repeater. Nothing further from the truth. I did say it was a great way to experiment with radio. D-Star seems to have lots of potential and some really great things to try and play with. If any one is wound too tight, I suggest we look elsewhere.

If anything I'm excited that we have the option of trying D-Star.
Locally. Great! The rigs have been available for years. Maybe this
will be the incentive to get a rig and try the mode? Bill's repeater
has wonderful coverage. Now it has 25% greater coverage? Where is the
down side? Wonderful for Bill.

I hope that all repeaters don't go that direction. Lots of folks around
here can just scrape together the cash to get on regular analog radio.
Not all changes are for the better and all D-Star machines will
certainly leave some hams without repeater access.

Now, if we could get everyone doing digital hf. . .

Bill, AB8SC

Its new tech and Muskegon is the first in the state. I think that a plus
for Muskegon. In time it will not be a big deal. In time the prices will
come down. I will not have one right away but I am sure in time I will.
This is just one more mode to play with in ham radio. I sure it is ot
the last...

As far as it goes, with the advances that are being made in voice technology, I don't see it being too awful long before the chips that you can get to read certain things on the kenwood and icom rigs being able to read the text that is put out on a digital radio. Have you seen what the VS-3 will read on the Kenwood ts-2000 and tmv-708a? It's almost everything that a blind person could ask for.

Subject: Re: [WestMichiganHams] 147.32 analog?

"The problem of coexistance is that those with analog can not tell when the digital side is being used."

This is just not true. I am sitting here right now listening to the digital noise on the 32 repeater and am getting it 60 over S9.

The opposite may be the case, the digital users won't be able to tell when an analog QSO is in process unless they listen in the analog mode. To that effect, digital and analog can, and will, co-exist on the frequencies. They must in order to share simplex frequencies.

I think the addition of a digital 2 meter repeater is a great way to get to learn, first hand, the answer to not only the above questions, but many others that will certainly come about. It will also give folks a reason to get into digital. I would bet that once people go digital they will wonder how they ever lived without some of it's features. Take the art of 'kerchunking' for instance. Every time you key up a digital repeater your call sign will be diplayed. Looking for someone with a D-Star and you don't know which repeater they are on? I think you will be able to enter a call sign and be able to connect with them wherever they are. Only want to hear from one station? That can be set up in your rig, and if you don't want to hear certain stations they can be excluded. Short text messages can be sent from your mike's keypad directly to the screen of a D-Star rig.

The list will surely continue to grow. Bill H. will surely be thought of as a local pioneer in the new digital realm.

73,

mhz

Subject: Re: [WestMichiganHams] 147.32 analog?

The problem of coexistance is that those with analog can not tell when the digital side is being used. Transmission then on the analog side will cause interference to the digital side.

"The two modes (digital and Analog) will not coexist on the same frequency."

Why not? I understand that no two signals, regardless of mode, can be on at the same time, but why must a frequency be exclusively digital? (Or exclusively analog for that matter?)

HI ,

A lot of curiosity here. This is what I am sure of.

The 32 repeater is Dstar digital voice only.

The two modes (digital and Analog) will not coexist on the same frequency.

You will not be able to bring up the digital repeater with analog equipment.

The Icom ID-800 is dual band and dual mode. There is also a dual band mode handhels.

The Icom IC-2200h with the extra board is 2m dual mode.

Subject: Re: [WestMichiganHams] 147.32 analog?

Yes, $140 is cheap. But if you want the D-Star digital stuff you will
add a $190 board. That's where the "double the cost of the radio" part
comes into play.

Read the fine print.

It is a great rig, though.

Is this why Jim, K8COP sold off a few Icom 2200 radios, recently?

Bill, AB8SC

I think the addition of a digital 2 meter repeater is a great way to get to learn, first hand, the answer to not only the above questions, but many others that will certainly come about. It will also give folks a reason to get into digital. I would bet that once people go digital they will wonder how they ever lived without some of it's features. Take the art of 'kerchunking' for instance. Every time you key up a digital repeater your call sign will be diplayed. Looking for someone with a D-Star and you don't know which repeater they are on? I think you will be able to enter a call sign and be able to connect with them wherever they are. Only want to hear from one station? That can be set up in your rig, and if you don't want to hear certain stations they can be excluded. Short text messages can be sent from your mike's keypad directly to the screen of a D-Star rig.

The list will surely continue to grow. Bill H. will surely be thought of as a local pioneer in the new digital realm.

73,

mhz

The problem of coexistance is that those with analog can not tell when the digital side is being used. Transmission then on the analog side will cause interference to the digital side.

"The two modes (digital and Analog) will not coexist on the same frequency."

Why not? I understand that no two signals, regardless of mode, can be on at the same time, but why must a frequency be exclusively digital? (Or exclusively analog for that matter?)

HI ,

A lot of curiosity here. This is what I am sure of.

The 32 repeater is Dstar digital voice only.

The two modes (digital and Analog) will not coexist on the same
frequency.

You will not be able to bring up the digital repeater with analog
equipment.

The Icom ID-800 is dual band and dual mode. There is also a dual
band mode handhels.

The Icom IC-2200h with the extra board is 2m dual mode.

Yes, $140 is cheap. But if you want the D-Star digital stuff you
will
add a $190 board. That's where the "double the cost of the
radio" part
comes into play.

Read the fine print.

It is a great rig, though.

Is this why Jim, K8COP sold off a few Icom 2200 radios,
recently?

I think digital will remain a neat toy/alternative mode for a while to come. Heck, we still barely use our UHF band on dual band rigs. FM analog still has a great sound quality. Digital is fine, but not so much better that we all are going to trash our rigs and buy new D-Stars within 5 years.

I will probably look for something compatible so I can play a little, but as long as there are analog repeaters and equipment out there, I believe it will remain the dominant mode on the bands above 50 MHz.

1857. CQWW CW N8XX SOAB LP

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-27 14:54:09 UTC
From: Hank Greeb
Topic: 1857 Message: 1857

Anyone else on this reflector active during the CQ WW DX Contest? It turns out you don't need to have a BIG signal to get some great DX when such a contest is being held. I went into the fray with little expectation of doing anything, because I've just a wire between two trees, about 35' up in the air. However, many times, with a bit of good luck, I managed to snag a DX station on the first or second call, even in a pile up, by figuring out the best timing to beat the crush. Last time I remember that N8XX was in a DX contest was during the ARRL phone DX contest in 1978, when "N" prefixes were new, and "X" suffixes had just be issued. The local radio club borrowed my call for the event, and were subjected to pileups because prefix hunters were looking for "N" prefixes, and quite a few double letter suffix hunters were trying to contact us.

CQ Worldwide DX Contest, CW

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: SOAB LP
QTH: MICHIGAN
Operating Time (hrs): 8

Summary:
Band QSOs Zones Countries

160:
80: 26 9 11
40: 26 12 19
20: 43 14 25
15: 39 15 23
10:

Total: 134 50 78 Total Score = 38,808

Club: Mad River Radio Club

Comments: First DX contest in memory except for occasional club multi. Was surprized that my peanut whistle 100 W to a wet noodle (40 meter dipole fed with 450 ohm open wire line at 35') managed to snag as many as I did. Couldn't compete with the "BIG" pileups, but surprized myself in getting through some of the smaller ones in competition to some very loud US signals.

1858. Re: [WestMichiganHams] CQWW CW N8XX SOAB LP

Hank:

I chase dx for wallpaper. This contest is a great opportunity to fill in some entities, and since I'm relatively new, lots of new ones are offered.

I did not enter the fray except for chasing the occasional spot. And I was not so successful. Chasing dx on cw is interesting, rewarding, challenging, and a great opportunity to rub elbows with some really great cw operators. In no way do I feel part of the fraternity of cw folks.

Glad to hear you entered and had such fun and success.

Bill, AB8SC

From: Hank Greeb
Topic: 1844 Message: 1863

Yes, Alan. We're talking of CW, that very ancient mode of operation which some folks say is a "dying art."

I doubt that I could have gotten through the pileups through which I successfully made contacts during the CQ-WW-SS contest this last weekend. It amazed me to hear the cacophony of loud signals, and then, just as they died down, I'd interject my peanut whistle call from my low power rig to a wet noodle dipole, and about 50% of the time the operator on the other end would come back to me. Some of the DX stations were very kind - they'd only get part of my call, but would insist on NOT working anyone else until they workd the "N8" or "X" or some other fragment of my call.

I do think some of the operators must have gotten my call incorrectly, because they'd come back with w8xx, or n9xx, or some other permutation, but since I was in the contest just for the fun it really didn't matter to me.

On a different subject, I've been checking into the HF nets when possible, and after 7 p.m. or so propagation has been long to very long. On the Eighth Region Net, for example, the West Virginia stations can generally hear me, they have loud signals, but the Ohio stations are sometimes a bit weak - just at or slightly above the ambient noise. If I'd be using SSB, with 2.5 KHz bandwidth, I probably couldn't drag the traffic out of the mud. But, with CW, and 500 Hz bandwidth the copy is a bit challenging, but doable.

So, for me, at least, CW seems to be a very valuable tool, both for fun of a DX Contest, and for the ability to get traffic through under adverse conditions.

As far as D-* goes, I'm a "wait and see person". It might offer a bit more signal to noise ratio than FM, because it works in a smaller (2.5 KHz??) bandwidth (at least on 2 metres) vs 10 or 15 KHz for FM, but it's not 500 Hz of CW. Lots more bellzandwhistles are possible than with CW, but I'm not sure what happens when the signal gets down to only a few dB above the ambient noise.

I agree, cw is still the best form of communication when it absolutely has to be sent. Think of what happens to radio signals when there is an arorah, (forgive the poor spelling of that) and when there are other natural or even man made noises on the air waves. Voice is unreliable during those times, but CW will always get through, if not always, more then voice, as there is really no truly one hundred percent reliable form of communication.

Two thoughts:

DStar users are limiting there use to simplex on 145.670. This is strictly voluntary.

Analog users should not be caring on a QSO on a coordinated frequency unless they are using the repeater. To use the 32 repeater one must be using Dstar digital voice.

Now just from looking at the digital group list from Illinois, am I to understand that with a DE-Star repeater, you can link to other systems via the internet and not use echolink, or another program like that? For instance, when the gateway is made available on the 732, would someone be able to be in Muskegon, using low power and be able to talk to someone say in Oklahoma via D-Star basically?
I know that it's not necessarily the most interesting question, but I'd love to find out a lot more about this. It really sounds like it could be an incredible technology when it's used to its full potential.

Two thoughts:

DStar users are limiting there use to simplex on 145.670. This is strictly voluntary.

Analog users should not be caring on a QSO on a coordinated frequency unless they are using the repeater. To use the 32 repeater one must be using Dstar digital voice.

It sounds like it would work similar to a "direct connect" system like Nextel, but a little simpler.

That is really neat. It is not so much a mode, but a system. It is very much like a cellular phone system without the "cells."

Your mobile phone checks in and the system remembers what tower (repeater) it was on last.

Here is some info from the Icom site about D-Star repeaters. In addition to what is described below, D-Star has also been used with EchoLink.

Repeaters and repeater systems

D-STAR gateway protocols and software support linking repeater systems over a few miles or around the world. A regional group of repeaters create a D-STAR zone, shown in figure 4, working together and addressable in the D-STAR system as a unit. Whether you live in the wide-open spaces or a densely populated area, D-STAR repeaters can be tied together to make up the repeater system you want using either Internet or microwave links.

Repeaters linked with D-STAR can also share information using the same D-STAR link. This information includes repeater operating information and statistics. System designers can add entirely new functions, sharing weather and control information, for example. Another possibility is "smart systems" that track interference or user location.

If you've tried to coordinate a repeater channel on 2-meters or 440 MHz in any metropolitan area, you know how crowded the bands are! The D-STAR voice and low-speed data signal offers a significant improvement in spectrum efficiency, requiring only a 6 kHz channel instead of the 20, 25, or even 30 kHz of analog wide-band FM. As shown in figure 5, D-STAR repeaters can be interleaved between existing channels or multiple repeaters deployed in the spectrum of only one analog FM repeater.

As authorized users make their initial transmission to a D-STAR system, the call sign information attached to the digitized voice packets is recorded by the repeater controller. The controller then shares the information with other D-STAR systems through the D-STAR gateway registry. The registry is maintained on gateway servers located around the world as shown in figure 6 -- currently Japan, the United States, and the UK. When an authorized D-STAR user makes a call to a call sign not currently registered on that repeater system, the registry allows the repeater controller to route the call to the repeater on which the targeted user was last registered.

Hello Everyone ? Once again it is time to welcome Santa Claus to Grand Haven for this Christmas season ? yes it is the Jingle Bell Parade and it is this coming Saturday evening at 7:00 pm and we have been asked to help guide Santa and all his fans large and small safely along the parade route by GHPS and the Grand Haven Chamber Of Commerce. We will be meeting starting at 6:15pm at the Grand Haven Public Safety Parking lot so we are on the route by 7:00 and should be done by 8:00 if his sleigh makes it on time. If you can help please come out, we will be communicating on the 145.49 repeater ? please send me a email reply if you can or catch John Fisher or myself on the repeater ? bring your family along too as this is a real nice winter time event lots of floats with lots of lights ? hope to see you there ? 73 Don

Bill:

When you start thinking in CW, and have to translate what is said from English to CW before you recognize what is said, then you'll REALLY be a CW nut. This happened to me after 20+ hours of a CW Sweepstakes. It felt wierd for a few hours after waking up on Monday morning - like I was in a foreign country.

If I'm copying higher speed CW I often have to read what I've just copied because things go from my brain to the keyboard without registering (in English) what I've just copied.

But, the strange calls, like T40, 9Y5, P57, etc., make things very interesting, especially in a contest when they zip through their call letters at a very high clip. I've thought about using a multi speed tape recorder to record and then play back what the folks are saying, but haven't gotten around to it.

I trust the problems of audio levels, audio passbands, etc., are minimized when linking repeaters.

Also, the wider the range and larger the number of repeaters in a group, the more tempting the collection is to squirrels who send trash and otherwise interfere with conversations on the linked systems. The the call signs imbedded in "registered" rigs, this should be considerably harder for the squirrels.

1876. Needed: TNC firmware

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-28 17:02:41 UTC
From: Joe Veldhuis
Topic: 1876 Message: 1876

I bought a PacComm TNC-200 off Ebay a week ago, and it arrived today. Sure enough, it doesn't work. It powers up, the front panel lights come on and the serial port goes "online", but it doesn't "boot". Seeing as it gets that far, I imagine that most of the hardware is OK. I have, of course, tried disconnecting the battery to clear the NVRAM.

My best guess is that either the firmware or the RAM chip is bad. Most likely the firmware. By any chance, does anyone have a known-good TNC firmware chip in their junk drawer? Any "generic" firmware will do, though I don't think the firmware from a multi-mode unit would work. (If it would, I do have the old firmware from my MFJ 1278 sitting on the shelf in front of me). It must support KISS operation, as that is what I will be using this TNC for, aside from that I'm not too picky about it.

If anyone has one, I'll give you $4 for it. I will be at the HARC mini-swap, or we can get together at any of the other weekly functions around the area.

Thanks!
-Joe, N8FQ

From: Joe Veldhuis
Topic: 1876 Message: 1877

You can ignore that last post. I decided to go ahead and try plugging in the aforementioned old MFJ 1278 firmware, and it did in fact work. The exact form of functionality, however, came as a complete surprise.

When I turned the PacComm TNC-200 (a TNC-2 clone) with the firmware from the MFJ 1278 (a multimode unit) installed, it started up just fine. Though the 1278 has significant parts copied from the TNC-2, it is in fact a different animal. So it was a bit of a surprise that it worked like this. But here's where it gets weird: the sign-on message, instead of saying "MFJ Enterprises Model 1278 multi-mode controller" and giving a build date of April 1988, said "Digital Radio Systems, Inc" and gave a build date in 1992. There's no sign of the commands specific to the MFJ's features, but all of the "basic" commands work, including the essential KISS mode (which didn't work when I was using this firmware in the 1278!).

I had a chat with Ernie W8EL and Chuck WB8WHN on the Holland .06 repeater, and of all the theories that were floated, the most plausible one is that the PacComm has a "hard" firmware stored somewhere else on the board, which it loaded upon finding and rejecting the MFJ firmware.

So how 'bout that?

Grand Haven for this Christmas season yes it is the Jingle Bell
Parade and it is this coming Saturday evening at 7:00 pm and we have
been asked to help guide Santa and all his fans large and small
safely along the parade route by GHPS and the Grand Haven Chamber Of
Commerce. We will be meeting starting at 6:15pm at the Grand Haven
Public Safety Parking lot so we are on the route by 7:00 and should
be done by 8:00 if his sleigh makes it on time. If you can help
please come out, we will be communicating on the 145.49 repeater
please send me a email reply if you can or catch John Fisher or
myself on the repeater bring your family along too as this is a
real nice winter time event lots of floats with lots of lights
hope to see you there 73 Don

1879. Packet related question

Talking about TNC's - I have at least two TNC-2 types, a Kantronics something or the other (KPC-2 I think), and perhaps a Kantronics data engine and maybe a 19.2 K modem. Is there a market for this kind of thing in Western Michigan? Would a Holland mini swap be a possible outlet for these things?

Also, I'd like to get a packet station going for things like DX cluster spotting, etc. but I need 9 pin DIN plug for the TNC-2 versions. One used to be able to get these at Rat Shack, but a couple weeks ago I perused the shelves of the local emporium and didn't find those connectors. Any idea where I might find such a connector? (I tried the For Twain hamfest and didn't run across any of the things, though I didn't scour every possible vendor or flea marketer.)

E-bay is your best bet, but you could probably sell them almost anywhere, including on this reflector.

1881. Re: [WestMichiganHams] Yes, CW

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-28 21:11:44 UTC
From: Alan NV8A
Topic: 1844 Message: 1881

I have no doubt that under some conditions CW will get the message through when SSB will not.

HOWEVER, I wonder whether some of the more modern modes would not do as well as or better than CW. E.g., has anybody run any tests of CW vs. PSK31 or other digital modes? I have seen Ham Radio Deluxe's PSK31 module "lock onto" and produce intelligible text from signals whose presence I could not detect by ear.

Of course Morse Code has other advantages, such as not needing a computer at each end, and in fact for short distances it doesn't even need a radio: flashing lights or tapping on the walls of one's cell work too.

Does anybody still use CW except hams? I don't know.

There are digital modes which have error correction and computational methods which can dig down under the average noise level. If it were life or death, and absolute integrity of the messages must be verified, then this type of transfer would be the mode of choice. The modes used for communication with submarines, for example, where signal levels are very low due to absorption from water, must use these techniques, though exact methods are classified secrets.

For experimenting, such as with the experimental 136 KHz VLF band, where the ERP is limited and the ambient noise level is high, baud rates of less than 0.1 with start and stop syncronized with WWV, have been used to communicate between Australia and Europe for example. It takes up to several hours to send the bare essentials of a complete contact.

Coherent CW, at less than 1 WPM, was described way back in the 1960's. In those days discrete parts, perhaps even tubes, were used. The techniques are much simpler with computers and sound cards.

Several of these techniques were described in QST a few years ago. I haven't searched the index recently. A simple index is available to non members at http://www.arrl.org/files/infoserv/qst/ or a searchable index is available to members at the main arrl.org web site.

Not a bad alternative - need to arrange it to be "seen" easily.

Like most other things - alternatives abound.
USB is emerging as the favored computer connection - I have one USB port
with a converter trouble free so far.
TNC is perhaps better but less flexible than sound interface.
RS-232 adapters are plentiful (a million varieties) at Computers & More
in Holland.

From the recent "Contester's Rate Sheet" a paragraph you might find interesting or useful. It is an unusual issue that arrives without one or two fun places to wander into on the internet. I recommend you subscribe.

Another fascinating sideline of ham radio, particularly DXing, is stamp collecting. There are quite a few "radio stamps" and Merri AB0MV has put together quite a Web site (http://www.qsl.net/ab0mv/stamps.htm) with many pictures of stamps with radio and electrical themes. The site loads slowly, so be patient. (Thanks, John W0UN)

This video is also available directly on the Icom America web site at:

http://fp8.adhost.com/icomamerica/d-star_introduction.wmv

I also have a link to it from the Illinois Digital Ham Yahoo Group.

I suspect someone downloaded from Icom site and uploaded it to YouTube.

Be aware that when this video was done at Dayton in 2005 only 1.2 GHz D-STAR equipment was available. As many of you know, subsequently Icom has introduced HTs, mobiles & repeaters for 2m & 70cm.

All
Help the NWS out with this storm coming Friday. Tom

Hello Everyone: Please be prepared to provide winter storm measurements via the QMN-NWS Rain Gauge Network. A copy of the forecast discussion is provided below. Until the forecast firms-up, we will not set an observation and net schedule. However, this is a good time to review the reporting procedures. If we do not call for special net sessions, routine snowfall observation may be submitted in the normal way. Please follow these guidelines: 1. When checking-in, list the traffic as one routine NWS.2. NCS operators should request a QMN or NWS liaison.3. An example of message format is as follows: 11 R K8SIW 5 VALLEY TWP MI 2330Z DEC 1NWS-GRR ALLEGAN SNOW 350/350 LIQUID 035 WADES Place of origin: Location where the observation was made. This is not your mailing address, but rather the city or township in which you are located. These do differ, sometimes by ten miles or more, so please be sure to accurately indicate your location. Time of origin: Time at which you made the observation. Address: NWS CWA in which you are located (e.g. APX, DTX, GRR, IWX, MQT) Text: County in which the observation was made, followed by precipitation type, amount of snow measured as falling in past 24-hours, amount of snow on ground at time of observation, and liquid equivalent (melted). Please note, the liquid equivalent is optional. If you are one of the observers equipped with a standard 8-inch government gauge, we would appreciate the liquid amount. Routine reports may be listed on QMN-Early, MITN, or on the QMN K8QMN-14 high-profile packet radio BBS. Emergency Observations If subsequent forecast models indicate the likelihood for a major event, we may call for observations at 3, 6, or 12-hour intervals. In this case, the message format alters to: 12 P K8SIW 3 VALLEY TWP MI 1200Z DEC 2NWS-GRR ALLEGAN SIX HOUR SNOW 570/1020/1020 WADES The same rules apply here, except the measurements, in order, indicate the amount of snow that has fallen in the past six hours (5.20 inches), the amount of snow on ground (10.20 inches), and the storm event total (10.20 inches). The message is also "priority" precedence. Routine reports need not be submitted during emergency operations. Nets Messages may be submitted via HF-SSB, the VHF Link Repeater System (W8HVG West Michigan), the QMN CW Nets, or the QMN Packet Radio Network.In the later case, please follow these directions: 1. Use the ST command, followed by the general QMN call sign "K8SIW" (e.g. ST K8SIW). Do not simply use "S", as this will indicate a personal message and it may not be accessible for delivery! 2. For the subject line, indicate QTC, followed by quantity, precedence, and NWS office (CWA) of destination. For example: QTC 1 P NWS-GRR 3. At the message prompt, please enter your message in standard NTS format, all capitals, imitating the format above. 4. Using /EX on a separate line, exit from the BBS. 5. When using packet radio, if possible, please try to format your message in a buffer first for upload, so as not to tie up the BBS. Disconnect promptly using the "B" (bye) command at the command prompt. The procedures on the "manual mode" traffic nets are identical to all other NTS traffic. As stated previously, we will announce the net times, frequencies, and related information when we know more about this potentially significant winter storm. Thank you, Jim Wades, K8SIW 000FXUS63 KGRR 300848AFDGRR AREA FORECAST DISCUSSIONNATIONAL WEATHER SERVICE GRAND RAPIDS MI350 AM EST THU NOV 30 2006 .SHORT TERM...A MAJOR EARLY SEASON WINTER STORM WILL IMPACT OUR AREA BEGINNINGLATE THURSDAY NIGHT THROUGH FRIDAY AFTERNOON. THIS STORM WILL BRINGTHE POTENTIAL FOR SIGNIFICANT SNOWFALL ACROSS OUR ENTIRE CWA. THEREIS ALSO A THREAT FOR FREEZING RAIN

WITH SIGNIFICANT ICING POTENTIALFOR OUR SOUTHERN CWA FRIDAY MORNING PRIMARILY SOUTH OF I-96. POST FRONTAL RAIN WILL CONTINUE EARLY THIS MORNING ACROSS MOST OFOUR CWA AND THEN SHIFT EAST TO AFFECT OUR EASTERN AND SOUTHERN CWAFROM MID TO LATE MORNING. CAA WILL CONTINUE WITH SLOWLY FALLINGTEMPERATURES THROUGH THE DAY CAUSING ANY LINGERING SHOWERS TOBECOMING MIXED WITH THEN CHANGE OVER TO LIGHT SNOW SHOWERS ORFLURRIES FROM NW TO SE. HOWEVER... I BELIEVE THAT BY THE TIME IT ISCOLD ENOUGH FOR SNOW THE TIMING WILL BE SUCH THAT THE STEADIER PCPNWILL ALREADY BE OUT OF OUR AREA. THEREFORE I EXPECT NOTHING MORETHAN A FEW FLURRIES OR LIGHT SNOW SHOWERS THIS AFTERNOON WITH NOSNOW ACCUMULATION. TEMPS WILL CONTINUE TO FALL STEADILY THROUGH THE30S ACROSS OUR CWA THIS AFTERNOON. AN INTENSIFYING LOW PRESSURE SYSTEM WILL MOVE FROM NE ARKANSAS THISEVENING TO NEAR IND BY 12Z FRIDAY. THIS LOW PRESSURE SYSTEM WILLTHEN MOST LIKELY CONTINUE TO TRACK NE TO NEAR TORONTO CANADA BY 18ZFRIDAY. THIS SYSTEM HAS POTENTIAL TO PRODUCE SIGNIFICANT SNOW ACCUMSACROSS MUCH OF OUR AREA FROM EARLY FRIDAY MORNING THROUGH FRIDAYAFTERNOON. VIGOROUS PVA WILL DEVELOP BETWEEN AROUND 10Z AND 18ZFRIDAY. VERY STRONG UPR DIVERGENCE IS PROGGED AND OMEGA VALUES AREREALLY IMPRESSIVE... ON THE ORDER OF 25-40 MICROBARS/SEC! IN FACT WECANNOT REMEMBER THE LAST TIME SHORT RANGE GUIDANCE PROGGED THESETYPE OF OMEGAS AND JUST A TREMENDOUS AMOUNT OF LIFT. DEEP MOISTUREAND VERY STRONG UPWARD VERTICAL MOTION WILL EXTEND UP THROUGH THEFAVORED MAX DENDRITIC SNOW GROWTH REGION OF THE ATMOSPHERE (ROUGHLY-12 TO -18 C). MID LEVEL INSTABILITY AND IMPRESSIVE 700 MB F-VECTORCONVERGENCE IS ALSO PROGGED PARTICULARLY ACROSS OUR NORTH CENTRALAND NORTHERN CWA. THIS SYSTEM WILL TAP EXTENSIVE GULF MOISTURE AND ATROWAL WILL ALSO DEVELOP AS AN AXIS OF WARMER AIR ALOFT NUDGES INFROM THE ESE. SHORT RANGE GUIDANCE ALSO SHOWS QUITE CLEARLY THAT ALINGERING DEFORMATION ZONE BAND WILL LIKELY CONTINUE TO IMPACT(MAINLY) OUR NW AND NORTHERN CWA THROUGH FRIDAY AFTERNOON ON THEBACK SIDE OF THE SYSTEM AS A RESULT OF TILTING/STRETCHING OF UPRLEVEL VORTICITY. IN ADDITION TO HEAVY SNOW POTENTIAL THERE IS ALSO POTENTIAL FORSIGNIFICANT ICING ACROSS PORTIONS OF OUR AREA (MAINLY OUR SE ANDSOUTHERN CWA FRIDAY MORNING). 00Z NAM GUIDANCE FCST SOUNDINGS ANDBUFKIT DATA CLEARLY SHOW A FAIR AMOUNT OF WARM AIR (> 0 C) ALOFTWITH SHALLOW COLD AIR RIGHT NEAR THE SFC FROM ROUGHLY I-96 SOUTH. IFNAM GUIDANCE IS CORRECT A FULL FLEDGED ICE STORM IS NOT BEYOND THEREALM OF POSSIBILITY ACROSS THAT AREA. 00Z GFS MODEL DATA PAINTS ADIFFERENT PICTURE. EVEN THOUGH IT HAS THE SFC LOW PRESSURE SYSTEMFURTHER WEST AND CENTERED NEAR SBN BY 12Z FRIDAY... A LOOK AT GFSFCST SOUNDINGS SHOWS THAT THEY ARE SIGNIFICANTLY COOLER WITH TEMPPROFILES ACROSS OUR SOUTHERN CWA BETWEEN 12Z AND 18Z. AS A RESULT OFDYNAMICAL AND EVAPORATIONAL COOLING AND VERY HEAVY PCPN IN THAT TIMEFRAME... I WOULD LEAN TOWARD BELIEVING THE COOLER GFS FCST SOUNDINGSWHICH SEEM MORE REALISTIC. THIS THINKING COULD OBVIOUSLY CHANGEHOWEVER IF THE GFS CONTINUES IT/S TREND FURTHER WEST WITH THE SFCLOW TRACK. THE BOTTOM LINE TO ALL THIS IS THAT WE BELIEVE A SIGNIFICANT SNOWEVENT IS PROBABLE FOR MUCH OF OUR CWA WITH SNOW TOTALS OF ANYWHEREFROM 6 TO 12 INCHES EASILY ATTAINABLE FROM AROUND 10Z FRIDAYTHROUGH FRIDAY AFTERNOON. SEVERAL LOCATIONS COULD EASILY HAVESNOWFALL TOTALS FROM THIS STORM EXCEED A FOOT AND EVEN APPROACH AFOOT AND A HALF. THE HEAVIEST SNOW WILL LIKELY FALL FROM AROUND 10ZTHROUGH 18Z WHEN SNOWFALL RATES OF ANYWHERE FROM 1 TO AS MUCH AS 3INCHES PER HOUR ARE CERTAINLY POSSIBLE. DEFORMATION ZONE SNOW WILLCONTINUE THROUGH MID TO LATE FRIDAY AFTERNOON (MAINLY NORTH) BEFOREGRADUALLY TAPERING OFF TO SCATTERED SNOW SHOWERS FRIDAY EVENING.ACROSS OUR SOUTHERN CWA I BELIEVE A PERIOD OF FZRA IS CERTAINLYPOSSIBLE FRIDAY MORNING WHICH WOULD ALSO OBVIOUSLY LIMIT SNOW TOTALSFROM I-96 SOUTH. HOWEVER GIVEN CURRENT GUIDANCE AND TRENDS ANDFINDING THE GFS FCST SOUNDINGS MORE BELIEVABLE THAN THE NAM DATA...I SUSPECT THE FZRA WOULD CHANGE OVER TO SNOW RATHER QUICKLY LATEFRIDAY MORNING AND EARLY FRIDAY AFTERNOON ACROSS OUR SOUTHERN CWA. I EXPECT SCATTERED LAKE EFFECT SNOW SHOWERS FRIDAY NIGHT ANDSATURDAY IN A WESTERLY LOW LEVEL FLOW REGIME FRIDAY NIGHT WHICH WILLBECOME SW SATURDAY. DELTA T/S IN THE MID TEENS WILL RESULT INCONDITIONAL INSTABILITY. HOWEVER MOISTURE PROFILES IN THAT TIMEFRAME ARE NOT TOO IMPRESSIVE FOR LES PARTICULARLY ON SATURDAY.FURTHERMORE INVERSION HEIGHTS WILL BE DOWN

AROUND 4 TO 5 KFT SO THEOVERALL SETUP FOR LES IS NOT REALLY IMPRESSIVE FRIDAY NIGHT THROUGHSATURDAY. AS FOR HEADLINE DECISIONS... A WINTER STORM WARNING WAS STRONGLYCONSIDERED BUT AFTER COORD WITH SURROUNDING OFFICES IT WASDETERMINED THAT THE DAY SHIFT COULD MAKE THAT CALL AFTER REVIEW OFALL THE LATEST COMPUTER MODEL GUIDANCE AND TRENDS. THE DAY SHIFTWILL ALSO STILL HAVE AMPLE TIME TO GET WARNINGS OUT WITH PLENTY OFLEAD TIME SINCE THE EVENT WILL NOT REALLY GET GOING UNTIL THE EARLYMORNING HOURS FRIDAY. WE FELT THIS COURSE OF ACTION WAS WISEST.WE DECIDED TO EXPAND THE WINTER STORM WATCH HEADLINE TO INCLUDE OURNORTHERNMOST ROW OF COUNTIES. THIS SINCE GUIDANCE HAS BEEN TRENDINGA BIT FURTHER NW WITH THE SFC LOW TRACK AND THERE IS ALSO SOMEPOTENTIAL FOR SIGNIFICANT DEFORMATION ZONE SNOW TO LINGER ACROSSTHAT AREA. FINALLY... I AM CONCERNED THAT A POTENTIAL DRY SLOTWORKING IN FROM THE SOUTH COULD LIMIT SNOW/ICE ACCUMS ACROSS OURSOUTHERN CWA. HOWEVER AT THIS POINT A WINTER STORM WATCH WHICHINCLUDES OUR SOUTHERN COUNTIES DEFINITELY SEEMS VERY JUSTIFIED. .LONG TERM...MODELS ARE IN DECENT AGREEMENT IN SHOWING THE UPPER TROUGH PIVOTINGTHROUGH SOUTHWEST LOWER MI SUNDAY INTO SUNDAY NIGHT. THECOMBINATION OF DEEP MOISTURE...DEEP CYCLONIC FLOW AND TEMPERATURESFAVORABLE FOR LAKE EFFECT SUGGEST A MORE ORGANIZED EVENT. NOTICETHIS SYSTEM CURRENTLY LOOKS RATHER INTENSE COMING INTO THE PACIFICNW. FOR THESE REASONS...I INCREASED POPS TO LIKELY NEAR THELAKESHORE SUN INTO SUN NIGHT. WILL NEED TO MONITOR THE SYSTEM FORMON INTO TUE AS WELL. LOOKS LIKE SW FLOW DEVELOPS LEADING TOISENTROPIC LIFT...AND PERHAPS ANOTHER ROUND OF SNOW. WILL HOLD ONTOTHE CHC FOR SW. COLD AIR POURS BACK IN FOR WED BEHIND THE DEPARTINGWAVE OF LOW PRESSURE. && .GRR WATCHES/WARNINGS/ADVISORIES...WINTER STORM WATCH FOR OUR ENTIRECWA FRIDAY MORNING AND AFTERNOON. SMALL CRAFT ADVISORY FOR ENTIRENEARSHORE THROUGH FRIDAY AFTERNOON. && $$ LAURENS MJS

Mark:

I guess that Earth to Mars to Earth (Mars-bounce, similar to Moon-bounce) wouldn't count, since in 1927 Hiram Percy Maxim couldn't visualize things like moonbounce.

Did you calculate the path loss? It should be doable, because Mars Rovers have been communicating from Mars to Earth for years. They couldn't have much stored enegy, so they couldn't generate much RF power. They probably rely on high gain antennae for the ERP requirements.

As you say, the first requirement will be to get a hamshack and opoerator to MARS. Wanna volunteer? :)

Hg

I am not volunteering because I'll want to be able to come back. I'll stay here and point a beam at Mars.

1898. USE OF COMMERCIAL EQUIPMENT

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-11-30 19:42:13 UTC
From: ayoung@chartermi.net
Topic: 1898 Message: 1898

This was on the ARRL website. Note the EXCEPTION of the Amateur Service. We do not need type-accepted (FCC Certified) equipment on our bands. We just can't use our Amateur equipment on other bands such as GMRS, MURS, Public Safety, etc.

So old police radios, non-certified foreign-made radios, and such are OK for use on our bands, if I read this right:

==========

FCC warns against nonamateur use of modified gear: The FCC has told the ARRL that police, public safety agencies, and others may not legally use equipment--such as modified Amateur Radio gear--that has not been FCC certified to transmit in services requiring FCC-certified equipment. The use of a modified Amateur Radio transceiver on police frequencies would be contrary to Part 90 of the rules because the equipment would not be FCC certified, an FCC official explained. In 1996, the FCC reminded manufacturers and users that transmitters intended for operation on frequencies allocated to any FCC-authorized radio service (except the Amateur Service) must be type-accepted (now called FCC certified) for the particular radio service prior to marketing and use. The use of such equipment could subject the licensee and user to penalties and forfeitures, as appropriate. The FCC said anyone selling such equipment also risks FCC sanctions.

The December "meeting" will be a potluck dinner. The club will provide the meat, plates, utensils, soft drinks and coffee. Please bring a side-dish, appetizer, salad or dessert for 10 people to share. Families and friends are cordially invited to join us. The more the merrier.

We'll gather at 6:30 p.m., have a very, very, very short business meeting at approximately 7 p.m., and at 7:05 p.m. or shortly thereafter we'll start the festivities.

Come one, come all

Let me get this straight... The Motrac and Motran and similar GE repeaters which are in wide use are illegal? Or the 100 or so Motorola VHF police radios which I got from Motorola in Atlanta and sold, at cost, to folks during the 70's and early 80's? I personally used several of these for at least a dozen years. They're not type accepted for Amateur Radio use. Gee, I didn't realize I, and 100's of my colleagues were violating the FCC rules, and many repeater groups continue to violate these rules.

Methinks there must be another part of the regs which covers these kinds of uses.

I do know the converse is illegal - i.e. it's not permissable to use Ham Gear for commercial uses, either home brew or commercially made, even though I know it has been done.

No Hank, as I understand it it's the use of stuff that's below 54 mhz, in other words, hf gear has to be type excepted I'm guessing it's because of the harmonics and spurious emitions that it can cause, i.e the modified chicken band amps that ilegals run on eleven meters. The stuff that's used for vhf and uhf is fine.

Not so Hank,

It just means they all comericial mfg. eguiptment has to be FCC approved for it's intended use.

1906. Winter Storm Warning

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-01 01:04:01 UTC
From: Tom VanderMel
Topic: 1906 Message: 1906

Subject: Winter Storm Warning

The following is the schedule for QMN-NWS observations and nets for Friday's winter storm event:

Observation Net Time Net/Frequency

011200Z (700 AM) 011215Z QSX SSB 3932 KHz (alt. 1932 KHz)

011230Z QMN-CW 3663 KHz (alt. 1812 KHz)

011245Z W8HVG Link Repeaters will be monitoring until about 1300Z, call "K8QMN"

012330Z (630 PM) 012330Z QMN-CW 3663 KHz (alt. 1812 KHz)

020001Z MITN-SSB 3932 KHz (alt. 1932 KHz if MITN fails due to poor conditions)

020015Z W8HVG Link Repeaters will be monitoring until about 0030Z, call "K8QMN"

Reports may also be posted to the K8QMN-14 high profile BBS serving West Michigan on the QMN Packet Radio Net Frequency: 145.760 MHz. Numerous nodes and digipeaters are available to provide a path. Check the DRG web site for network data.

Please note: I will be monitoring 3663 KHz throughout the day while at work for any special reports. Of particular interest would be significant ice accumulations, significant power outages, storm damage, etc.

The QMN-NWS SOPs are available on both the QMN and NREN web pages, the URLs for which are provided below. Please note that the QMN-NWS SOPs provide a format for reporting ice accumulations. Please review this format and be prepared to report ice storm events.

QMN members are encouraged to monitor the W8HVG link system when available to receive any reports for QSP (relay) to the QMN 3663 KHz frequency.

Thank you,

URGENT - WINTER WEATHER MESSAGE

NATIONAL WEATHER SERVICE GRAND RAPIDS MI

416 PM EST THU NOV 30 2006

...A SIGNIFICANT WINTER STORM EXPECTED TO IMPACT SOUTHWEST LOWER MICHIGAN TONIGHT AND FRIDAY...

.A LOW PRESSURE SYSTEM CURRENTLY DEVELOPING OVER ARKANSAS WILL INTENSIFY AS IT MOVES NORTH TO CENTRAL ILLINOIS AROUND DAYBREAK FRIDAY MORNING...AND THEN TO NEAR SOUTHERN LAKE HURON FRIDAY EVENING.

ABUNDANT MOISTURE WILL MOVE OVER THE AREA LATE TONIGHT AND FRIDAY MORNING AHEAD OF THIS INTENSIFYING SYSTEM. THIS MOISTURE WILL MOVE INTO THE COLD AIR MOVING OVERHEAD...AND WILL DEVELOP SNOW...

SLEET...FREEZING RAIN...AND RAIN OVER THE AREA.

COUNTY SPECIFIC MESSAGE:

/O.UPG.KGRR.WS.A.0003.061201T0800Z-061201T2000Z/

/O.NEW.KGRR.WS.W.0002.061201T0600Z-061202T0000Z/

CALHOUN-

INCLUDING THE CITIES OF...IONIA...ST. JOHNS...HOLLAND...

HASTINGS...CHARLOTTE...LANSING...SOUTH HAVEN...KALAMAZOO...

BATTLE CREEK

416 PM EST THU NOV 30 2006

...WINTER STORM WARNING IN EFFECT FROM 1 AM TO 7 PM EST FRIDAY...

THE NATIONAL WEATHER SERVICE IN GRAND RAPIDS HAS ISSUED A WINTER STORM WARNING...WHICH IS IN EFFECT FROM 1 AM TO 7 PM EST FRIDAY.

THE WINTER STORM WATCH IS NO LONGER IN EFFECT.

RAIN OR FREEZING RAIN WILL DEVELOP AFTER MIDNIGHT TONIGHT AND WILL CHANGE OVER TO ALL FREEZING RAIN OVERNIGHT. FREEZING RAIN WILL THEN MIX WITH AND CHANGE OVER TO SNOW FRIDAY MORNING.

SNOW...LOCALLY HEAVY AT TIMES...WILL THEN GRADUALLY END LATE TOMORROW AFTERNOON. THUNDERSTORMS WILL ALSO BE POSSIBLE.

ICE ACCUMULATIONS OF A QUARTER TO HALF AN INCH ARE LIKELY FROM LATE TONIGHT THROUGH TOMORROW MORNING BEFORE PRECIPITATION CHANGES OVER TO SNOW. SNOWFALL ACCUMULATIONS OF 3 TO 6 INCHES ARE EXPECTED BEFORE THE SNOW ENDS LATE TOMORROW AFTERNOON.

A WINTER STORM WARNING MEANS SIGNIFICANT AMOUNTS OF SNOW...

SLEET...AND ICE ARE EXPECTED OR OCCURRING. STRONG WINDS ARE ALSO POSSIBLE. THIS WILL MAKE TRAVEL VERY HAZARDOUS OR IMPOSSIBLE.

AFFECTED COUNTIES:

IN MICHIGAN: ALLEGAN, BARRY, CALHOUN, CLINTON, EATON, INGHAM, IONIA, KALAMAZOO, VAN BUREN.

CONSTRUCTING and SELLING is different than USING. If you modify a commercial amplifier from another service for Amateur use, then you're OK.

You're right- you can't build and sell them commercially without certification.

Thanks, from some of the other messages in this thread one might believe
that the use my converted army surplus gear which I've been using for
50+ years is contrary to current FCC regulations.

It has always been incumbent upon the amateur radio operator to assure
himself of compliance with spectral purity. Even if I buy a rig which
has met FCC certification for Amateur Use, and either by neglected
maintenance or misuse it emits radiation out of band (splatter or
harmonics are most typical), I'm still liable and my license can be in
jeopardy.

As I read it, the following exception to the certification requirement

"3) The amplifier was:

...

(ii) Modified by the licensee for use at the licensee's station."

seems to mean that as long as the licensee changes something (what is
not specified), it can be used in the amateur service even if it was a
commercial device.

From: Andrew Young
Topic: 1898 Message: 1913

The only thing I know of that is restricted in this manner is an external amplifier for HF. It is not really against Amateurs, but to prevent other services from using ours illegally or manufacturing them under the guise of Amateur Radio.

My original point was mostly directed at a recent question about using some cheap UHF radios someone found from China or somewhere.

Subject: Re: [WestMichiganHams] Re: USE OF COMMERCIAL EQUIPMENT

As I read it, the following exception to the certification requirement

"3) The amplifier was:

...

(ii) Modified by the licensee for use at the licensee's station."

seems to mean that as long as the licensee changes something (what is not specified), it can be used in the amateur service even if it was a commercial device.

1918. WEAVER'S WORDS -- CW NETS, ETC.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-03 23:55:19 UTC
From: Tom VanderMel
Topic: 1918 Message: 1918

[As always, send replies to k8je@.... Do not click on REPLY. The ARRL reflector that gets this newsletter to you is one-way, only.]

- CW Nets Moving
- 80 Meter CW Traffic Nets Frequency & Time Matrix
- International ARRL Humanitarian Award Nominations
- Upgraded Instructors' Manual Available
- Tentative Travel Schedule

CW NETS MOVING

With the totally unexpected extension of the fone band on 80M clear down to 3600 kHz, it is necessary for many CW nets to move from longstanding net frequencies above 3600 to frequencies within the new subband. To say the least, doing this is distasteful. To say it more plainly, doing this is often painful and highly disruptive. New, unwanted potential for creating inter-net QRM can be expected to result.

I am very pleased that in nearly every instance, though, the Net Managers have taken the attitude that this is something that needs to be done. They set about selecting new frequencies with the professionalism expected of Amateur Radio operators and leaders. I applaud these forward-thinking leaders and net members for the courage and determination to continue to succeed that they have demonstrated.

I want to reiterate that ARRL and I stand squarely with the NTS and nets in it -- whether these use CW, SSB, RTTY, high-speed digital or native drum. It is difficult to conceive of a form of net in NTS that does not potentially enhance the standing of Amateur Radio within the community and does not increase and maintain Amateur Radio's ability to communicate during emergency and disaster situations. As non-technical as CW is relative to high speed multimedia or even RTTY and SSB, CW continues to provide yeoman service in disasters when professional, highly-technical systems fail. CW's low-tech (in this high-tech era) is actually a great plus in many instances.

Keeping this in mind, I continue to urge all net operators to recognize that the great glory days of NTS are past. Just as the typical automobile no long has a standard, shifter transmission, and just as the crank telephone connected by hard lines has given way to push button phones -- and for many people to cell phones, and just as hand-turning the propeller to start airplane engines has given way to electric starters and increasingly to jet engines, NTS must continue to evolve in a manner that makes it most useful. The role NTS can find most useful in filling today is as an arm of ARES operation.

This does not mean that NTS is dying or should die. It does not mean that ARRL is attempting to cast NTS into the deepest part of the dungeon, never to be heard of again. It only means that to maintain and even regain much of the luster it had in days past, NTS must adapt. Among others, I urge local, regional and national NTS leaders to look deeply into the situation the service faces today and to guide it to be able to perform still greater service in the future than it has ever performed in "bygone year." I, as well as others, are encouraging our F&ES leaders to help us in the field see where adaptation will be most valuable and how it can best be accomplished.

80 METER CW TRAFFIC NETS FREQUENCY & OPERATING TIME COORDINATION MATRIX

Net Managers may want to check the following site and make certain their nets are listed on it.

Jack, W0UCE, has developed a Matrix Table to help coordinate relocation of NTS 80 meter CW nets. This is not a frequency-assigning operation, but simply involves posting what Net Managers send to him. This is intended to assist Net Managers select frequencies based upon frequencies that are being used by other nets. Go to <http://4rnc4.homestead.com/80mCWNETMATRIX.html> to view the current matrix and to send information for Jack to add to it.

Thanks to W8LLY for forwarding this information via the Miami Valley Amateur Radio Bulletin Board. It is also being distributed by a variety of additional amateurs.

INTERNATIONAL ARRL HUMANITARIAN AWARD NOMINATIONS

From the ARRL Letter: Nominations for the 2006 ARRL International Humanitarian Award close December 31. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual award to recognize radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

For additional information, go to www.arrl.org/FandES/field/awards/.

UPGRADED INSTRUCTORS' MANUAL AVAILABLE

The new ARRL "Instructor's Manual for Technician Class License Courses" is now available. Mark Spencer wrote the book. ARRL COO Harold Kramer, WJ1B introduced the new manual to the Board of Directors by saying,

"We conducted an on-line survey asking them about their requirements and needs. Over 800 instructors responded to this survey with valuable inputs and comments.

"From the survey, we . . . heard loud and clear that our instructors want interactive and graphic materials included with the manual.

Therefore, the book comes with a CD that has complete PowerPoint Lesson Presentations for each section, ExamWin Software for practice tests, and files of the graphics in the HRLM. To give you an idea of the type of material that we have included, I am attaching one of the sample Lesson Plans."

I can't attach the sample lesson plan with this message, but it is really nice. Harold also explained:

"The Manual itself is divided into Sections that correlate with The Ham Radio License Manual (HRLM) so that instructors can use the HRLM together with the Instructor's Manual as an integrated instructional system. Each Section contains detailed Lesson Plans including Learning Objectives, Study Materials, Equipment and Materials requirements, Recommended Instructional Strategies and Suggested Classroom Activities. The new book also contains a guide on preparation to teach amateur radio written by Peter Kemp KZ1Z as well as practice exams and Lesson Plans for CW instruction."

1920. Old Magazine Cover

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-04 14:08:19 UTC
From: wingerham
Topic: 1920 Message: 1920

My son e-mailed me a JPEG of two old magazine covers from Radio News. I just couldn't let them go without sharing them. I, for one, would be interested if anyone could identify the radios they are using. On one cover, I am thinking it shows a DX expedition since the linear is on a pallet with wheels.

The other picture is pretty self explanatory. It is a hoot.

I posted it in the photo section.

1921. Any TNC experts around? Still having problems...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-04 15:11:45 UTC
From: Joe Veldhuis
Topic: 1921 Message: 1921

Well, I am still having problems with this new TNC. As mentioned before, it's a PacComm TNC-200, a generic TAPR TNC-2 clone. Once I got it to "boot", I found that it was completely out of alignment. After recalibrating the tones and drive level, I was able to get it transmitting packets that other TNCs and soundcard modems could decode, however the receive end still didn't work.

On Saturday, Ernie W8EL helped me recalibrate the decoder, but that only seems to have fixed the problem half way. The DCD light on the front comes on steadily when it's receiving a packet (before it would just flicker), but it still doesn't actually seem to be doing anything with the decoded info. That is, it doesn't respond to incoming connections or relay any monitored packets to the terminal.

Another, most likely unrelated issue, is that it has an intermittent problem where it will power on but won't "boot". Since giving it a good, sharp whack over the top often fixes this, it's probably an imperfect connection on the PCB somewhere.

Anyway, although the TNC seems fixable, doing so is beyond what I can do with the tools and skills I have available. So, does anyone feel like taking a look at it? I'll even pay you (though not much) if you can get it working.

-Joe, N8FQ

1924. The official Michigan Section (ARRL) campout date

Yahoo group: WestMichiganHams (2006 — 2008)

From: Hank Greeb
Topic: 1924 Message: 1924

Mark your calendars - the Michigan Section (ARRL) campout dates are now official for July 2007... This is a fun campout for families, and has several working sessions for Emergency and Traffic minded amateur radio operators. All hams and their families are welcome, you needn't be a holder of an ARRL appointment to be eligible to attend.

Look for more information on the section's web site as it becomes available (http://www.arrl-mi.org/)

For a glimpse of the agenda for the 2006 event see http://www.arrl-mi.org/?q=node/4

Looks like lots of fun, interspersed with some interesting planning sessions.

For those who'd like to partake of the festivities, but who aren't campers, there are motels in the area for "indoor camping." :)

If the data gets to the buffer, the other thing that causes no-data is
check-sum failure for the packet.
The TNC sometime has a parameter to pass "all data" even though it is
not a valid packet for analysis.

From: Bill
Topic: 1920 Message: 1926

In 1983 I was visiting a remote yard sale site east of Cadillac, Michigan. The guy there sold me his old Hallicrafters SX-42 receiver for $25. It was Heavy and a wonderful rig that reintroduced me to Short Wave Listening.

I learned about QSL cards, logging, and some ham radio. I have a certificate from a ham special event station in, I think, San Antonio, TX. There were other cards and lessons in the IRC, antennas, and such.

What a pleasure to power up the rig on a dark winter's evening and listen to the world from my shack in Big Rapids. I had not done any listening since childhood in the mid 1960s.

A great radio, memories, and introduction to ham radio.

1927. Michigan Amateur Radio Alliance Meeting, December 13

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-05 14:39:44 UTC
From: Hank Greeb
Topic: 1927 Message: 1927

<>The Michigan Amateur Radio Alliance meeting will hold its regular monthly meeting at 7:30 PM on Wednesday, December 13. The meeting usually lasts about an hour.

We meet in the Steepletown Building, 671 Davis Ave NW, Grand Rapids, which is 5/8 mile south of Leonard St., and 200 yards east of Alpine Ave., on the southwest corner of 5th St. and Davis St. The parking lot is behind the building, and we use the door on the rear corner. There is another door for anyone using a wheel-chair, but we have not used it yet.

A map of the area can be found at http://tinyurl.com/yentto

<>Most people arrive about 7:15, and there will be someone on our repeater (145.230 PL 94.8) around 7:00, if you need talk-in.

Afterwards, some of us go to Steak and Shake for a snack or whatever.

All are welcome. Your presence will be truly appreciated.

More information on MARA may be found at http://www.w8usa.org/

1928. Winter Field Day @ MAARC?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-05 18:03:35 UTC
From: Bill
Topic: 1928 Message: 1928

All:

Does anyone have an opinion regarding a Winter Field Day at the MAARC's clubhouse this season (well, technically it is not yet winter, but tell that to my driveway!)? We are thinking about the clubhouse schedule for the coming month or so and the topic was raised.

Would anyone be willing to host this event? At the clubhouse? Another location?

What are the dates and will the clubhouse work well for such an event?

The answer to the question, "Hey, when can we do another contest?"

1931. DAYTIME WMTN SESSION POLL

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-05 18:30:06 UTC
From: ravennaelectronics
Topic: 1931 Message: 1931

Good day everyone.
This is a reminder that the WMTN Daytime Session Poll is still active. Please look at and place your vote. You can change your vote as your mind changes as well. The poll will close on December 19th. The answers to this poll will go toward further consideration of creating a daytime traffic net. I did discuss a daytime VHF traffic net with the STM and he is all for it.

Thank you very much
Doc Strait, KD8BGQ

From Spar:

Winter Field Day will be held from 12:00 noon on Saturday January 13, 2007 to 12:00 noon on Sunday January 14, 2007 local time.

We can set up at the clubhouse and I think we'll then be classed as a home station.

I'll be mentioning this event at the upcoming MAARC's meetings, membership and board.

Bill

I was actualy thinking of using my sons fifth wheel. but the club house sounds good also. It would have room for 2 stations in the fifth wheel.

Subject: [WestMichiganHams] Winter Field Day @ MAARC?

All:

Does anyone have an opinion regarding a Winter Field Day at the
MAARC's clubhouse this season (well, technically it is not yet winter,
but tell that to my driveway!)? We are thinking about the clubhouse
schedule for the coming month or so and the topic was raised.

Would anyone be willing to host this event? At the clubhouse?
Another location?

What are the dates and will the clubhouse work well for such an event?

The answer to the question, "Hey, when can we do another contest?"

Chris,
Actualy it's notto cold if you keep in mind that most people would be inside campers and vans. Mark had mentioned his mini van with the rear seatss removed and placeing a bord accros the arm rests make an excelent work station along with use of a lawn chair. I had thought about draging my camper out to the clubhouse and operating out of it. I have heat, a stove and fridg. along with a place to sleep.

1939. Talking of DX

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-06 01:53:16 UTC
From: Hank Greeb
Topic: 1929 Message: 1939

Talking of DX - I had fired up my rig on 20 metres Sunday, "sorta" looking for the New Mexico QSO party, and didn't hear anything. After listening around the band for a while, I gave up.

I left the speaker on at about 14060 KHz, and started doing some other things in the shack. I heard something, a CQ, and got semi-interested when it was 8R1J, in Guyana. He called CQ several times, and finally worked a European station. He again called CQ, and a K3, who I could also hear, answered and chatted a while. After that, when he called CQ I called him, and was delighted to work him. It was a quite casual contact, because we exchanged reports, names, locations, rather than jsut the more typical "RST 599 TNX 73" for a DX contest.

I couldn't find my reference to a DX reflector, so I didn't "spot" him, nor does it seem that anyone else did, because he called CQ a few more times and (apparently) gave up, or at least moved frequency.

Guana is all that "rare" DX, but I'd thimk that a fellow calling CQ from a place like that might get a bigger reception that he did. He had a very respectable signal here in Michigan....

Or, am I just not enough of a DXer to know the score?

If I'd have a vote, I'd vote for 2 alternatives, which one actually implemented being dependent upon the weather.

1. RV's or camping trailers in a campground. Use if the temperature and preciptation is favorable for erecting antennae. This would be "MO" classification, and would get 2000 bonus points if run off AC mains, or 3000 bonus points if run off a generator. Putting up antennae is the major difficulty during a big sn*wstorm, icestorm, or freeaing rain.

2. Backup would be to activate the club station if weather is inclement. This would be IO classification. Wouldn't get bonus points, but would be a good exercise of operators and equipment.

I operated in a dining canopy in 40°F Temperature, 20 mph winds, during the Illinois QSO party, and don't really want to subject myself to conditions like that again!

How about doing the camper idea at the club house. We can operate on battery or generator power and have facilities to boot. All depends on the amount of snow. Worst comes to worst we go indoors and give up a few points. It still would be fun.
Would have to check height clearance going into the club house.

I'd bet the clubhouse would work.

Height clearance into the parcel? We host the Teenage Net picnic and they like to bring their campers and trailers. I doubt the road would be impassable.

I encourage the idea.

Fruitland Township Park is likely closed off for the season. They do not encourage camping, even in the summer, but make a special arrangement for the club. Does not mean they will not allow us to use their park. Just doubt it.

We should talk at the club meeting Thursday evening. Or at the Soup Supper Saturday afternoon, 5:00 pm.

Bill

Forwarded from the ARRL Club News Mailing List

Welcome to the first edition of the ARRL Club News. Published monthly, the ARRL Club News is a source of information to invigorate and stimulate your radio club. Features will include meeting activities, on air activities, recruiting and training new hams. We hope to share some exciting things that clubs are doing to make ham radio fun.

Did you know that there are more than 2,000 clubs across the country affiliated with the ARRL? Some of these clubs are single purpose groups that may support a repeater; some specialize in DX and contest operating; some have an emphasis on public service and emergency communications; and others are all purpose ham radio clubs that are striving to maintain or obtain status as an ARRL Special Service Club. http://www.arrl.org/FandES/field/club/#ssc_program

Initially the ARRL Club News will be published in plain text format but we plan to produce it in HTML format by March of 2007. Using HTML will allow us to share photographs of members and club activities. The ARRL Club News is for your club. Please be sure to share with us some of the things that your club is doing.

==========

Spotlights

Portage County Amateur radio Service, Ohio This group started just over a year ago and has grown to almost 50 active members. PCARS is active in community service and holds regular club activities including license classes, on air nets, meeting activities and of course Field Day. The club encourages hams to get on the air. Whether it is on a net, a contest or just plain old rag chewing, hams on the air are hams having fun and making friends.

http://www.portcars.org/

Madison County Amateur Radio Club, Ohio When Bob Lewis, N8GU joined the Madison County Amateur Radio Club there were just six members and no meeting programs. Today the club is 39 members strong and has meeting activities, a weekly 2 meter net and submitted a top in class score for Field Day 2006. According to Bob the club tries to keep focus on fun by having regularly scheduled meeting programs and good communication with their membership about club activities and news.

http://qsy.to/mcarcoh/

Arrow Communications Association, Michigan Dan Romanchick, KB6NU tells us that the Arrow Communications Association in Ann Arbor, Michigan has a jewel called the Ann Arbor Hands-On Museum (www.aahom.org). This is ostensibly a children's science museum, but the facility is a lot of fun for adults, too. Dan met with the director a couple of weeks ago, and he was very enthusiastic about the club providing an amateur radio station at the museum. The museum's director has agreed to provide space for classes. The club is planning to set-up a special event station at the museum in a couple of weeks and plans to start the classes there in January.

==========

Elmer's Corner

License classes are a great way to recruit new members for your club and the post-license mentoring sessions attract members who may have been away from meetings for a while. An important part of effective amateur licensing is keeping in touch with new licensees and keeping them motivated and moving forward with their new activity.

The folks at Michiana ARC of South Bend, Indiana are preparing their "One Day Only" licensing class again. The club had overwhelming success with this program in 2005 and says that the essence of this intense single day program is not on what happens that day but what occurs at the "elmering" sessions following the licensing class. Students prepare to take the Technician class exam in an eight hour class that drills home the material covered on the exam. The following club meeting is dedicated solely to mentoring of the new hams. The "mentor meeting" brings out many club members who are eager to share their knowledge with the newly licensed hams.

http://community.michiana.org/marcsite/

ARRL Instructors

The long awaited ARRL Instructor Manual (9817) is now available. The manual comes with a CD that has complete PowerPoint Lesson presentations for each section. The ARRL Instructor's Manual is designed to be used with the ARRL Ham Radio License Manual (9639) as an integrated teaching system. The material also correlates with the ARRL On-line Technician Licensing course.

Book with CD-ROM #9817 -- $15.95

Order on-line < http://www.arrl.org/catalog/ or use our toll-free order line 1-888-277-5289.

www.arrl.org/instructor

==========

The ARRL Club Commission Membership Recruitment Program allows ARRL Affiliated Clubs to retain a portion of the ARRL membership dues from each new member or renewal that the club collects and submits.

Under this program, clubs retain $15 for each NEW membership and $2 for each renewal submitted (regular and senior memberships only). A NEW MEMBER is defined as any individual who has never been a member of ARRL or any individual who has not retained a membership for two or more calendar years prior to the application submission.

The details and forms can be found on the web at the ARRL Club Companion page: http://www.arrl.org/FandES/field/club/benefits.html#commission

==========

Doughnuts Are Health Food

Healthy, active clubs are the foundation of Amateur Radio. It doesn't matter if your club has eight members or several hundred members, your club is your ham radio family. Our local radio club is where we get to interact with other hams and share information and knowledge. It is through the local club where many hams earned their first Amateur Radio license or upgraded to a higher license class. Amateur Radio clubs act as a catalyst where close personal friendships grow. Whether the activity is Field Day, a licensing class, a public service event or an antenna party, the local club really is where the rubber meets the road.

Clubs with a strong social appeal tend to be more active clubs. On the surface, Amateur Radio may appear to be a technical hobby, but it really is about people. Ham radio is people communicating and sharing ideas with each other. For 100 years hams have developed and exploited technology to be able to communicate with other hams and on behalf of the people in their communities. When we get on the air we are people sharing a common interest. During times of disaster hams are people helping other people. Members of our radio clubs are our friends. The magic boxes have changed quite a lot over the years, but the one thing that remains the same are the people who use them.

Though not scientific, a recent ARRL web survey indicated that 57% of those who attend club meetings do so because of social contact with other amateurs. Coffee and doughnuts are hardly technological marvels but they are a large part of what keeps a radio club active. Many clubs have rearranged the format for their meetings where they have a presentation or guest speaker at the beginning of the meeting followed by a social break, and then the business portion of the meeting is held at the end. Interestingly, many members who did not regularly attend club meetings because they were forced to sit through the business meeting at the beginning, before socializing, not only increased their attendance at meetings but these same folks stayed for the entire meeting-- including the business segment. Serving desert first not only satisfies the sweet tooth, but it also quenches the need to be with friends. Even though the doughnut is not listed in the major food groups of healthy eating, the fried treat is essential to a healthy

radio club.

1947. Re: Any TNC experts around? Still having problems...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-06 18:28:12 UTC
From: Hank Greeb
Topic: 1921 Message: 1947

I forget, but I seem to remember that the IC's in the TNC-2 had sockets and were replaceable. At least I was able to put in new "brains" in one of mine back in the 80's to make it into a NetRom node. It might just be an oxidized socket, and pulling the IC's out and replacing them in their sockets a few times might do the trick. The symptom of "fixing" the thing with a "sharp whack" could be the result of some oxidation in one of the socket connections.

You might get a few memory chips, etc., from someone's junque box, and plug in various chips to see if one of them is failing.

The more difficult symptom is the fact that the decoder was "completely out of alignment." This means that some of the capacitors have changed value. Alignment procedures are available for the decoder, but not for other parts of the receive algorithm. And, the caps are soldered in, making it hard to replace....

Have you plugged a different TNC in it's place? It might be that there's something wrong between the rig and the TNC. If you haven't done this, I found an MFJ-1270 in the pile up stuff I packed up when we moved last year, and could loan it to you for a few daze to help with your troubleshooting.

Well, I was actually able to find and fix the decoding problem. Turns out that the EEPROM in slot U6 is responsible for decoding, and I had removed it earlier. Doing so initially seemed to fix the bootup problem. When I put it back in, the TNC was able to decode signals.

It is still suffering from the bootup problem. Ernie W8EL has suggested that the cause of that problem lies in the circuitry between the power regulator and the reset pin on the Z80 CPU.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-06 20:33:46 UTC
From: StraitMD4@comcast.net
Topic: 1949 Message: 1949

Hi all,

This is for those of you who may not understand some of the technology . I have had several people ask me about these connections and how to set -up something like mine . This is not my shack . My set up is similar .
It's a good video . It takes a few minutes to buffer . Unless you have broad-band .

This episode shows the assembly of a VHF and UHF station with Echo-Link , a D-Star GPS position reporting internet gateway and a UHF APRS receive only internet gateway .

I have my stuff set up the same way .

1950. Re: Winter Field Day @ MAARC?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-06 22:28:21 UTC
From: Bill
Topic: 1928 Message: 1950

"Any other part of Muskegon County for the event?"

We have tried to find other places for the traditional Field Day in the summer. The Muskegon city parks are not inviting because they dissuade overnight camping. The county parks are great but charge a daily fee or an overnight fee. Not so great when we have upwards of fifty folks attending and participating. I've kicked around the county fair grounds but never chased that one down. Maybe a township would have a facility you could borrow for the day? Some of them do invite parties or receptions?

The county parks generally close in January. Same with the Muskegon State Park. Maybe you could find some USFS property where you could hang out for a day. However, camping in winter is not so fun and sitting on that cold toilet seat in an unheated outhouse, if, indeed, you find an outhouse, has to be less than encouraging. Might make the clubhouse a bit more inviting. Besides, the radio club is generally encouraging and inviting folks to play radio at their clubhouse. It is not that hard a sell.

We can bring up the subject at the club meeting Thursday or to the radio club's board on the eighteenth. Or other dates.

Bill, AB8SC

Bill,

My thought is use the clubhouse with RV's, Vans and such. We can use a generator for power. Club antennas can be used outdoors with ease. The club house would make a great common place for restroom place to eat and fellowship with good fireplace burning a few logs. I could have two shacks running in my camper. k8mhz could run one in his minivan and k8pcj has a fifth wheel that could acomedate atleast one shack. Saturday morning could be great for breakfest and NS8Z estate sale/auction to kick things off.

Al:

Thanks for the insight on the radios. It really shows you how far we have come. Now you can buy a HF rig with all the bells and whistles that you can carry in one hand for a thousand or so dollars. I wonder what $275 would translate to in today's dollars.

In the 60's, I had a Hallicrafters shortwave receiver and I would spend hours listening to the world. It also warmed my unheated bedroom. That was my introduction to shortwave radio and hams. I wish I still had it.

Ham in a day!

Get your Amateur Radio License in just one day!

Sponsored by the: Kent County Radio Amateur Civil Emergency Service

No Techno-Babble needed, this class is for anyone who wants their amateur
radio license

Date: Sunday January 21st 2007

Cost: 30.00 Includes license Fee

Location: Red Cross 1050 Fuller Ave NE

Pre-Registration is required to reserve a spot in the class

Time: 1:00 PM - 7:00 PM

Testing will start at 6:00 PM

To register e-mail jnawrot@... or call 616-889-7101

Under 16 must be accompanied by an adult!

Bring either drivers license or 2 pieces of identification

Coffee and Treats will be provided! Dress comfortably!

Small Print: This class uses memory retention, everyone learns differently.
Class is not a guarantee to getting your license.

This message has been prepared on resources owned by Kent County Radio
Amateur Civil Emergency Service. It is subject to the Acceptable Use Policy
and Procedures of KCRACES.

If you want to look at the past of cost of older ham rigs. I have the original paperwork for my collins transevier. It's a KWM-2 purchased new in September 1960 for $1185.00. Now think about what that relates to in todays money and that was considered a mobile rig and that didn't include the power supply just like todays rigs.

Date: 2006-12-07 21:38:54 UTC
From: Hank Greeb
Topic: 1920 Message: 1959

My first rig cost less than $15. I was given a BC457 transmitter (I think that was it's the number). Its nominal frequency range was 4 to 5 MHz or thereabouts, but I padded it down to 80 metres. I bought a BC 454 (again, I think that was its number) receiver, which covered 80 metres. I scrounged parts from a defunct TV receiver for the power supply, thought I had to buy a few misc parts. One "inventive" thing I did was to use four 35Z5 rectifiers which I got for nothing from a radio repair shop. They had a "fuse" and tap for a pilot light which would oftn blow, and the rectifier was still good. In series four of the filaments added up to about 117 VAC. I rectified the 24 volts from the filament supply for grid bias and another couple of the rectifiers were used for a relay for keying.

The receiver was as wide as a barn, but during the day in the novice band it worked just fine. I worked something like 25 states plus Canada with it.....

My father, also a ham, had a hallicrafters S-20R and a home brew transmitter. A "rich ham" a few miles away, had a SX-28 with crystal filter.

1961. Harding Energy program for January MAARC meeting at Norton Shores Public Library

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-08 15:17:02 UTC
From: birdpriestess
Topic: 1961 Message: 1961

The Muskegon Area Amateur Radio Council is pleased to present a special program on January 4, 2007, at the Norton Shores Public Library, 705 Seminole Rd, Norton Shores, Michigan. 7 p.m. sharp! The program will be presented by David Clow, CEO of Harding Energy, Inc., a world leader in rechargeable battery technology. Here is some information from their website (http://www.hardingenergy.com):

"Harding Energy Inc. was founded in 1987 by local businessmen and physicians in the western Michigan area. Lead by Doctor Nicholas Pietrangelo and his relationship with Stan Ovshinsky, inventor of Nickel Metal Hydride technology, Harding was one of the first companies to obtain a license from Energy Conversion Devices (ECD) to manufacture and distribute NiMH batteries and battery assemblies."
"Harding has evolved from a single line cell manufacturer to a global battery solution provider. Products range from single cells that are distributed to assemblers for battery pack manufacturing, to the most complicated smart battery technology solutions coupled with intelligent chargers. Harding has 100 different cell sizes making them one of the largest cell providers in the world with production capabilities exceeding 3,000,000 units per month. Harding offers Li-Ion, Li-Polymer, Ni-MH, charging systems and smart boards to complete their product line."

"Not only is Harding a world-class manufacturer, but also their staff is extremely well versed and has many years experience in the electronics and battery industry. President and CEO, David Clow has been in the electronic industry in excess of 30 years and brings a global knowledge to Harding. With his several years of experience matched with his education, he brings a tremendous amount of resources and talent that is necessary to run and orchestrate the departments within the Harding Corporation."

The public is welcome to attend this program. Bob, N9AUY, pulled this program together for us and has also invited his radio controlled aircraft club to attend. We think there will be an excellent turnout. Many in the public, who don't know any better, think that ham radio is dead. Help us prove them wrong! There has been no decision yet on a talk-in to the library location, BUT if you make a call on the local .94 repeater, someone will guide you to the library. It's not difficult to find.

Soup Supper is Saturday (hey, that's tomorrow!) at the clubhouse. Begins around 5:00 pm. You're invited. We'll have a special presentation, too.

Don't miss this opportunity to sample soups like potato, taco (taco??), garden vegetable, chili, and the like. Many soups to choose, only one night to enjoy.

We'll accept donations to cover the costs. We'll invite all to enjoy.

See you there? We hope!

Who operates / owns 88.7-106.5 MHz ? I have heard phone conversations there before . As well with the UHF standard and "T" band .

UHF standard = 450-470 MHz
UHF "T" band = 470-512 MHz

KD8BIG

-------------- Original message --------------
From: <k8mhz@...>

"No, because the cellphone does not transmit in an amateur band. So
you can't use it for a repeater input, even if it were technically
possible."

It is technically possible with ACUs. Reverse phone patches using land lines are and have been legal for some time. If the phone is cellular instead of a land line it is still a reverse phone patch but in actuality is a re-transmission of a non-amateur frequency. Both the Motorola ACU-1000 and a properly set up EchoStation repeater have the capability of re-transmitting ANY audio input to an amateur frequency, or any frequency that there is a transmitter for. EchoStation can be set up with a cell phone as a receiver and a ham rig as a transmitter so the cell # could be called and the received audio is sent out over the transmitter. EchoLink uses many frequencies via the Internet in the same manner. This seems like a breech of the law, not just to me, but others as well. NOT to be taken that this use is a travesty, but more to be taken as a need to address Part 97's failure to keep up with

the times. /FONT>

"I totally disagree with your premise, Mark. The fact that cellphones use RF is incidental to their operation, and would not fall under an interpretation of the amateur rules prohibiting re-broadcasting of other services."

The only allowance for incidentals is clearly outlined and pertains to things such as music on the ISS for instance. Nowhere in Part 97 is there an exception for devices that use RF 'incidental to their operation', which I don't think is the case for cell phones. Cell phones are radio phones and the radio part is the primary function of those devices, not merely incidental.

The re-transmission exclusion bears no written exceptions and leaves little room for interpretation. Without an exception for cellular or cordless phones it is against the ruling of 97.113.

If I missed something in other sections of Part 97 please point them out to me.

I think this is the case of the law not keeping up with the technology.

73,

Mark K8MHZ

>
> So, if it is OK to use a phone patch to re-broadcast cellular phones, would it then be OK to have a repeater in which the input was a cellular phone?
>
> See where I am concerned?

No, because the cellphone does not transmit in an amateur band. So you can't use it for a repeater input, even if it were technically possible.

> If it is NOT OK to use a cellular phone as a repeater input it is also NOT OK to use them on a phone patch as the exact same retransmission is suspect, just connected differently.

I totally disagree with your premise, Mark. The fact that cellphones use RF is inci dental to their operation, and would not fall under an interpretation of the amateur rules prohibiting re-broadcasting of other services.

Good discussion though.

Good morning all,

I'm sorry that not everyone can access the video.
The video shows the assembly of a VHF,UHF station with Echo-Link,D-Star GPS position reporting internet gateway using an IC-2200H w/D-Star interface and how to connect the rig to your P.C.
It also shows the IC-420s that is used for echo-link and APRS receiver . How to use connectors OPC-617, the cable to be used from the radio to the sound card interface that will be used for echo-link.
The video also shows how to use the software to adjust your system . It gives ideas on ways to mount your equipment in an electrical wall mount type cabinet with a 2 meter bandpass filter , pc ,radio etc and the various connections needed to operate the system .

The video also gives several web-sites for reference seen below .
I hope this explains what you may have missed . Hopefully BPL gets here soon for those in the sticks .

The video shows the assembly of a VHF,UHF station with Echo-Link,D-Star GPS position reporting internet gateway using an IC-2200H w/D-Star interface and how to connect the rig to your P.C.
It also shows the IC-420s that is used for echo-link and APRS receiver . How to use connectors OPC-617, the cable to be used from the radio to the sound card interface that will be used for echo-link.
The video also shows how to use the software to adjust your system . It gives ideas onways to mount your equipment in an electrical wall mount type cabinet with a 2 meter bandpass filter , pc ,radio etc and the various connections needed to operate the system .

The video also gives several web-sites for reference seen below .
I hope this explains what you may have missed . Hopefully BPL gets here soon for those in the sticks .

From: Bill
Topic: 1978 Message: 1978

At Monday's meeting of MCECS (formerly MCARES) our great friend Al, K8AER was recognized for his tireless dedication to emergency service. Al received praise and a wonderful plaque to commemorate the acknowledgment that he has given unselfishly in the name of radio for many years. You will know Al from the Sunday evening two meter net on both of the Muskegon repeaters.

Al has also worked tirelessly on numerous public service community events like the March of Dimes spring walk to raise significant money for their causes. Whenever there is a radio related opportunity you often will see and hear Al lending a helpful hand and providing support.

Annually the MCECS has extended a congratulatory hand to one of its members who has gone "above and beyond" in their radio activities. The previous recipient is Tom, N8YJT.

Please join everyone and MCECS in giving Al, K8AER a well earned pat on the back and a "Thank You!" Al proudly upholds the service tradition of amateur radio. Congratulations, Al.

1979. K8AER

Looketh like a good possibility of meteor scatter communications tonight and for the next few daze. MFSK411, anyone? This one came from SW Ohio, don't know if we'll be able to see through the clouds which are still prevalent here in Grand Rapids, but radio waves should penetrate the clouds...

Sent: Wednesday, December 13, 2006 2:27 PM
Subject: Tonight-Tonight!

For those of you who may suffer a case of Insomnia tonight, having difficulty sleeping, boy are you lucky...! Tonight is the peak of the Geminid Meteor Shower. The skies will be clear and the temperature not very cold (mid-to low 40's overnight). If you can't sleep, grab your coat, a cup of hot chocolate, and anytime after eight or nine o'clock venture outside and look for Orion's Belt (three stars lined up in the East/Southeast) as part of the Constellation Orion then look straight up from there to the Constellation Gemini. The show will be in this area of the sky.

The Meteor Shower will get more intense as the night progresses, with the potential of seeing one to two shooting stars a minute (that's busy)! The Constellations will move East to West during the night, so if you wake up in the middle of the night, look further South, then West depending on how late it is... Enjoy!

If you visit the MLive site on the internet you will find a link to the Muskegon Chronicle. On their MLive page you see that some stories are grouped by county. Under the Muskegon County related stories link is a story about two fatal accidents. This story gives detail regarding Al's fatal accident. It takes a bit of effort but you'll find the story there.

Also Al and Kathy's van is pictured on the front page of the Muskegon Chronicle this evening. Additional details are inside the paper and linked to the front page article.

Thanks to everyone for all your thoughts, prayers, and kind words.

Kathy has survived and is in Hackley Hospital this evening. There is no word on how long she may be in the hospital. And there is no word about a funeral.

We will use this venue to keep everyone up on the details. And you might listen to the Muskegon repeaters.

Tragic!

Mark, to go along with your comments of Al's determination, I was talking to Al last week. He said he wanted to get an extra class book to study. I was planning on going to the Lowell ham fest this weekend and was going to buy a study book and mail it to him without him knowing where it came from. I am very saddened that I will not get the chance to see the smile on his face when he would have passed that test. He was a man with a big heart and not afraid to show it.

Al, my friend, You have left an empty space here on earth and in our hearts that will be very hard for us to fill and you will never be forgotten.

until we meet again 73s

Through many tears I mailed the following to my church, First Congregational Church in Fremont. You might find some comfort or measure of a man somewhere in the following:

Pastor Ray:

Please share this story with our church. Several of the "old folks" will recognize many of the details. I'm sure they will be much better at filling in the blanks, too.

In the late 1970s and in the 1980s our church had an outreach program centered around travel to various parts of the United States. Our youth minister, Frank Dobos, organized youth and adults who were transported to many parts of our country on a retired "Greyhound" bus. We built a garage to house the bus which is one of remaining legacies of this period.

In those days our youth enjoyed these opportunities. My sister, Elizabeth Rogers, was one of the youth participants. She so enjoyed the trip to New England that she moved there after college. She met a wonderful man, Michael, and they eventually returned to Fremont with the best nephew and niece a proud uncle could ever claim.

Another participant in those travels was a mentally challenged Alfred E. Ronning. Many years later it was my pleasure to call Al one of my cherished friends. Al later moved from Fremont and settled in Whitehall. He married a wonderful lady, Kathy Ronning.

My friendship with Al began with my introduction to amateur radio. This hobby seems to attract the most wonderful of individuals who volunteer their talent to causes like a March of Dimes walk or a Grand Haven Santa Clause parade. These folks, and Al was the quintessential example, give tirelessly of their time to help others less fortunate.

To earn a ham radio license a potential ham will pass a tough test. To be granted more privileges in the hobby there are more testing challenges. My friend, Al, was determined to earn his ham radio General license. This required Al to learn Morse code, that system of conversation using the sounds like "dit" and "dah." Al had survived a traffic accident in his very early youth that, frankly, could have killed a lesser child. The accident and the ensuing years of recovery seem to have toughened Al's determination and resolve whenever he set his mind to attain a goal. He pounded on that door barred by the Morse code test for well over a year. He asked for help from several friends in the ham community and we all worked to help him learn this skill while we marveled at his determination. We never doubted that Al would succeed with this test. Lesser folks simply cringe at the

challenge.

Al eventually earned that ham license. Never doubt that this was one of his finer moments. We celebrated the achievement when he earned the amateur radio General license and the call sign, K8AER.

Last Monday, December 11, he was recognized by his ham friends for his many tireless years of volunteering in the ham radio community with a plaque and fine words of congratulation. Al was instrumental in a Sunday evening ham roundtable discussion on the air that was both a training and an informal get together we all enjoyed. For years Al facilitated this net. He also worked tirelessly helping agencies like the March of Dimes and the American Red Cross using his radio skills, ham friends, and his determination. He made a difference in innumerable events from walks and runs to parades and giant shows like the Air Fair.

Wednesday morning, December 13, he and his wife were going to the hospital for some tests. For some reason he did not see or recognize the flashing red light at the intersection of Apple and Getty Streets. Al was killed in the car accident at that corner. Kathy was taken to a local hospital and is expected to recover from her injuries. The driver of the other vehicle is also hospitalized with non life threatening injuries.

The ham community is crushed by the news.

I tell you this story because Al was a member of our congregation in those past years. I also believe that Al and Kathy were married in our church.

They are prominent members of the Congregational Church in Whitehall. He worked tirelessly for their congregation as he worked so hard with his beloved hobby, ham radio. For example, he proudly told me on Tuesday that he had filled his van to capacity with food from the Gleaners in Grand Rapids that was used in the ministry of his church for folks much less fortunate. Al would literally do anything, move heaven and earth, to perform a favor for anyone.

I've attached a photograph of Al and his friends at the summer radio event we cherish called Field Day. Al is the guy in the burgundy tee shirt. The other guys are Chris, AB8WO (who, by the way, is blind) and Al's older brother, Rick, W8LGP. Russ and Edith Ronning, Al's parents, moved from Fremont to Muskegon where they still reside. The long ago car accident involved the whole family at a time when they called Fremont their home.

As an aside, when a ham ends his conversation his last characters in the conversation are Morse code that sound like dit dit dit dah dit dah and are written as the two letters, SK. When a ham dies we refer to him as a Silent Key. Al's key was snuffed out at the age of fifty-three wonderful years.

Bill Fries, Jr.

Al took and passed his Tech test on the same day as I. It was at the Fire Barn and I think we were the only two at the test session that day. He got KC8PLL and I received KC8PMM.

A couple years Later, when I took my General test, Al was there on one of his attempts to pass his CW test. He was the first fellow Amateur I remember clearly because of that and I have always felt a connection to him. I will miss hearing him on the air.

---- k8mhz@... wrote:
> Today is a sad day.
>
> I am glad to have been able to call Al my friend and I will miss him tremendously. Al was one of the finest hams I have ever known, especially if you factor in the hand Al was dealt by life's experiences. I won't go into details but Al had a hard row to hoe just to get his Tech ticket. He persevered not only to Tech Plus, but to General as well. The tests weren't easy for Al, but he did not let that stop him from attaining his goal of becoming a General and being able to work HF. I don't know how many times he took the tests but Al knew if he kept at it he would pass. And he did.
>
> Lesser men would have given up, but not my friend Al.
>
> Al has been an inspiration for me since the day I met him, and I remember that day well. It was at an Operation Care event at the Nunica rest area. He was not a ham at the time and was helping his brother Rick at the event when I showed up to take my shift. It was that day that Al told me he was going to be a ham. I remember Rick, now W8LGP, telling me that if Al decided he was going to do something, he was going to do it. There was no uncertainty in Rick's voice. Al was going to be a ham.
>
> Al not only became a ham, but went on to become the Muskegon County Amateur Radio Emergency Service's Sunday Net Manager. Since Al took the position, the Net had a net control operator NO MATTER WHAT every week for what has been a couple of years now. A very deserved award was given to him and he at least had a few hours to savor that award.
>
> We will probably be doing a service for him on Sunday night for the next Muskegon ARES net. I would like anyone that knew Al to check in. I don't know the details of what we will be doing but I would like to do Last Call for him if his friends approve.

Also keep in mind GRARA will have tables at Saturday's Hamfest. Plan on
bringing a few items to sell (unless you have a lot of stuff on your
own table) and spend a few minutes manning the table.

Whoever has the GRARA Banner, be sure to bring this early Saturday.

Topic: 1995 Message: 1995

Heather VanDyke of the Muskegon Chronicle wrote an article specifically about Al Ronning's life for the Chronicle webpage. Here is the link:

http://www.mlive.com/news/muchronicle/index.ssf?/base/news-10/1166112918154410.xml&coll=8

It's a prominent story, so it shouldn't be hard to find if the link fails.

It is difficult for me to write much of anything at this time concerning Al. The shock is still wearing off, but I will post my eulogy to him some time soon. Bill, AB8SC, and myself, AB8QH, were probably the last folks to see Al alive when he and Kathy stopped to visit on Tuesday night. We cherish the memory of their pleasant visit. Please consider Kathy in your prayers. She needs all of the support that she can get now.

73,

From: birdpriestess
Topic: 1996 Message: 1996

Since 2002, when Bill and I achieved our first ham radio licenses, Al Ronning, K8AER, has been a part of our circle of radio friends. Bill and I took our introductory Technician class at Reeths-Puffer Elementary school with Tom Porritt, N8YJT. Kathy Ronning, KC8TEH, was among our fellow students. This is how we came to know Al, as he accompanied Kathy on each of her class nights.

I don't know if Al knew exactly how to take Bill at first, with Bill's hail-fellow-well-met outlook on life, but over the months and years, they became excellent friends. They learned from each other.

For myself, as a new ham, Al was a friendly voice on the .94 repeater, always willing to talk and always friendly. We learned about the early car accident that gave Al some additional challenges in his life. We learned that Al and Kathy weren't so well off financially, but that they faced those challenges with a public face full of good humor and bonhomie.

Bill sold an HF radio to Al in anticipation of his passing the test on his knowledge of Morse Code. He mowed lawns and did odd jobs to earn the money to buy it. If anything defined Al's life for us, it was his "When I ." attitude. "When he passed the code test," he was going to get on that high frequency radio, as the higher license level of passing that test was going to allow it. He took the test over and over again and if anyone else doubted him, he never doubted himself. We didn't doubt him; we knew it was a matter of time. Al taught us to believe in ourselves, and, the power of perseverance. He looked for honest ways to achieve that goal and we all shared in the triumph of his final passage of the code test. His presence is our lives were a light that he shared with the rest of us, much to our betterment.

I'll never forget his showing us home videos of the trip that he took to the Lakota reservation to help his church in building beds for the Native people there. It was a delight. Or his love of the Detroit Tigers and Lions sports teams, whether deserving of that love or not.

The night before this terrible accident, Al and Kathy made a special trip from Whitehall so that Al could show off his Radio Amateur of the Year award, given by the Muskegon County Emergency Communication Services group for which he had given years of service as net control every Sunday evening. "Someone else is going to have to take the Net on Christmas Eve", he said to me, "because I won't be there." I laughed and told him that no one else likely would be either. He was that kind of person, to care whether his conscientiousness would be somehow be questioned because of a human desire to take a holiday off.

I don't want to mythologize Al, he was a fallible human like the rest of us. He made mistakes, had disagreements and was likely

disagreeable. But through him, we got to see the good side of life. We were privileged to see the joys of small and large victories and the sharing of a friendship. He told me on that last Tuesday night that he was going to take his award over to Big Prairie Township and show it to his grandfather, who has long passed from this earth. I imagine that he's able to show it off in person now. God bless you, Al, 73 & 88 from AB8QH & AB8SC. We are sure going to miss you.

Arrangements were made today that I want to pass along. on Sunday the 17th there will be showing at the Clock Funeral Home (413 Mears) in Whitehall from 3 pm to 6 pm. The funeral will be Monday the 18th at 11 am. It will be held at the Whitehall Congregational Church also on Mears, with a lunch at the church following.

The family would like to thank everyone for their kind wishes and prayers.

Soundeth good. When aurora comes on that strong, one doesn't need special modes to communicate via radio waves.

Some places in SW Michigan must have had openings in the clouds for visual sightings. WZZM-TV, Channel 13, had some rather spectacular pictures by folks around this area. I looked at about 10:30 p.m., but didn't see anything just clouds. Some folks say the meteor shower and aurora lights should be visible tonight - I'll believe it when I see it. :)

The article about the aurora can be found on the web at http://tinyurl.com/y5qbyo

This is a link to the wzzm13.com web site.

2015. FCC Eliminates Morse Code Requirement (Finally!!)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-16 02:27:19 UTC
From: Mark Thompson
Topic: 2015 Message: 2015

FOR IMMEDIATE RELEASE: NEWS MEDIA CONTACT:
December 15, 2006 Chelsea Fallon: (202) 418-7991

FCC MODIFIES AMATEUR RADIO SERVICE RULES,
ELIMINATING MORSE CODE EXAM REQUIREMENTS AND
ADDRESSING ARRL PETITION FOR RECONSIDERATION

Washington, D.C. – Today, the Federal Communications Commission (FCC) adopted a Report and Order and Order on Reconsideration (Order) that modifies the rules for the Amateur Radio Service by revising the examination requirements for obtaining a General Class or Amateur Extra Class amateur radio operator license and revising the operating privileges for Technician Class licensees. In addition, the Order resolves a petition filed by the American Radio Relay League, Inc. (ARRL) for partial reconsideration of an FCC Order on amateur service rules released on October 10, 2006.

The current amateur service operator license structure contains three classes of amateur radio operator licenses: Technician Class, General Class, and Amateur Extra Class. General Class and Amateur Extra Class licensees are permitted to operate in Amateur bands below 30 MHz, while the introductory Technician Class licensees are only permitted to operate in bands above 30 MHz. Prior to today's action, the FCC, in accordance with international radio regulations, required applicants for General Class and Amateur Extra Class operator licenses to pass a five words-per-minute Morse code examination.

Today's Order eliminates that requirement for General and Amateur Extra licensees. This change reflects revisions to international radio regulations made at the International Telecommunication Union's 2003 World Radio Conference (WRC-03), which authorized each country to determine whether to require that individuals demonstrate Morse code proficiency in order to qualify for an amateur radio license with transmitting privileges on frequencies below 30 MHz. This change eliminates an unnecessary regulatory burden that may discourage current amateur radio operators from advancing their skills and participating more fully in the benefits of amateur radio.

Today's Order also revises the operating privileges for Technician Class licensees by eliminating a disparity in the operating privileges for the Technician Class and Technician Plus Class licensees. Technician Class licensees are authorized operating privileges on all amateur frequencies above 30 MHz. The Technician Plus Class license, which is an operator license class that existed prior the FCC's simplification of the amateur license structure in 1999 and was grandfathered after that time, authorized operating privileges on all amateur frequencies above 30 MHz, as well as frequency segments in four HF bands (below 30 MHz) after the successful completion of a Morse code examination. With today's elimination of the Morse code exam requirements, the FCC concluded that the disparity between the operating privileges of Technician Class licensees and Technician Plus Class licensees should not be retained. Therefore, the FCC, in today's action, afforded Technician and Technician Plus licensees identical operating privileges.

Finally, today's Order resolved a petition filed by the ARRL for partial reconsideration of an FCC Order released on October 10, 2006 (FCC 06-149). In this Order, the FCC authorized amateur stations to transmit voice communications on additional frequencies in certain amateur service bands, including the 75 meter (m) band, which is authorized only for certain wideband voice and image communications. The ARRL argued that the 75 m band should not have been expanded below 3635 kHz, in order to protect automatically controlled digital stations operating in the 3620-3635 kHz portion of the 80 m band. The FCC concluded that these stations can be protected by providing alternate spectrum in the 3585-3600 kHz frequency segment.

Action by the Commission on December 15, 2006, by Report and Order and Order on Reconsideration. Chairman Martin and Commissioners Copps, Adelstein, Tate, and McDowell.

FCC MODIFIES AMATEUR RADIO SERVICE RULES,
ELIMINATING MORSE CODE EXAM REQUIREMENTS AND
ADDRESSING ARRL PETITION FOR RECONSIDERATION

Washington, D.C. - Today, the Federal
Communications Commission (FCC) adopted a Report
and Order and Order on Reconsideration (Order)
that modifies the rules for the Amateur Radio
Service by revising the examination requirements
for obtaining a General Class or Amateur Extra
Class amateur radio operator license and revising
the operating privileges for Technician Class
licensees. In addition, the Order resolves a
petition filed by the American Radio Relay
League, Inc. (ARRL) for partial reconsideration
of an FCC Order on amateur service rules released on October 10, 2006.

The current amateur service operator license
structure contains three classes of amateur radio
operator licenses: Technician Class, General
Class, and Amateur Extra Class. General Class
and Amateur Extra Class licensees are permitted
to operate in Amateur bands below 30 MHz, while

the introductory Technician Class licensees are only permitted to operate in bands above 30 MHz. Prior to today's action, the FCC, in accordance with international radio regulations, required applicants for General Class and Amateur Extra Class operator licenses to pass a five words-per-minute Morse code examination. Today's Order eliminates that requirement for General and Amateur Extra licensees. This change reflects revisions to international radio regulations made at the International Telecommunication Union's 2003 World Radio Conference (WRC-03), which authorized each country to determine whether to require that individuals demonstrate Morse code proficiency in order to qualify for an amateur radio license with transmitting privileges on frequencies below 30 MHz. This change eliminates an unnecessary regulatory burden that may discourage current amateur radio operators from advancing their skills and participating more fully in the benefits of amateur radio.

Today's Order also revises the operating privileges for Technician Class licensees by eliminating a disparity in the operating privileges for the Technician Class and Technician Plus Class licensees. Technician Class licensees are authorized operating privileges on all amateur frequencies above 30 MHz. The Technician Plus Class license, which is an operator license class that existed prior the FCC's simplification of the amateur license structure in 1999 and was grandfathered after that time, authorized operating privileges on all amateur frequencies above 30 MHz, as well as frequency segments in four HF bands (below 30 MHz) after the successful completion of a Morse code examination. With today's elimination of the Morse code exam requirements, the FCC concluded that the disparity between the operating privileges of Technician Class licensees and Technician Plus Class licensees should not be retained. Therefore, the FCC, in today's action, afforded Technician and Technician Plus licensees identical operating privileges.

Finally, today's Order resolved a petition filed by the ARRL for partial reconsideration of an FCC Order released on October 10, 2006 (FCC 06-149). In this Order, the FCC authorized amateur stations to transmit voice communications

on additional frequencies in certain amateur
service bands, including the 75 meter (m) band,
which is authorized only for certain wideband

that the 75 m band should not have been expanded
below 3635 kHz, in order to protect automatically
controlled digital stations operating in the
3620-3635 kHz portion of the 80 m band. The FCC
concluded that these stations can be protected by
providing alternate spectrum in the 3585-3600 kHz frequency segment.

Report and Order and Order on
Reconsideration. Chairman Martin and
Commissioners Copps, Adelstein, Tate, and McDowell.

FCC MODIFIES AMATEUR RADIO SERVICE RULES,
ELIMINATING MORSE CODE EXAM REQUIREMENTS AND
ADDRESSING ARRL PETITION FOR RECONSIDERATION

Washington, D.C. ? Today, the Federal Communications Commission (FCC) adopted a Report and Order and Order on Reconsideration (Order) that modifies the rules for the Amateur Radio Service by revising the examination requirements for obtaining a General Class or Amateur Extra Class amateur radio operator license and revising the operating privileges for Technician Class licensees. In addition, the Order resolves a petition filed by the American Radio Relay League, Inc. (ARRL) for partial reconsideration of an FCC Order on amateur service rules released on October 10, 2006.

The current amateur service operator license structure contains three classes of amateur radio operator licenses: Technician Class, General Class, and Amateur Extra Class. General Class and Amateur Extra Class licensees are permitted to operate in Amateur bands below 30 MHz, while the introductory Technician Class licensees are only permitted to operate in bands above 30 MHz. Prior to today?s action, the FCC, in accordance with international radio regulations, required applicants for General Class and Amateur Extra Class operator licenses to pass a five words-per-minute Morse code examination.

Today?s Order eliminates that requirement for General and Amateur Extra licensees. This change reflects revisions to international radio regulations made at the International Telecommunication Union?s 2003 World Radio Conference (WRC-03), which authorized each country to determine whether to require that individuals demonstrate Morse code proficiency in order to qualify for an amateur radio license with transmitting privileges on frequencies below 30 MHz. This change eliminates an unnecessary regulatory burden that may discourage current amateur radio operators from advancing their skills and participating more fully in the benefits of amateur radio.

Today?s Order also revises the operating privileges for Technician Class licensees by eliminating a disparity in the operating privileges for the Technician Class and Technician

Plus Class licensees. Technician Class licensees are authorized operating privileges on all amateur frequencies above 30 MHz. The Technician Plus Class license, which is an operator license class that existed prior the FCC?s simplification of the amateur license structure in 1999 and was grandfathered after that time, authorized operating privileges on all amateur frequencies above 30 MHz, as well as frequency segments in four HF bands (below 30 MHz) after the successful completion of a Morse code examination. With today?s elimination of the Morse code exam requirements, the FCC concluded that the disparity between the operating privileges of Technician Class licensees and Technician Plus Class licensees should not be retained. Therefore, the FCC, in today?s action, afforded Technician and
Technician Plus licensees identical operating privileges.

Finally, today?s Order resolved a petition filed by the ARRL for partial reconsideration of an FCC Order released on October 10, 2006 (FCC 06-149). In this Order, the FCC authorized amateur stations to transmit voice communications on additional frequencies in certain amateur service bands, including the 75 meter (m) band, which is authorized only for certain wideband voice and image communications. The ARRL argued that the 75 m band should not have been expanded below 3635 kHz, in order to protect automatically controlled digital stations operating in the 3620-3635 kHz portion of the 80 m band. The FCC concluded that these stations can be protected by providing alternate spectrum in the 3585-3600 kHz frequency segment.

Action by the Commission on December 15, 2006, by Report and Order and Order on Reconsideration. Chairman Martin and Commissioners Copps, Adelstein, Tate, and McDowell.

Well, my concern is that it will allow those people who were on cb the opportunity to get into ham radio now and get more powerful equipment to be the jerks on the hf bands that they were on eleven meters. Not only did I see morse code as a good form of communication, but I kind of saw it as a filter. For those who really wanted to get above technician. It kind of seperated those who wanted it from those who really weren't interested too much in the hobby for more then a neat way to talk to people around town.

There is tons on gnashing of teeth and frets of how this will impact the hobby. I wonder just how the hobby has suffered in those countries that have already taken away the code requirement?

And how will the new hams be any different from the Technicians we enjoy on the radio, already, today? I surely doubt that giving a Technician hf privileges will alter his behavior on the radio irregardless of the band or mode. Idiots are found everywhere and using the code test as a twit filter does little justice to the fine Technician class operators we enjoy and will enjoy. And it is not so effective a tactic.

When you hear an idiot on the radio you have the option of spinning that big dial on the rig. Or you can nudge him with kindness to affect his on the air persona.

We will all continue to make mistakes while learning and growing in a wonderful community. Let's encourage the elmer in everyone.

Subject: [PropNET-Online] PSK Contest this Weekend

Hi Everybody.
It doesn't feel like Xmas here. Its 70 degrees.

If you want to try out your contesting skills, the Michigan DX Assoc.
is putting on its annual PSK Deathmatch this weekend. Information and
the rules can be found at this link:
http://www.mdxa1.org/deathmatch.html

It is a nice event, unfortunately these solar conditions haven't helped
much. The contest covers 80 thru 6 Meters and both PSK31 and PSK63 are
allowed.

If 10 and 6 Meters opens up this weekend you might hear me call CQ a
couple of times.

Interesting stuff you sent around Paul.

As Mark points out, it is a bit dated.
It is also intended as promotional material for winlink, and therefore it is less than level handed in comparison to other techniques.

At the time this was written, AMPR had already extended Internet over amateur radio via TCP/IP.
That development allowed the email to be created on (say: Outlook Express) just as he did for Internet transport.
AMPR also discovered that extending Internet that easy led to a significant abuse by non-hams.
So policies set the techniques aside and opened the door to more restrictive techniques (like: winlink).

Winlink is GOOD stuff - don't get me wrong.
But it is more awkward than (probably) needed so as to keep only hams using it.

If you have interest in email over ham radio, and 6 to 8 hours to read stuff,
then visit http://www.mi-drg.org/ and look at the links to various sites.
Winlink is there, so is a lot of other stuff now in use.

Well, I wasn't saying that those of us who learned cw are better hams then those that are techs, heck, that'sh ow I got into the hobby. I started out as a technician, and upgraded from there. I just hope that the FCC didn't make a mistake and allow some of the wrong people to have more power then they deserve if they decide to take a test and pass it. With that being said, I was discussing this with Mark on the .94 repeater, and he reminded me that it's not necessarily up to the FCC to take care of problems on our bands, we have and will be able to police the bands ourselves, and if there are problems, we have and always will be able to solve them quite well.

FCC MODIFIES AMATEUR RADIO SERVICE RULES,
ELIMINATING MORSE CODE EXAM REQUIREMENTS AND
ADDRESSING ARRL PETITION FOR RECONSIDERATION

Washington, D.C. - Today, the Federal Communications Commission (FCC) adopted a Report and Order and Order on Reconsideration (Order) that modifies the rules for the Amateur Radio

Service by revising the examination requirements for obtaining a General Class or Amateur Extra Class amateur radio operator license and revising the operating privileges for Technician Class licensees. In addition, the Order resolves a petition filed by the American Radio Relay League, Inc. (ARRL) for partial reconsideration of an FCC Order on amateur service rules released on October 10, 2006.

The current amateur service operator license structure contains three classes of amateur radio operator licenses: Technician Class, General Class, and Amateur Extra Class. General Class and Amateur Extra Class licensees are permitted to operate in Amateur bands below 30 MHz, while the introductory Technician Class licensees are only permitted to operate in bands above 30 MHz. Prior to today's action, the FCC, in accordance with international radio regulations, required applicants for General Class and Amateur Extra Class operator licenses to pass a five words-per-minute Morse code examination.

Today's Order eliminates that requirement for General and Amateur Extra licensees. This change reflects revisions to international radio regulations made at the International Telecommunication Union's 2003 World Radio Conference (WRC-03), which authorized each country to determine whether to require that individuals demonstrate Morse code proficiency in order to qualify for an amateur radio license with transmitting privileges on frequencies below 30 MHz. This change eliminates an unnecessary regulatory burden that may discourage current amateur radio operators from advancing their skills and participating more fully in the benefits of amateur radio.

Today's Order also revises the operating privileges for Technician Class licensees by eliminating a disparity in the operating privileges for the Technician Class and Technician Plus Class licensees. Technician Class licensees are authorized operating privileges on all amateur frequencies above 30 MHz. The Technician Plus Class license, which is an operator license class that existed prior the FCC's simplification of the amateur license structure in 1999 and was grandfathered after that time, authorized operating privileges on all amateur frequencies above 30 MHz, as well as frequency segments in four HF bands (below 30 MHz) after the successful completion of a Morse code examination. With today's elimination of the Morse code exam requirements, the FCC concluded that the disparity between the operating privileges of Technician Class licensees and Technician Plus Class licensees should not be retained. Therefore, the FCC, in today's action, afforded Technician and Technician Plus licensees identical operating privileges.

Finally, today's Order resolved a petition filed by the ARRL for partial reconsideration of an FCC Order released on October 10, 2006 (FCC 06-149). In this Order, the FCC authorized amateur stations to transmit voice communications on additional frequencies in certain amateur service bands, including the 75 meter (m) band, which is authorized only for certain wideband voice and image communications. The ARRL argued that the 75 m band should not have been expanded below 3635 kHz, in order to protect automatically controlled digital stations operating in the 3620-3635 kHz portion of the 80 m band. The FCC concluded that these stations can be protected by providing alternate spectrum in the 3585-3600 kHz frequency segment.

Action by the Commission on December 15, 2006, by Report and Order and Order on Reconsideration. Chairman Martin and Commissioners Copps, Adelstein, Tate, and McDowell.

No , No , No , By all means pass on anything you do find . Old info is good stuff . We sometimes forget and that helps us remember . You can never have to much information .
I just used that info you gave to help another person understand this hobby .

Mark

Subject: [WestMichiganHams] Re: FCC Eliminates Morse Code Requirement (SAD SAD DAY)

There is tons on gnashing of teeth and frets of how this will impact
the hobby. I wonder just how the hobby has suffered in those
countries that have already taken away the code requirement?

And how will the new hams be any different from the Technicians we
enjoy on the radio, already, today? I surely doubt that giving a
Technician hf privileges will alter his behavior on the radio
irregardless of the band or mode. Idiots are found everywhere and
using the code test as a twit filter does little justice to the fine
Technician class operators we enjoy and will enjoy. And it is not so
effective a tactic.

When you hear an idiot on the radio you have the option of spinning
that big dial on the rig. Or you can nudge him with kindness to
affect his on the air persona.

We will all continue to make mistakes while learning and growing in a
wonderful community. Let's encourage the elmer in everyone.

Bill, AB8SC

If you think the CW requirement serves to filter out the riffraff, you haven't listened to 75m phone for a while, have you? And many of the perpetrators probably passed a CW test at 13wpm or more.

I don't think anybody who didn't learn to drive on a non-synchromesh stick-shift should be allowed to drive. :-)

Like you, I'm not pulling some kind of "I'm better than you are" card. That makes no sense and is certainly not positive nor progressive. We have been dealt a hand that we'll deal with and use to improve our favorite part of this wonderful hobby.

In another format it was pointed out that the old FCC had tons of hams and technically competent members on their staff and in positions of influence in years past. Today's FCC lacks that talent pool with the ability of measuring their rules against the legacy of our hobby. Folks who know nothing about radio might be more likely to be "politically correct" and try to step on as few toes as possible while hoping they are encouraging everyone. Certainly the hobby is graying. And things must be done.

Whining and complaining about an organization that is stepping into the breach and doing something positive makes no sense. Nobody here has so complained. Maybe you don't like the ARRL and its positions. I support this organization that is stepping up, being heard, and trying to keep the FCC in touch with our radio hobby. Good or bad they influence things. Or at least take a swing at the problems. You should, too.

Did you pass a test for Extra???!!!!! Wow! Congratulations! Wonderful!

Yes I did!

Thanks and pass the thanks along to Linda as well for her post.

Also in my test session was a few people taking their Morse Code tests. Did I just witness the very last Morse Code test to be given in Michigan?

To anyone interested in passing the Extra written, I ordered the study book from Gordon West and read it cover to cover at least a couple times. I noticed that almost all of the questions regarding an impedance triangle used on of less than half dozen triangles. The 3,4,5 right triangle, the Icosolese (sp?) right triangle, the 14/76 and the 53/36 being the most common. I just memorized all the relationships to those few triangles and had the answers to a whole bunch of questions. Then I started taking the tests online. I took over 20 practice tests and only failed two in the very beginnning. After about the fourth try I started passing every time. I used both the QRZ and eHam tests as they seemed to generate slightly different answers. I also used some memory tricks. For instance to remember the types of oscillators used I imagined a police radio and the show 'Chips' which actually stood for CHP or California Highway Patrol. The answer is Colpitts, Hartly and Pierce (CHP).

I got a score of 44 out of 50. There were a few questions on the test I did not recognize from the study guide.

I think the best thing about going for Extra is that I actually learned some neat things about ham radio I did not know. (Just wait until Fox Hunt season) That and now my HF rigs are worth more to me because they can transmit on a whole bunch more of the radio spectrum.

Congrats on the extra. I'm new to this forum, but I've "been' around ham radio for 40 years.

This past Monday night the Holland club finished up its ten week Extra Class Class, and we gave ten extra class exams, and ten passed!

We have posted that we will be giving tech and general classes on Jan 22, and the plan is to continue to give the 5 wpm class.
So if anyone would like to go for the their tech or general, send them to Holland in Jan.
The Holland club is also interested in how much interest there would be for another Extra Class class in the fall of 07.

Great Times for Ham Radio

Tom K8TB

Well as in the past Ham radio has been very self policing. So if all the good hams let the very few bad ham screw it up, we might have to take a little blame ourselves. many of the CBers that I have talked to don't even want to take the tech test let alone morse or anything else. There is not much to stop someone from buying a rig at a swap and creating a lot of hate and discontent. I don't think we are going to see amateur radio take a dive due to no code. I do think you will see a lot more people upgrading which should create move amateur radio activity and may even hel drive down some equipment cost.

That my thought for the day.

Mark:

Did you pass a test for Extra???!!!!! Wow! Congratulations! Wonderful!

Yes I did!

Thanks and pass the thanks along to Linda as well for her post.

Also in my test session was a few people taking their Morse Code tests. Did I just witness the very last Morse Code test to be given in Michigan?

To anyone interested in passing the Extra written, I ordered the study book from Gordon West and read it cover to cover at least a couple times. I noticed that almost all of the questions regarding an impedance triangle used on of less than half dozen triangles. The 3,4,5 right triangle, the Icosolese (sp?) right triangle, the 14/76 and the 53/36 being the most common. I just memorized all the relationships to those few triangles and had the answers to a whole bunch of questions. Then I started taking the tests online. I took over 20 practice tests and only failed two in the very beginnning. After about the fourth try I started passing every time. I used both the QRZ and eHam tests as they seemed to generate slightly different answers. I also used some memory tricks. For instance to remember the types of oscillators used I imagined a police radio and the show 'Chips' which actually stood for CHP or California Highway Patrol. The answer is Colpitts, Hartly and Pierce (CHP).

I got a score of 44 out of 50. There were a few questions on the test I did not recognize from the study guide.

I think the best thing about going for Extra is that I actually learned some neat things about ham radio I did not know. (Just wait until Fox Hunt season) That and now my HF rigs are worth more to me because they can transmit on a whole bunch more of the radio spectrum.

73,

Mark K8MHZ

2060. General class book

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-17 13:42:52 UTC
From: jason mackay
Topic: 2060 Message: 2060

Good day all,
I guess I don't need my Morse code Cd's any more!!
Now I am looking for a general class book. If anyone has one they would like to sell please let me know. I'm sure that there will be others who will want to upgrade.
I don't have any hf gear but I want to be able to use the radio at central dispatch if we are activated for some reason.
Thanks Jason Mac Kay KC8OVS

Note that the net is being held on the MAARC repeater and not the usual repeater you may be more used to using on Sunday evenings.

The net starts at 7:30 pm local time with check-in with the net control. You do not need to be or even have been a "regular" on the two meter net to check-in and participate. We are encouraging all local hams to take a moment and participate.

While this will be an emotionally difficult net for all of us your support and participation will make this net memorable and meaningful. I, selfishly, will need the assistance from all our friends for this evening's net. Please lend me a hand and we'll get through this together.

I got this from an e-mail from a friend in South Africa . This is what he had to say about "cw".

His call is ZS6BUU

Big Mark

Read all about it earlier this week. Down here its very hot but fortunately we do not have the brush fires the poor guys in Australia are having! CW is also no longer required in South Africa, but obtaining a ZS is not that easy. There are 5 routes you can take to obtain that privaledge - from building a workable Receiver/transmitter to producting 100 QSL cards indicating you have spent some time on phone and "behaved" yourself and can show you are fully conversant with good radio procedures. I personally still feel that a certain percentage of all HAMNET members MUST be able to communicate in CW. It is still a very "fail safe" way of communicating when conditions are poor.

---

k8mhz@... wrote:
As the RAC has found out, there are still some countries that require a Morse qualification in order for hams to operate there. The RAC found that their new license class, Basic Plus, a codeless class that allows HF privileges, can now work HF in the US, but not in some other countries.

Now that the Element 1 requirement has been dropped, will it still be offered in order to satisfy the needs of US hams that may want to work HF in countries that require a Morse qualification for such operation?

I do not have a list of those countries. This is just a question that came to mind when I read about the Basic Plus class' initial problems with operating here in the US, now resolved, and the realization that the Basic Plus class could not operate HF in certain ITU countries.

If anyone knows if Element 1 will still be tested for as an option I think that would be good info to post here.

Thanks and 73,

It would be nice if the code test were still offered for those that would like to take the challange. Even if only a certifacate of completion. For me passing the code test took some effort, but I am glad it is one that I completed. It is a little more about this hobby that I know and there is so much more to learn. If for some reason I could not speak but could move my fingers I could still communicate.

The poll I posted concerning a daytime VHF traffic net closes tomorrow. For those that say they are interested in a daytime traffic net can you please email me with the following information: 1. What times work the best for you 2. Which repeaters can you work from where you expect to be operating from. 3. Are you interested in being a Net Control Station. and finally how many times a week would you like the daytime VFH traffic netto meet.

John, WB8RCR, the Section Traffic Manager is very happy to hear of the interest in a daytime VHF traffic net. He would like to see more VHF traffic nets and at other times of the day besides the evening. Thank you for your interest in promoting NTS and a daytime VHF traffic net.

Doc, KD8BGQ

From http://www.arrl.org/w1aw.html

W1AW Local UTC
Date Time Day Time Date Notes
December 8 10 pm Fri 0300z December 9
December 19 9 am Tue 1400z December 19 40-10 WPM

W1AW does code practice several time a day, almost daily. The next code proficiency test is tomorrow at 9 am EST. They start at 40 WPM and go down to 10 WPM, I think they're in 5 WPM increments. I believe other times the speed goes in 5 wpm increments from 10 WPM to 35 WPM.

Frequencies are 1.8175, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz. Depending on how the sunspots are doing, 7.0475 or 14.0475 would probably be the best for reception here in Western Michigan tomorrow morning.

The cost for the first certificate is $10, and each additional endorsement is $7.50.

2075. Monthly Michigan Section News Summary

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-19 00:21:08 UTC
From: Tom VanderMel
Topic: 37 Message: 2075

You have doubtlessly heard that the FCC has released the R&O eliminating Morse code as a requirement for obtaining a General Class or Amateur Extra Class license. The debate is now ended and we must take advantage of this opportunity to advise those who found code to be an impenetrable obstacle to becoming a ham, that they now have no excuse! We can also rest confident that these new hams will find that the skills of CW operating will continue to bind radio amateurs together, not only through tradition, but as a valuable communications asset.

As SM, I have the opportunity to visit many clubs and hamfests in the Great Lakes State. Very often I find myself in a discussion about the state of this hobby and growth within our ranks. In those areas where I see high levels of activity, I find one or two constants: 1) A Sparkplug -- an individual who has the ability to organize and follow through with results, and 2) Mentoring by a team of people who are attached at the hip with new licensees and assist them is becoming familiar with every aspect of the hobby. It is true that there are several other factors that can came into play, but these two were the most frequent items that had a significant impact in insuring an active group in any given area. Most of us have seen many clubs wax and wane in energy over the years and no one is going to guarantee that the mentors and sparkplugs will be in place in every club forever. Therefore it becomes important to us all that we strive to mentor every new ham into the hobby and work together to support the "sparkplugs" in our organizations. By doing this, we mentor one another, share the burdens of leadership and reduce the tendency to have our leaders burn out. This message is not just to encourage support for a few leaders, this targets support for everyone.

In the following paragraph I have the pleasure of reporting a good number of newly elected club officers. I consider it very important to honor those who accept positions of leadership in all of our organizations. These are the folks who have a very distinct impact upon amateur radio and how we are perceived by prospective hams. They deserve our very direct support and assistance. Radio clubs are in the critical position of being an entry point for most new licensees and as such, the newcomer's perception of ham operators comes from what they see in us club members. Are we as friendly as we can be? Are we greeting every individual who attends the club's

meetings?
Are we offering to assist newcomers with their questions? Are we giving hands-on experience to the newcomers? If you cannot answer yes to all of these, I suggest that you join me in thinking about what we are going to do better at the next meeting. That is you and ME, because I could not answer yes to all four questions.

New officers took the helm in several Michigan clubs within the past month.
For the Clinton County ARA the following officers were elected: Pres KC8LRM,
VP N8TSK, Sec/Treas KB8QZX, and Directors WD8OVL, KC8BFK, WA8RZJ and N8SUA.
In the Lowell ARC these officers were elected: Pres WW8WW, VP KC8EGM, Treas KC8YTC Sec AA8JR, Tech Advisor N8UVI and PIO NY8D. Oakland County ARS elected these officers: Pres KC8IJF, Sec KB8POD and Treas K8ZZU. The Michigan Amateur Radio Alliance elected these officers: Pres K8JX, VP KB8VOZ,
Sec WD8LGN, and Treas W8MSK. We should also express our thanks to those whose
terms are closing. Their tireless efforts are appreciated.

Station Activity Reports for November, 2006: N8FPN 269, KC8WSE 212, K8CQF 200, KC8MLD 153, K8LJG 149, K8AE 110, K8AMR 68, AB8WF 50, KD8BGQ 49, W8RNQ 44, N8XX 42, WB8RCR 39, WD8USA 33, K8YB 26, KC8BYI 24, KC8YVF 17, K8ZJU 14, WA8OOH 10, KC8BDQ 8, N8UN 5, AB8CB 4, KD8BMV 2, KC8ZGB 2, WD8RIK 2.

Public Service Honor Roll reports for November, 2006: KD8BGQ 155, N8FPN 110,
WB8RCR 109, K8AE 105, K8CQF 93, K8AMR 90, K8ZJU 77, KC8BDQ 53, KC8YVF 52, KC8BYI 49, WD8RIK 22.

November Official Emergency Station reports came in from K8COP, KC8ULE, and
N8HA. PSHRs and SARs should be filed monthly with WB8RCR and your OES reports with WA8EFK.

And from Judy and me, the very best wishes for this season.

Kellogg's & FCC Sign Pact

Washington D.C.-
It was announced today that Kellogg's and the Federal Communications Commission have signed a pact to issue Amateur Radio Licenses on specially marked boxes of Corn Flakes. In this unprecedented move the FCC believes this will not hurt amateur radio but allow all individuals to receive an amateur radio license without having to demonstrate any skills with the exception of being able to use a pair of scissors to cut out their operating permit from the breakfast cereal box.

Kellogg's spokesperson commented that they were proud to have been selected by the government to be the issuer of licenses for amateur radio in the US and hope to soon make an agreement with other cereal loving countries. They also expect that will be issuing certificates of achievement for DXCF for confirmed contacts with 100 corn flakers.

From: Bill
Topic: 2079 Message: 2079

All:

It is quite likely that we will be holding Technician Classes in the coming month. There are reports of significant interest in amateur radio. And the FCC has changed the rules, or will change the rules, which will certainly impact the path a fellow follows to his license.

From the Michigan Section news (with thanks to Tom, KB8VEE) a sentence caught my eye, "Mentoring by a team of people who are attached at the hip with new licensees and assist them is becoming familiar with every aspect of the hobby."

We can all find a way to interact and help train the hams of next year by stepping up and volunteering. We will make a huge difference in our friend's enjoyment of our hobby.

Keep your ears open as the opportunity will surely present. And if you know of a person or two with interest, the classes are free, the book is cheap, and, as you well know, the opportunities rewarding in our hobby.

Bill, AB8SC

Should an Amateur Radio License become such a cheap ticket then we only have ourselves to blame. We have the responsibility to encourage friends in this hobby we all enjoy. We also have the responsibility to enlist new hams so we can more enjoy the simple act of conversing on the radio.

Should we relinquish this responsibility we only have ourselves to blame for the ensuing demise. I'm a glass half full guy who knows that people can be encouraged to join, learn, and improve their radio behavior. And I value my license from the FCC that welcomes and encourages me in the fraternity of ham radio operators. Many great friends and too many wonderful opportunities.

Bill, AB8SC

HAM RADIO CLASS COMING

Again the Holland Amateur radio club offers to the community a licensing class. It is designed for those who are new to the hobby and for those who want to up-grade their license to General. With a Technician license you can talk to others across the country and around the world (free), build electrical devices and antennas, as well as serve the community with communication skills.

WHEN: Beginning January 22 for nine Mondays.

WHERE: HOLLAND AMATEUR RADIO CLUB Technology and Training Center 280 E. 8th Street Holland

TIME: 7:00 until 9:15 p.m.

No matter how easy getting a license gets, we are still a self-policing service. If we get a bunch of folks on the bands violating the rules, it will be easier to track them if they have a license and use a callsign than if they just get on the band and start transmitting.

I am sure anyone who takes the time to get tested will respect the rules to some extent. How many truly bad operators do we hear on VHF? I mean truly bad, not a guy who occasionally slips up and says "10-4."

It is very difficult to explain to a non-ham why I had to learn Morse Code. Now take that same person and explain why THEY have to learn it to TALK on a radio. Maybe it's so they can tell what unused repeater they are listening to when the only thing coming over the air is the CW identifier.

Subject: [WestMichiganHams] Re: Kellogg's & FCC Sign Pact

Should an Amateur Radio License become such a cheap ticket then we only have ourselves to blame. We have the responsibility to encourage friends in this hobby we all enjoy. We also have the responsibility to enlist new hams so we can more enjoy the simple act of conversing on the radio.

Should we relinquish this responsibility we only have ourselves to blame for the ensuing demise. I'm a glass half full guy who knows that people can be encouraged to join, learn, and improve their radio behavior. And I value my license from the FCC that welcomes and encourages me in the fraternity of ham radio operators. Many great friends and too many wonderful opportunities.

2092. The FCC Report and Order

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-19 22:34:30 UTC
From: K8TB
Topic: 2087 Message: 2092

The FCC report and order regarding the dropping of the International Morse Code as a licensing requirement can be read at:

http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-178A1.txt

or the PDF is at:

http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-178A1.pdf

41 pages, I've read just a bit of it. Good reading.

In the last few days, I have received two phone calls and four emails from broadcast engineers from around the US. They asked for clarification and acknowledgment of what the FCC did. All six are now planning to get their licenses.

CW is great. A great art form. And I just used it Thursday night on 6 meter aurora contacts.

But there are another 143 facets to this diamond of a hobby.

These six men will be a great addition to our hobby.

Read and enjoy

Jim and All:

Winter Field Day? Good Question.

We have secured the permission of the MAARC to enjoy their clubhouse for this event. We will be allowed to park our shacks there, use the antenna assets, hook into a generous generator power supply, and enjoy the inside plumbing, kitchen, and radio shack.

There is talk of a mini swap and ham gear auction and breakfast. The event, FD, starts at noon on Saturday, Jan 13 and runs for twenty-four hours.

Specifics are still to be resolved so you are encouraged to keep your ears open.

Don't hesitate to ask any questions of Tom, W8AMZ or myself.

2097. General Book?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-19 23:38:06 UTC
From: Bill
Topic: 2097 Message: 2097

I have been asked to try to scare up a copy of a good book to be used to study for the General test. I must have loaned my copy and I'm not asking for its return. However, if you have an idea of where to look for a copy I'll be all ears. The library? Your library? Under my mattress? At a ham swap? You have an extra copy?

I sure hope that these things get as scarce as hen's teeth because folks are upgrading. You might remember that a General test success is good for a year toward the upgrade, or instantaneously when the FCC removes the code impediment.

Help?

2100. The FCC Report and Order, best guess effective date

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-19 23:34:01 UTC
From: K8TB
Topic: 2087 Message: 2100

I just got a private email asking when the effective date is.

The report itself was adopted December 15, and released December 19 (today, Tuesday). It becomes effective, or law, 30 days after it is printed up in the Federal Register. The last FCC R & O that effected us hams was the Omnibus Order, which had an adopted date of October 4, and a release date of October 10. Since it made it into the Federal Register on November 15, and then became effective December 15, it looks like there is a five week delay in getting into the Federal Register.

However, we have the holidays upon us, so it might be hard to guess this one. My stab will be that it gets printed right around Feb 1, which would make the effective date March 1. This is my guess, and it has a probability factor of +/- 3 Db.

From: Bill
Topic: 2102 Message: 2102

In an earlier post I suggested that if you pass your Element 3 for upgrade to General that you would instantaneously be granted your license when the FCC takes away the code test, Element One.

THIS IS WRONG information! From a FAQ on the ARRL web site, I quote the following:

Q. I have a Certificate for Successful Completion of Examination (CSCE) for Element 3 (General written test) and have been waiting for the FCC to drop the Morse code requirement. What will I need to do? Will I automatically receive my General license?

A. It will not happen automatically. You also will need to wait until the new rules are in effect. CSCEs remain valid for 365 days. There's been no change in that rule. If you have a non-expired CSCE for Element 3 credit, you would need to go to take the CSCE to a VE test session, pay the test session fee, if any, and have the examination team prepare and submit the paperwork for your license upgrade.

If the CSCE for Element 3 credit has expired or expires before you attend a test session to process your upgrade, you will have to retake the examination element in order to receive the credit toward your upgrade. The test session fee will apply.

Remember: A CSCE is only valid for 365 days. An expired CSCE for the General license theory will not be usable for an upgrade. If your CSCE expires before the new rules go into effect you will have to re-take the Element 3 General class theory exam in order to upgrade.

The ARRL is saying you should wait to take the Element 3 test until after the FCC takes away the code test. Then you can take and pass the test for a single test session fee of $14. I suggest you start studying now and be ready in February for the code to go away when you can take and pass the test and get your new privileges.

I am VERY SORRY for passing around bum dope. My HUGE apologies.

Hi everyone.
Mark, K8MHZ, is planning on starting a Tech Class in February. I have a list of 14 potential students at this time. Once Mark has the dates (most likely Wednesdays),time and location confirmed he will let me know. At that time I will begin the phone calling. If you have names of interested folks send them to me and I will add them to my list. I also read the post from Joe about the class in Holland on Monday evenings. So, the opportunities are there.

Mark is planning on using the Gordon West book and the W5YI VEC team. Book is around $15 and the class itself is FREE. Testing will hopefully be done on the last night of class and that will be the standard $14 test fee.

From: Deater, Tim
Topic: 2107 Message: 2107

Good morning everyone.

Has anyone ever tried to make a 12 volt battery for an Icom IC-W32A radio? The largest that Icom ever offered from what I can find is 9.6V. My 9.6V battery has around 30mAh of life left in it. (Yes, 30) So, I thought it would make a nice donor case to build a new pack.

My concern is if the radio can handle 12V at the battery connector. I know it will at the power connector. I did hook it up to a power supply at 12V and it powered on fine.

Any input? Any opinions?

I hope everyone has a great holiday!

Thanks for the manufacturer Tom. I did read trough the manual and did find the specs in the back. Looks like a 12V battery will be fine. I ordered some 2700mAh cells from Overstock.com. $9.95 for a 4 pack. We'll see how well they work for that price.

It may not be pretty when it is done, but should work well..... I hope. If it turns out well I will post it on my website.

Hi Tim,

In the manual somewhere, usually the back, there is a specification for the voltage range. Typical is 6 - 16 volts.

If you don't have a manual let me know, I will download one and post a link for it. I think you would be OK but it is best to check the manual first.

Do you mean DC-Ace? I bought from them new NiCd "innards" for my ancient IC-2A, also a set of D-size NiMH cells. So far all are fine.

For our three TH-F6A HTs, however, I bought battery packs from W&W Manufacturing, but their fast-charger works only with their own packs, which have contacts on the bottom that the standard battery does not have. I also bought a charger from Batteries America (?? No name on it) that will fast-charge the stock battery pack: the battery fits in it upside down.

At one of the recent ham fest I went to a vendor was selling cordless phone battery packs, which had 4 AA batteries in each for $ 1.50. I bought 3 packs and with a little effort replace the batteries in my icom battery pack that were dead. I wish I would have bought a few more. I am pretty sure you will be able to find them at Marshall if your not in a hurry.

My tower is here, but my plan to use a tow truck to move it into position around the back of the house failed when the truck's wheels started sinking into the lawn. So I have a tower weighing approx. 1100lbs sitting alongside my driveway in Holland Township (down the street from Dave Lamer and "Fuzzy").

It would be very much appreciated if I could get anything up to 20 people to help move this thing into place on Saturday morning. It's a lattice tower, so I can put several 2x4s or 2x6s through it with a few people on each side at each point.

I was thinking of 10am Saturday, but if some other time suits enough people, we could do it earlier or later.

Coffee, tea, soda and cinnamon rolls (and maybe other edibles too) will be provided. (It'll be too early in the day for pizza and Foster's.)

Please let me know here, or on the repeater, or by email, or at 748-1228.

I got 2600MAh AA's for 9.95 for a 4 pack at Overstock.com. I'll post how well they work when they come in.

At one of the recent ham fest I went to a vendor was selling cordless phone battery packs, which had 4 AA batteries in each for $ 1.50. I bought 3 packs and with a little effort replace the batteries in my icom battery pack that were dead. I wish I would have bought a few more. I am pretty sure you will be able to find them at Marshall if your not in a hurry.

Do you mean DC-Ace? I bought from them new NiCd "innards" for my ancient IC-2A, also a set of D-size NiMH cells. So far all are fine.

For our three TH-F6A HTs, however, I bought battery packs from W&W Manufacturing, but their fast-charger works only with their own packs, which have contacts on the bottom that the standard battery does not have. I also bought a charger from Batteries America (?? No name on it) that will fast-charge the stock battery pack: the battery fits in it upside down.

2120. Santa on 20m phone

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-12-23 02:11:46 UTC
From: K8TB
Topic: 2120 Message: 2120

For those of you who have young(er) children, or even better yet, grandchildren, there is a guy on 20 meters, with the call WO6T, who is running a special event station under the call of W6S. He is Santa on the air. You can email him ahead of time, by going to the website, www.wo6t.com, and clicking on the webcam page, and then looking for the little elf to send an email.

My wife, K8AJ, had two of the grandchildren over this afternoon, and had "emailed" Santa with specific information ahead of time. The older one is 6, and she was absolutely stunned when Santa was telling her about her loose tooth, and all the stuff going on in her life. He does a great job.

I wish I had known about this earlier, but you still have Saturday and Sunday to mix the magic of Santa with the magic of ham radio. The six year old was still babbling about the contact hours later.

W6S, when he is on, is around 14.270 +/-, and his signal is "routed" via Bakersfield, CA.

Enjoy the season,

Tom Bosscher K8TB

2121. Re: [WestMichiganHams] 12 volt battery monitor

Yahoo group: WestMichiganHams (2006 — 2008)

From: Jim KC8PCJ
Topic: 1968 Message: 2121

I found another circuit that uses the LM3914 and then added a digital display from 1 to 9 to show battery percentage. It also has a circuit that will sound a buzzer when the indicator reaches a certian point.The led indicator is pretty simple adding the digital is going to be a little more work. Maybe a Saturday project at the club house to build some of the led indicators would be fun.
Any one interested???

All
Was anybody aware of this new Law? Tom KB8VEE

Subject: FW: SIGN CAR REGISTRATION OR PAY $125

Make sure your car registration has been signed on the back to avoid paying a $125 fine if you're ever pulled over for anything. New legislation in Michigan.

At the Secretary of State's office, the customer service representative told me to please be sure that the registered owner of the vehicle signed the registration. She explained that if you are pulled over and the back of your registration is not signed (even though it is valid), you will be fined $125.00.

I was so stunned " I had to clarify: So, if I get pulled over, and even though my tags are valid, and the registration is in my possession BUT it is not signed by the registered owner, I will be given a ticket for $125.00?? She answered YES! Apparently, this is Michigan state legislature that has recently been put into effect. Pass it on Please

Wow , what a stupid law . So now if someone breaks into my car they not only get what I may have in there but also my signature .

Great opportunity for identity theft .

Thanks for the heads-up Tom .

Big Mark

Subject: FW: SIGN CAR REGISTRATION OR PAY $125

Make sure your car registration has been signed on the back to avoid
paying a $125 fine if you're ever pulled over for anything. New
legislation in Michigan.

At the Secretary of State's office, the customer service representative
told me to please be sure that the registered owner of the vehicle
signed the registration. She explained that if you are pulled over and
the back of your registration is not signed (even though it is valid),
you will be fined $125.00.

I was so stunned " I had to clarify: So, if I get pulled over, and
even though my tags are valid, and the registration is in my possession
BUT it is not signed by the registered owner, I will be given a ticket for
$125.00?? She answered YES! Apparently, this is Michigan state
legislature that has recently been put into effect. Pass it on Please

I don't think that's a recent law. It's always been on the back of the registration "NOT VALID UNLESS SIGNED." If you are carrying an "Invalid" registration, then you can be fined.

Yes, a stupid technicality, but I think it's always been there. Maybe the officers have only recently been told to start enforcing it (or the law's been changed slightly?).

I think you can also be cited for having no windshield washer fluid, bad wipers, ANY lights inoperative, and (get this one) NOT WEARING A SEATBELT. ;)

From: Hank Greeb
Topic: 2140 Message: 2140

The New York Times has an article about "Morse Code: A Fading Signal" -
concerning the use of code in the ham bands (and elsewhere).

Very interesting reading.

The full URL for the article is 102 characters long:

http://www.nytimes.com/2006/12/27/business/27morse.html?ex=1167886800&en=b53d88e01be66bb6&
ei=5070&emc=eta1

this will probably get chopped up, and will need pasting together, so I
asked tinyurl.com to make a shorter link:

http://tinyurl.com/wh5ex

It's interesting to read the various viewpoints expressed about Code,
CW, and Ham Radio.

Hope ya'll enjoy it.

OK, I just have to jump in here about CW. Before vacuum tubes and after spark, there was another method of generating CW. A rotary, high frequency generator was used to produce the RF carrier that could be interrupted for CW.
I also remember reading about the first voice transmissions being with a modulated carbon arc device, but don't have the details on that.
W8IQE

>
> Funneh...
>
> We were NEVER required to demonstrate proficiency of CW. At least not in my lifetime.
>
> We were only required to demonstrate our proficiency of Morse Code. Morse Code is not a mode, it is a code. CW is the mode Morse is usually sent with but I have sent it with FM as well. Novices and Techs can only transmit CW using International Morse Code. (97.307(f)(9)).
>
> All the discussion about having one mode being superior to another, or even perceived to be, is a moot point. We were tested on Code, not on mode.
>
> Actually, how many of us have ever even heard a CW transmission during a licensing test? I never have, the Code test was on a tape.
>
> The story about Fessenden taught me a little about CW. Besides being interested in voice, he was also interested in CW. The problem was that CW was not possible until the invention of the vacuum tube. Perfect sine waves of a single radio frequency were not possible using the spark generators, even at 50Kc which was sufficient to send a recognizable human voice. How many of us know that phone came before CW? The mode used to send Morse Code at the turn of that century was DW or damped wave. The spark generator pretty much polluted the entire radio spectrum and was modulated by damping, or reducing it at coded intervals. The airwaves must have been full of QRM!
>
> CW made possible many more simultaneous transmissions on the bands due to its greatly reduced bandwidth. Spark (DW) was so bad of a technology for communication that CW almost instantaneously killed it. Very shortly after CW was introduced it became illegal to transmit DW on the air. The vacuum tube made it possible to create

high frequency radio waves of purity and became a death knell for
Ole' King Spark.
>
> Morse Code survived the death of it's first king and will probably
outlive CW, the king's assassin, as well. Morse will become the
Latin of those supremely interested in radio communication and it's
ability to harness CW to talk the farthest with the least amount of
equipment will not be affected in the least bit by the new FCC ruling.

Subject: [ham-radio-deluxe] IHS needs a ham radio operator for Honduras
mission
Reply-To: ham-radio-deluxe@yahoogroups.com
X-Yahoo-Newman-Property: groups-email-ff
Content-Type: multipart/alternative;
boundary="sC1j9sH4JwO64WtGeV0XoCcSMXZOmZuuk4b7CWZ"

We need your help!

I sent out a similar notice several months ago and we had 5 new hams sign up to go on our Honduras medical mission. We also have 6 veteran hams returning for the trip. We were all set to go but we now have a radio guy with a serious medical situation and he can not go. He was assigned as a radio operator for a medical/dental team. We need to get a replacement for him very soon. We also need an Engineer for a mountain team and a Spanish translator. If this does not work for you, please consider passing this notice on to fellow hams or to your radio club.

For details on this critical radio position, call me right away or reply directly to my home e-mail address (listed below). It is not difficult work for any ham who has done some HF work in the past. However, the support it will provide is vital as we plan to have patient referrals from that location to a nearby hospital. We will have the use of a small plane to do that. That village has no telephones or commercial electricity so IHS will provide generators and support equipment.

If this looks like something you can do, call me at the number at the bottom of this notice. (I can also get an updated application to you to cover the formalities)

Mission info: Right now IHS (International Health Services) is going on a 2 week medical mission trip to some very poor locations in Honduras. It is a large undertaking with 11 teams planned to go at the same time for the 16 Feb to 4 March, 2007 trip. It will have 6 medical

and dental clinic teams plus 2 eye glasses teams, 2 surgical teams and a logistic support site planned. This means about 100 people will go counting all the support and worker people who go also (many spouses and friends go in this way). We have done this for 25 years so we have all the logistics planned out. We have already gathered a LOT of supplies, gear, and meds for a container shipment that will leave in a couple weeks. We are a totally volunteer group but IHS does help cover nearly all of the expenses during the mission.

The radio operator duties will vary some depending on the team they are giving radio support to. In all locations we will have HF voice capability with a check in net 2 or 3 times a day. A few of the 11 locations will also have 2 meter ops with a couple using a repeater. Also, several of the locations may have e-mail capability through the HF Winlink system and IHS has the equipment to do that where needed. So, whatever your skill level, we can use you to do radio work and to be a support person to help do other tasks. We will have a training/orientation session before the trip for those who want to brush up their skills on any of the above modes. We like to go well prepared. We (IHS) also have some gear to help out in items that you may be lacking. Some items are in a storage location in Honduras where we keep a lot of items such as antennas, coax, tuners, generators, power supplies, tools, etc. We even operate our own repeater in Puerto Lempira (near a hospital).

Our purpose is to go to the poor remote locations of Honduras where there are no medical or dental services for the local people. It would be a sad thing if a team did not go to a very needy village simply because we lacked a radio person to complete a team.

FYI, our typical clinic team will have one or two docs, an RN and one other nurse or EMT, a pharmacist, a dentist (usually), one or two Spanish translators, an engineer, a radio operator, and several helpers. It is a well rounded team and this also helps when a spouse or friend wants to be on the same team (note our application has a place to note your desire to be on a team with some one else). A parent can take a MATURE son or daughter also if they are able to be a productive member of the team.

Also, there are several other IHS Directors who can answer more technical questions about the medical side of things, etc. This is important for those who want to go with a spouse or friend and they have other skills to offer. So let me know if you have questions in that regard, as well. Our radio guys have a Yahoo site at: www.group.Yahoo.com/group/IHSradio/ We are using it a lot to keep all the hams informed and to prepare those who want to brush up on some comm skills. We also post many ☐planning☐ files there. There also is an IHS web site with GENERAL info at: www.IHSOFMN.org

Call me any time or write back. A call is best so I can fill you in on basic expenses, everything IHS provides, and the work conditions we encounter. I am around the phone most of the time but if I am away on an errand, call later or leave your number and a time I can get back to you.

I and the needy of Honduras thank you for your interest in this very rewarding work!

Best regards,

John Kirckof
KB0UUP
JMKKEK@...
Phone: 320-634-4386
IHS Comm Co-Director

PS We also are in need of one Spanish translator and a Team Engineer (simple support work). If you can help us find one or two, I will buy you a Grape Uba when we get to LaCeiba !

CW and use of Morse Code on the ham bands has been "almost synonymous" since at least 1935, when my father first got his license. He got on CW because he couldn't afford a phone rig, even though he never was very proficient at Morse Code.

The major thrust of the New York Times article was that Morse Code proficiency was dropped as a requirement for an amateur radio license. Some of the hams who were interviewed used "CW" and "Morse Code" interchangeably, but the major thrust of the article remained.

As for spark dying almost instantaneously, my father became interested in ham radio in the late 20's by listening to the spark gap transmissions of his school's amateur radio club - which, while generating RF, also generated loud audio which permeated the quadrangle upon which his dorm sat. He'd mimic the code with his trumpet, and drifted over to the ham shack to find out more about what was going on. He got "hooked" in that manner. CW was available when the triode tube was developed, in the late 1910's or early 1920's, so "instantaneously" is a bit of a stretch.

I sent and received Morse Code on VHF AM, on 145.35 MHz during the 60's - in fact my first 2 metre converter was tuned up by listening to the club station sending code practice on that frequency. (Yes, Matilda, hams used much/most of 2 metres for AM in those daze.) I sent and received Morse Code on VHF FM, on 53.05 MHz and on various 144-148 MHz frequencies, and possibly on 220-225 MHz FM, though I don't recall using that band for Morse Code.

The CW generated for Morse Code testing, is initially an electrical (electromagnetic, if any energy escapes) continuous wave, of 500-1000 Hz, generated by some sort of machine. It is converted to a sound wave via headphones or speaker. But, if up converted to a higher frequency, say 3563 KHz, would be identical to that generated by the rig in my ham shack.

But, of course, very few hear an Electromagnetic Continuous Wave because 99.9999944% of us hear via sound waves through air, which are almost completely different from electromagnetic continuous waves. One "might" say that if one has a congenital defect and cannot hear through the ear drum, but instead uses a special implant to directly connect from the air to the nerve endings inside the scull, then one "hears" the electric or electromagnetic waves.

All of this splitteth hairs. The article started out with the absolutely true fact - "the government will no longer require Morse Code proficiency as a condition for an amateur license."

BTW, I had a friend who taught me the land line (continental) Morse Code, which I occasionally use for conversing with olde tyme telegraphers. The last time I checked, it was legal, except that once every 10 minutes or less, one needed to identify using international Morse.

Funneh...

We were NEVER required to demonstrate proficiency of CW. At least not in my lifetime.

We were only required to demonstrate our proficiency of Morse Code. Morse Code is not a mode, it is a code. CW is the mode Morse is usually sent with but I have sent it with FM as well. Novices and Techs can only transmit CW using International Morse Code. (97.307(f)(9)).

All the discussion about having one mode being superior to another, or even perceived to be, is a moot point. We were tested on Code, not on mode.

Actually, how many of us have ever even heard a CW transmission during a licensing test? I never have, the Code test was on a tape.

The story about Fessenden taught me a little about CW. Besides being interested in voice, he was also interested in CW. The problem was that CW was not possible until the invention of the vacuum tube. Perfect sine waves of a single radio frequency were not possible using the spark generators, even at 50Kc which was sufficient to send a recognizable human voice. How many of us know that phone came before CW? The mode used to send Morse Code at the turn of that century was DW or damped wave. The spark generator pretty much polluted the entire radio spectrum and was modulated by damping, or reducing it at coded intervals. The airwaves must have been full of QRM!

CW made possible many more simultaneous transmissions on the bands due to its greatly reduced bandwidth. Spark (DW) was so bad of a technology for communication that CW almost instantaneously killed it. Very shortly after CW was introduced it became illegal to transmit DW on the air. The vacuum tube made it possible to create high frequency radio waves of purity and became a death knell for Ole' King Spark.

Morse Code survived the death of it's first king and will probably outlive CW, the king's assassin, as well. Morse will become the Latin of those supremely interested in radio communication and it's ability to harness CW to talk the farthest with the least amount of equipment will not be affected in the least bit by the new FCC ruling.

All:

I'd have to believe that this would be a pretty good project for hams in our area. We could do this "seminar" or project as a group using the MAARC clubhouse. We would need a host or someone to take charge of the event. We'll take names and find the interest, purchase the individual parts, and solder the kit together on a Saturday afternoon. March? April? Earlier?

Anyone willing to adopt this project? I'll see that the council's board approves and encourages.

Bill, AB8SC

Where's the circuit? I might be interested in one to keep the battery in my tractor up to snuff. I use it rarely in the winter unless there's sn*w, and sometimes have to "kick start" it with a battery charger. The supposed fast/trickle charger I have uses variable pulses to keep the battery topped off, but the "pulses" will boil the water from the electrolyte and, if I don't catch it in time, destroy the battery by exposing the plates to the air.

A circuit with a voltage/current regulator and a display to indicate the "health" would be of interest.

All
For all of you that have not heard I am now working again. I started this month as General Manager of Tool Max Industrial Supply a new retail store on Schamber Dr just off Pontaluna Rd and US-31. We are a tool and suppliers of lots of things looking to add new items.
I have been talking to our owner Greg about adding some HAM Radio items to our store. I am asking for help on what kind of items you would want to see in a local store to be used for our Hobby? I am thinking things like cable, antennas, connectors, maybe some radios. What would you want? Let me know or stop in and see me.

Thanks Tom KB8VEE

RF connectors, coax,adapters, Power connectors, Gel Cell batteries and chargers, Antennas, antenna building materials, books, Electronics tools, It would sure beat driveing to GR for some of this stuff. maybe some electronic parts or the abillity to order them. Take the boss to the Marshal hamfest for some ideas. A few radios would be great.

Congrats, Tom, on the new job!

I think you have the right ideas for how to get started a bit in the ham radio end of things.

You could always start small with the items you have listed, and take special orders for those who want something that you don't have, such as a more expensive radio than what the average ham might typically buy.

As for radios, I'd try to stock some of the most popular HT's, and maybe dual-band mobile rigs. If you want to do any HF stuff, something in the Icom 706 family might also work.

These are just my thoughts. Take them for what they're worth.

73 and happy new year from Tom Behler: KB8TYJ, Mecosta County EC/RO

Did anyone know that in May of 2004 the ITU added a new symbol to Morse Code?

The @ symbol. It is represented by the digraph of AC, or 'dit dah dah dit dah dit'.

If Tom does this, we need to give it some support by buying some of these things so his boss can see some profit.

Even if we go in for something non-ham related, buy a few feet of co-ax, ladder line, a connector, or something to put on the same ticket.

From: Hank Greeb
Topic: 2170 Message: 2170

And have ham license plates on one's car.

I was tooling down East Main Street in Rockford on the way home from a short shopping expedition this noon, and didn't see that a police car was parked along the street. I was probably going 35 MPH or so in a 25 MPH zone, because that's what many (most?) of the traffic goes along that stretch - hardly any traffic, hardly ever any pedestrians, etc. The police lady turned on her lights, I pulled into a parking lot at the next corner, and she took all the info from me, and asked about my special license plates. She went back to her car, determined that I didn't have any outstanding warrants, and came back without a ticket. She said "I can't give a ham radio operator with no previous ticket history a ticket, because my father is a ham, call letters WW8WWW (not the call she gave me, but I'm not using it because I don't want to cause him or the police lady any trouble.)

I'm sure I'll try to not expeed the seed limit of 25 MPH on that stretch of street, though I'm sure that it won't be easy.....

Happy New Year to everyone.

First thing I would to wish everybody a HAPPY NEW YEAR.

For me as some of you know that I have a collection of unbuilt Heathkits. Well I made this decision in the last few days to build the biggest of my kits. I spent yesterday preparing the bench area to build A SB-221 with 10m kit; this is 2kw pep SSB & 1kw CW 80-10m amp. It was Heathkits big boy of amps. The kind of neat thing is of watching on Ebay during the last year that there has been quite a few of them being sold in the unbuilt condition for around $2000 and there is one for sale on there now. Now yes that seems expensive considering new they sold for about a quarter of that. But if you compare it to similar amps being sold new today it's a lot less. Take the Ameritron AL-82 of, which is almost the exact same amp except it comes with Chinese tubes (yuck) and also costs almost $2700. It seems to me that the better choice overall was the one that I made to purchase the Heathkit. For not only was cheaper by seven hundred bucks but I can enjoy building it, then for years to come I can see that monster sitting in the shack and say I built it myself. Well once again everybody have a happy New Year.

All:

Winter Field Day is coming! We will celebrate this special contest opportunity in an unusual way with our Muskegon radio club January 13.

A fun filled day begins with a FREE breakfast at the clubhouse at 8:30 am. Then we move into a mini swap. Bring your gear and we'll also try to sell some items from the NS8Z estate. Some of the items will be sold with price tags while other items will be silent auction.

Following this mini swap we will enjoy the new Winter Field Day. Starts at noon and runs for twenty-four. Hang around after the sale and help us contest.

Looking forward seeing you all there. Remember, I'll buy you a cup of coffee.

73

Bill, AB8SC

2180. Reminder MAARC Special Meeting at Norton Shores Public Library - January 4th

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-02 23:30:25 UTC
From: Linda
Topic: 2180 Message: 2180

The Muskegon Area Amateur Radio Council is pleased to present a special program on January 4, 2007, at the Norton Shores Public Library, 705 Seminole Rd, Norton Shores, Michigan. 7 p.m. sharp! The program will be presented by David Clow, CEO of Harding Energy, Inc., a world leader in rechargeable battery technology.

The public is welcome to attend this program. Bob, N9AUY, pulled this program together for us and has also invited his radio controlled aircraft club to attend. We think there will be an excellent turnout. Many in the public, who don't know any better, think that ham radio is dead. Help us prove them wrong! There has been no decision yet on a talk-in to the library location, BUT if you make a call on the local .94 repeater, someone will guide you to the library. It's not difficult to find.

Here is some information from Harding's website http://www.hardingenergy.com):

"Harding Energy Inc. was founded in 1987 by local businessmen and physicians in the western Michigan area. Lead by Doctor Nicholas Pietrangelo and his relationship with Stan Ovshinsky, inventor of Nickel Metal Hydride technology, Harding was one of the first companies to obtain a license from Energy Conversion Devices (ECD) to manufacture and distribute NiMH batteries and battery assemblies."
"Harding has evolved from a single line cell manufacturer to a global battery solution provider. Products range from single cells that are distributed to assemblers for battery pack manufacturing, to the most complicated smart battery technology solutions coupled with intelligent chargers. Harding has 100 different cell sizes making them one of the largest cell providers in the world with production capabilities exceeding 3,000,000 units per month. Harding offers Li-Ion, Li-Polymer, Ni-MH, charging systems and smart boards to complete their product line."

"Not only is Harding a world-class manufacturer, but also their staff is extremely well versed and has many years experience in the electronics and battery industry. President and CEO, David Clow has been in the electronic industry in excess of 30 years and brings a global knowledge to Harding. With his several years of experience matched with his education, he brings a tremendous amount of resources and talent that is necessary to run and orchestrate the departments within the Harding Corporation."

Something to ponder any ham radio operator or ham radio organization....

From The ARRL Club News, Copyright ? 2007 by the American Radio Relay League, Inc. Reprinted by permission

==========

Elmer's Corner

The FCC has made a change in the way we test for Amateur Radio licenses and the Element 1 CW exam is going to be eliminated. Many have voiced some very negative opinions about this and their derogatory comments are very hurtful to the new ham trying to get involved in this hobby.

If we expect the ranks of hams to grow then it is up to us, the experienced hams, to ensure that the first experience the new ham has is a positive one and that he or she is welcome. We should be extending our hands in friendship and teaching these newcomers how to operate according to the rules and regulation and how to safely assemble an Amateur Radio station. Without nurturing and guidance these new operators will splinter off and form their own sub-culture. Soon the expected result will occur and all of the hams who insisted on staying firmly anchored in the past will say "I told you so."

So much has changed in communications, technology and society that it is absurd to even be think that things should -- or could -- be the way they were over half a century ago. The FCC has not made CW illegal. You can operate that mode or any other mode you wish. Expect to see more radio operators experimenting with CW and other modes because they can do so without fear of the expectation to be expert at it. That is as long as the experienced operators show them the correct way and not chastise them for stumbling or for not having had "come up the way that they did." We all came to the party through a different door, but we are all here to have fun.

I hope that all experienced Amateur Radio operators will reach out and mentor the new hams. Pass the torch and share the excitement and thrill that we enjoy from this wonderful hobby and let's keep it going.

If you have any questions about the FCC's Morse Code Report and Order in WT Docket 05-235 and the FCC Order on Reconsideration in WT Docket 04-140, please visit the ARRL FAQ on this topic:

2186. SW Ohio Digital Symposium, Saturday, 1/13, 9 am - 4:30 pm

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-04 19:10:31 UTC
From: Mark Thompson
Topic: 2186 Message: 2186

Digital Enthusiasts -

The Twenty First Annual Southwest Ohio Digital Symposium will be from 9 AM to approximately 4:30 PM EST, Saturday, January 13, 2007 in Thesken Hall, on the Middletown Campus of Miami University, Middletown, Ohio.

This year's program is still in the works, so please consider what you'd like to see as a presentation. If you have a favorite which you would like to present, please let us know @ k4zle at arrl.net.

So far the proposed topics are:

· D-Star Introduction, Mark Thompson, WB9QZB
· WinLink 2K in SW Ohio, Greg Zach, WG8Z
· A PSK-31 Audio Beacon Project, Jim Everly, K8IKE
· Using a Wide Band Noise Generator, Jay Slough, K4ZLE
· The SoftRock Software Defined Radio Project, Tony Parks, KB9YIG
· AMSAT update, Gerd Schrick, WB8IFM, and Steve Coy, K8UD
· 10 gHz EME project at VOA Museum, Mike Murphy, KA8ABR
· BPL update, Ed Hare, W1RFI --- REMOTE
· The Michigan Digital Network, John McDonough, WB8RCR --- REMOTE
· ARRL news and views by Ohio SM, Joe Phillips, K8QOE, and Great Lakes Division Director, Jim Weaver, K8JE

Other potential presentations are in the wings, such as an AMSAT update, a microwave communications demonstration and more. As you can see, this year's program should be very informative with topics that are state of the art and have immediate real world application. Come meet the folks who are making things happen technically in our hobby, both locally and nationally.

There is no charge for attending the symposium. A box lunch will be available on site. Updates to the program will be posted here on the website, http://www.swohdigi.org/, so please check in from time to time. For further information please contact K4ZLE@....

We will have a "demonstration room" for items on the program, plus any items which you'd like to display. We'd like, in particular, a specialty APRS stations, a working PSK-31 station, and any other systems which you've found useful.

PLEASE PASS THIS ANNOUNCEMENT ON TO OTHER CLUBS & HAMS WHO MIGHT BE INTERESTED.

There was a group back in the 70's, primarily in Kentucky, Ohio, West Virginia, and Indiana, which called themselves the "Ohio Valley Teenage Net." It met regularly on 75 meters to discuss whatever was on their minds. This was more of a ragchew session than a net, but they meticulously kept track of time, and every 9.5 minutes the "timekeeper" would come on an say "ID TIME". Every station identified simultanously on frequency.

There was some question as to legality of this, but they were never cited by the FCC. Apparantly the FCC read the regs as these rather innovative youngsters did - the ID is required, but how far it can be heard isn't specified.

I got cited once by an OO because I was mobile, and found K8XX on a repeater here in Michigan. I was so thrilled at talking with another ham with the same suffix that I yakked for over 10 minutes. I thanked the OO and never was cited again.

As Mark sez, it's wise to have a timer to remind you to ID when required.

Unless KB3GRK is egregious in his lack of timely ID, a simple letter advising that he's purchased a timer, and apologizing for the transgression should satisfy the Friendly Candy Company.

The direct link to AC6V's kit reference page is

http://www.ac6v.com/kits.htm

If you're not an ARRL member (and I'd encourage everyone to join),
you can purchase QST's on CD for a nominal price of $19.95 per CD, at
http://www.arrl.org/catalog/?item=NO-PER#top

There's always several construction articles and most of them have a
source of all the parts required to build the device under
discussion. The discussion is usually quite informative - more so
that just a list of parts and construction details which comes in
many parts kits.

Identifying?

You and I know the rules of identifying. I find it somehow uncomfortable that some folks will over identify at intervals of closer to four minutes while insinuating that there are some uncomfortable consequences related to ignoring the identifying rules by the FCC. I seriously doubt that a ham who forgets to identify after ten minutes of conversation is doing a grave disservice to the amateur radio hobby. Making a Big Deal out of identifying seems to interrupt the smooth flow of a QSO, especially as we converse on the two meter repeater.

On the two meter repeater we have a built in timer. The repeater will identify itself at intervals of ten minutes. This is a very good reminder to insert a call sign after the repeater sends the reminder. What purpose is served by sending a call sign at earlier intervals?

This particular ham in the news droned on for over an hour without identification. An amazing feat but not particularly hard to imagine. You have to imagine that he somehow identified at least to the point that the FCC could send him a "pink slip" and invitation to explain. I'm having a hard time imagining the FCC guy hanging around long enough to keep an eye on his watch, recognize the identifying problem, and eventually divining the ham's call sign. It takes two to tango and two or more to converse on seventy centimeters? I imagine the conversation must have, at some point, thumbed its nose at the FCC and their perceived inability or unwillingness to enforce certain rules.

I hope this does not begin a new round of concern and gnashing of teeth over the FCC and their "rules" of conduct. We each enjoy a wonderful resource and hobby. Cooperation and compassion go a long way to keep peace and harmony among hams.

My two cents not offered in any capacity other than as a simple ham.

Bill, AB8SC

2193. 1st. 2007 Mini-Swap this Saturday!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-05 04:14:07 UTC
From: Laryn Lohman
Topic: 2193 Message: 2193

Seasons Greetings to everyone!

After the recent festive break HARC club will once again be reverting back to our regular FREE monthly mini-swap. Details are as follows;-

HOLLAND AMATEUR RADIO CLUBS MONTHLY MINI - SWAP.

Bring your items and come join us at our new Technology and Training building in downtown Holland. Family and friends all most welcome to join in for a fun day. Free parking available.

Please note, by popular demand, the earlier start / set up times.

DATE : JAN 6th, 2007 (Talk in : 147.060 94.8pl)
SET UP TIME : 09H30 - 10h00
SWAP TIME : 10h00 to 2.00pm
VENUE : 280 East 8th Street, Holland (next door to Holland Chamber of Commerce)

HARC will provide you with...

* FREE table space
* FREE trunk swap parking space (weather permitting)
* FREE parking
* FREE entry
* FREE coffee
* 50/50 Draw
(To offset our new buildings upkeep, donations from sellers / visitors would
however be very much appreciated as always!)

YOU need to bring what ever surplus equipment to sell / swap.

NOTE: For those who may wish to set up the Friday night before, meet down at
Club House between 19h00 - 20h30

Come along and be part of what has become a great social event, all are welcome

NOTE: You don't have to be a member of HARC to enjoy the day with us.

ANY QUESTIONS: Contact Ken ZR5AAD/W8 - Cell Ph: (616)726-3929

2194. Great Lakes area 2 meter digital net tonight 8e/7c - NEW MODE

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-05 11:11:06 UTC
From: Joe Veldhuis
Topic: 2194 Message: 2194

As announced last week, I'm changing modes for this week's net.

Time: 8 PM eastern, 7 PM central
Freq: 144.150 MHz USB +1500Hz (144.1515 MHz actual center)
Mode: DominoEX - 11 baud, FEC

If you don't currently have any software that supports DominoEX or its FEC variant, try ZL2AFP's reference app:

http://www.qsl.net/zl1bpu/DOMINO/Index.htm

Note that this is a Windows app. Although both gMFSK and Fldigi on Linux support DominoEX, they do not yet support FEC. Dave W1HKJ and I are working on it, but it's going slowly. Fortunately, this app will run on Linux under WINE.

-Joe, N8FQ

For those of you who have Epirbs on your boats .

KD8BIG

DATE: December 08, 2006 13:47:51 EST
FOR IMMEDIATE RELEASE
Office of Public Affairs
U.S. Coast Guard
Press Release Date: Dec. 8, 2006
Contact: Steve Blando

BOATERS MUST NOT OPERATE 121.5/243 MHZ EPIRBs AFTER 31 DECEMBER 2006

WASHINGTON - The Coast Guard reminds all boaters that beginning January 1, 2007, both 121.5 and 243 MHz Emergency Position Indicating Radio Beacons (EPIRBs) are prohibited from use in both commercial and recreational watercraft. Boaters wishing to have an emergency rescue beacon aboard their vessel must have a digital 406 MHz model.
The January 1, 2007, date to stop using 121.5 MHz EPIRBs is in preparation for February 1, 2009, when satellite processing of distress signals from all 121.5/243 MHz beacons will terminate. Following this termination date, only the 406 MHz beacons will be detected by the International Cospas-Sarsat Satellite System which provides distress alert and location data for search and rescue operations around the world.
The regulation applies to all Class A, B, and S 121.5/243 MHz EPIRBs. It does not affect 121.5/243 MHz man overboard devices which are designed to work directly with a base alerting unit only and not with the satellite system.
This change, in large part, was brought about by the unreliability of the 121.5/243 MHz beacons in an emergency situation. Data reveals that with a 121.5 MHz beacon, only one alert out of every 50 is a genuine distress situation. This has a significant effect on expending the limited resources of search and rescue personnel and platforms. With 406 MHz beacons, false alerts have been reduced significantly, and, when properly registered, can usually be resolved with a telephone call to the beacon owner. Consequently, real alerts can receive the attention they deserve.
When a 406 MHz beacon signal is received, search and rescue personnel can retrieve information from a registration database. This includes the beacon owner's contact information, emergency contact information, and vessel/aircraft identifying characteristics. Having this information allows the Coast Guard, or other rescue personnel, to respond appropriately.
In the U.S., users are required by law to directly register their beacon in the U.S. 406 MHz Beacon Registration Database at: http://www.beaconregistration.noaa.gov/ or by calling 1-888-212-SAVE. Other users can register their beacon in their country's national beacon registration database or, if no national database is available, in the International Beacon Registration Database at https://www.406registration.com/.
The United States Coast Guard is the lead agency for coordinating national maritime search and rescue policy and is responsible for providing search and rescue services on, under and over assigned international waters and waters subject to United States jurisdiction.

###

The U.S. Coast Guard is a military, maritime, multi-mission service within the Department of Homeland Security dedicated to protecting the safety and security of America.

Subject: Re: [WestMichiganHams] Re: FCC Cites Amateur

Just to nit pick a little....

[nitpick]

An easy habit to get into and a hard one to break is to add an unecessary suffix to the end of our call signs. This may lead to a station unfamiliar with our calls, especially if we say them really fast, to call us in a way we may not understand. For instance if you had just identified your station and another station called back "Station ending in 4ID do you copy?" would you know they were trying to contact you?

The addition of the 4ID suffix is scorned by many. It is also used by many. I think the reason is that just saying our call signs seems a bit awkward and adding a few words somehow makes the practice flow better during the conversation. The practice, however, adds a character string after our call signs which should be the last part of the sentence.

Might I suggest using something like "this is K8MHZ" instead. Please feel free to use your own call sign unless you are signing me up for an expensive door prize at a hamfest.

4ID? Of course it's for I. D. What other use is there for a call sign?

[/nitpick]

73,

Mark K8MHZ 4ID

Identifying?

You and I know the rules of identifying. I find it somehow
uncomfortable that some folks will over identify at intervals of
closer to four minutes while insinuating that there are some
uncomfortable consequences related to ignoring the identifying rules
by the FCC. I seriously doubt that a ham who forgets to identify
after ten minutes of conversation is doing a grave disservice to the

amateur radio hobby. Making a Big Deal out of identifying seems to interrupt the smooth flow of a QSO, especially as we converse on the two meter repeater.

On the two meter repeater we have a built in timer. The repeater will identify itself at intervals of ten minutes. This is a very good reminder to insert a call sign after the repeater sends the reminder. What purpose is served by sending a call sign at earlier intervals?

This particular ham in the news droned on for over an hour without identification. An amazing feat but not particularly hard to imagine. You have to imagine that he somehow identified at least to the point that the FCC could send him a "pink slip" and invitation to explain. I'm having a hard time imagining the FCC guy hanging around long enough to keep an eye on his watch, recognize the identifying problem, and eventually divining the ham's call sign. It takes two to tango and two or more to converse on seventy centimeters? I imagine the conversation must have, at some point, thumbed its nose at the FCC and their perceived inability or unwillingness to enforce certain rules.

I hope this does not begin a new round of concern and gnashing of teeth over the FCC and their "rules" of conduct. We each enjoy a wonderful resource and hobby. Cooperation and compassion go a long way to keep peace and harmony among hams.

My two cents not offered in any capacity other than as a simple ham.

2201. ARRL January VHF Sweepstakes, 1/20 - 1/21

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-05 22:24:49 UTC
From: Mark Thompson
Topic: 2201 Message: 2201

2007 ARRL January VHF Sweepstakes Rules
General Rules · VHF Rules
1. Object: To work as many amateur stations in as many different 2 degrees × 1 degree grid squares as possible using authorized frequencies above 50 MHz. Foreign stations work W/VE amateurs only.
2. Date and Contest Period: The date will be announced annually by the ARRL but will generally be the third or fourth weekend in January. Begins 1900 UTC Saturday, ends 0400 UTC Monday (January 20-22, 2007).
3. Entry Categories:
3.1 Single Operator.
3.1.1. Low Power
3.1.2. High Power
3.2. Single Operator Portable
3.3. Rover.
3.4. Multioperator.
3.5. Limited Multioperator.
4. Exchange: Grid-square locator (see April 1994 QST, p 86).
4.1. Exchange of signal report is optional.
5. Scoring:
5.1. QSO points:
5.1.1. Count one point for each complete 50- or 144-MHz QSO.
5.1.2. Count two points for each 222- or 432-MHz QSO.
5.1.3. Count four points for each 902- or 1296-MHz QSO.
5.1.4. Count eight points for each 2.3 GHz (or higher) QSO.
5.2. Multiplier: The total number of different grid squares worked per band. Each 2 degrees × 1 degree grid square counts as one multiplier on each band it is worked.
5.3. Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score.
5.4. Rovers only: The final score consists of the total number of QSO points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid square from which they successfully completed a contact.
5.4.1. Rovers are listed in the contest score listings under the Division from which the most QSOs were made.
6. Reporting:
6.1. Electronic submissions may be emailed to JanuaryVHF@... and hand written paper logs or diskettes mailed to January VHF, ARRL, 225 Main St, Newington, CT 06111.
6.2. Entries that have been electronically generated must submit their log file in the Cabrillo file format. Paper print outs of electronic files are not acceptable substitutes.
6.3. Entries must be emailed or postmarked no later than February 21, 2007.
6.4. Entries may be submitted using the web applet at www.b4h.net/cabforms
6.5. Rovers who submit scores for the club competition must submit a second summary sheet indicating QSOs and score if they make any contacts from outside of the club territory. Indicate clearly on the summary sheet and in log if the log is the total entry or that portion to be counted for the club score.

7. Miscellaneous:
7.1. Stations may be worked for credit only once per band from any given grid square, regardless of mode. This does not prohibit working a station from more than one grid square with the same call sign (such as a Rover).
7.2. Only permitted one signal per band (6, 2, 11/4, etc) at any given time is permitted, regardless of mode.
7.3. Multi-operator stations may not include QSOs with their own operators except on frequencies higher than 2.3 GHz. Even then, a complete, different station (transmitter, receiver and antenna) must exist for each QSO made under these conditions.
8. Awards: Certificates will be awarded in the following categories:
8.1. Single operator.
8.1.1. Top single operator in each ARRL/RAC Section for high and low power..
8.1.2. Top single operator on each band (50, 144, 222, 432, 902, 1296 and 2304-and-up categories) in each ARRL/RAC Section where significant effort or competition is evident. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-band endorsements.) For example, if KA1RWY has the highest single-operator all-band score in the CT Section and her 50- and 222-MHz scores are higher than any other CT single operator's, she will earn a certificate for being the single-operator Section leader and endorsements for 50 and 222 MHz.
8.2. Top single-operator portable in each ARRL/RAC Section where significant effort or competition is evident. (Single operator portable entries are not eligible for single-band awards.)
8.3. Top rover in each ARRL Division and Canada where significant effort or competition is evident. (Rover entries are not eligible for single-band awards.)
8.4. Top multi-operator score in each ARRL/RAC Section where significant effort or competition is evident. (Multioperator entries are not eligible for single-band awards.)
8.5. Top limited multioperator in each ARRL/RAC Section where significant effort or competition is evident. (Limited multioperator entries are not eligible for single-band awards.)
8.6. Top DX stations where significant effort or competition is evident.
9. Other:
9.1. See "General Rules for All ARRL Contests" and "General Rules for ARRL Contests on bands above 50 MHz (VHF)" in November 2001 QST or on the ARRL Web at www.arrl.org/contests
9.2. For more information contact contests@... or (860) 594-0232.

Hi all ,

It seems to me that it dose not matter what you know to become a Ham . All you have to do is memorize the answers to the test .

I was so happy when I got my ticket . Then I talked to a fellow worker and told him of my success. He was also a Ham at one time . He grew up around Amateur Radio and gave it up when his Father died in the early 70s .

He told me that Hams now days are not like the Hams that passed the test 20 + years ago . That when he went for his license they were taught to build radios and other equipment that go along with the hobby . They were taught how to work a QSO , build Antennas, radios etc . He said that now days hams are taught how to pass a test , but not how to retain there knowledge or how to use the equipment .
He was taught through his boy Scout Troop and his father . They built a 2 and 6 meter rigs . They also learned CW. They worked on these things while at camp outs etc .

I have to agree. I was never taught much more than how to pass the test using common sense . Never once hands on experience was applied .

I do not want to take away from what I have achieved . It is the truth though .

Talking with other friends of mine they tell me of there local clubs . How they are open almost 24 hours a day . That they have 1st ,2nd and 3rd shift people in there club and use the shack at all times . How there club holds weekly events on how to work and understand various equipment . Get to know your rig night etc .

How hard would it be for a guy to take a tech test ? Yep , it shows how lazy Amateur Radio has become .

I'm not trying to take away anything from anyone who helped teach me . Just letting those of you know what I have been told from a few elmers along the way .

BTW .
I also dislike ww8www for ID
and 73s .

K8MHZ taught me that it is, " this is, KD8BIG "

73,
Big Mark

My point was that there is always someone out there who will try to circumvent the rules no matter how easy it is to follow them. They put forth hte effort for Technician some years back but will risk a huge fine to avoid upgrading to Tech?

Hi all ,

It seems to me that it dose not matter what you know to become a Ham . All you have to do is memorize the answers to the test .

I was so happy when I got my ticket . Then I talked to a fellow worker and told him of my success. He was also a Ham at one time . He grew up around Amateur Radio and gave it up when his Father died in the early 70s .

He told me that Hams now days are not like the Hams that passed the test 20 + years ago . That when he went for his license they were taught to build radios and other equipment that go along with the hobby . They were taught how to work a QSO , build Antennas, radios etc . He said that now days hams are taught how to pass a test , but not how to retain there knowledge or how to use the equipment .
He was taught through his boy Scout Troop and his father . They built a 2 and 6 meter rigs . They also learned CW. They worked on these things while at camp outs etc .

I have to agree. I was never taught much more than how to pass the test using common sense . Never once hands on experience was applied .

I do not want to take away from what I have achieved . It is the truth though .

Talking with other friends of mine they tell me of there local clubs . How they are open almost 24 hours a day . That they have 1st ,2nd and 3rd shift people in there club and use the shack at all times . How there club holds weekly events on how to work and understand various equipment . Get to know your rig night etc .

How hard would it be for a guy to take a tech test ? Yep , it shows how lazy Amateur Radio has become .

I'm not trying to take away anything from anyone who helped teach me . Just letting those of you know what I have been told from a few elmers along the way .

BTW .
I also dislike ww8www for ID
and 73s .

2213. Fine points of Ham Radio Operating

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-08 16:18:05 UTC
From: Hank Greeb
Topic: 2213 Message: 2213

When I took the test, and up until the FCC determined that they didn't have enough resources to continue giving tests, the general areas of knowledge upon which someone would be tested was known, but the exact questions weren't. We had to study from the license manual and the handbook. We never seemed to know what the questions might be.

When the FCC turned the task over to the Hams, the (several) Volunteer Examination Coordinators (VEC's) were given the task of coming up with the question pool, so the tests could be standardized throughout the country.

I don't remember what the rhubarb was all about, but the "legal beagle folks" got involved at some point in the past, not long after VEC's took over the testing. I believe that happened because a publishing company, perhaps in cahoots with one of the VE Coordinators (NOT ARRL) asked folks who too the test to copy the questions, from which then they published a book containing all the questions. They were making money on this publication, which caused others to cry foul. The FCC's lawyers decided that, if the VEC's couldn't police themselves, then the question pool should be published.

The study guide suddenly morphed from a treatise on technical, operating, and FCC rules, to a Q&A list of the exact questions which will appear on the test. There's many times more many questions as will appear on the actual tests - but all tests must be formulated with a certain percentage from each of the "blocks" of questions.

For most people, memorizing the whole test pool was easier than absorbing the general knowledge from whence one can deduce the answer to any of the questions. Then, some enterprising folks decided that they could teach enough of the answers in a day, so "ham in a day" classes have sprung up. If you get only 6 hours or less of class, there's not much room for teaching things like how to operate a rig, protocol for calling and answering another station, etc.

To help fill in these obvious gaps, the Grand Rapids ARA, the folks hold an "open radio room" at W8DC, in the basement of the Kent County Red Cross building, each Wednesday evening, beginning about 7 p.m.. Olde Tymers and newcomers are invited to visit the station, to operate on any of the several operating consoles on a variety of modes, etc. The Olde Tymers act as "Elmers", teaching by example the finer points of ham radio operating. No question is too stupid to ask.

I believe other groups (Muskegeon in particular) hold similar sessions. This is a great service to the ham radio community, and those Olde Tymers who participate deserve commendation.

2219. Linked System Receiver in Holland

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-09 05:33:30 UTC
From: Laryn Lohman
Topic: 2219 Message: 2219

Thanks to Abe W8HVG there is now a receiver
for the 147.16 linked repeater system in Holland. It is at the
hospital, using the same antenna that the 147.06 repeater uses. It is
a receiver, not a linked repeater. It requires a subaudible tone of
118.8 cycles. Just set up a new memory in your radio with this tone
so you can go to it easily. Now you can sit in your easy chair and
talk back to GR (well, if near Holland).....

From: Bill
Topic: 2220 Message: 2220

All:

This weekend at the MAARC clubhouse will be a number of activities you are invited to attend and actively participate.

First is a free breakfast starting at 8:30 am. There is lots on the menu and most of which you will enjoy! This breakfast encourages our ham friends to drop in and enjoy the gear sale and auction. Yep, we'll have a mini swap.

You can bring in your gear for sale, we'll have gear for sale, and the fun starts after the breakfast. Some items will have price tags while others are offered on a silent auction. The larger gear will have a reserve price. You can bring in your gear and we'll horse trade and shoot the breeze until about noon.

Starting at noon on Saturday we will participate in the FIRST annual Winter Field Day. The fun starts at noon and runs until noon on Sunday. There will be several shacks for you to operate and enjoy.

We have been invited to work W7W, the special event station from Arizona. Clarke, K8BP will be one of the operators at their event shack. It will be such fun!

Go to http://www.picmyphotos.com and enter the password "NS8Z" to view the equipment that will be presented for sale at the clubhouse on January 13th and 14th during the "Winter Field Day" operation.

We have been having problem accessing this site. I understand that the problems will be fixed in the next day or so. Please check back there often to see the items available.

Put this weekend on your calendar. You won't want to miss the activities. Kind of an open shack night on steroids. Tons of fun. Radio Active!

In case you aren't aware of this.....

Jan. 05 2007,09:20 by kg4rpe

Wayne Spires (KF4BJT), a Wetumpka, AL ham is now sitting perched a top his 68 foot radio tower behind his house in protest of a judges ruling forcing him to become a part of a homeowners association. He says that 20 years ago when he bought the property located along the river that it was listed as unrestricted. He has been atop the tower for about three or four days and says he will not come down until his next court date which is scheduled for Feb. 5th.

The nationaly syndicated radio team Rick and Bubba out of WZZK 104.7 in Birmingham, AL interviewed Mr. Spires, his wife, and a daughter live by phone this morning. They also talked yesterday by phone to the sheriff who said as long as Mr. Spires does not try to hurt himself or somebody else his department will not interfere. William "Bubba" Bussey (KJ4JJ) the co-host of Rick and Bubba, explained on yesterday's show the importance ham radio can play in a time of emergency and the importance for good towers for hams to own and use. (Bubba is a very active ham and promotes it often on their program.)

His family as well as other neighbors, friends, and hams all are sending their support to him.

Hey, got anything going Saturday? Drop by the clubhouse any time and get in on the great events centered on radio.

I'll buy you breakfast when you show up around 8:30 am.

Hang around or drop in later and you can purchase some great ham gear at really good prices. Bring your own gear for sale or maybe we can trade. There's a ham swap on Saturday. I've got some gear in there and so do other hams.

Like to contest? We're doing Winter Field Day that starts at noon on Saturday and runs until noon on Sunday.

Tons of stuff going on! And you thought this was another boring winter weekend??!

At the HARC monthly business meeting this week, it was decided to move our open radio room night to Tuesdays. So anyone interested in dropping by, don't do so on Wednesday. The door will be open by 7 PM, and possibly earlier.

As an aside, we were called on our 2 meter repeater by N8DGD at W8DC this Wednesday, and attempted to make contact on 6 meters, but were unable to do so. At least we got one attempt in...

Bill,

There is one problem that I notice with this forum, and that each group within West Michigan that posts' on the forum, assumes that everyone knows absolutely everyone else, and where they are located. When I first read you email, I was thinking that the open house was for the Holland club. It took a few seconds to have the old noggin figure out that you meant the Muskegon club.

I have noticed several other event messages that do not indicate the location, or who is behind it.

Remember the old adage: Who,What, When, and Where.

Tom K8TB (from Hudsonville, member of the Holland group!!)

2232. Contact from Hell, anyone?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-12 01:42:19 UTC
From: Hank Greeb
Topic: 2232 Message: 2232

This is to announce that N8XX will be going to hell.

(Now, don't everyone cheer at once)

Actually, there's a QRP contest, sponsored by the AzScQRPions QRP club, call the annual F)reeze Y)our B)... O)ff (FYBO) which will be held between 1400Z and 2359Z on 3 February 2007. The idea is to take a QRP rig to the field, set up, and contact as many stations as possible. There's a category for home (indoor) stations for those who don't want to freeze their b...s off. :)

I figured that folks might like contacting someone from Hell, so I'm proposing to drive over to Hell, Michigan, and set up operation. (We hope Hell will be frozen over, though the probability is lower than for a typical winter. :)

There's one other fellow who has shown interest, and he will probably bring a SSB rig, so we should be able to operate on both CW and SSB. (My HW-9 only operates on CW).

I've reserved the special call N8H for the event, so, if you want a QSL from Hell, look for us on 7.04 MHz (CW) and 7.285 MHz (SSB).

For details on the contest see

http://www.azscqrpions.org/FYBO2007_01072007.htm

73 de n8xx Hg (N8H during FYBO 2007)

p.s. you DON't have to be running QRP <5 W, or be operating from the field to contact N8H. All contacts will be appreciated. If you want a special QSL, send #10 or larger SASE to N8XX QTHR.

2237. What Are You Doing Saturday? GOOD EATS waiting for you!

Hello All,

Let's see here. The eats for Saturday

8:30AM till the food runs out.
Free Breakfast. all the normal good reakfast eats, plus biscuits & gravy, french toast and Bud's famous belgium waffles.

The sale of Ham equipment and the start of winter field day.

And more food if you stick around or come back later. Starting after noon there will be Chili & Gumbo and then sometime after 5:00PM I have about good number of leftover New York Strips from the steak fry. It will be first come first serve. If you want to bring anything else feel free.

Tom

2238. Reminder: Great Lakes area 2m digital net tonight 8e/7c

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-12 13:47:44 UTC
From: Joe Veldhuis
Topic: 2238 Message: 2238

Here's the weekly reminder that the Great Lakes area 2 meter digital net will be held tonight:

Time: 8 PM eastern, 7 PM central
Freq: 144.150 USB +1500 Hz (144.1515 actual)
Mode: DominoEX, 11 baud with FEC

Attendance has been low lately, the last few nets have only had one or two checkins. The only one who showed up last week was Bill N9DSJ. If it continues like this I might suspend the net until conditions improve.

Morning,I am using MFJ products for an example.
Is a swr/wattmeter that covers a wide band spread less accurate than a meter designed for a more specific band spread?
example
A MFJ-864 advertises to cover(1.8-60mhz,144mhz,440mhz).
A MFJ-815C advertises to cover (144/220/440mhz)??

You do give up some accuracy with wide band units, but not anything that I have ever noticed. I don't know about MFJ units specifically though. I would think that the manufacturer should publish the specs somewhere on what the acceptable error is. MFJ does advertise that each band is calibrated individually, so there may not be any compromise for the wide band. Or, maybe I have been at work too long..... :-)

It depends on what you'll want to do with it. I'd think either one would get the job done; however, an SWR meter designed for a specific band, I would think, should have less loss when connected in series with the co-ax.

2245. ARLB003 FCC suspends vanity call sign processing

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-13 15:31:25 UTC
From: Mark Thompson
Topic: 2245 Message: 2245

SB QST @ ARL $ARLB003
ARLB003 FCC suspends vanity call sign processing

ZCZC AG03
QST de W1AW
ARRL Bulletin 3 ARLB003
From ARRL Headquarters
Newington CT January 12, 2007
To all radio amateurs

SB QST ARL ARLB003
ARLB003 FCC suspends vanity call sign processing

The FCC has put new Amateur Radio vanity call sign processing on hold while it modifies the software that handles vanity applications. The suspension is a result of a rule change that went into effect December 15 to discourage the filing of multiple applications by one individual for the same call sign. The FCC is still processing vanity call sign renewal applications.

"The Commission continues to accept vanity call sign applications," says a brief announcement on the FCC's Universal Licensing System (ULS) Web page, http://wireless.fcc.gov/uls/. "However, these applications will not be processed until software changes in accordance with the recent rule making have been fully implemented." Just when that might happen is not known.

As revised in the FCC's recent Report and Order (R&O) in WT Docket 04-140, §97.19(d)(1) stipulates that if the FCC receives more than one application requesting a vanity call sign from a single applicant on the same receipt day, it will process only the first application entered into the ULS. "Subsequent vanity call sign applications from that applicant with the same receipt date will not be accepted," the rule concludes.

The FCC says that when it resumes processing new vanity applications, it will handle pending applications "consistent with the date order in which they were received."

This suspension affects new vanity call sign applications submitted on December 18 or later. Typically, it takes 18 days from the time the FCC receives a vanity application until the call sign is issued -- or the application is denied. The FCC granted the last new Amateur Radio vanity call signs on January 4 for applications received December 15.

All vanity call sign renewal applications, including those for club stations, must be filed via the ULS. The current vanity call sign fee, payable for new applications as well as renewals, is $20.80 for the 10-year license term.

Subject: Re: [WestMichiganHams] SWR/wattmeter ??

I would guess that the more broadband a meter is the less accurate it would be but that may not be true. The meters may have switches in them for different bands that indicate they are really more than one instrument sharing a display. That would present more accuracy than a single broadband device.

How much accuracy is needed in our hobby? Do we really care about the difference between a 1.2 to 1 and a 1.4 to 1 SWR? We are interested in which adjustment makes the lowest SWR and if that is acceptable life is good. Actually we don't even need numbers on the scale. All we need are three icons. An ice cube, a bunny and a radio on fire. Ice is the coolest, bunnies are warm but still good and radios on fire are bad. As long as we could see the needle move and see how close to the icons the needle was I am sure the meter would be just as useful to us as one with numbers on it.

The watt meters need a bit more accuracy for bragging rights. The human ear can't hear the difference between an 80 watt signal and a 120 watt signal but the human ego can tell the difference between 80 and 80 1/2 watts.

How do you know how accurate a meter is? A rule of thumb is that accurate meters are heavier and much more expensive than less accurate ones. Accurate meters are also usually made in countries that don't allow oxen to walk the streets of their largest cities.

I hope that these words of wisdom have helped some.

73,

Mark K8MHZ

All:

I hope you all enjoyed this weekend as much as many of our group. What a wonderful experience playing radio with friends. The MAARC sure enjoys some wonderful hams, friends, family, folks.

My thanks to all who participated, from the folks who stopped in just long enough to say a quick, "Hello" to the Tom, W8AMZ family who seemed to be there constantly and cooking much of the time. Wow, was that food excellent or what?! We really enjoyed some great treats with friends. I guess when you've got a few kids you have to really get good at menus and cooking. Amazing and delicious.

And thanks to everyone who participated.

I'm especially humbled to have met one of the oldest hams in our community who told stories of building the original clubhouse. Max, W8CPD is ninety-four years young and full of life. I'm so grateful.

Thanks to you for making this one really great weekend. We welcome and thank everyone who helped, participated, and made this a wonderful weekend.

Bill, AB8SC

Good morning.
On the WMTN Yahoo! Group you can find the QMN-NWS Rain Gauge Network's Standard Operating and Reporting Procedures manual. This is the most current and up-to-date version that just came out a couple of days ago. The WMTN has joined up with the QMN to help with reporting.
To find the group type in WMTN for the Yahoo! Group name. It is a listed group, membership does require approval which takes less than a day.

Best Regards,
Doc, KD8BGQ

Because of the dissolution of the Amateur Radio and Youth (ARAY) club, the GCARES board of directors has agreed to take over the sponsorship of the annual ARAY Ham Radio Swap & Shop...

The 15th annual ARAY/GCARES Swap & Shop is scheduled for Saturday, January 20, 2007, 8 AM till 12 PM, at Bentley Middle School, 1180 N. Belsay Road in Burton, Michigan.

This is a new, easier to find, location. Take I-69 to Exit 141 (Belsay Road), go North 1/4 mile. The school is on the right.

* The site is handicap accessible
* Parking is free
* All sales inside
* Talk-in will be on 147.100 MHz with 100 Hz tone
* Admission is $5 / under 12 free
* Door prizes will be given away hourly
* VE testing at 10 AM (contact Don, N8DI at 810.564.9638)

For more swap information, call Clay, KF8UI at 810.233.7889, or e-mail at kf8ui@...

To download a printable copy of the flyer click here.

2264. N8XX in Hell (Michigan) 3 February 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-16 18:46:38 UTC
From: Hank Greeb
Topic: 2264 Message: 2264

This is to announce that it is official! Yes, a bunch of West Michigan hams are going to Hell. There will be a contingent of hams who will be participating from Hell, Michigan, during the Arizona ScQRPions' F)reeze Y)our B)... Off (You fill in the letters after the B) :) Contest. Right now the contingent includes Ed, AB8DF, Cortland, KA5S, and Hank, N8XX. We're looking for some more operators, particularly experienced contesters. Please let me know of your interest and availability.

It should be one H... of a contest. Since we get a larger multiplier if the temperature is lower, we hope that Hell will freeze over. :)

And, what call to use? Why no a Special Event 1 by 1 call, N8H? This has been reserved!

Please look for us (as N8H) on all the "QRP" frequencies including 7.04, 14,060, and 21060 KHz (CW) or 7.285, 14285, 21385 KHz (SSB) between 1400Z and 2359Z 3 February.. For the path Hell to this part of Michigan during the day, forty meters should be best, but occasionally 20 meters has short enough skip for such contacts.

We will try to activate a station on the preferred mode Hellschriber, but this is whether any of us can figure out how to run those fancy things called Computers to run software.

For details on the contest, see
http://www.azscqrpions.org/FYBO2007_01072007.htm

A special, pictorial "QSL from Hell" will be provided for a #10 or larger SASE to N8XX, Hank Greeb, 5727 11 Mile Rd NE, Rockford, MI 49341-9502

Note that you do NOT have to be running <5 watts, or be outside to make this contact. We'll appreciate any and all contacts, freezing or not!

73 de n8xx

p.s. If you know any of the 5 hams who live in Paradise, Michigan, please contact them. We'd LOVE a Hell to Paradise QSO! :)

Pretty neat. I couldn't hear the school station "on the input" (maybe if they were using sideband and I had a decent preamp) but the downlink was S9+60 at times. If anyone's interested:

All
As I reported last month I am now working as General Manager of Tool Max Industrial Supply a new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant . We have tools and industrial suppliers and are looking for new things to add to the store.
We will be adding some HAM Radio items to our store. Come in and let me know what kind of radios and extras you want to see. I can get just about anything for close to the same prices at AES and HRO.
First I want to add items on consignment. Bring your items for sale in and we will sell them for you. Stop in and see the items we have now or bring your in.
Starting this Saturday January 20 and every Saturday from about 8:30AM-11:00AM I would like to host a Coffee Break with FREE Donuts,Juice and Coffee. Come in before or after your Breakfast in Ferryburg or Muskegon and have coffee with us. Just like us oldies did at H & R Electronics years ago. Looking forward to see you all this Saturday.

From: Mark Thompson
Topic: 2274 Message: 2274

D-STAR is the NEW Digital Voice AND Data Technology
That is Transforming Ham Radio as did SSB, FM & Packet Radio

Learn about D-STAR on Sunday, 1/28 at Noon after WCRA Hamfest.
The Training is at the Hilton Garden Inn next to the Hamfest/DuPage Expo Center, St. Charles.

If D-STAR is new to you or you already have a D-STAR radio then this training is for you.

Training Agenda

Introduction to D-STAR, Noon ☐1 pm by Mark, WB9QZB

How to Use D-STAR, 1 ☐ 2 pm by Kermit, W9XA

Programming Your D-STAR Radio, 2 ☐ 3 pm

Attend the Training and Get a Free Icom Hat
(Supplies Limited So Come Early)

The D-STAR Simplex Frequency at the Hamfest is 145.67 MHz.

Chicago☐s 1st D-STAR Digital Voice Repeater is now On-the-Air.
It's W9CEQ(FRRL), 442.100 at 370 ft. in Elburn, Central Kane County.

You can learn more about D-STAR at:
http://groups.yahoo.com/group/illinoisdigitalham/

Information about WCRA Hamfest on Sunday, January 28th at DuPage Expo Center available at:
http://wheatonhamfest.org/flyer2006.pdf

2281. Surplus feed line

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-18 20:31:45 UTC
From: Deater, Tim
Topic: 2281 Message: 2281

I have 3 spool ends of Andrew Heliax 1 5/8" LDF7-50A-PEA-29713-4 coax
that I am tired of looking at.

Spool 1 has 200 feet according to the markings on the cable.

Spool 2 has 183 feet

Spool 3 has a lot more, but it was dropped from the tower while it was
being installed so I don't know how good it is.

Specs are found at
http://www.andrew.com/catalog/product_details.aspx?id=1311

Personally, to me it doesn't look like there is that much cable there,
but according to the markings there is.

You can see the spools for yourself at the NC RESA complex in Fremont.
The spools are located to the north of the tower, just north past the
habitat for humanity house. I am here from 7:30 until 4:00 in the NCATS
office in the building under the tower if you have any questions.

Make me an offer. The spools are heavy! You may need a couple of
people to get them onto a trailer or something.

Hello Everyone ?.. I have been contacted by Sgt. Bo of Grand Haven Public Safety about forming class?s to train for Community Emergency Response Teams (CERT). Sgt. Bo is a trainer for CERT and we have talked about working on forming some teams for the West Michigan area with trained hams as there means of communicating with the emergency units they would be assisting. The class?s involve 18 hrs of training and I would like to know if there are hams that would be interested in going through the training and be a CERT communications team member. I do not have times and place for the training yet, but I need to know if and how much interest there is, so please drop me a e-mail at kb8odb@... if you are interested in the training ?.. 73 Don

2290. I'd train for Community Emergency Response

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-19 14:16:01 UTC
From: Hank Greeb
Topic: 2290 Message: 2290

Don:

I'd train for Community Emergency Response - that answer in obvious. I've been a communicator for Red Cross for 40 or so years (not currently certified because of red tape, but "probably" still qualified.)

But, would I submit to 18 consecutive hours (over four or five consecutive weekends) without a complete synopsis of what is involved? Probably not, because of my personal and travel schedule.

Would I eventually take 18 hours of training to become fully qualified? Probably yes, because even if I found that some parts were redundant, and identical to my past training, I'd like to find out what is so important that it takes 18 hours to teach.

Be informed that several communities around the Greater Cincinnati area (from whence I moved in late 2005) were offering one half to one day or less training courses in community emergency response. Many of my ham friends attended. They received a certificate that they had received the training. Were they "fully" trained? Probably not. But, did they have the "basic training" which would be helpful for response to a natural or man made disaster? Certainly! Did these short sessions encourage some/many of them to take even more training? Certainly? (The Cincinnati Red Cross was swamped with demand and giving extra training sessions during this period, probably because of this type of training.)

The folks in Kent County were offering similar training, only I think they required 20 hours training. When I informed the ham trainer that I thought 20 hours was a bit much to ask of the general public, he shrugged his shoulders and said "That's what we are required to do here in Michigan, and it's hard to fit all the requirements into even 20 hours."

Folks here in Michigan seem to believe:

1. That folks interested in community emergency response in Michigan have much less intellectual capacity than folks in other parts of the country AND.OR

2.. the bureaucracy sees a need to inflate the requirements. AND/OR

3. the bureaucracy doesn't understand basic human psychology which takes askance at submitting to a long regime of training without knowing what they're getting into.

I view things like this to things like First Aid training. At Red Cross one can generally find a course which takes a few hours, or one which takes a whole day, and probably one which lasts a week (though I've

never searched for one lasting that long.)

I have been contacted by Sgt. Bo of Grand Haven Public Safety about forming class?s to train for Community Emergency Response Teams (CERT). Sgt. Bo is a trainer for CERT and we have talked about working on forming some teams for the West Michigan area with trained hams as there means of communicating with the emergency units they would be assisting.

The class?s involve 18 hrs of training and I would like to know if there are hams that would be interested in going through the training and be a CERT communications team member. I do not have times and place for the training yet, but I need to know if and how much interest there is, so please drop me a e-mail at kb8odb@... if you are interested in the training ?..

2291. Leadership Seminar Saturday (Tomorrow)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-19 14:19:53 UTC
From: Bill
Topic: 2291 Message: 2291

All:

At the MAARC clubhouse in Muskegon will be a leadership seminar. The following message is a copy of a post from the club's president on this subject:

Just a reminder about the Leadership Seminar this Saturday January 20 from 9AM-3PM. So far we have a crock pot of chili on the working lunch menu. Like stone soup, any small additions you care to make to the menu enhance the final product. I would like to get some kind of count if you plan on attending. I want to make sure we have enough for everyone. The past couple of years have shown attendance of about 10 (give or take). We should have plenty of coffee and soda on hand.

The basic agenda is: going over the responsibilities of board members; going over goal setting and progress measurement; and planning for the coming year. Although the seminar is geared towards training our board members to lead effectively, any of our club members are certainly welcome to attend.

2292. Deactivated Verizon Wireless Cellphone anyone willing to part with?

Yahoo group: WestMichiganHams (2006 — 2008)

Deactivated Verizon Wireless Cellphone anyone willing to part with?

Unlike the glory days of repeater autopatch, calls are now far and few between. The Lowell Amateur Radio Club (LARC), sponsor of the 145.27-(94.8Hz) repeater has had the autopatch land line disconnected. With autopatch calls and repeater donations down, we could no longer justify the cost of a business land line.

In order to continue repeater autopatch on the cheap, we are looking for a deactivated Verizon Wireless phone which we will put on pre-paid minutes through Page Plus Cellular http://www.pagepluscellular.com

To do this, LARC will purchase a docking station which effectively turns a cell phone into a land line, which in turn can be connected to the repeater controller. Although there are other docking stations available, the only one I find that can be connected to a standard telephone, and repeater controller, is made by Phone Labs http://www.phonelabs.com with an appropriate cell phone adapter.

If you have such an item you'd be willing to donate (we're 501c3), please contact me. Below my contact info is a list of compatible phones. It has to be a Verizon phone to work with the plan we found. Thank you for your consideration.

Time: 8 PM Eastern, 7 PM Central
Freq: 144.150 MHz USB +1500 Hz (144.1515 MHz actual center)
Mode: DominoEX, 11 baud with FEC

Due to poor band conditions and low attendance (I've only had one checkin the last 2 weeks), after tonight I am suspending the net until spring. So this is your last chance to get in on it for awhile.

Mark,

My wife uses simple freedom 15 cents a min. You can setup service at Kmart or the Anti-christ store or also none as (Walmart). they use Alltell network. Good luck,

Tom w8amz

Topic: 2300 Message: 2300

Hello Everyone ... From the responce I had from my posting on Community Emergency Response Team (CERT) I see there is interest and I will post more information on class?s and what the class?s are about and times and all that good stuff as they are avalible ....73 Don

2301. Speaking of Contests this weekend

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-20 01:57:59 UTC
From: K8TB
Topic: 2285 Message: 2301

This weekend also is the ARRL Winter VHF contest. Yup, the bands are basically dead, but fire up the radios anyway. It starts Saturday at 2PM. I believe that Dave, KF8QL,f from the southern Grand Rapids area will be mobile roving, so listen for him, and listen for Erv, K8EB, just NE of GR will be on all bands. He will be running multi op.

If you have one of those IC-706/7000 etc types radios, start poking around 50.125-50.150, 144.2-.25 and 432.1-.15 starting Saturday at 2pm/

QST de W1AW
ARRL Bulletin 4 ARLB004
>From ARRL Headquarters
Newington CT January 19, 2007
To all radio amateurs

SB QST ARL ARLB004
ARLB004 Codeless Amateur Radio testing tentatively begins February 23

The ARRL has learned that the FCC's Report and Order (R&O) in the ''Morse code proceeding,'' WT Docket 05-235, http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-178A1.pdf, is scheduled to appear in the Federal Register Wednesday, January 24. Assuming that occurs, the new Part 97 rules deleting any Morse code examination requirement for Amateur Radio license applicants would go into effect Friday, February 23, 2007. The League cautions that this date is tentative, pending official confirmation and publication.

''This change eliminates an unnecessary regulatory burden that may discourage current Amateur Radio operators from advancing their skills and participating more fully in the benefits of Amateur Radio,'' the FCC remarked in the Morse code R&O.

Publication of the R&O in the Federal Register starts a 30-day countdown for the new rules to go on the books. Rules and regulations that appear in the Federal Register constitute their official version.

Deletion of the Morse requirement is a landmark in Amateur Radio history. Until 1991, when a code examination was dropped from the requirements to obtain a Technician ticket, all prospective radio amateurs had to pass a Morse test.

On or after the effective date of the new rules, an applicant holding a valid Certificate of Successful Completion of Examination (CSCE) for a higher license class will be able to redeem it for an upgrade. For example, a Technician licensee holding a valid CSCE for Element 3 (General) could apply at a VEC exam session, pay the application fee -- which most VECs charge -- and receive an instant upgrade. A CSCE is good only for 365 days from the date of issuance.

The new rules also mean that all Technician licensees, whether or not they've passed a Morse code examination, will gain HF privileges identical to those of current Novice and Tech Plus (or Technician with Element 1 credit) licensees without having to apply for an upgrade. Novices and Technicians with Element 1 credit have CW privileges on 80, 40, 15 meters and CW, RTTY, data and SSB privileges on 10 meters.

The FCC R&O includes an Order on Reconsideration in WT Docket 04-140 -- the so-called ''omnibus'' proceeding. It will modify the Amateur Service rules in response to ARRL's request to accommodate automatically controlled narrowband digital stations on 80 meters in the wake of other rule changes that were effective last December 15. The Commission designated 3585 to 3600 kHz for such operations, although that segment will remain available for CW, RTTY and data.

The ARRL has posted all relevant information on these important Part 97 rule revisions on its ''FCC's Morse Code Report and Order WT Docket 05-235'' Web page, www.arrl.org/fcc/morse/.

2304. Re: Deactivated Verizon Wireless Cellphone anyone willing to part with?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-20 05:44:42 UTC
From: Hank Greeb
Topic: 2292 Message: 2304

A not for profit organization like a repeater group can get a home phone rate for their repeater.

After all, one cannot use the repeater for business, so in every case where it has been questioned, a home phone line and rate has been obtained. I don't know the details of how this has been negotiated, but if anyone wishes to know, I can refer you to folks who have been successful.

Of course, as you say, this is becoming a moot point, because cell phones are taking most of the traffic which formerly was handled via repeater autopatches.

This Sunday evening, the Flying Pigs Amateur Radio Club International will be holding its monthly Run For The Bacon. This is a friendly, two hour QRP CW Sprint, which is open to ALL radio amateurs, will last from 9:00 - 11:00PM EST (0200-0400 UTC Monday).

You may work stations once per band on 160, 80, 40, 20, 15 or 10 Meters. Suggested starting frequencies are 1.812, 3.562, 7.044, 14.062, 21.062, and 28.062 MHz.

The exchange is RST, S/P/C (State, Province, Country) and Flying Pigs membership number. If you're not a member of the Flying Pigs, and would like to be; then please click on the "membership" hyperlink on .http://www.gentzow.com/fpqrp/ Otherwise, non-members can just use their output power figure.

You can report your score via the Autolog page which can be found at : http://gentzow.com/fpqrp/autolog.asp or you can mail your logs to the address given on the Autolog page. The deadline for logs is January 27th at 2400 UTC.

Hope to catch you on the air Sunday evening!

Codeless Amateur Radio Testing Regime Appears Set to Begin February 23

NEWINGTON, CT, Jan 19, 2007 -- The ARRL has learned that the FCC's Report and Order (_R&O_ (http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-178A1.pdf)) in the "Morse code proceeding," WT Docket 05-235, is scheduled to appear in the Federal Register Wednesday, January 24. Assuming that occurs, the new Part 97 rules deleting any Morse code examination requirement for Amateur
Radio license applicants would go into effect Friday, February 23, 2007. The League cautions that this date is tentative, pending official confirmation and publication.

"This change eliminates an unnecessary regulatory burden that may discourage current Amateur Radio operators from advancing their skills and participating more fully in the benefits of Amateur Radio," the FCC remarked in the Morse code R&O.

Publication of the R&O in the Federal Register starts a 30-day countdown for the new rules to go on the books. The FCC reportedly completed its work on the R&O this week and forwarded it to the Federal Register receiving desk. The Federal Register must make the document available for public inspection 24 hours prior to publication. Federal Register personnel are constrained by law from saying if a particular R&O is in the publication queue, however. Rules and regulations that appear in the Federal Register constitute their official version.

Deletion of the Morse requirement is a landmark in Amateur Radio history. Until 1991, when a code examination was dropped from the requirements to obtain a Technician ticket, all prospective radio amateurs had to pass a Morse test. Once the new rules are in place, Amateur Radio license applicants no longer will have to demonstrate Morse code proficiency at any level to gain access to the HF bands.

On or after the effective date of the new rules, an applicant holding a valid Certificate of Successful Completion of Examination (CSCE) for a higher license class will be able to redeem it for an upgrade. For example, a Technician licensee holding a valid CSCE for Element 3 (General) could apply at a VEC exam session, pay the application fee -- which most VECs charge -- and receive an instant upgrade. A CSCE is good only for 365 days from the date of issuance. Candidates for General or Amateur Extra between now and the effective date of the new rules still must have Element 1 (5 WPM Morse code) credit to obtain new privileges, however.

The new rules also mean that all Technician licensees, whether or not they've passed a Morse code examination, will gain HF privileges identical to those

of current Novice and Tech Plus (or Technician with Element 1 credit) licensees without having to apply for an upgrade. Novices and Technicians with Element 1 credit have CW privileges on 80, 40, 15 meters and CW, RTTY, data and SSB privileges on 10 meters.

The FCC R&O includes an Order on Reconsideration in WT Docket 04-140 -- the so-called "omnibus" proceeding. It will modify the Amateur Service rules in response to ARRL's request to accommodate automatically controlled narrowband digital stations on 80 meters in the wake of other rule changes that were effective last December 15. The Commission designated 3585 to 3600 kHz for such operations, although that segment will remain available for CW, RTTY and data.

The ARRL has been posting all relevant information on these important Part 97 rule revisions on its "_FCC's Morse Code Report and Order WT Docket 05-235_ (http://www.arrl.org/fcc/morse/) " Web page.

2314. ISA network card needed for SSTV server

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-22 03:29:19 UTC
From: Joe Veldhuis
Topic: 2314 Message: 2314

I now have the computer for the SSTV image server on my bench, and will probably spend a good portion of the evening getting the OS set up on it. Unfortunately, the computer does not have a network card. I have a spare PCI card, but this computer only has ISA slots. So, does anyone have an ISA Ethernet card sitting around somewhere that they'd be willing to give us?

2317. CPR Saturday - Ottawa County

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-22 18:49:25 UTC
From: Steve Vander Hill
Topic: 2317 Message: 2317

Hello, below is an email from Ed Wirth, Director of Health & Safety at the American Red Cross of Ottawa County, reference to their yearly CPR Saturday, which provides FREE Adult CPR/AED training all in one Saturday morning.

Register early, slots fill up quick.

Best regards,

Steve N8UJD

Thank you, Chris. I was given a Motortola Startac this weekend that looks like it will work.
If it doesn't, I'll give you a call

Thanks Mark and Hank for the comments about replacing our repeater land line with a cell phone.

"You can expect to pay 25 cents per minute and also expect to have minutes deducted for each
month of use, depending on the service provider."
The plan we're looking at is 12 cents / minute, unless you leave thier service area where it
goes up to 99 cents. Obviously, I already made certain the repeater location has a good signal in the service area. As long as you add minutes every 4 months, unused minutes roll over. There is no monthly minimum. I know all this for a fact because I personally have a cell phone with this plan for over a year now, with no surprize "gotcha" fees. Works for me because I'm not much of a phone gabber.

"I don't see the need for a business line. They are more expensive than non-business lines."
"A not for profit organization like a repeater group can get a home
phone rate for their repeater."
The repeater controller is located at a non-residence. As such, we could not get a residential rate, period. I've heard of groups somehow able to pull this off, but when we tried, we got absolutley nowhere.

"If the patch was used for 10 minutes a week with 2 calls on different days, a pre-pay bill would be about 20 dollars."
10x.12=$1.20 per week or just under $5 per month. Much more econmical than the $30 to $40 per month the land line was running.

"The bad thing about pre-pay is that if a call is made and not dropped you get charged for the time. Also, when the pre-pay time is up so is the conversation. Service will abruptly halt and not be re-activated until more money is put on the account. This would be very bad in an emergency scenario."
Excellent points. We'll just have to keep track of minutes remaining. Although you point out
some valid shortfalls, we're in a position where we can't ignore the cost savings. Its better this way than no autopatch at all.

I want to thank Josh and Chris for offering phones. I was given a Motorola Startac over the weekend by Dennis N8CUF that looks like it will work. If not I will contact Josh and Chris.

I got one (well, two actually) from Alan NV8A today. Thanks to all who offered cards.

Working with an old 486 sure stands in stark contrast from what I'm used to these days. Having to put the boot partition in the first 1024 cyls of the hard disk (at least it can handle the 4.3 GB disk I put in there!), no USB, no PCI slots, no plug-and-play, no software power control, and a non-IDE 2x CD-ROM drive. But despite all of this it works fine, and now it's even on the internet! Next step is to get the sound card working. Do the numbers 220, 5 and 1 bring back unpleasant memories for anyone else?

-Joe, N8FQ

2324. Code Gone, Party On?!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-24 15:13:07 UTC
From: Bill
Topic: 2324 Message: 2324

All:

The word is out and the code is gone. Friday, February 23 the end of code testing for General and Extra is history.

Jim, K8JE has suggested the VE folks hold a special commemoration of the occasion disguised as a party. The idea? Hold a late night VE test session, bring in candidates and pizza, and administer the test at the stroke of midnight.

Sounds like fun? Are you ready? Want to get this ball rolling?

I'm all wet and you'd never get three VE guys to stay out that late on a weeknight?

What say you?

Bill, AB8SC
MAARC guy

2325. Fw: ARRL Headquarters Reoganization Announced

Yahoo group: WestMichiganHams (2006 — 2008)

Subject: [frrl] ARRL Headquarters Reoganization Announced

24 JAN 2007 - 1140 CST

Over the past few weeks, some of you have asked me about Wayne Mills resignation and more important, who will take his place and manage Logbook of The World (LoTW).

Now that ARRL staff members have been fully briefed, the full reorganization has been published on the ARRL website at:

http://www.arrl.org/news/stories/2007/01/22/100/?nc=1

Dave Patton, NN1N, is now the head of the combined Membership Services Department (Wayne's job) and the Field & Education Services Department now called the Programs & Services Department (PSD). ARRL's education programs are being moved to a separate Education Department. The head of this department is yet to be determined.

Day-to-day management of LoTW is now in the very capable hands of Kathy Allison, KA1RWY. Kathy had been providing part-time support of LoTW and is very good at helping users establish and manage their LoTW accounts.

However, if users' problems with LoTW are due to user lack of experience with setting up and using the various versions of Microsoft Windows or Linux, ARRL staff is not obligated to provide computer operating system user support. If prospective and current LoTW users have operating system (OS) problems, they should contact Microsoft Customer Support, the various Linnux support groups, or a knowledgeable friend. In the past, the large amount of staff time spent on this type of problem has caused a severe overrun in LoTW support costs which must be reduced.

In an effort to reduce this support cost, I understand the instructions for using LoTW (user interface) are being re-written for clarity and ease of use. This change should be in place before the end of this year.

- Dick Isely, W9GIG
ARRL Central Division Director

2328. CODE PROFICIENCY PROGRAM FIELD PILOT TEST

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-26 02:45:02 UTC
From: Tom VanderMel
Topic: 2328 Message: 2328

Please pass to all VE's

Subject: CODE PROFICIENCY PROGRAM FIELD PILOT TEST

[As always, reply only to k8je@.... Do not hit the REPLY buttom.]

TO GREAT LAKES DIVISION ARRL VE TEAMS

If you are interested in learning about a pilot project that I am putting together to perform Field Code Proficiency testing, please get in touch with me. I have been authorized to develop a do-it-locally version of the ARRL Code Proficiency Program that has been a fixture on W1AW for decades. The purpose of this project is to determine if this voluntary program will help stimulate further interest in Morse code.

As I currently envision the project, ARRL VEs will manage the program in their home communities. I am responsible for selecting 3 or 4 ARRL VE teams that wish to participate, share the tentative outline of the project with them and enroll them into the Field Test.

The first step in identifying VE teams to participate in the program is to gather representatives of a number of interested teams into a telephone conference call (no cost to the participants) to discuss a variety of aspects of how the project will operate in their hands.

I am looking in particular for VE teams that cover fairly large ham populations and who might be expected to have a number of area amateurs wish to participate in Code Proficienty testing at a local site.

If your VE team is interested in discussing this pilot poject, please send me the name, call, city and E-mail address of the person who would represent you in the teleconference. Send this information to k8je@....

Tnx, 73,

Jim, K8JE

I have lots of new things for sale at the Tool Max Store this week.

Just In Used Equipment on Consignment

HF Radios Icom and Ten-Tec
HF Tuners
HF set of Antennas
VHF Tuner
VHF/UHF SWR Meters
HF SWR Meter
VHF Hand Held Radio
VHF/UHF Hand Held Radio
VHF Mobile Antenna
20 Ch.Radio Shack Hand Held Scanner
Icom Desk Microphone
Low Pass filter
VHF radios that need work
VOM in good condition
Heathkit items
Other items coming in Daily.
For more information call me at 231 798-7898

Come in and Join us for FREE Coffee and Donuts every Saturday mourning from 9AM-12PM

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools, industrial suppliers and Ham radios for sale.

SB QST @ ARL $ARLB006
ARLB006 ARRL Board accepts National Emergency Response Planning
Committee report

ZCZC AG06
QST de W1AW
ARRL Bulletin 6 ARLB006
From ARRL Headquarters
Newington CT January 26, 2007
To all radio amateurs

SB QST ARL ARLB006
ARLB006 ARRL Board accepts National Emergency Response Planning
Committee report

The ARRL Board of Directors accepted the Report of the National
Emergency Response Planning Committee (NERPC) when it met January 19
and 20 in Windsor, Connecticut. Upon dissolving the committee with
its thanks, the Board set in motion a process to identify and
implement action items in the report as soon as possible. ARRL First
Vice President Kay Craigie, N3KN, chaired the 13-member NERPC,
charged with developing comprehensive recommendations to improve the
League's response to regional, national and international disasters.
Among other things, panel members evaluated the responses and
actions of ARRL and the Amateur Radio Emergency Service (ARES)
during Hurricane Katrina as well as lessons learned.

"If 'lessons learned' are not followed by 'behaviors changed,' then
the lessons have not been learned at all," the report concludes. The
report describes disaster preparedness as "a moving target, moving
faster all the time." No recommendations, plans or systems should be
considered "the permanent answers for all circumstances and
hazards," the report asserts.

The unprecedented scope of the Katrina response placed ARRL
Headquarters into a leadership coordination role through
national-level requests for help from served agencies such as the
American Red Cross. While the level of expertise in emergency
communications and emergency management among US radio amateurs is
growing, the report noted, so is the expectation that the ARRL
provide first-rate leadership and guidance.

Among the report's wide-ranging recommendations and suggestions:

* enhance ARRL and ARES training in basic message handling.

* develop a continuing education course covering installation, configuration, and use of Winlink 2000 for e-mail.

* formally establish a national ARES volunteer database for use during major disasters and establish training criteria.

* institute a Major Disaster Emergency Coordinator (MDEC) function to coordinate responses to large-scale national or regional disasters or emergencies.

* become better acquainted with the emergency response needs of distant ARRL sections, such as Pacific, Puerto Rico, Virgin Islands and Alaska.

* improve working relationships with national-level served agencies.

* ensure ARRL staff training in the Incident Command System (ICS) and National Incident Management System (NIMS) and, as necessary, adapt ARRL's emergency response structure to the Unified Command model.

In addition, ARRL President Joel Harrison, W5ZN, has appointed an ad hoc committee to study issues relating to background investigations as they apply to ARRL Amateur Radio volunteers and to recommend a background investigation policy.

2333. D-STAR Introduction & How to Use Training, Noon - 3 pm @ WCRA Hamfest, Hilton Garden Inn, St. Charles

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-27 18:02:12 UTC
From: Mark Thompson
Topic: 2274 Message: 2333

D-STAR is the NEW Digital Voice AND Data Technology
That is Transforming Ham Radio as did SSB, FM & Packet Radio

Learn about D-STAR on Sunday, 1/28 at Noon after WCRA Hamfest.
The Training is at the Hilton Garden Inn next to the Hamfest/DuPage Expo Center, St. Charles.

If D-STAR is new to you or you already have a D-STAR radio then this training is for you.

Training Agenda

Introduction to D-STAR, Noon ☐1 pm by Mark, WB9QZB

How to Use D-STAR, 1 ☐ 2 pm by Kermit, W9XA

Programming Your D-STAR Radio, 2 ☐ 3 pm

Attend the Training and Get a Free Icom Hat
(Supplies Limited So Come Early)

The D-STAR Simplex Frequency at the Hamfest is 145.67 MHz.

Chicago☐s 1st D-STAR Digital Voice Repeater is now On-the-Air.
It's W9CEQ(FRRL), 442.100 at 370 ft. in Elburn, Central Kane County.

You can learn more about D-STAR at:
http://groups.yahoo.com/group/illinoisdigitalham/

Information about WCRA Hamfest on Sunday, January 28th at DuPage Expo Center available at:
http://wheatonhamfest.org/flyer2006.pdf

Now that's room service! Choose from over 150,000 hotels
in 45,000 destinations on Yahoo! Travel to find your fit.

I have hundreds of Ferrite Toriodal Cores . My son has them for whatever a 12 yr. old needs and my wife uses them to keep notes on the fridge. I have them all over the shack and in the garage . I love magnets . I have a huge supply of Rare Earth Magnets .

k8mhz@... wrote: Check out the video, it's a riot!

I am sure it will remind many of us of ourselves when we were young. My mother used to buy radios at yard sales for me to dissect. The deal was that if she kept buying them I wouldn't go after the household radios and other appliances.

What is real funny is that I was at a doctor's appointment one day and they were hearing an FM station in their ultrasound machine. The techs from the company couldn't figure it out. I looked at the leads to the machine and did some quick math and it came out that the leads were a near perfect 1/2 wave on the FM broadcast band. I took the lead home and also found the shield had broken. I repaired the shield and added enough length in the lead to be able to put several wraps around a ferrite toroid and still keep the same working length of the lead. Problem solved.

Check out the vid. It's cool!

Hey, do you know the difference between an engineer and a technician?

Engineers design all the wonderful gadgets in life, and a technician can make them work anyway.

By the way , I know the transducer probe is the main part of the ultrasound machine. The transducer probe makes the sound waves and receives the echoes. It is, so to speak, the mouth and ears of the ultrasound machine. The transducer probe generates and receives sound waves using a principle called the piezoelectric (pressure electricity) effect, In the probe, there are one or more quartz crystals called piezoelectric crystals. When an electric current is applied to these crystals, they change shape rapidly. The rapid shape changes, or vibrations, of the crystals produce sound waves that travel outward. Conversely, when sound or pressure waves hit the crystals, they emit electrical currents. Therefore, the same crystals can be used to send and receive sound waves. The probe also has a sound absorbing substance to eliminate back reflections from the probe itself, and an acoustic lens to help focus the emitted sound waves.

You say you heard FM radio .

Just curious .

The meeting location is at the Muskegon County Sheriff's Department, Emergency Services Department, 1611 Oak Ave., Basement floor. Muskegon, MI.

It's located across the street from Mercy-General Hospital. Apple Ave & US 31 would be the off ramp from the X-way. For Muskegon Co people it's the old County Health Department building.

We will be monitoring 146.520 if anyone needs directions to the facility.

Last year at this time, amateur radio enthusiasts around the world were eagerly anticipating the beginning of what would be THE Dxpedition of 2006 (and, perhaps, the decade). This was the activation of Peter I Island, located near the coast of Antarctica. In November 2006, a DVD of the 3Y0X team's intrepid foray to the coldest of the cold DX entities was released. Guess what? We have a copy! We're going to show it to you, if you attend our next Muskegon Area Amateur Radio Council meeting. The DVD presentation lasts for about an hour, following by our regular business meeting. All are welcome to come. It's as much a travelogue as it is a documentary of the complexities involved in a DXpedition of this magnitude. We'll be showing the DVD beginning at 7:00 p.m., February 1st, at the clubhouse located at 2888 Scenic Drive, Muskegon. Come and be amazed and leave feeling not so rotten about the snowy weather here in Michigan.

Hi K8MHZ! :-)

Morning Mark! Did you know that if either you or I "slur" our call, it seems to sound just like mine!! haha I don't know how many times I've heard your call, and go to pick up my mike!! k8mhz ~ k8mic Too funny. Have actually considered changing it ... but what the heck. :-)

I read your posting and must agree. CW has been such a stalwart in amateur radio. I personally like watching old western's in B/W and when I hear the teletype rattling, or when watching an old war picture on TV and seeing the communications lad doing his crafty thing with his key ... oh boy, those were the days! I'm drawn to recognize that what I just described has one common descriptor ~ "old" (unintentionally).

As one who travels on average away from home in excess of 40 weeks a year, having to find the 'focus' time in different hotel settings around the nation, and north America, to study for CW & higher privileges has been tough. However, once qualified after that date next month, I'll feel more like I can use the ability, talent and equipment I've been blessed to possess.

I have personal acquaintances who are sailing (as we speak) through the Caribbean and are hams out of Montreal. I hear them as plain as day, every day at 0700 and just because I don't possess the CW/Gen. privilege, I can't speak with them (giving strength & weather reports) and they don't use CW at all. This is one tiny, personal advantage these new privileges will provide me, when qualified, next month.

Therefore, "doing away" with CW doesn't really have to happen for all of us that either like to use it or WISH WE COULD, and at the same time ... permit the other ham operators to expand their horizons accordingly.

I just hope the anticipated "flood" of new hams on HF won't overload the frequencies (is that all bad?) and that courtesy, self-governing operation, and following the law will rule the day.

73

2352. Update on Expedition to Hell (Michigan) 3 Feb 07

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-29 18:32:56 UTC
From: Hank Greeb
Topic: 2352 Message: 2352

Thought you all needed an update on the Expedition to Hell (Michigan) where three hardy souls will brave the elements to generat a "signal from Hell." Yes, it's official, and Ed, AB8DF, Courtland, KA5S, and Hank, N8XX will activate the special event call N8H from the parking lot in the rear of the General Store in Hell, Michigan, on Saturday February 3 2007 beginning at aproximately 1400Z and staying until approximately 2359Z.

Unless the NOAA weather forecast is completely wrong, we expect to seel Hell frozen over, since the low temperature is predicted to be near 4° on that day, and the high is not supposed to reach 15°F.

KA5S and N8XX believe they've figured out how to operate Feld Hell (Hellschriber), which appears to be the preferred mode from that location. We'll be trying Feld Hell at the top of each odd hour, on 7.068-7.072, 14.075-14.082 and possibly 21.068-21.072 MHz. Other times look for us on the standard QRP frequencies in the 40, 20 and 15 Metre bands on CW and SSB. There's a 10-10 international 10 metre contest at the same time, so if 10 metres is open, we'll probably appear there.

I'd appreciate announcement of this activity on any local club reflectors and at club meetings, such as the one listed for 1 February. The Hellxpediton isn't nearly as tough as the expedition which will be discussed there, but the three of us who are going there hope to have a lot of fun.

Barb, KD8FBY:

Congratulations and welcome to a wonderful hobby and a pretty good group of folks, too.

West Michigan hams is always around to answer your questions. Take some time to lurk and learn.

We also encourage you to look at the local radio club, the MAARC. We'll be meeting Thursday evening, 7:00 pm at our clubhouse, 2888 Scenic Drive. If you have a radio, tune to our two meter repeater and we'll give you directions. Otherwise find us on the www. The program on Thursday is a wonderful story of folks traveling way, way, way down south to play radio on a very remote island in the Antarctica (or is that the Antarctic?) area. You'll enjoy the story and the video.

There are tons of ways to enjoy the hobby. You will certainly enjoy hearing of our particular brand of radio in the coming years.

2359. 2-meter and 440 antenna for an RV

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-01-31 04:09:39 UTC
From: T Behler
Topic: 2359 Message: 2359

Hi, all.

My XYL and I just traded up from our old 18-foot travel trailer to a drivable motor home. Just for the record, it's a 31-foot Holiday Rambler Atlantis.

I'm in the process of getting workable ham antennas on the unit.

I have been working with, and getting a lot of help from a professional RV service mechanic who works for the dealer where we bought the RV, and who just happens to be a very knowledgeable ham.

MY HF screw-driver-type antenna is installed on the back left-hand side of the RV, and seems like it will work just fine with the auto-tuner I use with it.

My problem comes up with getting a good workable 2-meter and 440 antenna.

When we had the old travel trailer, I used an aluminum J-pole antenna made by KC8YOE on a
painter's pole, that probably stood a good 10 or 12 feet above the trailer, in free space. And, it worked just fine.

I have tried mounting that same J-pole to the ladder of the RV, but my SWR's are a bit questionable, probably due to RF coupling with the ladder and the alluminum siding on the RV. At our local 2-meter repeater frequency, of 146.740 with a negative off-set, the SWR is about 1.6 to 1, but when I try repeaters in the 147 MHZ range, my SWR goes up to about 2.2 to 1.

Does anyone have any thoughts as to how I might correct for this SWR problem?

Or, should I be thinking of a totally different antenna arrangement for the RV for 2 meters and 440?

If I should think of a different antenna arrangement, what might be suggested?

I am now on a rather limited budget, especially since we bought the RV (HI! HI!), but I could spend some money if I had to.

Any helpful suggestions would be most appreciated.

Thanks, and 73 from Tom Behler: KB8TYJ, Big Rapids, MI

I would say setting up an antenna that takes advantage of the very big ground plane provided by the motorhome would be your best bet. I like NMO mounts, but you have to drill holes. Of course, you'll probably keep the antenna on there forever, so go for it!

From: Chris Schulte
Topic: 2358 Message: 2363

Actually Al, he may be using a watt meter that LDG electronics makes. It has a speech synthesizer on it. Not sure how well it works as compared to other meters, but seeing as how he is totally blind, that's possibly what he is using, Tom, can you give us an idea of that? If you are using that kind of meter, I'd be interested in knowing how you've found it to work. 73,
Chris,
w8cjs

2365. Re: [WestMichiganHams] 2-meter and 440 antenna for an RV

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-01 00:10:37 UTC
From: T Behler
Topic: 2359 Message: 2365

Hi, al.

Well, the device I use to measure SWR is a talking SWR meter that is manufactured by a guy out of Quebec, Canada named Remy Simmard. I think his call is VE2AZZ.

Here are some more specific SWR readings with the KC8YOE j-pole. For these readings, I used 5, 10 and 45 watts via a Kenwood TMV7A mobile rig.

On the Big Rapids 146.74 2-meter repeater, my SWR was 1.6 to 1. Keep in mind that the transmit frequency was 146.140. On 146.52, I believe my SWR was 1.7 to 1.

Then, I shifted up the band to the Grand Rapids IRA link frequency of 147.160. Since that repeater pair involves a positive offset, the transmit frequency is 147.760.

At that frequency, my SWR was 2.2 to 1. This was true at all three power levels mentioned before.

This leads me to believe that the antenna is resonating somewhere probably in the lowest part of the 2-meter band, maybe around 144 or 145 MHZ.

I should point out that I didn't seem to have this problem when I used the YOE J-pole on my older travel trailer. In that case, the antenna was mounted on the front of the trailer, using a painter's pole to get me 10 or 12 feet above the trailer.

I have the YOE J-pole currently mounted to the side of the aluminum trailer ladder. One thing I would like to try is taking a piece of rubber garden hose to insulate the mounting bracket of the antenna from the aluminum ladder, to see if that makes any difference.

I hope this information helps.

I'll be looking for any more questions that you have, or any info you can provide.

I'm willing to spend the money for a better antenna for the RV, but don't want to do this if I don't have to, and certainly don't want to spend any more money than necessary.

Subject: Re: [WestMichiganHams] 2-meter and 440 antenna for an RV

Hi Tom

The J pole antenna is a stable design which is a half wave
antenna. It does not need a ground plane to work with such as a ground
plane antenna would. In theory a J pole is the electrical equivalent of a
vertical dipole. One problem that comes into play with J poles is
decoupling the coax feed line from the antenna so that the coax does not
radiate RF. A small balun at the feed point of the antenna will do the
trick. You mention your SWR is questionable. Can you provide some specific
numbers ????? Keep in mind that a half wave radiator does not provide a 52
ohm direct match with coax. You're going to see SWR above 1:1. The next
question is what piece of equipment you use to make your measurements ?? I
would question any measurements from an MFJ analyzer or similar piece of
equipment until they are compared to a standard such as Bird wattmeter.
What you see may not be a true analysis.

Al....KV8X

Subject: [WestMichiganHams] 2-meter and 440 antenna for an RV

Hi, all.

My XYL and I just traded up from our old 18-foot travel trailer to a
drivable motor home. Just for the record, it's a 31-foot Holiday Rambler
Atlantis.

I'm in the process of getting workable ham antennas on the unit.

I have been working with, and getting a lot of help from a professional RV
service mechanic who works for the dealer where we bought the RV, and who
just happens to be a very knowledgeable ham.

MY HF screw-driver-type antenna is installed on the back left-hand side of
the RV, and seems like it will work just fine with the auto-tuner I use with
it.

My problem comes up with getting a good workable 2-meter and 440 antenna.

When we had the old travel trailer, I used an aluminum J-pole antenna made
by KC8YOE on a
painter's pole, that probably stood a good 10 or 12 feet above the trailer,
in free space. And, it worked just fine.

I have tried mounting that same J-pole to the ladder of the RV, but my SWR's
are a bit questionable, probably due to RF coupling with the ladder and the
alluminum siding on the RV. At our local 2-meter repeater frequency, of

146.740 with a negative off-set, the SWR is about 1.6 to 1, but when I try repeaters in the 147 MHZ range, my SWR goes up to about 2.2 to 1.

Does anyone have any thoughts as to how I might correct for this SWR problem?

Or, should I be thinking of a totally different antenna arrangement for the RV for 2 meters and 440?

If I should think of a different antenna arrangement, what might be suggested?

I am now on a rather limited budget, especially since we bought the RV (HI! HI!), but I could spend some money if I had to.

Any helpful suggestions would be most appreciated.

Thanks, and 73 from Tom Behler: KB8TYJ, Big Rapids, MI

Chris:

As I indicated in an e-mail a bit ago, I'm using a talking SWR meter that's designed by a Canadian ham named Remy Simard.

I bought it about a year before the LDG units came out.

I've always wanted an LDG unit, but haven't had the bucks for it so far, so have stuck with this other model in the meantime.

It seems to be fairly accurate on HF, but I haven't had as much experience with it on 2 meters.

And, it doesn't measure SWR on 440.

So, I'm not sure how totally accurate it is, but at least it seems to give me ball park figures.

2372. Emergency Radio Web Site

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-01 14:49:05 UTC
From: Bill
Topic: 2372 Message: 2372

All:

The ARRL web site is beginning a new site dedicated to emergency radio. There you'll find tons (or should this be megabytes?) of information quite useful to not only the individual family and friends of hams but also useful to emergency communications organizations.

Visit: http://www.emergency-radio.org/

I really liked the video files.

There is a related story on the ARRL web page highlighting this asset. Visit and enjoy!

Bill, AB8SC
MAARC guy

2373. SSTV radar image server online!

Yahoo group: WestMichiganHams (2006 — 2008)

From: Joe Veldhuis
Topic: 2373 Message: 2373

Last Wednesday at about 7 PM, K8TVZ, N8XPQ and I went over to the Manley tower in Holland and put the much-anticipated Ottawa County SKYWARN SSTV image server on the air. The radio equipment and software were found to perform almost flawlessly, but we had some problems with the cable modem. N8XPQ resolved the issue and hooked the modem back up this morning at about 10:15 AM. Initial tests showed that the system is now 100% operational. You should hear it IDing every 10 minutes on 445.125 MHz FM.

I have compiled a user's manual:
http://www.electroblog.com:8090/sstvwx.pdf

And a 3x5 command reference card:
http://www.electroblog.com:8090/sstvwx_ref.pdf

Now we need to gather coverage data. Get an image from the system (I'd suggest the WOOD-TV local radar, slot 12) and send me a signal report. Signals to the north (along 136th Avenue) will be relatively poor due to shadowing from the tower (the antenna is on a sidearm on the south side of the tower), but I have been able to work it from my home station, 13 miles straight north from the site. Our goal is to provide acceptable-quality images to HTs and handheld scanners throughout at least the western half of the county. Commanding the system from such stations is not as important. You may need a base or high-power mobile station to command it from the northern part of the county.

If you have any questions about using the system that the manual doesn't answer, tell me.

-Joe, N8FQ

2375. Reminder N8H, the signal from Hell (Michigan), during FYBO 3 Feb 07

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-01 17:06:21 UTC
From: Hank Greeb
Topic: 2375 Message: 2375

This is to a reminder to all West Michigan Hams that, on February 3, 2007, between 1400z and 2359z several hams are "going to Hell" (Hell, Michigan, that is) to operate during the AzScQRPions "F)reeze Y)our B)... O)ff (you fill in the letters after the B) :) (FYBO) contest. So far, the contingent will include Ed, AB8DF, Cortland, KA5S, Jim, K8SIA, and Hank, N8XX. A special event call of N8H has been reserved. We'll be operating on all the "QRP" frequencies, 40 through 15 metres. We'll try 80 metres if it looks like it might be opening up after 2100z or so.

Note that you don't need to operate outside (Freezing) to contact us. And, you can operate above 5W, if you're NOT in the contest for points. We'll appreciate, and respond to all calls. A special pictorial "QSL from Hell" will be sent to those who send us a #10 or larger SASE to the QTH listed for N8XX on qrz.com

Details on the contest, are at
http://www.azscqrpions.org/FYBO2007_01072007.htm

Note, that the temperature is supposed to be well below freezing, so it would appear that Hell will be frozen over for our event! :)

73 de n8xx Hg (operating as N8H during FYBO 2007)

Hello Everyone ?.
We almost dodged the snow this winter ? but then again we live in Michigan so we put up with lake effect snow ?.
I have been contacted by Grand Haven Public Safety for help with a 5K Road Race on Saturday, February 17th. The Run is for 9:00am to 10:00am and we should be clear by 10:30am by the latest. We will be meeting to get assignments starting at 8:00am so we can be in place by 8:30, some places along the route we will be assisting GHPS with traffic. At this time I do not know who is putting on the race and what the route will be, I will up date you on that as soon as I know.
If you can help please send me a email at kb8odb@... or call me at 616-846-7307 or let John Fisher know you can help.
Thanks for all your help in the past and I hope to see you soon ?. 73 Don Meyer KB8ODB
P.S. Some of our regular helpers have gone south for the winter so if you could please consider helping out with this event we can use you .

Donald Meyer - KB8ODB

Date: 2007-02-02 16:42:20 UTC
From: Alan NV8A
Topic: 2386 Message: 2386

I have a 19" Sony G400 CRT monitor with a couple of small scratches on the faceplate and a too-bright but low-contrast display: I don't think the problem is in the tube itself.

It's free to anybody who feels like fiddling with it. I'm in Holland Township. but I could bring it to the HARC miniswap tomorrow as long as I know I don't have to bring it home again.

From: Bill
Topic: 2389 Message: 2389

Not unlike Chicken Little's cry, "The sky is falling, it hit me on the head!" the end of code testing for amateur radio is coming and will be here in late February.

Are you ready?

Technicians wanting to upgrade and citizens entering the hobby will all benefit from the new conditions related to the license testing regimen. You can now get a ham ticket and travel up the ranks and through the three license tests without suffering the trials of Morse code.

It is suggested that everyone study hard and be ready when the FCC takes away the code requirement. To encourage this all local hams are being enticed with a carrot reward of sorts disguised as a party. Yep, we'll enjoy a licensing party opportunity and you are invited.

The code test goes away and the new day dawns February 23, a Friday morning at midnight, local time. To celebrate we are having an open shack night, last minute cram session, commiserating in public blues event, and celebration culminating with license testing at midnight. Deb, KC8WSG and the Volunteer Examiners squad are hosting a fun evening of free food, fun, radio, open shack (yep, pass the test and get on the air that night, too), study, and more fun Thursday evening until the wee hours of Friday morning, February 22 and 23.

Break out the books and begin chasing those on line tests for your upgrade or entry into the ham fraternity. Tom, KB8VEE has study materials available at his store in the Norton Shores area or you can chase the material around on line.

The event starts around 8:00 pm on February 22 at the MAARC clubhouse, 2888 Scenic Drive between Muskegon and White Lakes. You know the place and now you know the time.

You will need $14 cash for the test session. You can take all three tests for this one fee. Bring a copy of your old license if you have one and identification in any event. We'll distribute the test booklets at the stroke of midnight, or 0500 UTC. Be there for the fun and opportunity. Remember, all three tests will be available, Technician, General, and Amateur Extra.

Please pass the word and encourage your friends to take advantage of this opportunity at the stroke of midnight when you can get in on the fun. Or, if you need a new call sign the VE folks can assist. How about a new call sign and that very nice Amateur Extra wallpaper? It is possible with some preparation, study, and a dash of fun to spice

the mix.

We hope to see everyone Thursday evening, February 22, at the clubhouse in Muskegon. This event is sponsored by the VE testers, the MAARC, and your encouraging friends in amateur radio. And even if you are already an Extra and don't need to take more tests you can stop in and encourage and promote. We'll enjoy all manner of fun things. Anyone in for a little game of pin the antenna on the transceiver? Break the piñata? Try that new suffix, /AG or /AE with your call sign? Are there any hams on the air that early in the morning? What might be on the menu? What ever could you bring to the party? Will we enjoy pizza or other delicacies? You can help!

Bill, AB8SC

Date: 2007-02-03 19:59:24 UTC
From: Deater, Tim
Topic: 2390 Message: 2390

Upon checking out the 146.920 repeater duplexer with a technician this afternoon we discovered that it is quite a way off on its tuning. The tech will be taking it back to his shop to tune it there.

So, until further notice the 146.920 repeater is off the air.

As soon as I have any updates I will let you all know.

Thanks!

Keep Warm!

2392. To Hell and Back

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-04 23:00:34 UTC
From: Hank Greeb
Topic: 2392 Message: 2392

This is to inform you that Cortland, KA5S and Hank, N8XX have been to Hell (Michigan) and back, where we operated the special event station N8H. I haven't checked the log to see if we worked any West Michigan Hams, but we did work several Michigan stations.

Because of technical problems, we didn't get started until after 10 a.m., then ran into several logistical problems associated with the weather. The worst one was when the temporary window we jerry rigged into a woodshed we were using for shelter blew in and fell on the rig and a propane lantern which we had for light and for a bit of heat. This was quite exciting. The mantles for the lantern were in shreds. The rig didn't suffer any permanent damage, just torn apart a cable between the computer and the keying jack. All in all, we were down for about an hour fixing a better window, and the cable.

You might say we had a "great time in Hell."

If you worked us, and wish a pictorial "QSL from Hell" send me a #10 or larger SASE and I'll send a QSL as soon as we get the final design of the card to the photo shop.

How about an expediton to Hell on BUBBA 2007?

The date hasn't been announced, but last year it was the 3rd Saturday
of August, or August 19, 2006, 1600Z-2200Z.

The idea is similar to FYBO, except you get larger multipliers the
warmer the temperature at the operating site. For example:

< 90 F = x1; A nice winter day
90 - 99 F = x2; A nice spring day.
100 - 104 F = x3; A nice day in May.
105 - 109 F = x4; A nice summer day.
110 - 114 F = x5; A warm summer day.
115F and UP = x6. But it's a dry heat

We could operate with >5 Watts if desired, and not be in the contest,
but with better antennae, which should be easy because the weather
won't be frigid. QRP is fun - I'm sure we could have gotten much
more RF radiated had we taken time to get our antennae up to 50' or
so, which is the height of several of the trees. As it was, there
was a snag in one of the halyards, and the 40 metre antenna was up
only 25 feet instead of >40 feet. I'd have thrown another string
across the tree, but at 2°F when I arrived, I said, (unprintable) and
went with the lower antenna.

It would be best to be in some sort of contest, as a "magnet point"
for folks.

Another thought would be to go there for the Michigan QSO party -
that would be Saturday, April 21, 2007.

There are scheduled events in Hell, so we'd have to be sure we
wouldn't interfere with them, or we might find ourselves competing
for space with thousands of other people.

I talked with the "Mayor of Hell" prior to this event, and he seemed
very amenable to anything which will publiciz the existence of the
location.

73 de n8xx Hg

p.s. The commemorative QSL card for this event will have a space
for "you were hotter/colder/ascoldas Hell" on it

--- In WestMichiganHams@yahoogroups.com, <k8mhz@...> wrote:
><snip>
> AB8SC and I were talking about the event a short bit ago. I came

up with the idea of having a Summer mini DXpedition back to Hell, this time running QRO instead of QRP and giving extra points for stations that are hotter than Hell that day.

For all of you that did not read the story this is it. Tom KB8VEE

When all else fails, local radio hobbyist will be there

BY MARK BROOKY
mbrooky@...

Don Meyer's hobby has proven to be a crucial link in some of the most dire emergency situations, and he's prepared to jump when local officials call him for help.

Click to enlarge

The 54-year-old Ferrysburg man was the driving force in getting an amateur ("ham") radio station set up inside the Ottawa County Central Dispatch Center in Grand Haven, said John Wehmer, the Ottawa County emergency coordinator for the Amateur Radio Emergency Service.

Meyer, who is also known to other ham radio operators by his federally licensed call letters KB8ODB, was alerted by Central Dispatch about 20 minutes before the severe windstorm that devastated northwest Ottawa County in May 1998. He was manning the center's ham station five minutes later.

Meyer said he sleeps with a cell phone and pager, which is used by Central Dispatch to alert him should radio amateurs be needed to supplement emergency communications, such as serving as storm lookouts or for a search-and-rescue effort.

"One thing that has been proven is, when a disaster hits, ham radio operators are there to help provide communications," he said. "A ham in Michigan can provide communications help for an area hundreds of miles away that has been devastated, lost all means of telephones, by relaying messages of need to officials that can provide help from adjacent areas - and this happens all the time."

Capt. Rick Yonker of the Grand Haven Department of Public Safety is the city's emergency management liaison. He said hams like Meyer could provide the main - and possibly only - line of communications in the event of a disaster.

"He does a lot, as far as working in the emergency management area, providing us with a lot of resources should we call on (the hams)," Yonker said.

Meyer became interested in ham radio in the 1960s when visiting the radio "shack" of his uncle, Glenn Hinkle, a licensed amateur radio operator living in Ferrysburg. Meyer earned his first license, a Novice "ticket," in 1968, but life got in the way and he let it lapse.

Meyer was relicensed in 1992, and that's when he got involved with the emergency communications part of the hobby. With the help of Jack Cook, Meyer worked with law enforcement and emergency officials to get amateur radios installed at the Central Dispatch Center in Grand Haven in 1993.

"I was able to show how valuable ham radio could be to the dispatchers during storms through their training in Skywarn, being able to spot the activity that is going on in the storms coming though the Tri-Cities and the county, and forward that on to Central Dispatch so they can warn the community when there is a danger," Meyer explained.

A ham station was also installed at the county's Fillmore Street complex about 10 years ago.

Meyer and local hams also offer crowd control and assistance at community events, such as the many foot races and festivals in the area.

"I could never do this without the hams that come out and volunteer, giving up their Saturdays to help make the Tri-Cities a better place to be," Meyer said. "They have fun doing it, and they love to have someone along the way ask them about their hobby."

Meyer currently serves as the assistant emergency coordinator for the Amateur Radio Emergency Service in Ottawa County and is the volunteer liaison to Central Dispatch. He lives in Ferrysburg with his wife, Berta. They have three children and four grandchildren; and he pays his bills by working for Metropolitan Appliance Repair, a mobile service that covers West Michigan from Saugatuck to Manistee.

For more information about amateur radio's emergency communication services, go online to: www.emergency-radio.org.

2407. FYBO N8H M/M QRP FIELD HELL, MICHIGAN

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-07 13:38:30 UTC
From: Hank Greeb
Topic: 2407 Message: 2407

Freeze Your B???. Off - 2007
N8H M/M QRP FIELD OPERATION FROM HELL, MICHIGAN
OPS AB8DF, KA5S, N8XX
Power - QRP (of course, for FYBO)
Location - Outside in Frozen Hell.:)

Band Raw Q's Valid Q's Points SPC

40CW 30 30 60 19
20CW 15 15 30 9

TOTAL 45 45 90 28

90 QSO PTS
28 SPC Multiplier
6 Temp Multiplier
4 Field OP Multiplier
10000 Worked WQ7RP
70480 Total Claimed Score

Murphy struck early - one antenna halyard was tangled in a tree, which caused the 40 meter antenna height to be <30 feet instead of 50 feet. Then the rig wouldn't put power to the tuner, and after some sleuthing a broken coax was found and fixed. Also, alternate power from a generator wouldn't start at such a cold temperature, so we gave up and plugged into the AC mains. At least they have 110VAC in Hell!

We tried Feld Hell on 40 metres at 1900Z and 2100Z with no takers. (we thought the mode would be appropriate for the venue!) We knew the rig was working because we were making quite a few CW contacts, even with a low antenna. We didn't try 20 meters Feld Hell because of technical difficulties with one rig.

It was 2?F when we arrived in Hell, and never got above 13?F during the operation. You might say it was a cold day in Hell:)

The weather was getting blustery and snowy around 2100Z, so we decided to close up at 2200Z while it was still light.

Thanks to the Arizona ScQRPions for running a nice contest. There will be a longer writeup on the AzScQRPions web site. We hope to CU during FYBO 2008. Unless things change drastically, we'll be in Hell again, and will have a much better idea of what is needed for such an operation.

2408. Midnight Madness

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-07 13:47:10 UTC
From: Bill
Topic: 2408 Message: 2408

All:

From one of the many newsletters I receive, the following gives a bit more detail about license upgrades, the calendar, and code. Check out my comments at the end. This material quoted from the ARRL Club News:

Midnight Madness

The Report & Order pertaining to the removal of the Morse testing requirement for Amateur Radio licensing has been printed in the Federal Register, and on February 23, 2007 at 12:01 AM Eastern Standard Time, testing for Morse code will no longer be required for any Amateur Radio license.

Many clubs are preparing to have a team of Volunteer Examiners ready to administer a paperwork upgrade session at 12:01 AM EST so those hams who are ready can upgrade their licenses and immediately take advantage of their new privileges.

There are many hams who have anticipated this day and are holding a Certificate of Successful Completion for General and/or Extra class written exam credit.

License upgrades are not automatic for those holding a CSCE. The only thing now for these eager operators to do is take their CSCE to a Volunteer Examination Session on or after February 23, 2007 and have the paperwork processed so they can upgrade and receive a new CSCE allowing them new operating privileges.

Under the new regulations Technicians will receive CW privileges on 80, 40 and 15 meters and CW, RTTY and SSB privileges on 10 meters. These privileges for Technicians will be automatic and no paperwork will need to be submitted.

ps: We are doing a party test session on this special night at the MAARC clubhouse.

How Cool is That?!

It has come to my attention that there is a special certificate available to commemorate a ham's first QSO. It's free and a nice wallpaper.

Imagine, you're a brand new General or Amateur Extra license signing your call with a /AG or a /AE on the hf bands for the first time. And you call W1AW, the shack for the ARRL out in CT.

This can be YOU!

Very Kewl . Your not the only one that hates computers this week . Mine crashed last week . I lost so many files . Now I'm spending hours putting my system back the way I had it . Not to mention trying to remember my fav. web sites . Have to learn to do system back-ups more often instead of every year in a half . LOL

Just glad that I did not loose my e-mails . That would really hurt .

Good luck on the battle .

2415. W1AW Special Opportunity

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-07 22:33:58 UTC
From: Bill
Topic: 2415 Message: 2415

All:

From a recent email message from the ARRL, the following talks about a special opportunity to QSO the W1AW station. They are calling this a special event but it seems more appropriate to call this a special opportunity. By any measure having a QSO with W1AW is special. If it is your first QSO with new privileges it might be extra (would that be Amateur Extra?) special.

Special Event

This is a historic event in Amateur Radio and clubs will want to open the club station or activate the club callsign to allow these new hams to make their first contact on the HF bands.

W1AW will be on the air beginning 12:01 AM February 23 making available the opportunity for a new General, or any ham, to contact the Hiram Percy Maxim Memorial Station in Newington, Connecticut. How exciting is that?

W1AW will be active throughout the weekend in the General bands and the Technician portion of the 10 meter band. The station is expected to be on the air during the day when band conditions and peak activity can be expected.

Suggested SSB frequencies are:

160m 1855 kHz
80m 3990 kHz
40m 7290 kHz
20m 14290 kHz
17m 18160 kHz
15m 21390 kHz
10m 28480 kHz

Joe,
Have been trying to find the signal tonight. Heard an ID, good signal, but no SSTV. Is it off?
Tom

Joe Veldhuis <kd8atu@...> wrote:
Last Wednesday at about 7 PM, K8TVZ, N8XPQ and I went over to the Manley tower in Holland and put the much-anticipated Ottawa County SKYWARN SSTV image server on the air. The radio equipment and software were found to perform almost flawlessly, but we had some problems with the cable modem. N8XPQ resolved the issue and hooked the modem back up this morning at about 10:15 AM. Initial tests showed that the system is now 100% operational. You should hear it IDing every 10 minutes on 445.125 MHz FM.

I have compiled a user's manual:
http://www.electroblog.com:8090/sstvwx.pdf

And a 3x5 command reference card:
http://www.electroblog.com:8090/sstvwx_ref.pdf

Now we need to gather coverage data. Get an image from the system (I'd suggest the WOOD-TV local radar, slot 12) and send me a signal report. Signals to the north (along 136th Avenue) will be relatively poor due to shadowing from the tower (the antenna is on a sidearm on the south side of the tower), but I have been able to work it from my home station, 13 miles straight north from the site. Our goal is to provide acceptable-quality images to HTs and handheld scanners throughout at least the western half of the county. Commanding the system from such stations is not as important. You may need a base or high-power mobile station to command it from the northern part of the county.

If you have any questions about using the system that the manual doesn't answer, tell me.

Unless the server is in loop mode, which it is only during testing, demonstrations or skywarn nets, images must be explicitly requested via DTMF commands. Try 11 or 20. The complete list is in the manual I posted.

2421. Red Cross Backgrouns Check is changing

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-08 11:36:16 UTC
From: Hank Greeb
Topic: 2421 Message: 2421

I just received this from Jim Weaver, K8JE, Great Lakes Division Director. It appears that comments from Red Cross volunteers have "gotten through" to the hierarchy at the National Offices in Washington. It would appear that the only background check which will be necessary for most volunteers is a criminal background check.

I'm glad I can continue my 40+ years of volunteering for the Red Cross.

From: americanredcross@...
[mailto:americanredcross@...]
Sent: Tuesday, February 06, 2007 9:54 AM
To: AMERICAN_RED_CROSS@...
Subject: Execs, Chairs, AFES: Changes to Aspects of Background Check Program

Distributed to: Chapter Executives, Chairs; All Service Area Staff; Biomedical Services Division VPs, Blood Services Region CEOs; AFES Station Managers; All NHQ/BHQ Staff.

The following message is from Jack McGuire, Interim President and CEO AndKate Forbes, National Chair of Volunteers:

On December 22, 2006, we announced that the background check deadline wasextended until March 31, 2007 and that a leadership team would examine specific aspects of the program so that they were better understood and accepted across the organization. This week, we approved key modificationsto the program, specifically related to the consent form. We believe these changes respond to legitimate concerns and still maintain a strong organization-wide background check program.

The following summarizes the changes:

* A new consent form will be developed that eliminates all references to credit checks and mode of living.
* The Red Cross will not run future credit checks or mode of living checks on anyone who has signed the previous consent form. The Red Cross will consider that consent form null and void as to the credit check and mode of living authorizations, and promises not to conduct a credit check on individuals unless we obtain a second consent form from them authorizing those checks. Mode of living checks will not be conducted under any circumstances.
* In an effort to establish and maintain consistency across the organization, Jane Gilbert, Senior Vice President, Service Area Support, will convene a working group to establish an ongoing credit check policy that willdefine which positions require a credit check in the future and how to evaluate credit checks for those positions.

You may be wondering why we made these changes and particularly, why now. We listened to your concerns and feedback and determined that adding Another consent form in the event that a credit check is needed best met the needs of our volunteer force. This change does not reflect negatively upon the admirable efforts of the many units that worked extremely hard to meet the goals of this initiative by conducting background checks on their Employees and volunteers. We believe it underscores the fact that anopen dialogue on these issues is critical to the success of this program. These are positive changes that do not compromise the program, but rather advance our shared goal of having a consistent and standard background check program for all employees and volunteers who serve under the American Red Cross symbol. All other aspects of the program remain unchanged, including the deadline of March 31, 2007, by which all employees and volunteers must undergo and clear a background check. Employees and volunteers who have not cleared a background check by this date will no longer be able to serve with the Red Cross until they do so.

We would also like to take this opportunity to thank the National Background Check Office for their hard work and dedication in assisting the implementation of the program across the organization. If you have questions, please contact the National Background Check Office at backgroundchecks@... or (800) 507-3960.

External drives are OK until somebody bumps one while it is spinning.
Don't ask how I know.

I have been using DDS/DAT tape for my backups for years now. Currently
using a Compaq/Sony 8-tape DDS4 autoloader for which I paid $25 on eBay,
including a magazine full of tapes. 20GB per tape without compression.
I've never paid more than $9 per tape and often far less, and I can bump
them, drop them, mail them, store duplicates in another location, etc.

Indeed they should. However, keep in mind that this station is not a repeater. Don't assume that the person commanding the station is doing so without IDing if you can't hear them. If both of you are using HTs, you're probably out of eachother's mutual range.

However, if you heard the DTMF tones being sent, then it's quite possible that someone neglected to ID.

On Feb 12,2007 7:00PM, The training at the monthly Muskegon County Emergency Communications Service meeting(ARES), will be and overveiw of IS100 and IS200. This is intended to prepare you to take the Online test and recieve your IS100 & IS200 certificates from FEMA. The instructor will be Joe Kinnucan of Norton Shores Fire Department. If you already have your IS100/200 please at least attend the bussiness part of the meeting. You may go to the the links below and download the forms and manuals for the training. There will also be copies available at the meeting.

http://www.training.fema.gov/EMIWeb/IS/is100.asp

http://www.training.fema.gov/EMIWeb/IS/is200.asp

The meeting location is at the Muskegon County Sheriff's Department, Emergency Services Department. 1611 Oak Ave., Basement floor. Muskegon, MI. It's located across the street from Mercy-General Hospital. Apple Ave & US 31 would be the off ramp from the X-way. For Muskegon Co people it's the old County Health Department building.

We will talk in on 146.820 if anyone needs directions to the facility.

Jim Meyers

I did not realize the auto up to Teck Plus on Feb.24.I have this Fox Tango FT-101EX sitting here that I've been using to monitor with for a few months.I need a few things for TX.
1.a mic.---Got an old mic,solder in 4pin plug,101ex mic diagram.--done
2.an antenna---Got plenty material (wire,coax,copper tubeAlum.rod) to improvise"make"an antenna,but no swr for HF range.Saw a $20.00 Tram?at Tom's tool and Shack yesterday.
3.A good CW read and write program.I know,cheating.

73 KD8CBJ
P.S.Made a mistake,for kicks I took the on line General test,and passed.I was at the Tool and Shack to get the general book and FCC 97.The 97 is right next to my current BATF regs.book"Ignorance of the law is no excuse".

2445. Fw: W1AW SPECIAL EVENT, MIDNIGHT EXAM SESSIONS TO MARK NEW AMATEUR RULES

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-10 17:16:20 UTC
From: Mark Thompson
Topic: 2445 Message: 2445

==>W1AW SPECIAL EVENT, MIDNIGHT EXAM SESSIONS TO MARK NEW AMATEUR RULES

As new Amateur Radio Service rules phase in Friday, February 23, eliminating the Morse code requirement, Hiram Percy Maxim Memorial Station W1AW will mark the milestone with a weekend-long special event. In addition, a number of Central Connecticut volunteer examiners will be on hand at ARRL Headquarters -- both before and after the new rules become effective at 12:01 AM EST -- to offer Amateur Radio examinations under the current and new rules. ARRL Regulatory Information Specialist Dan Henderson, N1ND, is helping to coordinate the celebration. He says Headquarters staff and other volunteers will keep W1AW active for the "Welcome Weekend" event.

"W1AW will be on the air all weekend for this special event to celebrate the fact that so many amateurs have gained or will earn new privileges as a result of the rule changes," he said. "The station will operate starting at 12:01 AM Eastern Time on Friday, February 23, continuing into the wee hours and resuming operation during the day. Then W1AW will be on the air on both days of the weekend, from 10 AM until 5 PM -- perhaps longer as conditions and enthusiasm dictate."

Operation will be on both SSB and CW. W1AW operators will concentrate their activities on the Technician and General class HF subbands. On SSB, the station will use its normal phone frequencies -- 1.811, 3.990, 7.290, 14.290, 18.160 and 21.390 MHz. On 10 meters, W1AW will operate SSB on or about 28.480 MHz.

Henderson says operating will be casual unless pileups develop. "The purpose is to welcome newcomers to new privileges," he said.

"First Contact" certificates will be available as part of this event. ARRL invites anyone making a first contact or first HF contact to enter the contact information on the ARRL "Welcome Weekend" Web site <http://www.arrl.org/HFWelcome/> and receive a certificate in return. "If the first contact is with W1AW we will also be including a W1AW QSL card for the contact," Henderson added.

The ARRL anticipates a huge influx of upgrade applications once the Morse code requirement disappears. In addition, all Technician licensees will have limited HF privileges starting February 23, whether or not they've passed a Morse code test.

Amateur Radio exam sessions both before and after the zero hour will offer an opportunity for applicants either to upgrade under the outgoing licensing rules at the last possible opportunity or under the new licensing rules at the first possible opportunity.

"Dual exam sessions are scheduled at ARRL Headquarters around the effective time of the new licensing rules," says Brennan Price, N4QX, a former ARRL staff member and an ARRL VEC volunteer examiner. "At 11 PM on February 22, a session will be held for candidates wishing to upgrade under the existing rules. A few folks have expressed interest in such a session." Price says all Amateur Radio written and telegraphy elements will be offered until midnight.

"At 12:01 AM February 23, a second session will begin under the new licensing rules," he said. "Examiners will not only be evaluating previously earned Certificates of Successful Completion of Exam (CSCEs) for upgrades, but will be offering all written elements." Two teams of volunteer examiners will be on site until all applicants have been served.

On or after February 23, applicants upgrading on the basis of a valid CSCE must present the certificate for element credit, fill out an application and pay any applicable exam session fee, which most VECs charge. Only after the VE team has issued a CSCE for upgrade credit may applicants actually use their new operating privileges on the air.

Additional details and more information will be available on the ARRL Web site in the days leading up to February 23.

R U Ready 2 Upgrade?

Have you gotten your study material from Tom, KB8VEE at his new store? You've been working hard and pounding the on-line test sites? You're glad the code requirement will go away?

The first opportunity to get a code free license comes late on Thursday, February 22 and technically at 00:01 Friday morning, Eastern Standard Time. The MAARC will celebrate this occasion with last minute cramming, food, fun, an open shack, and the actual test session at midnight. Visit our clubhouse at 2888 Scenic Drive, between Muskegon and White Lakes on the shores of Lake Michigan.

We'll have a wonderful time. You've got a week and a half to get ready. You've been working on this already? I guarantee you'll enjoy the HF bands with tons of modes, frequencies, and a lot of new things to learn and enjoy.

If you are already a Technician you will be automatically upgraded to Tech Plus with limited CW and voice privileges on some bands. Take that next step, earn a General class license, and enjoy many more radio opportunities.

Drop me a reply with any questions. We're looking forward to a great time. It will be more fun with you attending and testing.

Bill, AB8SC
MAARC guy

Are you looking for a Technician licensing class? You're in luck!
Two opportunities present.

Starting February 19, Mark, K8MHZ is teaching an eight week class on the subject. The classes are in downtown Muskegon on Monday nights.

Starting February 25, Tom, N8YJT is teaching a six week class on the subject. The classes are in North Muskegon on Sunday afternoons.

Contact these instructors for details. They will welcome you and assist you with the world's GREATEST hobby, amateur radio.

Marshall (Michigan) Hamfest - March 17, 2007 - 0800-1300 EST, Marshall High School, Marshall, Michigan

For more info see http://www.w8df.com/hamfest.html

Last year I found this hamfest one of the better hamfests in Michigan - the vendors and flea marketers were "wall to wall" in halls and the entire gymnasium.

Sorry if this turns out to be a duplicate. I sent a message from my e-mail programme last evening, and it never showed up.

2453. Re: [WestMichiganHams] Marshall Hamfest, March 17

Do you realize that if you're currently a Technician ham and you pass the General or Extra test that you will INSTANTLY be able to enjoy your new privileges? Yep, you use your call sign and add a /AG or /AE and you're legal and using the HF bands, modes, and new privileges.

Instantly and painlessly. But instantly does not start before February 23 and very early in the morning. That's why we are enjoying open shack and testing session at the clubhouse.

We would ever so enjoy having you drop in and test. Takes $14 cash, a copy of your current license if you have one, identification if you don't, and a passing grade on the test.

Bill, AB8SC
MAARC guy

2456. Re: Need a Tech Class?

All:

I misrepresented the two class scenario. Mark's class is being held for the benefit of the general public and offers seats to about anyone willing to take the class on Monday evenings.

Tom's class is being run to benefit the Boy Scouts in our area. This class will not be open to anyone without the Boy Scout connection.

I am terribly sorry for the confusion. If you know of someone who would benefit from Mark's class then get them onboard and thinking along the lines of a Monday evening class session.

Would You Elmer?

There are two Tech classes starting rather soon. Each class could use assistance from Elmer. Would you volunteer?

A good Elmer does not have to take the class with his new friend. Elmer might be available to answer questions, encourage the student, encourage the student to attend classes, help him take the practice tests on-line, and make sure the student follows through and takes the licensing test. Then the fun begins when Elmer and his new Tech friend enjoy purchasing a new radio and making that first contact. It is a whole new world for a new ham. Elmer soothes the process. Maybe Elmer and the student visit a hamfest together.

If you can help I encourage you to contact Mark, K8MHZ and Tom, N8YJT to volunteer.

It is an easy and important step along the road to enjoying a wonderful hobby.

Thanks in advance to Elmer for this assistance.

Hi Bill
In Scouts we have the "Merit Badge List" and it is broken down into specifc areas such as electronics, radio, first aid,etc.. Each Scout unit would maintain a list of Merit Badge Counselors; those individuals that offer to help the scouts become familiar and more knowledgable with that skill.

I wonder if there is a "Elmer List" that is broken down into specifcs such as CW, packet, repeaters, getting on the air, DXing, etc.. I wonder if any clubs do have such a list?

Best Regards,
Doc, KD8BGQ

I have a Comanche Siltronix 1011D 10 meter tube radio boat anchor. Anyone want it? I just tried to plug it in and it blows the fuse. So, I would think it is for parts. I hate to just toss it out. I would rather give it to someone that wants to play with it.

It has all of the knobs, but many of them are missing the little silver cover on the front of them.

Thanks for posting this John and for the ones that let me know Marshall is next month ...I see you are reading the posts ....
One more thing we will be meeting in the training room at GHPS which is across the street from the parking lot on the corner marked employee entrance... it will be warmer inside ... hope to see you there ...

73 Don ..

From: ravennaelectronics
Topic: 2467 Message: 2467

Hello everyone.
I am looking for a microphone that will work well with a Kenwood TS-440S or another Kenwood MC-50 Mic. If you have one or know where I can get one, besides Ebay, in the next few days please let me know.

Thank you
Doc, KD8BGQ

2468. Specal guest at the coffiee break this Sat at the Tool Max Store

Hi Al.
I do have one of those mic elements here. I have used in the past on various electronic projects and repair jobs. They work well for many applications as you stated. The problem with the current mic is the fact that the cord is messed up. I found out later last night that the MC-50 Mic was not even designed for the TS-440S. That explains why the mic cord is messed up. The cord has been spliced so that there is a 8 pin connector on one end and a 5 pin connector on the other. Only one wire is actually hooked up to. I thought it may be simplier to get another mic than to redo the mic cord.

Thank you for reminding me about those mic elements from Radio Shack. That presents some possibilities too.

Best Regards,
Doc, KD8BGQ

Hi Paul.
If the mic is a MC-60A, 85, 80, 55, or 42S it will work. Those are the mics the manual lists as accessories to the radio. It does not show the MC-50 as a accessory mic.

Thank you

2479. Monthly Michigan Section News Summary

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-16 18:38:19 UTC
From: Hank Greeb
Topic: 37 Message: 2479

-------- Original Message --------
Subject: Monthly Michigan Section News Summary
Date: Fri, 16 Feb 2007 13:18:36 -0500
From: ARRL Web site <memberlist@...>
To:

Greetings everyone,

I am pleased to announce the appointment of our new Section Public Information Coordinator, Bobby N8CY. Bobby is replacing our long-term PIC Harold KC8QMH who has served for several years and now is retiring from the position. Thanks Harold for your sincere dedication. The PIC works with all of our Section Public Information Officers to present a coordinated effort in presenting amateur radio to the public. With the recent very positive image portrayed by ham radio, we are continuing with a very aggressive effort to keep the public informed and interested. Bobby's plans for the coming year include more involvement within clubs and ARPSC groups to organize and plan getting information in clear and concise form to the media.

There are several national award programs that recognize the efforts of radio amateurs and their dedication to this hobby, in addition the ARRL Great Lakes Division offers several select awards and Michigan has over the years offered several of our own. With the goal of providing distinct recognition to outstanding hams, I am pleased to announce the inception of the Michigan Section Awards Committee. This committee is charged with coordinating the efforts of all League sponsored recognition programs in the state, to insure that Michigan hams are provided the opportunity to be nominated for national Division and State award programs. Assistant Section Managers Roger WB8WJV wb8wjv@... and John N8ZE n8ze@... will coordinate this program.
They will be working with clubs and ARPSC organizations as well as our list of League appointees in the state to begin this task. WE will be determining the awards Michigan will be offering and the criteria for qualification. Needless to say, your input is valued and you may contact Roger and John to provide your suggestions. As this is program in its early formative stages, we have an excellent opportunity to consider a wide range of options.

It was observed that many clubs were not receiving the latest news releases of material directly related to club activities. One of the discussions at the recent Section Staff meeting related to offering the opportunity to have an assigned liaison at each ARRL Affiliated radio club. This person would receive direct emails from League Headquarters and the Michigan Affiliate Club Coordinator that were directly related to radio club activities. Clubs can contact Dan KB6NU kb6nu@... to name a liaison person to serve as an interface. This will be an easy solution to insure the club gets the latest data on national and state happenings.

Good news on the National Traffic System front. ARRL is emphasizing its continued support of the NTS and our Michigan Section Traffic Manager reports that Michigan NTS-ers are really doing an over-the-top job. Check this out: MI NTS check-ins for 2006 were up 30% over the previous year and traffic is up 50% over 2005. OUTSTANDING and even better yet, considering the bands have been so tough for the latter part of the year.

Jill KC8PVQ from the Traverse City area reports: "I would like to introduce you to the efforts of the Cherryland ARC in building the BSA camp in the region. It includes a Ham shack for the scouting youth in Michigan that visit the camp in the summer. Plans are underway to hold a license class and test sessions at the camp. We now have 8 scouts with tech class licenses and several adults that visit the station in the summer to help the boys earn the radio merit badge. We have our own call, W8BSC, and are open to youth groups that want to camp and work the station arranged through the camp office. We have rental cabins and wilderness cabins to rent. The shack is heated and would make a great outing for the youth groups in Michigan. We have 2 HF rigs, a VHF rig, 80m loop, tribander beam, 6 M beam, and a RigblasterTM for digital modes".

Congratulation to the Movers and Shakers: These newly elected club officers for the Genesee County ARC are Pres K8KZB, Treas K8VW, Sec L8LJG Trustee K8LJG. The new officers of the Saginaw Valley ARA are Pres. Keith N8XD, VP Jim WA8GRI, Sec Jeff KC8BDQ, Treas Judy KC8BYI. New officers of the Monroe County RCA are Pres N8YQW, VP KB8JAI, Sec KB8KQC, Treas KA8EBI, Dirs KB8VIU, W8PI and W8JDY.

Amateur Radio continues to receive plaudits and recognition from our served agencies. The Amateur Radio Public Service Corps in Michigan consists of ARES, ARCES, NTS and Skywarn and is considered to be a "First Responder" in disasters. With this thought in mind, it bears reminding that when a disaster occurs, hams should first check in with their EC/RO before taking any step to mobilize. This insures that you will be assigned to the most appropriate location, insures that you will not waste travel time going to an area where you may not be needed, and insures the continued excellent relationships with our served agencies.

Station Activity Reports (SARs for January, 2007: WB9JSR 805, KC8WSE 274, K8AE 220, K8LJG 148, KC8MLD 113, AB8SY 101, K8AMR 60, W8RNQ 49, KD8BGQ 47, AA8SN 38, WB8RCR 35, AB8WF 34, WI8K 29, K8RDN 25, KD8BMV 16, AB8CB 14, WD8USA 14, KC8ZCF 10, K8ZJU 9, WA8OOH 7, N8UN 4, KC8ZGB 1. SARs are reports of all the radiogram traffic you have handled in the past month.

Public Service Honor Roll Reports (PSHRs) for January, 2007: WB9JSR 270, WB8RCR 219, KD8BGQ 205, K8AE 128, K8MFK 120, KC8WSE 90, K8AMR 83, AB8SY 78, K8ZJU 71, K8RDN 58.

PSHRs include your net and public service activities for the month. PSHRs and SARs should be filed monthly with WB8RCR. You can access a simple reporting form at: http://www.mi-nts.org/PSHR_entry.shtml to provide your reports to WB8RCR.

January Official Emergency Station reports came in from KC8ULE, N8HA and W8RAE. Your OES reports should be filed with WA8EFK. In all cases, reporting by radiograms encouraged.

73,
Dale WA8EFK

I have a TS-something desk mic hiding around here Doc.
The other thing is I don't have any other Kenwood equipment.

One Identifying feature is that it has the older style 4-pin connector.
I remember a friend trying it and finding the connector to be wrong for
his use.
If it is OK for your use, I'd look hard for it, and make the price
"right"...

Hi Skip.
Thank you for your effort. The radio is a 8 pin connector so the
mic will not work without redoing the cord/pinouts.

Thank you though.

Hi Paul.
I could not find a diagram for that mic or the pinout information so
I do not know if it will work. I know it is not listed in the 440S
manual under accessories.

Thanks.

A reminder that the Allegan group will be holding a VE exam session at a most reasonable time of 9:00 am, Feb 24, in the cafeteria of the Allegan Hospital. Talk in on 147.24. Walk ins are more than invited.

Personally, I think it is somewhat cool that a group of folks are going to burn the mid-night oil to take the tests. But then there are those of us who need our beauty sleep!

2496. QRP-ARCI GRID SQUARE SPRINT - March 18

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-19 19:56:14 UTC
From: Hank Greeb
Topic: 2496 Message: 2496

Anyone for a QRP contest?

From "Jeff Hetherington" <va3jff@...>
Subject [QRP-L] ANNOUNCEMENT: QRP-ARCI GRID SQUARE SPRINT
Date Mon, February 19, 2007 1:34 pm
To members@...,njqrp@...,qrp-l@mailman.qth.net
CC elecraft@...,n2cq@...

Hi everybody!

Wanted to give everybody some advance notice of our next contest.
This contest is BRAND NEW and a contest format that was suggested by
QRP-ARCI Members.

However, since it was new, it missed the deadline for QST. Please
feel free to publish it to any lists you may be members of.

The exchange as printed in the QQ also featured a small gremlin, and
the correct rules including the exchange is posted on the right hand
side of the QRP-ARCI homepage along with all of the other contests
for 2007. The correct rules are also posted below.

Good Luck!
73/72
Jeff - VA3JFF

Date/Time: 1500Z to 1800Z on 18 March 2007.

Mode: HF CW only.

Exchange:
Members send: RST, Grid Square, ARCI member number
Non-Members send: RST, Grid Square, Power Out

QSO Points:
Member = 5 points
Non-Member, Different Continent = 4 points
Non-Member, Same Continent = 2 points

Multiplier: Grid Square total for all bands. The same station may be
worked on multiple bands for QSO points and SPC credit.

POWER MULTIPLIER:
>5 Watts = x1
>1 - 5 Watts = x7
>250 mW - 1 Watt = x10
>55 mW - 250 mW = x15
55 mW or less = x20

SUGGESTED FREQUENCIES:
160m 1810 kHz
80m 3560 kHz
40m 7030 kHz (please listen at 7040 kHz for rock bound participants)
20m 14060 kHz
15m 21060 kHz
10m 28060 kHz

BONUS POINTS: If you are operating PORTABLE using battery power AND a temporary antenna, add 5000 points to your final score. (You can NOT be at your shack operating from battery power using your home station antenna to qualify for this bonus.) This is to help level the playing field for contesters who work from the field against contest stations with 5 element yagis at 70 ft.

Score: Final Score = Points (total for all bands) x Grid Squares (total for all bands) x Power Multiplier + Bonus Points

Categories: Entry may be All-Band, Single Band, High Bands (10m-15m-20m) or Low Bands (40m-80m)

How to Participate: Get on any of the HF bands except the WARC bands and hang out near the QRP frequencies. Work as many stations calling CQ QRP or CQ TEST as possible, or call CQ QRP or CQ TEST yourself! You can work a station for credit once on each band.

Email Log Submission: Submit Logs in plain text format along with a summary stating your Callsign, Entry Category, Actual Power and Station Description along with score calculation to contest@... on or before 5 March 2006.

Snail mail Log Submission:

Submit Logs along with a summary stating your Callsign, Entry Category, Actual Power and Station Description along with score calculation to:

QRP-ARCI Grid Square Sprint
c/o Jeff Hetherington, VA3JFF
139 Elizabeth St. W.
Welland, Ontario
Canada L3C 4M3

Entries must be postmarked on or before 18 April 2007.

Results: Will be published in QRP Quarterly and shown on the QRP-ARCI website.

Certificates:

Will be awarded to the top scoring entrant in each
category. Certificates may be awarded for 2nd and 3rd
place if entries are sufficient in a category.

==========
L. Jeffrey Hetherington - VA3JFF
QRP-ARCI (sm) Contest Manager

2498. New Six Meter beacon

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-19 23:10:00 UTC
From: k8tb@bosscher.org
Topic: 2389 Message: 2498

Erv, K8EB, that "big gun" out of Marne, is planning to put a full time six meter beacon on the air. It will be located just north of his home QTH by a few miles.

However, it is operating from my house in Hudsonville for a shake down period. If you have the equipment, please listen for it on 50.066 MHz.

Once the beacon is moved to its permanent home, I will post another note here, and from then on, you will be able to use this beacon to see if your antennas and radios are working. Notice that Erv has a nice 5 second continuous tone for tweaking and S meter use.

Again, if you have the time, please listen to 50.066 MHz and let me know if you hear it.

Thank you

Tom K8TB

Here is another siite that I had good luck with. When I was taking the QRZ test I found that the questions were not very random and the first time I took the test I didn't make it. This site has a more random set of questions each time you take the test. follow link below.

From: John Wehmer (WB9JSR)
Topic: 2504 Message: 2504

I do not know if the Group is aware of the problem, especially Muskegon County Hams, but Jean KC8WSE of Twin Lake, a blind Ham whose
?thing? is NTS traffic handling, is having a problem with her microphone. The problem is being worked on and will be resolved by
a/some local Ham(s), but in the mean time, is there anyone in the Muskegon/Twin Lake area than can lend her a functioning mic that
will work on a Kenwood TS-440S?

From: John Wehmer
Topic: 2505 Message: 2506

The date in the "Subject" is incorrect, it should be February 21, 2007 as noted in the text.

FYI, Ottawa county will have a similar program March 22 at Zeeland Cityside School, 320 E Main St, Zeeland, MI. The title that NWS gives the presentation is "Skywarn Training".

2007 Skywarn Spotter Training
Thursday, March 22, 2007
6:30 - 10:00 PM
Zeeland Cityside Middle School
320 Main St.

This training is presented for all Emergency Response agencies (Law, Fire, EMS), Amateur Radio, Weather Spotters and anyone interested in sever weather. This class will cover classification, visual identification and reporting procedures for sever weather. Instruction will be given by a representative of the GR Office of the National Weather Service. There will also be presentations by local TV meteorologists

Sponsored By:
Ottawa County Emergency Management
&
The Grand Rapids Office of the National Weather Service.

Actually, the date for Kent Counties training is Thursday February 22nd.

Hope to see anyone from the Kent County area at the training. Please come early as registration can take a few minutes. Right now we have over 150 signed up and are hoping to see another 50-100 show up.

Thanx
Jeff Nawrot

From: Mark Strait
Topic: 2512 Message: 2512

One nice thing about being an ARRL member is the QST magazine . And what a great surprise to see K8ROH working the station on the Silversides and being recognized for being active on the Teenage Net . MAARC/W8ZHO and AB8RD were also recognized for the club and support for our area .
This can been seen in the current issue of QST on page 21.
To think about how many clubs and Hams there are and our local club/hams made 2/3 of page 21.

Very nice .

kd8BIG Mark

Topic: 2467 Message: 2521

No, the MC-50 is a multi-impedance microphone. It will work fine on a newer rig.

Doc- if you want to take the time to come to my house (south of Grand Haven), I will GLADLY help you get your MC-50 working well for your Kenwood 8 pin radio. We'll go over it so next time you could do it yourself. It's really not hard to "get", once someone explains it well. Let me know if you are interested.

Don:

I think your name is Don. From testing too early Friday morning, right?

It's not free but cheap. I've been using Amateur Contact Log, abbreviated ACLog from N3FJP. Good stuff, lots of features, cheap, and works. Go to n3fjp.com for the details. Look on the left for AC Log. There are tons of contest logging programs available from this site, but you don't need them, yet. Hi

I did see a program MixW which combined lots of digital modes with logging. I liked that program except I don't do enough Digital stuff to justify. It might cost a bit more.

And AB8QH uses a free program. Logger 32 I think it's called. She likes it. And has been using same for a number of years, three?

2531. Mackinac Bridge 50th Anniversary Celebrartion

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-24 21:44:47 UTC
From: Hank Greeb
Topic: 2531 Message: 2531

Marquette - 20 February 2007 - For Immediate Release

Michigan amateur radio operators have a once-in-a-lifetime opportunity to participate in a Michigan-based special event that is likely to attract national, possibly world-wide attention. Big Mac, the Mackinac Straits Bridge, is celebrating its 50th year of operation in 2007. The celebration committee has tentatively accepted a proposal to include an amateur radio special event in the formal celebration program.

The amateur community has less than a month to develop enough of an event plan to open discussions with the celebration committee on operating hours, setup and teardown logistics, space and power requirements, on-site staffing, publicity and signage to start working with the committee when the proposal is formally adopted, probably at their 8 March meeting. Two UP clubs and a Mackinaw-area ARES group have already signed on as provisional sponsors, and the Michigan Section of the ARRL is endorsing the event.

The public event is scheduled for July 27-28 at Bridge View Park at the North end of the bridge. There will be parades, fireworks, a banquet, and exhibitors and many public-oriented activities at the park. National Public Radio will be there as parts of its Story Corps Project capturing personal stories and recollections of family encounters with the bridge and its lore. The celebration committee is getting inquiries and offers of participation from all over the country, and local motels have already noticed a jump in reservations.

ARRL Section Manager Dale Williams notes that "This is an outstanding opportunity for the amateur community to put on a great event that will be interesting for on-site visitors at the celebration grounds but also to show our pride in one of the very few symbols that is specifically about Michigan that is known world-wide. I want to encourage our clubs and individual members to help out with this event however they can. Even if they can't actually sign up for operating shifts or working the public information desk, help is needed with technical planning, local logistics, ideas for public exhibits, getting QSL cards and tee-shirts printed. There's a role for everyone interested."

Clubs and amateurs interested in getting involved in this unique opportunity should contact John Forslin at the Big Mac 50 Special Event Committee:

John J Forslin - KC8ULE

From: Hank Greeb
Topic: 2527 Message: 2534

A totally free (no registration fee necessary for the complete version) is W3KM's Gen Log (http://www.qsl.net/w3km/gen_log.htm) I've used it successfully for several contests, though the club with which I participated most recently used N3FJP's shareware program.

The fact that it is totally free means you can try all the features without having to pay a registration fee. If you don't like it after a while, you're just out the time you took to evaluate it.

Don't think you're married to a single program. Download one and try it. Log a few real QSOs and get a feel.

Don't care for it? You can export your log, import it into the next program, and keep on logging.

k8mhz@... wrote:

>When I try to get on QRZ (www.qrz.com <http://www.qrz.com>) I get a no such site message.

Yes, K8AJ complained about it yesterday. She uses the auto-look up with AC Log, and qRZ was down yesterday.

They lost the power supply in their server:

http://www.qrz.com/ib-bin/ikonboard.cgi?act=ST&f=3&t=147424

I'm really surprised that a site that large uses their own server. Usually, it is a lot cheaper, and whole lot more reliable to simply lease space on ISP's servers. Everything is backed up, roll over servers, etc.

QRZ is back up now, but it was bumping up and down a little bit this morning.

[As always, send replies to k8je@.... Do not click on REPLY. The ARRL reflector that gets this newsletter to you is one-way, only.]

- History has been Made
- Coordinator Appointed for Michigan
- Legislative Agenda
- ARRL Seeks Emergency Communications Manager
- W1AW Transmits on Required Frequencies
- Up-to-Date Frequency Allocation Chart
- Division Convention - September 22
- Tentative Itinerary for K8JE

HISTORY HAS BEEN MADE

Regardless of one's personal views on the situation, Amateur Radio history was made when the FCC's rule that abolished Morse code requirements for ham licensing became effective this past Friday. Any effort to continue the arguments against dropping the code requirement are equivalent with continuing to beat a dead horse for not running. I strongly suggest the best thing all of us can do at this time is to help newer amateurs become full citizens in our great service and Elmer them to become top-quality operators.

Amateur Radio may not be Amateur Radio without Morse code, but even under the new rule, Amateur Radio still has Morse code. It is simply no longer required to demonstrate the ability to use Morse before getting a license. Morse code will be around for a long time. Now that learning Morse has been made optional, its use may even become more wide-spread than during any time over the past 50 years.

COORDINATOR APPOINTED FOR MICHIGAN

Bob Wright, KB8APS, of Muskegon has been appointed Legislative Action Coordinator (LAC) for Michigan. He succeeds Val Rose, N8EXV of Flint who was appointed Division Legislative Action Chair (DLAC) earlier to assist me in managing the Legislative Action Program in the Great Lakes Division. Bob's will recruit and train additional Legislative Action Assistants who will represent the ARRL Legislative Agenda to US Representatives and US Senators in the Wolverine State.

For information on how you can help the ARRL's Legislative Agenda, please contact Bob at kb8aps@.... To inquire about helping with this agenda in Ohio, contact Brent Stover, WD8PNZ (wd8pnz@...). For Kentucky, contact Vice Director Gary Johnston KI4LA (ki4la@...).

Incidentally, we still need a full-time LAC for Kentucky to relieve Gary of the Legislative duties. Please contact me (k8je@...) if you would like more information on this position.

LEGISLATIVE AGENDA

Wherever I've visited in hamdom since returning from the Board mid-January meeting, I've asked members if they approve of the ARRL's legislative agenda for the current session of the US Congress. The immediate answer has always been a solid, "yes."

The agenda calls for us to pass national laws that are beneficial to Amateur Radio and the public we serve. These laws would enable amateurs essentially anywhere to put up antennas (overriding local codes covenants and restrictions), protect Amateur Radio frequencies from wanton sell-offs, require the FCC to re-evaluate its rules regarding "unintentional" emitters such as (but not restricted to) BPL and recognize the huge value the Amateur Radio community offers to the nation in times of emergency and disaster.

If you agree with this agenda, it is very nearly "put up or shut up" time. The time is rapidly approaching when ARRL members will be called on to contact their Congressmen to show local support for the first Agenda item introduced into the US House. In many instances, the first of our contacts will be made by teams of local members with the local offices of their US Representatives or US Senators. If you want these legislative items to pass, we need your active support. To do this, we first need to complete the organization of the Legislative Action Program in the Great Lakes Division. This is where you might fit in.

Our target is to have a team of two or three members in each Congressional District in our three states. These teams will be the ones who will contact local offices of US Representatives and US Senators. We are far from accomplishing this goal! Of the 6 Congressional Districts in Kentucky, two Districts (Districts 1 and 5, Mr. Whitfield and Mr. Rogers) have a two-member team ready to roll. The remaining Districts have absolutely no members who have volunteered for the Program or have just one member to do this critical task.

Of the 15 Districts in Michigan, only District 7 (Mr. Walberg) is represented by a two-member team of ARRL members. The remaining 14 Districts have no one or only one member to represent Amateur Radio interests to their Representative.

Finally and best off, if one wishes to consider this as being best off, Ohio has a whopping total of four Districts of its 17 with two-member lobbying teams. You guessed it, the remaining 13 Districts are either not represented or are represented by no more than one member.

We need your help. ARRL is a "member organization." This means not only that members pay dues to belong and support the League; but that members often need to supply the muscles that are needed to help ARRL protect and promote Amateur Radio. Without at least a small amount of

sweat from each of us, ARRL has no muscle . . . and no face. We need you to add muscle and the face on Amateur Radio to your Congressional Representatives.

We all make choices throughout our lives. In this instance, we can choose to sit back and do nothing (a time-honored tradition for many people) or we can choose to become involved and make things happen. If we sit back and do nothing, we have absolutely no right to complain when CC&Rs prevent us or our friends from putting up antennas, or if FCC sells off our bands. How'd you like to loose the 2M or the 20M band?

If we do nothing, we also have absolutely no right to brag or take credit when things go well. We certainly would have no reason to feel "warm and furry" over helping to save Amateur Radio.

If we choose to roll up our sleeves (in this case, to put on a shirt and tie or nice dress), we will have every right to feel we are part of the solution when our work is successful.

If you are interested in learning how you can become part of helping pass the legislation I mentioned, please contact your Legislation Action Coordinator, our Division Legislative Action Chair, Val Rose, N8EXV (n8exv@...) or me at k8je@... for further information.
Let us know you are willing to help. In Kentucky, contact Gary Johnston, KI4LA (ki4la@...), in Michigan it is Bob Wright, KB8APS (kb8aps@...) and in Ohio contact Brent Stover, WD8PNZ (wd8pnz@...).

A POSSIBLE OOPS: I have the uneasy feeling that during the early phases of the Legislative Action Program in this Division two or three additional people had volunteered to be LAAs. If you had volunteered for this position and if you've not heard from anyone about your appointment during the last three months, please let me know. It is very possible that your offer was lost into the ethers early on. I apologize for anyone to whom this may have happened. We haven't ignored you. We have simply been inept.

ARRL SEEKS EMERGENCY COMMUNICATIONS MANAGER

As mentioned in the last issue of Words, the ARRL seeks to fill the new position of Emergency Communications Manager that has been made in the Membership and Volunteer Programs (MVP) Department. The following notice is from a recent ARRL Letter.

"This is a permanent staff position at League Headquarters in Newington, Connecticut, and applicants must be willing to relocate. Candidates should have at least a bachelor's degree or equivalent experience and an Amateur Radio license. Applicants should hold or be able to earn an Amateur Extra class ticket.

"Other qualifications include:

"* knowledge of Amateur Radio, including HF, VHF and digital modes related to emergency communications

"* five years' minimum ARES/RACES experience or equivalent

"* ARRL Field Organization leadership experience

"* knowledge of and experience with ICS and NIMS (FEMA 100 and 700 certification highly desirable, 200 and 800 certification recommended)

"* completion of the Level 1 ARRL Amateur Radio Emergency Communications course (EC-001)

"* superior speaking and writing skills

"Emergency communications professional and/or first responder experience is desirable

"The Emergency Communications Manager will act as ARRL emergency communications liaison to government agencies, including FEMA and the Department of Homeland Security. This individual also will:

"* administer memoranda of understanding between ARRL and served agencies, such as the American Red Cross

"* maintain and encourage relationships with all ARRL served agencies

"* create and administer ARRL's internal emergency response plan

"* coordinate Simulated Emergency Tests

"* assist field personnel with emergency communications and public service events, as required

"* maintain and update ARRL emergency communications training materials and publications plus ARRL emergency communications and public service Web content

"* maintain the ARES volunteer database

"* act as liaison to ARRL emergency communications Field Organization leadership

* write/edit occasional material for QST and other ARRL publications

"* manage other emergency communications and public service-related issues.

"To apply, submit cover letter and resume via e-mail or USPS to Human Resources Manager LouAnn Campanello <lcampanello@...>, ARRL, 225 Main St, Newington, CT 06111. ARRL is an Equal Opportunity Employer."

As you can see, the new EmComm Manager position requires a heavy-hitter. All information for the position is available from LouAnn Campanello at the above addresses.

W1AW TRANSMITS ON REQUIRED FREQUENCIES

I hadn't given this much thought recently, but a comment by a couple of amateurs reminded me that most people probably do not know the reason W1AW sometimes appears to jump in on top of ongoing QSOs. The facts are that W1AW in its formal operation to educate and inform amateurs must transmit on a pre-published schedule on pre-published frequencies. This is an FCC requirement of ARRL for transmitting bulletins, code practice, code proficiency runs and any other scheduled activity. Therefore, W1AW is firmly prohibited from QSYing or to shift schedule at a moment's notice. However, when making casual QSOs, W1AW is equally required to observe the same requirements as other amateurs -- and to avoid intentional QRMing of ongoing activities.

W1AW operating schedules are published well in advance in QST and on the Internet to advise amateurs when they can expect the station to be on the published frequencies. In addition to this, W1AW also attempts to be a good radio citizen by transmitting brief advisory notices at 5 minutes and 1 minute before beginning its scheduled longer transmissions. The pre-published schedule and brief advisory notices are good faith attempts to avoid QRM with the operations of other stations.

The next time you hear someone ask why ARRL thinks it is so almighty that it allows W1AW to broadcast bulletins and other scheduled operations without QSYing to avoid QRMing, the answer is very simple. The FCC does not permit W1AW to deviate from its published schedule. To vary from this schedule would be a violation of an FCC mandate to ARRL. The educated amateur should take this fact into consideration before operating on a frequency that has been publicly announced for W1AW operation.

UP-TO-DATE FREQUENCY ALLOCATION CHART

A fully updated Frequency Allocation Chart for US amateurs has been released by ARRL. The chart may be downloaded at www.arrl.org/FandES/field/regulations/bands.html. The chart became effective February 23.

DIVISION CONVENTION - SEPTEMBER 22

It isn't too early to plan to attend the biannual ARRL Great Lakes Division Convention in Cleveland on September 22. The keynote speaker will be ARRL's vibrant President, Joel Harrison, W5ZN. The Convention will feature interesting and informative seminars, a banquet and opportunity to talk directly with President Harrison, Division and Section officials. Go to www.2007gldc.com/ for a complete list of seminars, sponsors, and speakers and their biographies.

TENTATIVE TRAVEL SCHEDULE FOR K8JE

Mar 12: West Chester ARA, West Chester, OH.
Mar 15: Bellbrook ARC Dinner Meeting, Waynesville, OH.

Mar 18: Toledo Hamfest, Toledo.
Mar 20: Owensboro ARC Dinner Meeting, Owensboro, KY.
Mar 31: Elizabethtown (KY) Hamfest.
Apr 14: QCWA Meeting, Cleveland, OH.
Apr 21: Programs & Services Committee Meeting, Newington, CT.
Apr 26: SUMCO ARES, Stow, OH.
May 10: LARK, Howell, MI.
May 18-20: Dayton Hamvention, Dayton, OH.
Jun 17: Monroe Hamfest, Monroe, MI.
Jul 19: Programs & Services Committee Meeting, Newington, CT.
Jul 20-21: Board of Directors Meeting, Newington, CT.
Jul 28: UP Hamfest, Escanaba, MI.
Aug 18-19: ARRL National Convention, Huntsville, AL.
Sep 8: GRAHamfest, Grand Rapids, MI.
Sep 9: Findlay Hamfest, Findlay, OH.
Sep 22: Great Lakes Division Convention, Cleveland, OH.
Sep 23: Cleveland Hamfest, Cleveland, OH.
Oct 2: OH-KY-IN ARRL Night, Cincinnati, OH.
Dec 1: Motor City RC 75th Ann., Wyandotte, MI.

Want Vice Director Johnston, KI4LA or me to attend a club function?
Let us know. If we are available, we will attempt to accommodate you.
Gary is at ki4la@.... I am at k8je@....

73,

Jim, K8JE

2545. CPR Saturday - Last Chance!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-02-26 14:34:07 UTC
From: Steve Vander Hill
Topic: 2545 Message: 2545

Ottawa County American Red Cross CPR Saturday is being held this Saturday, March 3, 2007, from 9:00am till 1:00pm. They are offering FREE Adult CPR & AED training.

The training sites are:

* Holland- Holiday Inn - 650 E. 24th
* Grand Haven- St Patrick's Catholic Church- 920 Fulton- just off of US 31
* Hudsonville- Baldwin St. Middle School- 3835 Baldwin
* Allendale- Allendale Township Hall- 6676 Lake Michigan Drive, Allendale

There is VERY LIMITED room left, pre-registration is required, so call the Chapter at 616-396-6545. I will be one of the instructors at the Hudsonville site, so be aware!

Best regards,

Steve - N8UJD

2546. Amateur Radio Newsline Report 1540 - February 16th, 2007

Yahoo group: WestMichiganHams (2006 — 2008)

>
>
> Amateur Radio Newsline Report 1540 - February 16th, 2007
>
> The following is a closed circuit advisory. I'm Newsline Support
> Administrator Andy Jarema, N6TCQ, with a few quick thank-yous.
>
> In the month of March we heard from monthly contributor Joseph Bartzi,
> Jr., KC8DKF of Columbus, OH, The Egyptian Radio Club, W9AIU of Glen
> Carbon, IL , The Ogemaw Arenac Amateur Radio Society, K8OAR of
> Prescott, MI and Jay Underdown, W0PS of O'Fallon, MO
>
>>From California, we heard from monthly contributors William Walters,
> WA2IBM, and Scott Hensley of the Area Communications Team, both in San
> Jose, the Rio Hondo ARC of Whittier, the Orange County ARC in Tustin
> and Often-contributor John Rice, KE6YFV of San Pedro.
>
>>From PayPal we heard from the Baldwin Hills ARC, WA6MDJ & WA6TFD of Los
> Angeles.
>
> We want to thank all of you who have donated so far in 2007. It is you
> who are keeping these newscasts on your favorite repeater and direct
> to you on the web. Unfortunately, what we have received since the
> beginning of the year is simply not enough to keep us going through to
> springtime, let alone to the end of the year. In fact, we still need
> to raise monies to fully pay off our expenses from December of 2006 .
> As to the January bills -- they still need to be assessed.
>
> As we have said before, making a contribution is only a mouse click
> away if you have Pay Pal. Just go to www.arnewsline. org and click on
> the button at the top of the page marked "Make Donation."
>
> Or you can send in a contribution to the Amateur Radio Newsline Support
> Fund, Post Office Box 660937, Arcadia California, 91066.
>
> All donations are tax deductible and whichever way you choose, the all
> volunteer crew at the Amateur Radio Newsline will be eternally
> grateful. Simply said, we are here to serve you.
>
> For the support fund, I'm Andy Jarema, N6TCQ
>
>
> Amateur Radio Newsline report number 1540 with a release date of
> Friday, February 16th, 2007 to follow in 5-4-3-2-1.
>

> The following is a Q-S-T. Hams across the nation fight for the right
> to go mobile as numerous states propose laws to ban in motion
> electronic messaging. Find out the details on Amateur Radio Newsline
> report number 1540 coming your way right now.
>
> **
>
> RADIO LAW: OREGON HAMS FACE PROPOSED MOBILE RADIO BAN
>
> Hams in several states are now facing the possibility of new laws aimed
> at cellphone users that broadly forbid the use of any sort of two-way
> mobile radio gear. In Oregon, three such pieces of legislation have
> now been introduced in the state Legislature. Don Carlson, KQ6FM,
> reports:
>
> --
>
> Oregon hams are facing three proposals aimed at mobile cellphone and
> text messaging that could also restrict their ability to communicate
> while in motion. Oregon state measures House Bill 2482 and Senate Bill
> 293 are nearly identical save for a higher fine in the Senate measure.
> It sets specific penalties and levels of fines.
>
> On the other hand, Senate Bill 246, is a little more complex. It
> includes increased fines if the violation results in an accident,
> injury or death. It also requires the offender to take additional
> steps after conviction as well as suspends their license even if no
> accident has taken place.
>
> None of the three proposed ordinances contain any exemption for Amateur
> Radio operations. Not even during emergency situations. As such, hams
> in Oregon are mounting a multi-pronged campaign against them. They
> either want to riders added to that exempts all Amateur Radio
> operations from any of the proposed measures, or to the defeat of all
> three.
>
> For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.
>
> --
>
> No word yet if legislators have been approached by the Oregon ham
> community to try to work out a compromise. (W7ZVD, ARNewsline)
>
> **
>
> RADIO LAW: WASHINGTON COULD BAN ALL TYPES OF MOBILE ELECTRONIC
> MESSAGING
>
> And hams in Washington state are now on alert. This, as Representative
> Joyce McDonald introduces her electronic devices control law before

> that states legislature. Paul Vinoski, KR8ZZY, has more:
>
> --
>
> If enacted as written, the Washington state measure would ban anyone in
> a moving vehicle from reading, manually writing, or in any way sending
> a message using any form of electronic device. This includes any form
> of readerboard in which the message is updated by wireless connection
> and which may also display Amber Alert messages.
>
> Washington state considers a readerboard to be any form of visual
> display in line of sight of a driver. Theoretically, even the display
> on an X-M or Sirius satellite radio receiver would likely fall in this
> category as would the displays used for a vehicle satellite guidance
> system. For ham radio, it could mean that A-P-R-S and other packet
> messages would be affected.
>
> Also, the language of the measure does not require the electronic
> wireless communication device being read to even be in the vehicle. And
> its ambiguous enough that the ban on sending is not restricted to text
> messaging. In theory at least it would seem to include any sort of
> messaging that could in any way impede a persons ability to safely
> operate a motor vehicle.
>
> For the Amateur Radio Newsline, I'm Paul Vinoski, KR8ZZY
>
> --
>
> Although the proposed legislation purports to cover text messaging
> devices aimed at teens, the language of the proposed law is so broad as
> to include a lot of other forms of personal electronics in which text
> arrives to the driver via a radio transmission. (W7ZVD, ARNewsline)
>
> **
>
> RADIO LAW: NY HAMS FACE PEDESTRIAN ANTI CELLPHONE LAW
>
> And if you think that one bad, New York state pedestrians including
> radio amateurs could find themselves on the wrong side of the law.
> This by just crossing the street while chatting on a cell phone, using
> a two-way device or just listening to an iPod.
>
> State Senator Carl Kruger plans to introduce legislation to make it
> illegal to use any form of portable electronic devices while crossing
> the street. The measure would impose $100 fine and a trip to criminal
> court for anyone caught crossing the street while using any electronic
> device. News reports say Kruger opposes any exemptions other than for
> police, fire and emergency first responders.
>
> The proposed legislation comes after the deaths of two pedestrians

> within the past five months in the senators Brooklyn district. The
> first walked into the path of an oncoming bus after stepping off the
> curb at a busy intersection Later a 23-year-old man was struck and
> killed while listening to his iPod while crossing the street.
>
> Police officials in cities around the country have cautioned citizens
> against using electronic devices in public. According to Senator
> Kruger, electronic devices not only distract people from watching for
> oncoming vehicles, but also can attract big-city hazards such as
> pickpockets, muggers and purse-snatchers. (Published news reports)
>
> **
>

> A February 7th release from the states ARRL New Mexico Public
> Information Officer Charlie Christmann, K5CEC, spells out in most vivid
> terms the disastrous consequences that New Mexico House Bill 241 would
> have on that states ham community to respond in emergencies and asks
> all hams in the state to oppose it.
>
> As reported last week, the measure was introduced into the New Mexico
> House of Representatives by Antonio Lujan of Las Cruces. While the
> primary intent is to prohibit the use of mobile telephones, the bill is
> all encompassing and targets all two-way radio equipment. The only
> exemption is for public safety and commercial vehicle operators.
> Unlike other New Mexaco state laws there is no provision to allow the
> use of hands-free devices.
>
> Christman's release says that Amateur Radio operators in New Mexico
> will oppose the bill because it will prohibit their ability to use
> their radio equipment from their vehicles. He notes that Amateur Radio
> has a long history of service to this state, including providing
> communications for the Sandoval County fires in the summer 2006.
> Christman notes that several County Emergency Managers in New Mexico
> recognize the effectiveness of Amateur Radio and have earned their own
> Amateur Radio license.
>
> For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF
>
> --
>
> ARRL Rocky Mountain Division Vice-Director Brian Mileshosky, N5ZGT,
> may have summed it up best. He is quoted in the release as saying that

> this bill should be amended to exempt ham radio operators or it should
> not go to the floor for a vote. (K5CEC)
>
> **
>
> RADIO LAW: WYOMING PROPOSES TO EXEMPT CB'ERS FROM PROPOSED ANTI MOBILE
> COMNMUNICATIONS LAW
>
> Meantime a big win for 11 meter C-B operators in Wyoming. That's where
> two measures are now before the legislature to outlaw the use of
> cellular or satellite telephones while a vehicle is in motion.
>
> Both bills contain specific exemptions for 11 meter Class D operators
> along with first responders and most commercial users. However, there
> is no exemption for Amateur Radio operations.
>
> Hams in Wyoming are reported to be trying to get similar treatment, but
> so far their requests have fallen on deaf legislative ears. (KB0IIM)
>
> **
>
> ENFORCEMENT: FCC ISSUES SHOW CAUSE IN 14 YEAR OLD CASE

> his Amateur service license designated for possible revocation by the
> FCC. This, as the regulatory agency asks David L. Titus, KB7ILD, of
> Seattle, Washington, to justify why his Amateur Radio license should
> not be revoked. Amateur Radio Newsline's Mark Abramowicz, NT3V,
> reports:
>
> --
>
> The FCC says it is taking steps to revoke the Amateur Radio license of
> 32-year-old David Titus who is listed on Seattle's sex offender
> registry for his 1993 conviction for soliciting an 11-year-old boy at a
> gym.
>
> The registry says Titus, KB7ILD, served a 20-month prison term for his
> conviction on a charge of communications with a minor for immoral
> purposes.
>
> The FCC'S Enforcement Bureau issued an order on Jan. 30 of this year to
> Titus requiring him to - in legal terms - show cause as to why he
> should keep his ham license.
>
> In a four-page order obtained from the FCC by Amateur Radio Newsline,
> the commission cites sections of the Communications Act of 1934 as its
> justification for moving against Titus nearly 14 years after his
> conviction.
>

> Kris Anne Monteith, chief of the Enforcement Bureau, signed the order.
> She says Section 312 gives the FCC the right to revoke any license if
> "conditions come to the attention of the Commission which would warrant
> it in refusing to grant a license or permit on the original
> application. "
>
> Monteith asserts an applicant's character is among the factors the
> commission can consider.
>
> And, "any conviction for misconduct constituting a felony," calls into
> quetion whether "the applicant lacks to traits of reliability and or
> truthfulness necessary to be a licensee."
>
> Monteith contends felony convictions, especially those related to
> sexual offenses involving young children, raise questions regarding an
> amateur licensee's qualifications.
>
> She says because the Amateur Radio Service is particularly attractive
> to children, it calls into question whether Titus should be able to
> retain his ham license.
>
> Titus has 30 days to respond to the order and a hearing will be
> scheduled before an administrative law judge on the matter.
>
> For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in
> Philadelphia.
>
> --
>
> The full show cause order is on the FCC Web site at the
> http://hraunfoss. fcc.gov/edocs_ public/attachmat ch/DA-07- 377A1.pdf

> ENFORCEMENT: UNLICENSED BROADCASTER GDINGED FOR $10,000
>
> The FCC has issued a monetary forfeiture in the amount of $10,000 to Gary
> Toussaint. This, for operating an unlicensed radio transmitter on the
> frequency 102.9 MHz in Mattapan, Massachusetts.
>
> On March 8, 2006, the Commission's Boston Field Office issued a Notice of
> Apparent Liability for Forfeiture in the amount of $10,000 to Toussaint.
> On May 15, 2006, Toussaint submitted a response to the N-A-L and
> requested cancellation of the proposed forfeiture based on his inability
> to pay.
>
> Toussaint stated in the response that documentation in support of his
> request would be submitted under separate cover. To date, no such
> documentation has been received by the Commission.

>
> Based on the information before it, the Commission has affirmed the
> $10,000 forfeiture order. Toussaint was given the usual 30 days to pay
> or to file a further appeal. (FCC)

> RESCUE RADIO: CALIFORNIA TO STREAMLINE STATE EMERGENCY AGENCIES
>
> The State Auditor of California's and one of its senators say that far
> to many agencies overseeing the states emergency preparedness. Both
> say that this demonstrates the need to clarify which one should take
> the lead when disaster strikes.
>
> Auditor Elaine Howle recently told a Senate committee that her office
> had to draw its own organizational chart. This, to sort out the
> interconnecting and often overlapping responsibilities of the various
> agencies. They include the Governor's Office of Emergency Services,
> Governor's Office of Homeland Security, California Department of Health
> Services and more than a dozen other departments, boards, committees
> and councils.
>
> State Senator Dean Florez, the committee's chairman, plans legislation
> this year to streamline the emergency response bureaucracy. The
> nonpartisan Legislative Analyst's Office has also recommended changes.

> RESTRUCTURING: MORSE TESTING RIDES INTO THE SUNSET SEPT 23rd
>
> Well, it will not be long now until Morse testing to obtain a ham
> license in the United States is a thing of the past. Friday, February
> 23rd is that day and according to ARRL Media and Public Relations
> Manager Allen Pitts, W1AGP, many groups around the nation are holding
> "last code testing" sessions. Others will be having sessions for
> paperwork upgrades on the February 23rd.
>
> Pitts also notes that a number of groups have scheduled additional Tech
> level licensing classes or are planning welcoming parties on the
> airwaves as Techs venture out on 10m SSB and yes, using the code on H-F
> digital frequencies.
>
> Some say that they will be on the air over the weekend to look for new
> people. This, to say hello and help them make their first H-F
> contacts.
>
> Pitts says that he hopes your group is among those who use this
> opportunity to welcome the newcomers to H-F, to help them be at ease
> and to help your organization to grow with new members. He adds that

> even at this late moment in time, it's still not too late to get
> something going. (W1AGP, ARNewsline)

> LAW VS. TECHNOLOGY: HACKER CLAIMS TO HAVE BROKEN THE IPOD CODE
>
> A Norwegian hacker now living in San Francisco and known for cracking
> the copy-protection technology in DVDs claims to have unlocked the
> playback restrictions of Apple Computer Inc.'s iPod and iTunes music
> products. Don Wilbanks, AE5DW, has more:
>
> --
>
> Jon Lech Johansen, also known as "DVD Jon" has a system that he says
> mimics the Apple protection scheme and there-by disables it.
>
> Johansen became a hero to hackers at age 15, when he posted software
> called DeCSS to unlock the Content Scrambling System, or CSS, the film
> industry used on DVD movies to prevent illegal copying. The act made
> Johansen, who was then living in Norway at the time, a folk hero among
> hackers.
>
> The film industry complained and Norwegian authorities charged him with
> data break-in. Johansen was acquitted and has since become a strong
> advocate of the open-source philosophy of making software code freely
> available for inspection and sharing.
>
> With his latest decript Johansen says that he plans to license his code
> to others. The move, will likely pit the 22-year-old computer guru
> against Apple's lawyers,. Experts say if Johansen is successful he
> could free users from some restrictions Apple and its rivals place on
> digital music.
>
> I'm Don Wilbanks, AE5DW.
> --
>
> No word yet on whether or not Apple will be taking on Johansen in a
> court of law. (Science OnLine)

Beacons?

Beacons are on the radio to help you determine if there is propagation between you and the DX, or more specifically the beacon, you might hope to QSO. The NCDXA (is that right?) beacon network is worldwide and quite structured. I recommend you find some beacon software that will listen for the beacon and help you listen for them. That way, when you cannot hear the beacon in Taiwan or where ever you can really know which beacon is missing. Otherwise these beacons send their call sign, in cw, at twenty wpm, in what is really a fast burst, at least for my taste. This beacon network is on all the regular bands like fifteen and twenty meters, as well as ten. And I seem to remember that there are any number of private beacons on ten meters. Their structure is a whole lot less formal, they transmit at all power levels, and might send their ID at twenty wpm or other speeds. I don't recommend you rely on these private beacons like you might the better and more structured worldwide network mentioned above. For example, K8PY had a beacon on ten meters. It is off the air and you wouldn't know that unless you asked. Makes tracking the private ones more difficult.

And, you'll likely find that at the bottom of the sunspot cycle (we're suffering that state, today) there is precious little propagation on ten meters. I would suggest you look for ten meter contests as they really put a lot more stations on the band. Was it last November that I had several QSOs on ten meters during a contest? Sweeps? Or get a Ten-Ten number and chase these folks around.

You'll find more joy by learning and passing the General class material. Need help with this? There is talk of a General class being offered by the radio club. No firm dates, yet.

Or you can learn code. There are folks who will help you, QSO you usually on the slow code part of forty meters, and you can get a "code buddy" to nudge and encourage. Kinda makes passing the General test more appealing? My guess, anyway.

Hello, All:

You are welcome to attend the March 1st meeting of the Muskegon Area Amateur Radio Council, located at 2888 Scenic Drive, Muskegon. (If you have trouble finding us, the 146.94 repeater is your choice for directions and friendly voices.) The program will be first on the agenda at 7:00 p.m. and Greg Hoffman, N8RXB, will present it. The topic is New Technology and GPS. Greg is owner/operator of The Mariner's Centre, a marine electronics business, located in Muskegon. He is also involved with the Muskegon Technical Academy. Come with questions and curiosity. This should be an excellent program!

73,
Linda, AB8QH
Vice-President, MAARC

The ten meter band goes from 28.000 to 29.700 mhz Paul, so you're going to want to use a center frequency a little higher then 28.500, probably somewhere around 28.800 or 28.900 mhz might be better. I could be wrong on this one, but that's the thought that comes to my mind.
73, Chris

Subject: [HARC] THIS SAT -Next MINI-SWAP at HARC's T&T center.

Spread the word! It's time again to enjoy Holland Amateur Radio Club's next **FREE** mini-swap which takes place this coming Saturday. Each month our mini-swap just keeps getting better and better!

Bring all your surplus items, come join us at our Technology and Training building in downtown Holland. Family and friends always welcome to join in for a fun day of fellowship, food and great bargains to be had.

Free Parking available on site.

DATE: SAT MARCH 3rd 2007 (Talk in : 147.060 94.8pl)

SET UP TIME: SAT 09H30 - 10h00
Note: Friday night prior a limited opportunity exists between 19h00 - 20h30 to pre-setup your
table.

SWAP TIME: SAT 10h00 to 2.00pm

VENUE: 280 East 8th Street, Holland (right next to Holland Chamber of Commerce).

ENTRY FEE : **FREE**!

TABLE COST : **FREE**

HARC will provide once again....

* FREE table space
* FREE trunk swap parking space (weather permitting)
* FREE parking
* FREE entry
* FREE coffee
* 50/50 Draw

(To offset our new buildings upkeep, donations from sellers /visitors are always very much appreciated!)

Bring what ever surplus radio / computer equipment to sell / swap. Last month a lot of equipment changed hands! Turn that surplus gear into cash.

We look forward to seeing everyone there.

ANY QUESTIONS:
Please contact HARC Building Manager - Ken ZR5AAD/W8

2566. ARRL International DX Contest This Weekend

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-02 14:22:43 UTC
From: Bill
Topic: 2566 Message: 2566

All:

The ARRL's BIG DX contest is this weekend. It is the SSB version on HF. This is one great opportunity for hams to fill in a bunch of countries on that needs list. And a good chance to QSO exotic and run-of-the-mill DX, too.

This event will be more informal. W8ZHO will not enter the contest. The club's shack will be available for individual hams to use their call signs and privileges to chase DX. There will also be experienced contesters available to help smooth the process, encourage, direct, and train.

If you want to participate you should contact:

(in no particular order)
Al, KV8X
Tom, W8AMZ
Bill, AB8SC

We will certainly be at the clubhouse on Sunday. We also welcome the opportunities on Saturday. You will need to ask and coordinate your effort with one of these folks. In this contest there are Huge pile-ups late on Friday and on Saturday while the DX will generally be less busy on Sunday.

As an aside, you might remember we participated in Sweeps last November. Four hams in that event managed to QSO the 5A7A station from Libya. The QSL cards for those contacts arrived this past week. There will be similar opportunities in this contest.

Drop us a phone call or email. We're willing to help and open the clubhouse with your request.

2567. 10m Beacons

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-02 15:50:15 UTC
From: Bill
Topic: 2567 Message: 2567

All:

There was a little chatter around here lately about beacons on ten meters. In my email I'll often get various emailed newsletters. The recent one from the ARRL on the subject of propagation had the following paragraph:

Eric Owen, KD4MZM of Sarasota, Florida sent a URL for a web page devoted to 10-meter beacons at, http://10mbeacons.com/. Here you can check loggings for 10-meter beacons, and leave your own feedback as well for any you hear. There is also a list of links to individual beacon web sites, and a beacon-chat area. Eric runs a beacon on 28.277 MHz.

I've not gone there and don't have an opinion about beacons outside of my earlier post. Just thought you might find some joy here.

Bill, AB8SC
MAARC guy

All:

We've got a little better than a month before the Michigan QSO Party. W8ZHO is planning to field another Multi operator Single Transmitter effort this year. Remember last year's effort netted our club a respectable third place certificate.

This year I'd like to schedule folks to operate and log. Maybe an hour operating and then an hour logging? We'll make this fun with special opportunities.

Mark your calendar for this fun event. April 21. Starts noon and runs for twelve hours until midnight. We will operate from the W8ZHO MAARC clubhouse.

Hope you can join us for the fun!

73

Bill, AB8SC
MAARC guy

Some repeaters may use different tones for the input and output. All you need, of course, to access the repeater is the correct input tone. Repeaters may use split tones to reduce interference to an <upside down> repeater on the same pair, or to reduce an intermod problem at their site. Notice I said <reduce>. Subaudible tones don't cure interference, they only cover it up...

Wish I were there!

From: Hank Greeb
Topic: 2585 Message: 2585

The Grand Rapids ARA will hold a class for the General Class Amateur Radio License for an eight week period beginning March 20, 2007 and continuing on Tuesday evenings until May 8. There will be an exam session on Friday, May 11. A team of eight instructors will lead the course, and there will be practical demonstrations of various aspects of Amateur Radio theory and practice.

Where: American Red Cross
1050 Fuller Ave NE
Grand Rapids, MI 49503
1/2 Block South of Leonard on Fuller NE

Classes will start at 7:00 p.m. and end at 9:30 p.m.

There is a charge of $20.00 for a study book and supplies.

Please pass the word amongst your fellow hams

If interested, please contact Dave DeVos, KF8QL <devosd@...>

2591. Watch "Amateur Radio: "Every Single Minute"" on Google Video

Your friend, jtlr.fischer@..., has sent you the following
video from Google Video and included this message:
this video shows the use of mobil comms and how a net should go besides
the mobil gear looked good you dont see to many 102 " whips today

Title: Amateur Radio: "Every Single Minute"
http://video.google.com/videoplay?docid=2943570522939177086&pr=goog-sl

Description: In 1955, The Phil-Mont Mobile Radio Club, an association
of mobile amateur radio operators, provided emergency communications
during the during the devastating flooding along the Delaware River and
in the Pocono Mountains following Hurricane Diane, the sixth costliest
U.S. hurricane of the 20th century...fifty years before Hurricane
Katrina.

In 1959, the club produced this short film to explain amateur radio,
and especially mobile communications as practiced by the club.

(The main film begins after a three minute interview with Jim Spencer,
W3BBB, produced by a local cable channel many years later)

All, Its time again.. River Bank Run 2007! This sign up is for the main event.. Remember that if you sign up we will need you at a Pre-Race meeting the night before. We are also looking for a few people to ride bikes in to help cover the event. So if your in shape and you want to ride a bike let me know. Please go to this link to sign up. www.kcraces.net/rbr River Bank run requires lots and lots of people.. This is the BIG ONE for the year, 5 hours of controled chaos! 25,000 people and lots of fun! We need everyone, we do not care what club you belong to, ARRL affiliation or any other affiliations. All you need is a Tech License and be willing to give up your Friday Night / Saturday Morning for lots of Fun!!!! IF you have questions or to sign up for the smaller events please email me jnawrot@...

This year there are several events related to the River Bank Run to help get things going..

April 21 - Pre Run Need about 15-20 people

May 8th - Holland Junior Run Need about 10 People for this

May 9th - Wyoming Junior Run Need About 15 People for this

May 11th - Pre Race meeting Everyone signed up needs to be at this. Meeting place will be the Red Cross 1050 Fuller Ave NE
May 12th - Main Event - Need about 80 People for this event!!!

My favorite is Win2K but XP is ok too. XP just has too much of a cartooney feel to it. I have heard Vista is totally different and a big investment as an upgrade.

Maybe we should set up a workshop with a Linux expert and have that as one of the club presentations. That way we could free ourselves from the bonds of Microsoft.

2597. Daylight Savings Time

From: Jim
Topic: 2597 Message: 2597

Just a reminder about daylight savings time. Here are some helpfull information to make sure your computer changes the time this weekend.

If your computer is setup to receive automatic updates, you should be all set, however it will be good to check just to make sure.

With the upcoming time change Sunday at 2:00 am you will want to check your home computers and apply the windows update patch that corrects DST to the new start and end dates. You will want to assure that patch (KB931836) is applied. You can check from the windows update page in Internet explorer. Then click on View to see your update history. If it is not already installed click on the express install and it will download. Then install updates and you should be good.

If you have an older computer running Win 98 or 95 you will have to manually make the change this Sunday and again on April 1 as the system will not know that it has been changed, you will need to do this every time DST changes in Spring and Fall for as long as you keep these computers running, as Microsoft does not have a patch for the older systems.

Old DST: First Sunday in April until Last Sunday in October
New DST: Second Sunday in March until First Sunday in November

2598. Reminder, Marshall Hamfest, Saturday March 17

Marshall Hamfest, 2007, Saturday March 17th, 2007,8am to 1pm at the
Marshall High School

Details at http://www.w8df.com/hamfest.html

Marshall is about 90 miles SE of downtown Grand Rapids just off I-94

2599. Wisconsin QSO Party Sunday March 11

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-07 23:02:20 UTC
From: Hank Greeb
Topic: 2599 Message: 2599

2007 Wisconsin QSO Party - 1800Z March 11 to 0100Z March 12

Eastern (Michigan) Time: March 11 - 2:00 PM to 9:00 PM EDST

Note: This is the first day of Daylight Savings Time

SSB, CW, Digital, 80 thru 2 metres. For details and rules see

http://www.warac.org/wqp/wqp.htm

Typically this QSO Party has over 200 participants, with over 100 in Wisconsin, so there should be plenty QSO's available. There is a special award for out of state operators who contact all 72 Wisconsin counties.

I purchased a new Dell desktop the week Vista was released. I wanted to replace my old Dell machine that is almost 5 years old. That old machine works well but is not upgrade-worthy to Vista as it was made during the early 00s Intel marriage with RAMBUS memory. It has 512 megs in it and would cost almost $700 to add another gig of ram to in order to make it Vista worthy, plus it doesnt have a DVD drive which is needed to install Vista out of the box.

So far, I like Vista. It seems very stable but so does XP. The feel is very, very different than the predecessors. Micorsoft did good finally with Mediaplayer, native support for images, and with IE 7.0. The whole hype about how much of a resource hog it can be is true. Notice I emphasize the word true. If you run it with all the fancy fade and transparency features that Microsoft touts, it runs slowly even on my new machine which is an AMD 64 X 2 dual core 3800 processor running at 2.0 GHZ with 4 gigs of DDR2 ram and an ATI Radion XI 1300 pro card with 256 megs of ram. If you turn off all of the fancy visual settings the system easily runs half again as fast with them on. Lag time disappears.

I have not had any major problems getting software to work. They still don't have full OEM drivers out for my printer but Vista came with basic drivers preloaded. The layout is so different the issues I had that were blatent I was able to solve after playing around with settings and figuring out where stuff is among the new menu layouts.

Checkpoint has still yet to release a Vist version of ZoneAlarm Security Suite. This is my major compatability gripe. My free 30 day trial of Norton 2007 updates expires on Monday. Once Checkpoint releases a Vista compatible version I will upgrade my laptop and my parents' machine to Vista basic and let you guys know how that goes. I am not anticipating any real issues there since their machine is just over a year old and my laptop is under 2 years old.

Kind of sort of off topic, but on all of my XP computers I set them up for the high performance mode. It gets rid of the cartoonie feel. If you right click on My Computer and go to Properties. Then click on Advanced, then the performance settings button. I have been running XP Pro on a 333 with 250mb of ram with no problems on my laptop. It runs great! In the standard mode, it is pretty slow. I suppose I don't know if that setting exists in a XP home edition computer, but it might.

I have posted the tzedit utility for both 2000/xp and for win9X and ME on my website. http://www.tdats.net You can edit the time zone data with this utility, including the start and end dates, times, the time zone names, all without registry edits. I have only tested these utilities in windows 2000, XP and 98 computers.

You can also use the utility to tell if the automatic update for xp was installed or not.

The downloads on the instructions website I posted do not seem to work, but the directions are good. The downloads on my site are valid files that I used to patch our work computers.

Good luck!!

Subject: [WestMichiganHams] Daylight Savings Time

Just a reminder about daylight savings time. Here are some helpfull information to make sure your computer changes the time this weekend.

If your computer is setup to receive automatic updates, you should be all set, however it will be good to check just to make sure.

With the upcoming time change Sunday at 2:00 am you will want to check your home computers and apply the windows update patch that corrects DST to the new start and end dates. You will want to assure that patch (KB931836) is applied. You can check from the windows update page in Internet explorer. Then click on View to see your update history. If it is not already installed click on the express install and it will download. Then install updates and you should be good.

If you have an older computer running Win 98 or 95 you will have to manually make the change this Sunday and again on April 1 as the system will not know that it has been changed, you will need to do this every time DST changes in Spring and Fall for as long as you keep these computers running, as Microsoft does not have a patch for the older systems.

Old DST: First Sunday in April until Last Sunday in October
New DST: Second Sunday in March until First Sunday in November

Oh yeah, I agree... Daylight savings time is a pain, especially for us IT people, and even worse this year. I am going to have to re-set my alarm clock and watch 4 times a year now..... Hard to update a watch with no computer connection. :) My Alarm clock was cool that it would automatically change... now not so cool......

Besides the Wisconsin QSO party, you might want to dabble in the Oklahoma QSO Party.

Note rules, etc., can be found at http://www.okdxa.org One interesting part is that they will have special event stations on the air during the party which will allow you to "spell" OKLAHOMA with special event contacts and get a special certificate.

Now that ARRL Phone is over it's time for a QSO party!

Only 3 days until the 2007 running of the Oklahoma QSO party March 10 and 11. Everyone is invited to work all Oklahoma stations and many 1x1 Oklahoma Amateur Radio Centennial Event call signs. Spell OKLAHOMA with 1x1 calls during the QSO Party and become eligible for a specially designed award. All 77 counties will be on the air again this year and many rovers await your call. Visit http://www.okdxa.org for QSO Party and Centennial Event announcements, rules and awards.

2624. ARRL on Red Cross' Background Check Policy

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-10 15:16:30 UTC
From: Bill
Topic: 2624 Message: 2624

Did you see this paragraph or two in the recent ARRL Letter? Might send you in some interesting directions.

* ARRL releases statement on Red Cross background check policy:

ARRL -- the National Association for Amateur Radio, has released a position statement <http://www.arrl.org/announce/ARRL-ARC-bg-check.html> <http://www.arrl.org/announce/ARRL-ARC-bg-check.html> regarding the implementation of a background check procedure by the American Red Cross.

The statement was released to address ARRL members' concerns prior to a March 31, 2007, compliance deadline the Red Cross has set. The application of the background check policy to Amateur Radio operators providing communication services to the Red Cross -- either as Red Cross volunteers or as Amateur Radio Emergency Service (ARES) members -- is the subject of continuing discussions between the ARRL and the Red Cross. Therefore, the position statement is subject to change. The ARRL will announce any such revisions and updates on its Web site.

For the MCECS and NCEC members, please read the message I posted to each reflector in regards to this continuing saga.

For those of you that are not MCECS or NCEC members then I would ask that you contact your groups Red Cross Liaision and find out about how your local chapter is handling this whole saga.

If you do not have a Red Cross Liaision and wish to know the latest information then feel free to email me at kd8bgq at arrl.net

Best Regards,
Doc Strait, KD8BGQ
MCECS Red Cross Liaison
Muskegon-Oceana-Newago Red Cross Chapter RTT Manager & Volunteer.

Mark,

Try going to the Control Panel and select Regional and Language.

If you are using Windows XP Custom under Regional Options, then click on the Time Tab. If the Hour (HH) symbols are capitolized that means it displays the time at 24 hours. If the Hour (hh) symbols are in lower case the means it displays the time as 12 hours time.

If you have a different operation system you may have to poke around in the Regional Options to find it.

Denny

Hi Tim,

I ran the utility and now my clock only displays in 24 hr. time. There is no AM/PM choice.

Any idea what happened?

Thanks,

Mark K8MHZ

Subject: RE: [WestMichiganHams] Daylight Savings Time

I have posted the tzedit utility for both 2000/xp and for win9X and ME on my website. http://www.tdats.net You can edit the time zone data with this utility, including the start and end dates, times, the time zone names, all without registry edits. I have only tested these utilities in windows 2000, XP and 98 computers.

You can also use the utility to tell if the automatic update for xp was installed or not.

The downloads on the instructions website I posted do not seem to work, but the directions are good. The downloads on my site are valid files that I used to patch our work computers.

Good luck!!

Subject: [WestMichiganHams] Daylight Savings Time

Just a reminder about daylight savings time. Here are some helpfull information to make sure your computer changes the time this weekend.

If your computer is setup to receive automatic updates, you should be all set, however it will be good to check just to make sure.

With the upcoming time change Sunday at 2:00 am you will want to check your home computers and apply the windows update patch that corrects DST to the new start and end dates. You will want to assure that patch (KB931836) is applied. You can check from the windows update page in Internet explorer. Then click on View to see your update history. If it is not already installed click on the express install and it will download. Then install updates and you should be good.

If you have an older computer running Win 98 or 95 you will have to manually make the change this Sunday and again on April 1 as the system will not know that it has been changed, you will need to do this every time DST changes in Spring and Fall for as long as you keep these computers running, as Microsoft does not have a patch for the older systems.

Old DST: First Sunday in April until Last Sunday in October
New DST: Second Sunday in March until First Sunday in November

-- Why Steering Wheels are on the Left Side --

From the beginning of the production of automobiles in the US, steering
wheels on virtually all US motor vehicles have been on the left side of
the vehicle. Why? The answer is below.

-- Elmering Newcomers --

Elmering newcomers should come in many forms. Recently, I've seen one
form that builds on the high-interest of younger people in computer
technology -- the Internet.

I encourage the editors who put club news and activities into club
Internet and print bulletins work with other members in the club to
develop a series of short how-to-do-its or watch-outs to be included in
these bulletins. A recent brief discussion I saw came via a local BB
and local club bulletin. This discussion addressed how hams are
required by FCC to "protect" our band edges. As nearly all of us
established hams know, it isn't merely important where the "carrier
frequency" is centered if the side-band lies outside the legal band
edge. Many of our newer hams may not know this, so a
simple-to-understand explanation might be in order. But this topic is
merely one of many that a newbie might need to learn. How about the
time between IDing, listening for more than a split second before
transmitting and many, many more tidbits of information the rest of us
take for granted?

Before anyone begins to rail against "ignorant, new amateurs," keep in
mind that many of us who came into the Service by way of the Novice
license didn't know everything at the time, either. I admit I didn't
really understand what "protecting the band edge" fully meant until my
Elmer explained it to me just after I received the Novice license.

This is the reason there is an introductory license. It is a "license to learn." The Tech license is the current introductory license.

One purpose for an introductory license is to allow the new ham to learn. Let help them learn just as so many of us were assisted during the learning process by other hams.

-- AD for the Advancement of Digital Radio --

I am pleased to announce that John Champa, K8OCL of Howell, Michigan has accepted appointment as Assistant Director for the Advancement of Digital Radio! John earned the ARRL 2003 Microwave Development Award for his work in chairing the League's High Speed Multi-Media Working Group and for his work in developing practical IEEE 802.11 Wi-Fi technology for Amateur Radio.

John is an RF Systems Engineer with Rockwell-Collins.

-- Legislative Action Progress --

Since my latest plea for assistance with the new ARRL Legislative Action Program, several additional volunteers have stepped forward to become Legislative Action Assistants (LAAs). These are the people who meet occasionally with their US Congressman or aides back in the home Districts. This has been an encouraging turn of events as more members have recognized the importance of developing this "grassroots" effort. I thank each new volunteer for coming forward to serve the best interests of Amateur Radio and ARRL.

We still need quite a number of additional LAAs. If you believe you are capable of meeting about three times a year at a local Congressman's office to talk let him know you support or oppose a piece of legislation that effects Amateur Radio, contact your state Legislative Action Coordinator to find out how the LAA task works. In Michigan, contact Bob "Scotty" Wright, KB8APS at kb8aps@.... In Ohio it is Brent Stover, WD8PBZ, wd8pnz@..., and in Kentucky contact Vice Director Gary Johnston, KI4LA at ki4l@....

Incidentally, legislation of importance to Amateur Radio has been introduced into the US House of Representatives. Before much longer, it will be important that our LAAs contact their Representatives. To do this successfully, we need LAAs in each Congressional District in the Great Lakes Division.

-- FCC: No Habla Espaniole --

The FCC rejected a petition by the Puerto Rico Amateur Radio League (PEARL) to require Amateur Radio exams to be printed in Spanish for Spanish speaking license applicants. If the PEARL petitiion had been adopted, all VE sessions would have been required to maintain supplies of Spanish-language exams for all license levels.

-- Who Says Morse Is Dead --

Mark Spencer, WA8SME who heads the ARRL Amateur Radio Education & Technology Program has been doing research related to review the "Big Project" and schools that are signed up for this. One interesting comment in his most recent report on the subject is:

"I spent a day working with a 6th grader who was on school vacation. I tried out some curriculum materials on the young man. Morse code is the content area that seemed to capture his interest the most (the old mode maintains its relevance)."

Who says youngsters are not interested in Morse code? Maybe we need to get to "them" at a younger age than we previously thought. Admittedly, this "poll" is far from being statistically significant, but it provides a bit of interesting insight.

-- W1AW Transmits On Required Frequencies --

A few members asked for the reference to the FCC rule that requires W1AW to broadcast code practice, code trial runs, bulletins and the like on pre-announced frequencies and times, and therefore, prevents the station from QSYing at the last moment to avoid stations that have come on a pre-announced frequency. This rule is as follows:

"Code of Federal Regulations 97.113(d).

"(d) The control operator of a club station may accept compensation for the periods of time when the station is transmitting telegraphy practice or information bulletins, provided that the station transmits such telegraphy practice and bulletins for at least 40 hours per week; schedules operations on at least six amateur service MF and HF bands using reasonable measures to maximize coverage; where the schedule of normal operating times and frequencies is published at least 30 days in advance of the actual transmissions; and where the control operator does not accept any direct or indirect compensation for any other service as a control operator."

-- Progress Toward ARES Response Capability Upgrade --

One item highlighted in the National Emergency Response Preparedness Committee report in January relates to developing a database of amateurs who are willing to roll out in the event of a major, area wide disaster. This database would list trained ARES volunteers from throughout the US. The database has been developed and tested at HQ in a pilot study. The study disclosed areas in which improvements are needed. These improvements are being made at this time. Developing the data base will follow.

-- Why Steering Wheels are on the Left Side --

With all of Europe placing steering wheels on the right side of their vehicles until fairly recently, one wonders why steering wheels have essentially always been on the left side in this country. The reason is our old friend and fellow ham Hiram Percy Maxim who founded ARRL and for all intents and purposes founded Amateur Radio.

Hiram was a leading inventor in many fields, including in the development of the automobile. Hartford, CT was the hub of auto production in the early years of cars and trucks, and the ritzy streets even in New York City had the cars H.P. developed running around through them very early in the history of autos. H.P. simply chose to put the steering wheel on the left side. Everyone else in North America followed suit.

-- What'd They Say??? --

(The following comments are not intended to advise any of you what action to take reagrding the Red Cross' required background checks for its volunteers. What you do regarding the requirement is your business, not mine. All I am trying to do is to disclose the facts of the situation . . . and kick in a bit of sarcasm! Read on, if you will.)

In the last issue I commented that the American National Red Cross announced it would change the requirements for volunteers to have a background checks performed. The change has now been made. As before, I have no intent to tell anyone if they should or should not agree to the RC background check; however, the following information may help you decide.

Disclosure supplied on MyBackgroundcheck.com: "American Red Cross ("RED CROSS") will procure a consumer report and/or investigative consumer report on you for the limited purpose of evaluating you for a position with RED CROSS. MyBackgroundCheck.com, LLC ("MBC") an affiliate of Pre-employ.com, or any agent of MBC, will obtain the report for RED CROSS. MyBackgroundCheck.com is located at 2301 Balls Ferry Road, Anderson, California 96007 and can be reached at 800-300-1821."

Sound good? Maybe not. Let's look deeper into this. The important
> "spanner in the works" may just be the required agreement to an
> "investigative consumer report."
>
> Investigative consumer report? On its web site, the US Federal Trade
> Commission defines investigative consumer report as: "(e) The term
> "investigative consumer report" means a consumer report or portion
> thereof in which information on a consumer's character, general
> reputation, personal characteristics, or mode of living (ed note: read
> the last three words again) is obtained through personal interviews
> with neighbors, friends, or associates of the consumer reported on or
> with others with whom he is acquainted or who may have knowledge
> concerning any such items of information. However, such information
> shall not include specific factual information on a consumer's credit
> record obtained directly from a creditor of the consumer or from a
> consumer reporting agency when such information was obtained directly
> from a creditor of the consumer or from the consumer."
>
> In other words, instead of calling the search a Manner of Living

> search, an Investigative Consumer Report that does the same thing and
> more than a manner of living report is now required. And by the way,
> an investigative consumer report can include doing a credit check
> unless the credit information has already been obtained from the person
> submitting to the check or from this person's creditor.
>
> OK, so RC says it has changed its background checking for volunteers so
> that it no longer requires agreement to having credit and manner of
> living checks done. Instead, it says, it will only do consumer checks
> and investigative consumer checks which can include credit and manner
> of living checks. Is this another case of the more things change, the
> more they stay the same?
>
> Who says politicians are the only people in Washington, DC who talk in
> circles and always say the same thing or nothing? Or am I the only
> person confused by this diffuse logic?
>
> -- Hamvention(R) Designates --
>
> Our friends at the Dayton Hamvention(R) have designated two ARRL

The ARRL Field Day packet is now available for downloading.

http://www.arrl.org/contests/forms/fd-2007-packet.pdf

Only a few new rules, one being the GOTA station can only collect a max of 100 points PER GOTA Operator...and you have to have 20 GOTA contacts for 20 points. No partials.

It's never to early to start planning 4 the Day in the Field.

2638. Tulip Time Festival 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-14 02:34:38 UTC
From: Steve Vander Hill
Topic: 2638 Message: 2638

Hello, it might not feel like Spring Time is just around the corner but it will be here very soon, with Spring's arrival comes the 2007 Tulip Time Festival. As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade is scheduled for Wednesday, May 9, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately noon until 3:30pm.

The second parade is scheduled for Thursday, May 10, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday, May 11, 2006.

The third, the largest, and the longest parade is schedule for Saturday, May 12, which we will need twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the American Red Cross Tulip Time Headquarters, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently know needs to be covered.

As one can see, this is large operation in which one Club or Group cannot handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you're interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover. Please email Dave Lamer WA8RSA directly at wa8rsa@... if you're interested in working the parade line-up on Saturday.

Thank you in advance!

Best regards,

2639. Amateur Radio Shut Down in Iraq

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-14 03:25:49 UTC
From: Hank Greeb
Topic: 2639 Message: 2639

From: http://www.arrl.org/?artid=7293

Amateur Radio activity shut down in Iraq (Mar 13, 2007) -- Iraq Amateur Radio Society (IARS <http://www.iraqi-ars.org/>) President Diya Sayah, YI1DZ, has informed ARRL that all Amateur Radio activity in Iraq has been suspended until the security situation there improves. He says the suspension affects both Iraqi citizens as well as any foreigners -- including military personnel and contractors -- who have been on the air from Iraq. The request to halt all ham radio activity and the issuance of licenses in Iraq originated with a letter from the Iraqi Ministry of Defense to Iraqi Prime Minister Nouri al-Maliki as part of a new security plan, Sayah said. He received subsequent confirmation via the Ministry of Higher Education and Scientific Research to shut down ham radio activity, although he allows for a possible misunderstanding on the part of government officials as to the nature and purpose of Amateur Radio.

All
In past years we have had a problem finding enough people to work at the Tulip Time Festival parades. Please volunteer your time for this event. This is not only FUN but a great learning time on a net. In the past we been able to staff this event with local Hams from Holland but as you can see it has become a regional event. Let Steve know you can help in May for the Tulip Time events. E mail him at the below address.

Thanks Tom KB8VEE DEC-6

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently

know needs to be covered.

As one can see, this is large operation in which one Club or Group cannot handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you're interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover. Please email Dave Lamer WA8RSA directly at wa8rsa@... if you're interested in working the parade line-up on Saturday.

Thank you in advance!

Best regards,

Steve Vander Hill - N8UJD

Tom,

NO BACKGROUND CHECKS REQUIRED is the information that came out when the issue of Red Cross background checks first came out several months ago. Also from the information I have seen and Doc has given us the Red Cross can use volunteers up to 7 days without a background check.

If it is different or changes I'm sure Steve will let us know.

In past years we have had a problem finding enough people to work at the Tulip Time Festival parades. Please volunteer your time for this event. This is not only FUN but a great learning time on a net. In the past we been able to staff this event with local Hams from Holland but as you can see it has become a regional event. Let Steve know you can help in May for the Tulip Time events. E mail him at the below address.

Thanks Tom KB8VEE DEC-6

Hello, it might not feel like Spring Time is just around the corner but it will be here very soon, with Spring's arrival comes the 2007 Tulip Time Festival. As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade is scheduled for Wednesday, May 9, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately noon until 3:30pm.

The second parade is scheduled for Thursday, May 10, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday,

May 11, 2006.

The third, the largest, and the longest parade is schedule for Saturday, May 12, which we will need twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the American Red Cross Tulip Time Headquarters, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. 2644. ARC & Identification

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-14 17:44:25 UTC
From: Steve Vander Hill
Topic: 2638 Message: 2644

Hello, reference ARC background checks, good question, great answers by Denny and in Doc?s recent email/s.

We attempt to keep it simple during Tulip Time, the HAM volunteers do not wear any ARC identification, be it vests, hats, backpacks, badges, or whatever, but are asked to wear something the identifies them as being a part of the HAM communications group, be it club/organization/call sign hats, ID badges, shirt, vests, or whatever, besides the antennas attached to our bodies that show that we are not ARC First Aid responders.

On this subject, does anyone know of a club that might have three dozen of those bright ARRL Communications vests (or something similar) that they would be willing to lend out during Tulip Time?

We have enough events within W. MI maybe we can get the area clubs to each purchase six of them, have them all placed in a duffle bag to be passed among the various HAM event coordinators throughout the year. Food for thought?.

Best regards,
Steve - N8UJD

All:

On March 3rd sometime after business hours someone entered the Grand Rapids Red Cross Chapter house with out permission and stole the amateur radios from the Red Cross Emergency Operations Command Center. During this they also removed one of the computer systems and ransacked the front desk area. We are looking for help in locating these radios. If you hear anyone suspicious or see a single band radio for sale on 2 meter, 220 or 440 that seams suspicious please contact the Rick Norman from the Grand Rapids Red Cross Chapter.

2654. Fw: ARRL Position on the American Red Cross Background Check Policy

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-15 21:11:49 UTC
From: Mark Thompson
Topic: 2654 Message: 2654

ARRL Position on the American Red Cross Background Check Policy
Last year, the American Red Cross announced that it was implementing a background check procedure which would be mandatory for its staff and volunteers. Many ARRL members, including those who are also Red Cross volunteers, and ARES members who provide emergency communications for the benefit of the Red Cross, have questions about this policy, and whether or not it applied to them. ARRL offers the following information on this subject, so that ARRL members can decide for themselves whether or not to participate in this program. This information is subject to change, however, as ARRL and the Red Cross have commenced some discussions about the application of the Red Cross policy to Amateur Radio operators providing emergency communications. Should any of the following information change, ARRL will modify this posting immediately, so please review this page periodically.

ARRL will not attempt to advise members what organizations they should or should not support, or the extent to which they should comply with policies that such an organization requires in order for them to accept volunteer Amateur Radio communication services. However, we feel compelled to caution ARRL members to read very carefully any request for, or consent to the collection or disclosure of, personal, normally private information from a served agency. ARRL members should carefully consider what is being requested; for what purpose the information is needed; to what use the information will be put; and to whom it will be disclosed.
While there have been conflicting statements by local chapters, the National Headquarters of the American Red Cross apparently intends to require that all radio amateurs who provide communications for the Red Cross submit to a background check. Their policy applies to all partner organizations that do not themselves conduct criminal background checks on their members. ARRL, of course, does not conduct background checks. Some ARRL members are willing to submit to a criminal background check in order to volunteer to provide communications for the benefit of the Red Cross. The Red Cross has delegated the conducting of the background checks to a separate, private company. The private company has a consent form which is a requirement for the background check. The deadline for compliance with this Red Cross requirement, twice postponed, is now March 31, 2007. After that date, the Red Cross indicates that they will not accept volunteer services from those individuals who have not complied.

Initially, the Red Cross' requirements included more than a criminal background check. Volunteers were also to be required to grant permission for the Red Cross' background investigation company to conduct a "credit check" and a "mode of living" check as well. Additionally, the Red Cross indicated that the only criminal background check they would accept would be from its own investigation company, "mybackgroundcheck.com."

On February 6, 2007, the Interim CEO and the National Chair of Volunteers of the Red Cross jointly announced that the policy had changed; (1) that only criminal background checks would be required of Red Cross volunteers; that credit checks would not be required except where separate permission was granted; and that mode of living checks would not be conducted on volunteers under any circumstances. However, the Red Cross' investigation company consent form still includes consent to the conduct of an "investigative consumer report." The Federal Trade Commission's definition of that term specifically includes

"mode of living" checks and certain credit checks. The consent form that is required by the Red Cross, therefore, would permit both credit checks and mode of living checks, and not just criminal background checks. (2)
The new consent form used by "mybackgroundcheck.com" does not disclose to the person consenting to the search that he or she is in fact granting permission to have a credit check or mode of living check performed, but only makes reference to a "consumer investigative report" (3) without explaining it.
Although the Red Cross promises that it will not conduct a mode of living check or a credit check of volunteers, its contractor continues to require permission to conduct such investigations. ARRL has inquired of the Red Cross as to the reason for this, but to date has not received a satisfactory explanation.
Should the Red Cross clarify or further modify its background check policy in response to ARRL's written inquiry and the negotiations commenced thereby, we will provide that information immediately for the benefit of ARRL members and ARES participants.

(1) That announcement was as follows:

The following message is from Jack McGuire, Interim President and CEO and Kate Forbes, National Chair of Volunteers:

On December 22, 2006, we announced that the background check deadline was extended until March 31, 2007 and that a leadership team would examine specific aspects of the program so that they were better understood and accepted across the organization. This week, we approved key modifications to the program, specifically related to the consent form. We believe these changes respond to legitimate concerns and still maintain a strong organization-wide background check program.
The following summarizes the changes:
A new consent form will be developed that eliminates all references to credit checks and mode of living. The Red Cross will not run future credit checks or mode of living checks on anyone who has signed the previous consent form. The Red Cross will consider that consent form null and void as to the credit check and mode of living authorizations, and promises not to conduct a credit check on individuals unless we obtain a second consent form from them authorizing those checks. Mode of living checks will not be conducted under any circumstances. In an effort to establish and maintain consistency across the organization, Jane Gilbert, Senior Vice President, Service Area Support, will convene a working group to establish an ongoing credit check policy that will define which positions require a credit check in the future and how to evaluate credit checks for those positions.

You may be wondering why we made these changes and particularly, why now. We listened to your concerns and feedback and determined that adding another consent form in the event that a credit check is needed best met the needs of our volunteer force. This change does not reflect negatively upon the admirable efforts of the many units that worked extremely hard to meet the goals of this initiative by conducting background checks on their employees and volunteers. We believe it underscores the fact that an open dialogue on these issues is critical to the success of this program. These are positive changes that do not compromise the program, but rather advance our shared goal of having a consistent and standard background check program for all employees and volunteers who serve under the American Red Cross symbol. All other aspects of the program remain unchanged, including the deadline of March 31, 2007, by which all employees and volunteers must undergo and clear a background
check.

Employees and volunteers who have not cleared a background check by this date will no longer be able to serve with the Red Cross until they do so.

We would also like to take this opportunity to thank the National Background Check Office for their hard work and dedication in assisting the implementation of the program across the organization. If you have questions, please contact the National Background Check Office at backgroundchecks@... or (800) 507-3960.

(2) The following text is from the Federal Trade Commission website defining the term "investigative consumer report":

(e) The term "investigative consumer report" means a consumer report or portion thereof in which information on a consumer's character, general reputation, personal characteristics, or mode of living is obtained through personal interviews with neighbors, friends, or associates of the consumer reported on or with others with whom he is acquainted or who may have knowledge concerning any such items of information. However, such information shall not include specific factual information on a consumer's credit record obtained directly from a creditor of the consumer or from a consumer reporting agency when such information was obtained directly from a creditor of the consumer or from the consumer.

(3) The following text is from mybackgroundcheck.com's website, which discusses the information that is being requested:

Disclosure Regarding Background Investigation
American Red Cross ("RED CROSS") will procure a consumer report and/or investigative consumer report on you for the limited purpose of evaluating you for a position with RED CROSS. MyBackgroundCheck.com, LLC ("MBC") an affiliate of Pre-employ.com, or any agent of MBC, will obtain the report for RED CROSS. MyBackgroundCheck.com is located at 2301 Balls Ferry Road, Anderson, California 96007 and can be reached at 800-300-1821.

The report will contain any written, oral, or other communication of any information by a consumer reporting agency bearing on your character, general reputation, personal characteristics which is used or expected to be used or collected in whole or in part for the purpose of serving as a factor in establishing your eligibility for (A) employment purposes; or (B) any other purpose authorized under section 604 of the Fair Credit Reporting Act. 2655. LOOKING FOR YOUTH INTERESTED IN AMATEUR RADIO AGES 14-20

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-15 23:31:32 UTC
From: ravennaelectronics
Topic: 2655 Message: 2655

What: Muskegon Area Amateur Radio Council Venture Crew 9050 Open House

When: March 18th from 3pm-5pm.

Where: Muskegon Area Amateur Radio Council Clubhouse at 2888 Scenic drive, about one mile north of River Road.

For: Youth who are 14 (and have completed the 8th grade)through 20 years of age.

What did you do last weekend? Play video games? Sit in the house? Watch TV? Hang out at the mall? Tell your parents "I'm bored. There is nothing to do"?

Would you rather have talked to teenagers around the world for free? How about making something with electronics? Talk to the astronauts on the International Space Station? Go backpacking, canoeing, camping, DXing or other high adventure? Learn a ancient language? Hang out with friends at a really kewl place that is not the mall?

Youth, ages 14 (and have completed 8th grade) through 20, who are interested in Amateur Radio and High Adventure are invited to attend the Muskegon Area Amateur Radio Council Venture Crew 9050's "open house" program on March 18th from 3pm - 5pm. The purpose of the open house is to encourage high school-age young people to participate in the program developed by the crew. Come and learn about what the Muskegon Area Amateur Radio Council's Venture Crew has to offer to the youth and their adults.

Venturing is a youth development program of the Boy Scouts of America. Venturing's purpose is to provide positive experiences to help young people mature and to prepare them to become responsible and caring adults.

If you have questions or need more information, contact the Crew Advisor Karen Strait, KD8DHJ via email to Sarjenka47@...

I know and have seen this document however it does not change the feeling that NO background checked and minimum required trained individuals will assist the Chapter in critical sensitive areas of a disaster operation. This is in part why there is no ARES in Kent County. The only way we can use unknown personnel will be in message running, radio installations in non critical areas and the like. I repeat-No longer is a ham ticket and a desire to serve enough! The Red Cross Nationally are engaged in talks to institute background checks and the IS courses. Already the Red Cross has responded to the mode of living check issue but needs to further clarify this to the ham community. Until they do this and the National ARRL enters into a new agreement I agree that will be a problem for hams in general. And it seems a bone of contention although why expanding one's knowledge is causing such a problem I will never know! JB

From: Bill Fries
Topic: 2656 Message: 2657

All:

My two cents goes along these lines:

ARES folks like to encourage hams to train and continue learning emergency communication techniques. The world of EmmComm is getting more complex with different players, new jargon, and the entire concept of a unified incident command.

When someone says, ". . . the feeling that NO background checked and minimum required trained individuals will assist the Chapter in critical sensitive areas of a disaster operation" I initially read another message that goes something like, "Hey, you untrained and lower class radio operator, how can you ever dream of offering meaningful EmmComm assistance on a bad day?"

Is it progressive and encouraging to create a caste system and put a large number of willing folks into the undesirable category? On that bad day will the folks trying to help really think they can manage and sustain the service for the duration of the event with the few blessed operators? It might be better to encourage and train folks. Encourage training and participation with an esprit de corps. Rather than pointing out the obvious and unflattering of folks deemed unwashed.

Just my take.

Bill, AB8SC

Inconsiderate, idiot, unconscionable, boor, foolish, stupid

All and more leap from my last post.

I am reminded of an old admonishment by a wiser man, with an especially appropriate twist in this scenario; that it is better to be though an idiot than to type such garbage and remove all doubt.

And when I hit that "SEND" key the internet lasts a very, very long time.

I am very sorry for the insults perpetrated on the list with my last post.

2662. If you want to avoid all the Red Cross superfluous background check requirements

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-16 13:58:33 UTC
From: Hank Greeb
Topic: 2662 Message: 2662

As I understand it, RACES members are required to submit to a criminal background check run through the Michigan State Police.

This is a truly professional organization, which knows the requirements of a criminal background check, and doesn't require anything superfluous.

One gets much more training in communications skills, disaster response, etc., than is required by Red Cross. Red Cross will accept the background check provided by RACES through the State Police. There may be some conflict if one is a RACES member and also a member of the Red Cross disaster team, but the Red Cross communications officer and several assistants are membes of both groups, so it should be workable.

The requirements for membership in RACES may look onerous to some hams, but for those really dedicated to public service work, they are very useful.

2663. Re: Fw: ARRL Position on the American Red Cross Background...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-16 13:47:51 UTC
From: Hank Greeb
Topic: 2656 Message: 2663

Expanding one's knowledge and becoming more proficient in communications abilities is not the problem. There have been many hams who have taken the ARRL communications courses, as well as FEMA courses, and many more are willing to do so.

The problem is that Nationally, American Red Cross advised its chapters that they were changing the requirements to ONLY require a criminal background check, and has instructed mybackgroudcheck.com to ONLY do this, yet mybackgroundcheck.com continues to require consent for much, much more. This is viewed as deceit and a downright lie by a signficant number of hams, including many on the Board of Directors of the ARRL.

My contacts within a local chapter of Red Cross have summed the situation up succinctly, and I edit the locality specific items from the following:

==========

Let's make sure, rather than beating up each other, we "beat up" those
that are creating policy we might not like.

Here's your contact, PLEASE express your displeasure (if that's your posture):

Suzanne LeVert
Manager, National Background Check Office
American Red Cross
2025 E Street NW
Washington, DC 2006
202-303-4294
levertsu at usa.redcross.org

It is probably not real productive to keep trying to convince each other of the merits of the argument. Let's turn discord into action.

One last thought -- A recent e-mail message sums up the issue as I see it. The Red Cross is using only the criminal background check as I understand -- BUT we are all being asked to consent to every other possible check that this company provides, and that's not right. Let's raise our voice to try to make this easy policy/documentation change.

==========

I've written to Ms. LeVert asking why the Red Cross requirement is different from the requirements on the mybackgroundcheck.com

If more volunteers were to do this, perhaps we could generate an effective grass roots effort and get mybackgroundcheck.com to comply with Red Cross' stated policy.

Note that the Marshall hamfest is March 17, St. Patty's Day. (Will they have Green Beer in the High School??? NAWWW...., it's a high school, Dratz!)

But, does anyone have room in a vehicle for another passenger, or does anyone need a ride? I'm going to Marshall, but would like to carpool, either as a rider (preferred) or driver (I'm going anyway, so will drive if I can't find a ride.)

Topic: 2662 Message: 2665

Hi All:

I'm boored and feel like throwing .02 in to the ring for what its worth. I happen to wear a unique hat, ok several unique hats..

My Thoughts on the Red Cross BG check..

- As a volunteer, its my choice to volunteer with the Red Cross. As the Vice Chair for Disaster Communications at the Grand Rapids Chapter I have chosen to volunteer in a higher level. With this I accepted the application packet with out any hesitation. I am not concerned about them running credit or criminal or even mode of living.. #1) I have Terrible credit, don't lend me any money! #2) My Criminal History is clean, were talking squeaky clean. For those who know me they know its above board. (and I know how to wear gloves.. jk) #3) My mode of living is just like most of you.. I spend more then I make, usually on my ham radio stuff. As my wife, she'll tell you! As a person, who is always mindful of what is being put on my credit report, I watch it like a hawk. My identity has been stolen and it has been compromised in the past. So yes, I watch it. As for Red Cross running the Check or the company they use? So far, nothing has shown up and nobody has ever knocked on my door. Other then INS about the people across the street. If you choose to take your volunteering to a higher level and be a Red Cross volunteer then you must make the decision to sign the papers or not.

My thoughts about Hank's post? He's right on the money, my other hat the one I wear almost 25 hours a week for the County is that of County RACES coordinator for Kent. We run Criminal History checks on members, we also run a full membership process to become a member in Kent. This is what our EMD requires. We also report 3,000 or more man hours each month. With the budget crunch, they use us a lot. I've spent more time this week working for the county as a volunteer then I have working for my full time job. (maybe that's why I am broke?) In Kent County, we do not have an ARES program. Why? its simple, the EM will not use people who he cannot prove who they are via the application process. So, it would be a waste of time to do it. While I do get people who complain about not having an ARES program I get more who want to apply to join the RACES program. If anyone ever looks through the training program we have, we try to make everything independent as we know everyone's busy. We also try to bring new blood in by not requiring a ham license to start. Of course, we do require our members to A) Be Responsible for themselves and there actions B) To be someone that is free from a criminal record. My Emergency Manager explained it to me in simple terms when it came to the Criminal History check it went something like. You want to know that the person who might be stationed with your wife or your child is not a murderer or child molester or a rapist. (for those who do not know, my wife is a member also). Being in Grand Rapids / Kent County. We have a VERY diverse mix of people applying, I have seen applications from Rapists, Murderer's and even quite a few sex offenders.

While I know someone will blast me for my program because we are unconventional and we do not do the ARES thing. I am not downing anyone else's program at all. Each County has the program that works for them. Each person has the right to decide what program or programs

they want to volunteer for and the amount of information they are willing to give out. One thing I have done to make things easier on those who want to volunteer as a communicator for the Red Cross in Grand Rapids is to work out an agreement with the Red Cross Chapter so that Kent County RACES members play with Red Cross. This means NONE of the Red Cross Background checks, NONE of the Red Cross training program. It just means you have to be a Kent County RACES member. And when it hits the fan, as long as the person is properly credentialed from other Counties, they accept that also. This is a unique agreement that we have with them.

So, hope this helps a bit. Choices about your participation and information are up to you. Its a volunteer activity and we still get to choose who we do that for.

Jeffrey Nawrot - N8JSN
GRR Red Cross Vice Chair
Kent County RACES Coordinator
Kent County Search and Rescue Director
6 District Assistant RACES Coordinator

I beg to differ with your comment. I, for one, have no personal complaint against anyone in the local Red Cross. I have no personal complaint concerning criminal background checks. I've told Red Cross that I'm happy to submit to such a check.

But, for the life of me, I cannot understand why National Red Cross personnel say that they require ONLY a criminal background check, yet the consent agreement at mybackgroundcheck.com continues to require consent of much more.

And, if I believed that an organization like mybackgroundcheck.com, which charges the general public $5 for such a check, could be sure of keeping all my personal information secure from hackers, I wouldn't mind submitting to such a check. However, I don't really need all my credit data in another database - it's frightening enough to me that the credit bureaus collect all the minutia of my credit history.

I trust you'll understand this..... Note, I'm sending this as a private message - it needn't clutter up the west michigan reflector.

I asked at the Red Cross National Response Technology Team training a back at the start of March about RACES checks being accepted by the Red Cross. I was told that the Red Cross does not accept the RACES checks and that RACES does not accept the Red Cross checks. This was given to me directly from National Red Cross Background Check office representative. Has something changed? I have not received anything to the contrary yet. I know there are some more changes coming down too.

Best Regards,

Doc,

I believe thats a "national" thing.. We have a written agreement with our chapter to use RACES members in GRR. We did this specifically after national made the intelectual property form a requirement. I watched several long time members quit and refuse to fill it out. So we went to our chapter and asked for the "contract".

Hope this clarifies things.

Jeff

2673. Project OSCAR Pioneer Richard "Dick" Esneault, W4IJC -- SK

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-16 21:33:11 UTC
From: Hank Greeb
Topic: 2673 Message: 2673

From: John Champa <k8ocl@...>
Subject: Project OSCAR Pioneer Richard "Dick" Esneault, W4IJC -- SK

Project OSCAR member Richard "Dick" Esneault, W4IJC -- SK

I recently learned that Richard "Dick" Esneault, W4IJC, passed away.

My first encounter with Dick was many years ago when Gene Marcus, W3PM, mentioned that Mr. Esneault was involved with Project OSCAR and he was going to be part of the AMSAT Forum with me at the Huntsville Hamfest. The Forum was a big hit as Dick displayed articles on hardboard for display and the most spectacular item was the OSCAR-1 model that you could pick up and hold in your hands. Not just a model, but very much the same as the real model that went into space. The only other known model is in the Smithsonian Institution and here is this guy in Huntsville, Alabama carrying an OSCAR-1 prototype model in the trunk of his car to hamfests, field day sites, and local club meetings.

Mr. Esneault was never short on words. He could talk about the history of Project OSCAR and capture your attention. It was not until recent years that we thought we should really capture some of his conversation on videotape. So, we had him visit the Huntsville Amateur Radio Club a few years ago to share his memories.

Mr. Esneault always had an impressive display when he set-up to talk about Project OSCAR

His wife told him to tell us how they got the parts for OSCAR-1 and Dick with a big grin responded, "Well, well, they were acquired". He always said that Jack Kennedy hit a home run with Project OSCAR as a peaceful use of space. When asked what kind of battery was used on OSCAR-1 he responded, "It was a fancy battery, it wasn't cheap". Later discussion would reveal that perhaps it was one of those acquired items. Things that just appeared. When asked about the callsign used (HI) on OSCAR-1 he responded, "Hey, after Kennedy kicked the front door of his office wanting to get it up.. that made no difference.. we could have got up there and did anything, because he wanted it done.. it was sort of a blessing he got in on it.". When asked if there was any budget for OSCAR-1 or was it just all acquired Dick responded, "Budget to covert the cost of OSCAR? (pause) No, nobody would ever admit it, it just happened."

When asked how President Kennedy received project OSCAR, Dick responded, "Everret R Morrow (not sure if this name is spelled correctly), who Kennedy knew, heard about it in Washington and said let me talk to Jack about that.(pause) there was a big scream behind the

closed door's. why isn't that blank, blank, blank thing up in the air now. and that is how Project OSCAR was received by the President."

Last year, I ran into Dick at the 2006 Huntsville Hamfest and he was looking in good health, but it was apparent his memory was slipping away. I could tell by the look his wife's eyes that he was not himself, so I played along with his conversation. The next day I called his son and he confirmed that his father was having some memory issues as I had detected.

Mr. Esneault was a pioneer (at the right place at the right time) in the satellite community as one of those enabler's to pave the way where we are today. We will certainly miss his stories as he had so many.

His picture can still be found in the Satellite Experimenters handbook (Directors of the Project OSCAR Association) the last time I checked.

73's,
Tim - N8DEU

Doc,

Where did the National Red Cross Background Check Office Representative get the information on RACES? Did He/She get this information from the Department of Homeland Security, FEMA, or other government program?

While a lot of RACES people are ARRL members RACES itself is a Federal Government program that is handled locally by the Emergency Management Divisions in the various counties.

Subject: [WestMichiganHams] Re: If you want to avoid all the Red Cross superfluous background check requirements

I asked at the Red Cross National Response Technology Team training
a back at the start of March about RACES checks being accepted by
the Red Cross. I was told that the Red Cross does not accept the
RACES checks and that RACES does not accept the Red Cross checks.
This was given to me directly from National Red Cross Background
Check office representative. Has something changed? I have not
received anything to the contrary yet. I know there are some more
changes coming down too.

Best Regards,
Doc, KD8BGQ

Hi Denny.
The representative is an amateur radio operator, ARRL and RACES member. He works full time for Red Cross at National Headquarters. Right now he is one of those working in the Background Checks area for the Red Cross. He spoke to us about this whole situation and instructed us on what each chapter is supposed to be doing in regards to the background checks. He did say there will be more changes coming down and that the final change may not happen until after the ARRL and Red Cross rework the SOU. In the meantime, each chapter is to go by the latest and greatest Red Cross statement on the background checks.

Hi Jeff
It adds a bit of confusion to it. It is contrary to what was explained to us by the National Representative. He said that all chapters are to comply 100% with the background check policy by March 31st and that RACES background checks were not acceptable. Why the are not accepted, he would not elaborate on.

I will wait and see what is in the next Official Statement when it is released later this month.

Thanks!

FCC NOW POSTING AMATEUR RADIO ENFORCEMENT ACTIONS

Amateur Radio enforcement correspondence -- with some exceptions -- now is available to the public on the FCC's "Amateur Radio Service Enforcement Actions" Web site <http://www.fcc.gov/eb/AmateurActions/Welcome.html>. The listing will be cumulative, and Special Counsel in the FCC Spectrum Enforcement Division Riley Hollingsworth anticipates updating it every 7 to 10 days.

The site will not be a comprehensive listing of enforcement correspondence. For example, it will not include letters requiring retesting pursuant to §97.519(d) of the FCC's rules, letters regarding radio frequency interference to amateur licensees and letters requesting an initial response to a complaint.

As a result of irregularities detected by ARRL VEC in examination sessions in Clinton, South Carolina, in June and July 2006, Hollingsworth has issued retest orders to Technician licensees in Simpsonville, Greenwood, and Clinton, South Carolina, to an Amateur Extra licensee in Joanna, South Carolina (Elements 3 and 4), and to a General licensee in Laurens, South Carolina (Element 3).

He also wrote to Tri-County Electric Cooperative, Azle, Texas; Northfork Electric Cooperative, Sayre, Oklahoma; Bit-by-Bit Horse Farms, Wind Gap, Pennsylvania, and to a resident of Gallipolis, Ohio, requesting they work with Amateur Radio licensees regarding RF interference generated by power line hardware and other devices.

Direct all questions concerning the Amateur Radio Service Enforcement Actions Web postings via e-mail only to Riley Hollingsworth in the FCC Spectrum Enforcement Division <fccham@...>.

In the late 60's (or maybe early 70's) I held CB license KBIV-6460.
I might still have it somewhere, but I haven't looked for it for
quite a while.

A bunch of us hams would go out on public service events, and have CB
rigs with us. We'd quiet down the chatter on whatever channel we
decided to use by using quasi-ham procedures, tactical calls, and
professional sounding transmissions.

For a (short) while, FCC even tried to monitor and enforce
regulations on the CB bands.

If you had a 4 x 4 it was more likely the late 70s. In the 60s and early 70s they were 3 x 4s. Ours was KPM-4279.

My mother had a whole shoebox of CB QSL cards from the 60s and they are now lost. I sure would like to have that box!

Hello Tom,

WA8MZG was indeed my dad. Since that call he upgraded to Advanced and became KF8IJ. Sadly KF8IJ is now a silent key, he passed away in 1998. I had no idea his license plate was on the wall at Finleys. Strange how you find out things about your parents years after they are gone.

Thanks for this bit of information...

Special Bulletin To All HFpack
==========
About Your Security on Yahoo Groups.
==========
From the HFpack moderators

Dear HFpacker,
HFpack, the HF Portable Group, rarely issues special email bulletins. It is very important for your own security to read all of this message. It concerns all of us personally.

HFpack is a great group of radio operators because of participation in both the HFpack egroup, and on-the-air activity. The information content on the egroup is very high because radio operators like you are friendly and helpful. Hundreds of photos... files... thousands of messages are in the HFpack archives at your fingertips. As you know, the HFpack egroup runs on the Yahoo Groups server. The HFpack moderators always maintain complete secrecy of the members emails listing. The HFpack email list is still safe. It would be extremely difficult for the 6000+ member HFpack egroup to operate with so many great access features without making use of the Yahoo Groups service. So for the moment, there are no plans to change servers.

We all know that Yahoo provides the egroup service only so that it can advertise. But you can act now to minimize the advertising you will receive in the future.

It will do no good to unsubscribe or delete yourself as a Yahoo member, because Yahoo already knows your email address, and possibly other information about you if you have given them real information in the past. However, you can help to prevent them from using your email or information, or any possible problems resulting from this, by going to a special Yahoo web page and re-setting your "marketing preferences" and "account information". By doing this, you are specifically instructing them not to send spam to you.

The moderators of HFpack are very concerned about the security and personal preferences of HFpackers. For your own protection, please update your "Yahoo Marketing Preferences" and "Account Information" as soon as possible.

IF YOU DO NOT WANT SPAM, you MUST set ALL of your "marketing preferences" to "NO".

You should inspect your Yahoo "account information" to make sure it only contains information that you wish Yahoo to have. If not, then "update" it! Many Yahoo users are changing most of the Yahoo account information to non-real, alias, or "bogus" information. The only account information which must be correct is a valid email address.

To RE-SET, you will need your Yahoo ID and Password.
If you lost it, just click on "Password Lookup"
and use one of the three methods to restore it.

As Soon As Possible:
RESET YOUR "ACCOUNT INFORMATION" and
Click on "MARKETING PREFERENCES".
Here is the special Yahoo web site:

http://subscribe.yahoo.com/showaccount

2691. 1962 thru 1967 Callbook?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-19 15:00:24 UTC
From: Hank Greeb
Topic: 2681 Message: 2691

Does anyone have a 1962 thru 1967 callbook? My brother in law was K0RCX, technician class at the time. He got a KB9 call a few years back as a "new" technician, but would like a reference to the fact that he had passed the 5 WPM code test, etc., pre 1987. He let his license lapse in about 1967.

If anyone has a record of Fergus Moore, K0RCX, please advise.

All:
Contact me if your interested in any of these items, I either have them in my possession or can get them fairly quickly. Everything is pick up only in Grand Rapids, cash sales.

Icom ICT2H Sport 75.00
ADI AT-201 50.00
Magellan GPS-12 - 30.00
HP Laptop 400 MHZ Windows 98 - 125.00
Kantronics KPC3+ 140.00
Theilsen single radio chest harness 30.00

Yaesu FT-4700RH Dualband Mobile 144/440 $150
-Includes the box, instructions, remote
mount cable and 12amp Power supply.
(used as a base radio, not mobile)

Alinco HT's $300 for everything
DJ-580 144/440mhz
DJ-280 220mhz
DJ-180 144mhz

Also includes
EBP-22N 1200mah NiCad
EBP-28N 700Mah Nicad
AAA battery pack

EDC-34 Drop in Rapid charger
EDC-49 Drop in slow charger
EDC-24 Drop in slow charger

EDC-36 12v Lighter plug filtered power cable

Speaker mic, Earbud mic, and Mini-magnet mount
dual band antenn w/ BNC connector

Icom IC-2AT 144mhz w/ drop in charger $10

Compaq Laptop $300
Presario 700
- 1.2 Ghz CPU w/ 512 MB memory
- 20 GB Hard drive
- Windows XP home edition
- DVD reader/CD writer
- 2 USB/ 2 pcmcia
- Modem and Ethernet
- Built in floppy drive
- **** NO BATTERY ****

2698. Latest on RM 11306

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-21 04:42:58 UTC
From: Hank Greeb
Topic: 2698 Message: 2698

If you have an interest in narrow band modes (CW, PSK31, etc), you might have an interest in the following.

http://tinyurl.com/2v6k63

This might be worth reading and commenting to your ARRL Director and/or the Federal Candy Company.

Seems like proposing up to 3 KHz wide emissions in the very small remaining allocation for 80 thru 12 Metres for narrow band modes deserves careful reflection. Folks were terribly upset with the proposal to allow 3 KHz wide RTTY and data emissions in the phone bands, effectively beating down the FCC NPRM on the subject.

Get your Amateur Radio License in Just One Day!
Proven program has a 90% pass rate!
Technician Class License
No Morse Code required
Sponsored by:
Isabella County ARES, RACES
This class is open to the general public.
This class, limited to 25 students, is open to the general public but is especially aimed at firefighters, police, paramedics and EMT's, Red Cross, Salvation Army, Explorer scouts, government employees. SAR, OES, SKYWARN and other emergency/disaster workers, volunteer or paid. Ideal for CERT volunteers.
Date:
Saturday March 24th, 2007
9:00 AM ? 4:00 PM
Testing will start at 3:00 PM
Testing will be for Technician, General and Extra class license

Location:
Isabella County Emergency Management Department
2008 East Preston St
Mt Pleasant MI 48858
Cost:
The class costs $30, which covers the FCC testing fee; learning materials. You must RSVP to one of the contact people listed below to have a spot in this class.

To register, contact
Gus Glass K8GUS e-mail gglass@... or call 989-339-0851.
Terry Francis WB8ZNO e-mail francis@... or call 989-578-0627
For information and directions Gus or Terry
Talk-in 146.720 or 442.825 PL 100.0

Bring either a driver?s license or two pieces of identification.
Coffee and Treats will be provided! Dress comfortably!

Small Print Warning: Since not everybody learns the same, there is no guarantee that you will pass the test and get your license at the end if this class. Decent short-term memory is a must!

All Hams
Join us for coffee this Sat from 9AM-12PM

New This week
RG-8 .60 per Foot and RG-8X Coax Cable .35 per Foot
PL-259 Connectors and adadapters
BNC - SO-239 Connectors
Double Feamale Connectors $2
Laser pointers $2

I still need some more items for Sale. I need MORE Good stuff on consignment
Please bring me more this week.

New 2 Amp Power Supplies good to power Hand Held $12 More Power supplies on the Way
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals. Technician, General and Extra Class Study Manuals. FCC Part 97 book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications course Level 1 books $16 each

Other Used Equipment on Consignment

JOB 1002 SWR Power Meter from Wawasee Electronics $20
AB 300 Power Booster $20
B&W 550A 5 Coax switch box $10
M1000 Regency 10 Ch Scanner Works great $25
PRO-2038 Radio Shack 50 Ch Scanner Works Great $45 (Best Buy in Store)
75 meter Ham stick $15
Yaesu MP-1 Microphone $40
HF Antenna Mount for Reese Trailer Hitch with Ball $15
Comet CT-5 3/8 -24 antenna Mount $35
Allied A-2515 Short Wave Receiver $75
Ten-Tec Argosy HF radio $200
HF Tuner
HF SWR Meters
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition
Heathkit items From $5
Extra Speakers For Radios $3
Keychain LED lights $1.50 and up
Other items coming in Daily
For more information call me at 231 798-7898

Come in and Join us for FREE Coffee Each Saturday from 9AM-12PM

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools, industrial suppliers and Ham radios for sale.

2710. Fw: Fwd: RM-11306 Confusion About CW Sub-Bands

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-23 19:22:56 UTC
From: Mark Thompson
Topic: 2710 Message: 2710

23 MAR 2007 - 1245 CDT

All ARRL officers and directors are starting to receive email messages about the recent ex parte discussion ARRL had with the FCC about RM-11306; the ARRL's proposal to regulate Amateur Radio Service HF sub-bands by bandwidth. Because of what amounts to a clerical oversight, a number of amateur radio licensees are concerned, even angry, about what appears on the surface to be another move to curtail the use of Morse code communications. This is not the case and those who insist on saying it is, either don't know all the facts or have other motives for making their complaints and threats.

What follows is a summary history of RM-11306 provided by ARRL CEO Dave Sumner, K1ZZ. All the words are his with the exception of the lead-in sentence in the last paragraph.

In July 2002 the ARRL Board of Directors adopted the following policy: "At the next practical opportunity the ARRL shall petition the FCC to revise Part 97 to regulate sub-bands by signal bandwidth instead of by mode." The Board's objective was to update rules that were written long before the development of the current generation of digital modes so that digital emissions can be appropriately regulated in the future, while impacting traditional modes as little as possible.

Turning that statement of principle into a detailed petition proved to be no easy task. The Board received input from an ad hoc committee as well as staff, and twice solicited input directly from the ARRL membership. Hundreds of comments were received each time and helped inform the Board's discussions. Finally, at its July 2005 meeting the Board concluded its review of a draft petition and authorized its filing, following final review by the Executive Committee. The resulting petition was filed on November 14, 2005 and was designated RM-11306 by the FCC, after which additional comments were filed by individuals directly with the FCC.

Once the FCC had dealt with two outstanding proceedings, WT Dockets 04-140 and 05-235, we realized that the bandwidth petition was the next major Amateur Radio item in their hopper. On reviewing the RM-11306 petition, the comments, and the rules changes adopted in Dockets 04-140 and 05-235 it was apparent that some of the proposals contained in the petition had been affected by the changes adopted in the other two proceedings. It was also apparent that some aspects of the petition remained controversial.

After reviewing the situation at its January 2007 meeting, the ARRL Board authorized General Counsel Chris Imlay, W3KD to determine what

changes to the petition had to be made to align it with the new FCC rules, as well as which aspects of the petition were not controversial and could reasonably be expected to be included in an FCC Notice of Proposed Rule Making. Chris did so, and a meeting was held with FCC staff on February 13. As are all such meetings, this was made a matter of public record by the filing of a notice with the FCC Secretary that immediately became part of the on-line record in RM-11306.

The FCC staff was provided with a shortened list, or subset, of proposed rule changes from that contained in RM-11306. The list is included with the notice of the meeting. Because the proposals affecting the bands above 28 MHz had not aroused much controversy, they were retained in the shortened list. Regulation by bandwidth rather than by mode of emission remains controversial below 28 MHz because of perceived potential impact on established operating patterns, so these proposals were removed from the list with one narrow exception. The exception is necessary because, as discussed on page 11 of the RM-11306 petition, under the existing rules there is presently no effective bandwidth limit on HF digital operations. Digital emissions using multiple carriers, such as OFDM, can be designed for any bandwidth while staying within the existing rules. So, the subset of proposed rule changes given to the FCC on February 13 includes a bandwidth limit of 3 kHz on RTTY and data emissions below 28 MHz. It is important to understand that this does not increase the allowed bandwidth for RTTY and data emissions; it actually represents a new limitation that accommodates existing practice but prevents future monopolization of large segments of our narrow MF/HF bands by a single digital station. Also, the limit would not apply to phone emissions.

Some confusion has resulted from an item that, through oversight, was not deleted when the list of proposed rule changes was shortened. Because RM-11306 had proposed that bandwidths in most of the band segments now used for CW and RTTY be limited to 200 Hz and 500 Hz respectively, the existing 500-Hz bandwidth limit that applies to certain automatically controlled RTTY/data stations was redundant and could be dropped. However, because the subset of proposed rule changes does not substitute regulation by bandwidth for regulation by mode of emission, the 500-Hz limit needs to be retained. General Counsel Imlay has filed an erratum with a corrected list of proposed rule changes that makes it clear there should be no change to the existing Section 97.221. We regret the error.

Some amateurs have observed that the subset of proposed rule changes provides less protection to CW, RTTY and other narrowband modes than was afforded by the ARRL's proposals in RM-11306. This is true. However, it is not true that less protection is afforded than is the case with the existing rules. In fact, protection against interference from wide digital modes would be increased, not decreased, by adoption even of the subset.

The ARRL Board, having studied the situation literally for years, continues to support the principles of regulation by bandwidth that are contained in the original RM-11306 petition. Regulation by bandwidth provides a better regulatory framework, not only for the introduction of future digital emissions but for the protection of traditional narrowband modes as well. By providing the FCC with a subset of the modifications proposed in RM-11306 the ARRL has offered an alternative that, it is hoped, will make it easier for the FCC to move at least part of the way in that direction.

And for the truly paranoid or perhaps those who are not familiar with the FCC's table of authorized emissions in Part 97, here is specific information about the CW sub-band allocation. CW is not listed in the table of authorized emissions ONLY because it is covered by the blanket statement in 97.305(a): "(a) Except as specified elsewhere in this part, an amateur station may transmit a CW emission on any frequency authorized to the control operator." This isn't mentioned in RM-11306 or in the appendix to the ex parte statement because no change is proposed.

All Hams
Join us for coffee this Sat from 9AM-12PM

New This week
RG-8 .60 per Foot and RG-8X Coax Cable .35 per Foot
PL-259 Connectors and adadapters
BNC - SO-239 Connectors
Double Feamale Connectors $2
Laser pointers $2

I still need some more items for Sale. I need MORE Good stuff on consignment
Please bring me more this week.

New 2 Amp Power Supplies good to power Hand Held $12 More Power supplies on the Way
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals. Technician, General and Extra Class Study Manuals. FCC Part 97 book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications course Level 1 books $16 each

Other Used Equipment on Consignment

JOB 1002 SWR Power Meter from Wawasee Electronics $20
AB 300 Power Booster $20
B&W 550A 5 Coax switch box $10

M1000 Regency 10 Ch Scanner Works great $25
PRO-2038 Radio Shack 50 Ch Scanner Works Great $45 (Best Buy in Store)
75 meter Ham stick $15
Yaesu MP-1 Microphone $40
HF Antenna Mount for Reese Trailer Hitch with Ball $15
Comet CT-5 3/8 -24 antenna Mount $35
Allied A-2515 Short Wave Receiver $75
Ten-Tec Argosy HF radio $200
HF Tuner
HF SWR Meters
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition
Heathkit items From $5
Extra Speakers For Radios $3
Keychain LED lights $1.50 and up
Other items coming in Daily
For more information call me at 231 798-7898

Come in and Join us for FREE Coffee Each Saturday from 9AM-12PM

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools, industrial suppliers and Ham radios for sale.

2712. ARRL OFFERS ALTERNATE APPROACH TO "REGULATION BY BANDWIDTH

Yahoo group: WestMichiganHams (2006 — 2008)

Topic: 2712 Message: 2712

==>ARRL OFFERS ALTERNATE APPROACH TO "REGULATION BY BANDWIDTH"

In the wake of recent changes in the Part 97 Amateur Radio rules, the ARRL has revised its “regulation by bandwidth” proposals to match the new reality, avoid some unintended consequences and temper some of the controversy the original petition had aroused. In a November 2005 Petition for Rule Making (RM-11306 <http://www.arrl.org/announce/regulatory/rm-11306/RM-11306-asFiled.pdf>) <http://www.arrl.org/announce/regulatory/rm-11306/RM-11306-asFiled.pdf>, the League asked the FCC to establish a regulatory regime that would segment bands by necessary bandwidths ranging from 200 Hz to 100 kHz rather than by emission mode. The ARRL now is urging the FCC to adopt a "subset” of the rules <http://www.arrl.org/announce/regulatory/rm-11306/appendixA.html> <http://www.arrl.org/announce/regulatory/rm-11306/appendixA.html> contained in its original petition that largely affects only the amateur bands at 28 MHz and above.

“Because the proposals affecting the bands above 28 MHz had not aroused much controversy, they were retained in the shortened list,” ARRL CEO David Sumner, K1ZZ, explained this week. “Regulation by bandwidth rather than by mode of emission remains controversial below 28 MHz because of its perceived potential impact on established operating patterns, so these proposals were removed from the list with one narrow exception.”

That exception addresses the fact that current rules impose no effective bandwidth limit on HF digital operation. “Digital emissions using multiple carriers, such as OFDM [orthogonal frequency division multiplexing], can be designed for any bandwidth while staying within the existing rules,” Sumner points out, “so, the subset of proposed rule changes includes a bandwidth limit of 3 kHz on RTTY and data emissions below 28 MHz.”

The proposed 3 kHz RTTY/data bandwidth limit aims to avoid the possibility existing under the present rules that a single digital station could monopolize large MF and HF band segments. In an Erratum this week the ARRL also asked the FCC to retain the existing 500 Hz bandwidth limit that applies to certain automatically controlled RTTY/data stations under §97.221.

The ARRL proposal would amend the definition of “bandwidth” in §97.3(a)(8) to read: “For a given class of emission, the width of the frequency band which is sufficient to ensure the transmission of information at the rate and with the quality required under specified conditions.” The rule references the definition of “necessary bandwidth” appearing in Parts 2 and 97 of the FCC rules.

If the FCC adopts the League’s revised proposals, the 10, 6 and 2 meter amateur bands would be segmented into subbands allowing maximum emission bandwidths of 200 Hz, 500 Hz, 3.0 kHz (with an exception for double-sideband, full-carrier AM phone), 16 kHz or 100 kHz. Above 222 MHz, the entire emission must be within the allocated Amateur Radio band to comply with §97.307(d).

Sumner concedes that the subset of proposed rule changes in RM-11306 would provide less protection to CW, RTTY and other narrowband modes than the League’s original proposals afforded, but not less than the existing rules provide. “In fact, protection against interference from wideband digital modes would be increased, not decreased, even by adoption of the subset,” he contended.

Some confusion arose because of an inadvertent omission in the initial notice of a meeting on this subject between ARRL officials and FCC staff. This week's Erratum addressed that issue.

Additional consternation followed in the wake of a widely circulated, but erroneous, comment alleging "the complete absence of CW as a mode in the table of HF modes" the ARRL submitted. The ARRL has proposed no change to §97.305(a) of the rules, which authorizes CW on all amateur frequencies except on 60 meters.

The League has petitioned the FCC to permit CW and other modes on 60 meters, in addition to the presently permitted upper-sideband SSB.

After studying the topic several years, the ARRL Board of Directors continues to support the principles of regulation by bandwidth contained in the original RM-11306 petition.

“Regulation by bandwidth provides a better regulatory framework, not only for the introduction of future digital emissions but for the protection of traditional narrowband modes as well,” Sumner asserted this week. He expressed the hope that the subset of RM-11306 modifications offers an alternative that “will make it easier for the FCC to move at least part of the way in that direction.”

2713. ARRL SAYS KNOW YOUR PRIVILEGES! MISCONCEPTIONS ABOUND REGARDING TECH HF PRIVILEGES

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-24 04:57:19 UTC
From: Mark Thompson
Topic: 2713 Message: 2713

==>KNOW YOUR PRIVILEGES! MISCONCEPTIONS ABOUND REGARDING TECH HF PRIVILEGES

Some Technician licensees who gained new privileges February 23 remain unaware or uninformed as to what they may and may not do on the HF bands, says ARRL Regulatory Information Specialist Dan Henderson, N1ND. In addition to all Amateur Radio operating privileges above 50 MHz, Technicians who never passed a Morse code test now have CW privileges on certain segments of 80, 40 and 15 meters plus CW, RTTY, data and SSB privileges on certain segments of 10 meters. And that's it. "Know your privileges <http://www.arrl.org/FandES/field/regulations/bands.html>,"; Henderson advises all Amateur Radio licensees. He says some Technicians apparently believe their new HF phone privileges go far beyond what they really have.

"Technicians have no phone privileges on any HF band other than 10 meters, period!" Henderson emphasizes. "That's the bottom line. If you want to operate phone on the other HF bands, you'll have to upgrade to General or Amateur Extra class."

A lot of Technician licensees appear to have done just that, according to statistics compiled by Joe Speroni, AH0A <http://ah0a.org/FCC/Licenses.html>. So far in March, the number of General class licensees is up by more than 2700 over the February figure to 134,173, after hitting a 5-year low of just under 131,000 in January. The number of Technicians dropped by 4655 in the same period to 318,838. Speroni notes, however, that his mid-month figures tend to underestimate actual totals.

Most Technician license holders face a learning curve to take advantage of their new CW privileges on HF, but they no longer have to pass a Morse code examination. Technicians also may use their new HF privileges without having to apply for them first. No other license class automatically acquired additional privileges February 23. The "omnibus" rule changes effective last December 15 did not give Technician licensees without Morse code credit any additional privileges either.

Henderson further warns new Techs not to extrapolate additional phone privileges by misconstruing the FCC Part 97 rules to mean something they don't.

"Calls I've been getting lately indicate that some misinformed individuals believe Technicians may operate 'digital voice' on 80, 40 and 15, where they have only CW privileges," he says. "Not true. Digital voice is really digitized voice, and it's not permitted in non-phone band segments."

Henderson reiterates that Technicians do not have FM voice privileges on 10 meters -- or on any other HF band, for that matter.

The HF privileges all Technicians now have are equivalent to those that Novice licensees enjoy, Henderson notes. "This also means the 200 W maximum power limit still applies, regardless of where you operate in the HF bands," he says. Technicians may operate at up to the legal limit on VHF and UHF, however.

On 10 meters, Technician and Novice licensees have CW, RTTY and data privileges from 28.000 to 28.300 MHz, and CW and SSB privileges from 28.300 to 28.500 MHz. "We're sorry that the sunspots aren't favoring 10 meters at this point in the sunspot cycle, but they will in a few years," Henderson allowed.

In addition, Technicians and Novices have CW -- and only CW -- privileges on from 3.525 to 3.600 MHz on 80 meters, from 7.025 to 7.125 MHz on 40 meters and 21.025 to 21.200 MHz on 15 meters.

Henderson believes at least some of the confusion may have originated with a few brand-new or inexperienced Technician licensees who heard that the FCC deleted the Morse code requirement to obtain an Amateur Radio license, but paid little attention to the fine print.

"And we all know the devil's in the details," Henderson says. "Remember, the FCC requires you to know where you may and may not operate and with what modes. Stick to the privileges your license allows or risk hearing from the FCC."

2714. Mini-Swaps (Mini-Hamfest) returning to Grand Rapids Area

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-25 17:31:41 UTC
From: Jack Amelar
Topic: 2714 Message: 2714

START SPREADING THE NEWS!

Mini-Swaps coming back to the Grand Rapids area!

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to announce the summer 2007 series of Asphalt Adventure mini-hamfests.

First one STARTING SATURDAY, APRIL 14. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.

Here's the deal. The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings)
Location, just outside the new shack, 11435 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. Same location as the FLAT RIVER OUTREACH MINISTRIES
THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11435+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

What is a mini-swap? It?s a small version of a Hamfest. Not nearly the planning or advertising that goes into a full fledged Hamfest, you don?t have a variety of commercial vendors. But their cheep to put on and fun.

Advantages of a mini-swap at this location, besides being where the LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of other building traffic on main driveway, yet easily seen from the main driveway as well as Hwy M-21.
Just outside the windows of the LARC ham shack. If you need electricity, bring your own cord.

What's the catch? Sure we'd like to raise a couple bucks with this FUNdraiser, but we certainly don't have grandeurs of cleaning up either.
ADMISSION IS FREE.
Sellers are asked to contribute $10 per setup*. (Please read statement at bottom)
Considering the location, with no admission fee, lots of drive by traffic, potential shoppers from the Thrift Store, that's really a good deal.
Coffee, pop, and donuts available. Sellers get free coffee.

TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

Here's the summer 2007 schedule:

April 14, Saturday

May - since the second Saturday in May, the 12th, is also the same day as the 53rd River Bank Run, lots of hams needed for communications support, the LARC membership is being polled on the best course. The Saturday before is Cadillac Hamfest http://members.fortunecity.com/wexaukee/warc_hamfest.htm and Holland's mini-swap http://www.hollandarc.org/?page_id=30 . The Saturday following is Hamvention(c) http://www.hamvention.org/ . So the choices are have it anyway on the 12th, the following day Sunday the 13th (Thrift Store closed) or skip May altogether. The problem with skipping May is June is skipped because of IRA's Hamfestival. Stay tuned!

June - NO mini-swap, enjoy the IRA's Hamfestival at Hudsonville Fairgrounds, Saturday, June 2. http://www.w8hvg.org/IRAfest2k.htm

July 14, Saturday

August 11, Saturday

September - NO mini-swap, enjoy GRARA's GRAHamfest 2???7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

October 13, Saturday

*SETUP: We really don't want to get into fine details here. Your open trunk, with or without
your buddies = 1 Setup. Your open trunk next to your buddy's open trunk = 2 setups. Your van
with trailer with a bunch of tables = 1 Setup. You get the idea. If there's a disagreement on what constitutes a setup, you win. Can't get better than that.
WHAT TO SELL: In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that items offered for sale be radio-electronics and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items to dispose of, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is
a 501c3 organization.

Let's have fun, see you there.

2715. Monday Nights Holland VE testing

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-27 01:58:51 UTC
From: K8TB
Topic: 2715 Message: 2715

Once again the Holland Amateur Radio Club held a fine session of VE testing.
Under the guidance of head VE Jim KC8KE, there were a total of 7 VE's to test 9 people. A special note of thanks to Kim, N8KAL as he made his first appearance as a VE.

We now have 2 new Tech's, 3 new Generals and 4 new Extra's.

In what has to be a first for the Holland club, one person named Richard Harder, from Hudsonville, did something way cool. He took and passed in succession, his tech, his general, and his EXTRA! A most noteworthy achievement! The 7 member VE team immediately held an Ad hoc meeting and decided that the HARC will start a new award list, to be called the "Clean Sweep", in which a person, who was not licensed before, walks in and takes all three tests, and walks out with an Extra. It would be nice to see Richard invited to the next club meeting to be honored.

Congratulations also goes to Dave Posthuma, WD8PUO for heading up the tech/general class, and Don Stephans, KD8DAG who was his right hand man.

Once again, nice job by the students, the teachers and the VE's.

Tom Bosscher K8TB

Cadillac Amateur Radio and Computer Swap - Saturday May 5, 2007

8am to Noon at the Cadillac Junior High School

Details at http://members.fortunecity.com/wexaukee/warc_hamfest.htm

Cadillac is about 90 miles North of downtown Grand Rapids on US 131

2718. Anyone for Michigan QSO Party?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-27 21:54:37 UTC
From: Hank Greeb
Topic: 2718 Message: 2718

According to the statisticians who keep track of activity during the Michigan QSO party, there has been no fixed station operation from Allegan, Cass, or Montcalm counties - all in the lower peninsula and all in Western Michigan. I'm not sure of the clubs ham radio clubs which are in these counties, but I'd be willing to visit a meeting in early April to proselytize for activity in this fun event. While some folks make a real contest out of the event, most folks have a more casual approach .

This activity is scheduled for the third Saturday in April - this year Saturday, April 21, 2007. The contest period runs from 1200 EDST to 2400 EDST (16Z Saturday until 04Z Sunday UTC). SSB, & CW are allowed - on 80 thru 10 metres. For details and rules see http://www.miqp.org

Please consider joining in this fun event!
